Part II. Self-Assessment

The Town of North Reading has completed the required self-assessment and determined that our municipality is in compliance with all permit conditions. The Town is now in the process of completing a complete GPS survey of all drainage structures in the Town. Building upon the locational data collected in the previous “windshield survey” each structure is opened and inspected. Information collected includes cover condition, rim to invert depth, size and shape, material, condition, presence of debris or illicit connection, surcharge evidence, as well as size and material, and condition of connecting pipes.

The Town, along with Martins Pond Association volunteers has now installed ten (10) residential rain gardens. The North Reading Garden Club and the Friends of the North Reading Council on Aging designed and installed a rain garden to collect roof runoff from the Third Meeting House. On April 14, the DPW along with The Martins Pond Association held a neighborhood clean-up filling a 30 yard dumpster with trash and removed over 180 tires from wetlands, town woods and Martin’s Pond. They also held events throughout the year educating the public through library displays, in schools, demonstrations at the North Reading Apple Festival, and at the Lowell National Historic Park.

The Town is continuing its efforts to reduce sediments by conducting street sweeping on all streets, cleaning out all catchbasins and hiring a vector service to clean out all stormceptors each year.

The Town held two successful Hazardous Waste Days, the first on Jun 2, 2012 for propane tanks, tires, car batteries, and mercury thermometers, the second on September 15, 2012 for household chemicals and light bulbs.

The Town is continuing research into the installation of sanitary sewer in key areas of the Town. Several Town meetings have been held to review the findings of the Comprehensive Wastewater Management Plan, developed by Weston and Sampson, and community input on the possible installation of sanitary sewer in the town.

Part IV. Summary of Information Collected and Analyzed

A Town-wide survey of the drain system has begun and is nearly complete. This GIS Survey involves opening and inspecting all structures located in the previous “windshield survey” and collecting data including the material and condition of each structure and connecting pipes as well as any signs of an illicit discharge.
