Part II. Self-Assessment

The City of Peabody has completed the required self-assessment and has determined that our municipality is in compliance with all permit conditions.

Peabody has an extensive household hazardous waste program. Besides a once a year drop off, we collect waste oil, car batteries, propane tanks, computer monitors, refrigerators, televisions, computer units, air conditioners, and yard waste at all times throughout the year. From this program, we properly manage a number of toxic substances and enhance protection of stormwater quality. We also collect leaves curbside 6 weeks/year and provide drop off yard waste at all times throughout the year at no charge to the residents.

We sweep streets in the spring to remove sediment improving runoff water quality. This winter the City had only 14 sanding/salt operations, having less sand on the City roads means less stormwater sediment in our MS4 system. This past year the City cleaned approximately 822 catch basins to ensure water quality is met. In addition, we vacuumed and flushed all major drain lines in the downtown area, Main St corridor and sections of South and West Peabody.

We also have minimized or eliminated the generation of hazardous waste at our DPW facilities to eliminate environmental impacts. Our vehicles are stored inside and are highly maintained, reducing leaks of fuel, hydraulic fluids, and other maintenance related toxic materials.

The Friends of Peabody's Lakes are locally meeting in order to focus on all Peabody water bodies in educating the public and improving water quality/recreational opportunities for Peabody's water ways. This group also conducts local sampling and shoreline clean ups throughout the year.
