Part II. Self-Assessment

The facility of Tewksbury Hospital has completed the required self assessment and has determined that it is in compliance with all permit conditions. Please note that this is a State-owned and operated campus facility and not a municipality.

Part III. Summary of Minimum Control Measures

1. Public Education and Outreach

BMP ID #	BMP Description	Responsible Dept./Person Name	Measurable Goal(s)	Progress on Goal(s) – Permit Year 10 (Reliance on non-municipal partners indicated, if any)	Planned Activities
Revised	Identify all groups using facility for targeting info and notices	Facilities management and human resources	List of groups with contact information	This list was completed in 2004 and will be revised on a yearly basis. Copies of the list are kept on site. The contact information has been used to distribute information on the Tewksbury Hospital Storm-water program and other environmental items.	This list will be updated yearly and will be used as needed.
Revised	Integrate education and good housekeeping into orientation and yearly training	Facilities management and human resources	All new staff to get storm-water materials with required training; records to be kept with other training record in personnel file	Initial training of all maintenance and grounds-keeping staff has been conducted using a video presentation and handouts. Records with the name and date of training for these staff are being kept in the facilities management office and by the compliance officer.	Springtime “refreshers” will be conducted each year and records kept to record attendees.
Revised	Brochure development and distribution	Facilities management and Human Resources	An educational brochure designed and distributed to staff and visiting groups.	Tewksbury Hospital has used a brochure developed by EPA and the Weather Channel to distribute to staff and others at the hospital, including the various programs described in B1-2 above. The brochures contain contact information to enable people to contact the facilities department as well as access the EPA website on storm-water.	These brochures will be made available to staff, patients and visitors at the hospital

1a. Additions

(none)

2. Public Involvement and Participation

BMP ID #	BMP Description	Responsible Dept./Person Name	Measurable Goal(s)	Progress on Goal(s) – Permit Year 10 (Reliance on non-municipal partners indicated, if any)	Planned Activities
Revised	Compile list of existing related activities on campus each year	Facilities management and human resources	List of activities with organization name and contact	Tewksbury Hospital is undergoing some significant reorganization, and the completion of this list was delayed until permit year 2. (See also BMP B1-2 as these items are related). This list was completed in summer of 2004	This list will be updated in January of each year afterward.
Revised	Coordinate with town of Tewksbury	Compliance Officer and Facilities Management	Telephone meetings between Compliance Officer and Engineering Staff at the Town office.	Tewksbury has allowed us to read their storm-water management plan. They have no current need for face-to-face coordination with Tewksbury Hospital. As Tewksbury Hospital is a small portion of the town's land and much of the hospital's land is open space, they may not feel we have a significant enough impact to make coordination necessary.	DPH will continue to approach the town regarding storm-water issues.
Revised	Catch basin map publication	Facilities Department	Distribute map showing location of drainage and catch basins.	A map of the catch basins has been developed and is available for facility staff. Locations of all storm drains have been marked using GPS systems.	A more detailed and user-friendly map will be completed when staff time and facility money permit.
Revised	Publicize existing watershed groups	Facilities department and compliance officer	Information on the local watershed groups will be made available in locations around campus for staff and visitors	Information on the Shawshen River Watershed Association is posted in the main hospital building. This organization has a website to which interested parties are directed.	Additional information will be solicited from the SRWA as needed.

2a. Additions

As a part of B2-3 above, GPS equipment was used to map the locations of storm drains, outfalls and other areas of interest and

incorporated in a computerized storm sewer system map. This information will be used in the future when needed.

3. Illicit Discharge Detection and Elimination

BMP ID #	BMP Description	Responsible Dept./Person Name	Measurable Goal(s)	Progress on Goal(s) – Permit Year 10 (Reliance on non-municipal partners indicated, if any)	Planned Activities
Revised	Compile maps and other info on existing stormwater system	Facilities Management	Maps in both large format and standard handout size	A map of the catch basins has been developed and is available for facility staff (this is the same BMP as B2-3 above)	See above under B2-3.
Revised	Develop written SOP and work practices for stormwater management	Facilities management and Human Resources	One or more written SOPs	This SOP was completed and made a part of the facility management handbook at the facility. The policy includes information for grounds-keeping, facility maintenance and vehicle maintenance staff. It includes information on recordkeeping and when an individual storm-water permit for construction may be needed.	This SOP is a part of the facility's operating procedures and will be used from now on. The policy will only be rewritten if needed based on changes in facility operations.
Revised	Survey of campus buildings for illegal connections	Facilities management	All buildings surveyed	Locations where there are potential interconnections have been identified. TH is working on finding a funding source to investigate these locations in detail and make any repairs needed.	This item is ongoing when money is available.
Revised					
Revised					
Revised					

3a. Additions

Tewksbury Hospital has contracted with a company (Flow Assessment Services LLC) to do an Inflow and Infiltration study at

the Campus. This study is currently in progress.

4. Construction Site Stormwater Runoff Control

BMP ID #	BMP Description	Responsible Dept./Person Name	Measurable Goal(s)	Progress on Goal(s) – Permit Year 10 (Reliance on non-municipal partners indicated, if any)	Planned Activities
Revised	Work with DCAM to develop contract language for new construction	Compliance Officer	Review and revision to existing SOPS and new contract language as needed to ensure storm-water procedures are followed during construction	Any large projects requiring storm-water controls at Tewksbury Hospital are typically carried out under DCAM project management. Compliance officer has reviewed current DCAM standards and has requested information on ongoing changes from DCAM.	Coordination with DCAM will continue throughout all permit years. This will also include potential work associated with hazardous waste site cleanup activities at the facility.
Revised	Develop/implement training for employees who oversee construction	Human Resources and facilities management	Portion of training program for relevant staff.	General training of facility management employees, including those who oversee construction, on storm-water principles. A list of trained employees is kept in the facility director's office. (see also B1-3 as these are the same group of employees)	Springtime "refreshers" will be conducted each year and records kept to record attendees. Storm-water issues will be a part of any kickoff meetings for relevant construction projects.

4a. Additions

(none)

5. Post-Construction Stormwater Management in New Development and Redevelopment

BMP ID #	BMP Description	Responsible Dept./Person Name	Measurable Goal(s)	Progress on Goal(s) – Permit Year 10 (Reliance on non-municipal partners indicated, if any)	Planned Activities
Revised	Codify maintenance of storm drains	Compliance Officer and Facilities management	Written SOPs or other methods (such as automated maintenance system use)	Storm drains are a part of the regular facility maintenance procedures.	The facility waste disposal contract and includes regular storm drain cleaning and maintenance in the scope of the contract.

5a. Additions

(none)

6. Pollution Prevention and Good Housekeeping in Municipal Operations

BMP ID #	BMP Description	Responsible Dept./Person Name	Measurable Goal(s)	Progress on Goal(s) – Permit Year 10 (Reliance on non-municipal partners indicated, if any)	Planned Activities
Revised	Discussion with town of Tewksbury on potential to adopt some town BMPs	Compliance officer	Meetings and review of documents	See information on town coordination in BMP 2-4 above.	See information on town coordination in BMP 2-4 above.
Revised	Review all relevant statewide and facility contracts for appropriate storm-water-related language	Facilities management and compliance officer	All contracts, etc., will be reviewed with changes made as applicable	This information has been incorporated into relevant contracts with programs.	This BMP will have ongoing maintenance of contracts new and existing.
Revised	Work with on-site farmers on good practices related to storm-water	Facilities management	New work procedures as needed to control impacts	All new contracts have been negotiated with the agricultural users of the facility. These contracts include information and requirements	Contract renewals occur every year for this land use and the farmers will be kept to the terms of the agreements.

Revised			New binding contracts directly between the farmers and the facility specifying practices to be followed to prevent storm-water contamination	consistent with good storm-water practices and reporting of activities including those pertinent to good land stewardship. Any breach of these terms can be cause for termination of the contract.	
	Refine procedures to dispose of animal and horse waste from site	Facilities management	New work procedures to target these materials and prevent storm-water contamination Binding contracts between the facility and the operator specifying practices to be followed to prevent storm-water contamination	All new contracts have been negotiated with the operators of the horse operations on the site and signed. These contracts include information and requirements consistent with good storm-water practices and reporting of activities including those pertinent to good land stewardship. Any breach of these terms can be cause for termination of the contract.	Regular monitoring of the terms of the contract is ongoing during the year.
Revised					
	Review relevant facility SOPs	Facilities management	All facility work practices will be reviewed and changes	This item has commenced. The facility management department has a handbook of SOPs which is being reviewed for relevance to storm-water activities. The new SOP developed for item B3-2 has been added to this book as well.	This BMP will be subject to ongoing monitoring.
Revised					

6a. Additions

B6-5: The facility has revised its practices for movement of snow removed from roads and parking lots. The facility staff and Compliance Officer located areas on the property where excess snow can be placed to melt when snowfall totals are high. This area is be outside of the watershed protection boundary and located away from stormdrains, surface water and wetlands to prevent the runoff of any contamination present in the snow. These locations are made a part of the facility operating practices when necessary during a heavy snowfall. The effectiveness of the new snow storage locations is reviewed after each season.

7. BMPs for Meeting Total Maximum Daily Load (TMDL) Waste Load Allocations (WLA) <<if applicable>>
TMDL issues exist for the Shawsheen River. Specific BMPs above which will have the most potential benefit on the river are B1-1, B1-2, B1-5, B2-4 and all BMPs under section 3 “illicit discharge detection and elimination”. “Good Housekeeping” items B6-4 and B6-5 may also reduce pathogen loads to the waterways which connect to the Shawsheen.

7a. Additions

(None)

7b. WLA Assessment

None performed by Tewksbury Hospital; this is not anticipated to be part of our strategy.

Part IV. Summary of Information Collected and Analyzed

Tewksbury Hospital does not have water quality data and does not intend to collect any under this permit

Part IV. Summary of Information Collected and Analyzed

Since Tewksbury Hospital is not a municipality, many of these criteria do not apply. Relevant information on these outputs is contained in the tables above.

Part V. Program Outputs & Accomplishments (OPTIONAL)

(Since beginning of permit coverage unless specified otherwise by a **, which indicates response is for period covering April 1, 2012 through March 31, 2013)
