Part II. Self-Assessment

The previous self assessments completed by Jon Graves indicated that the Fernald Center is in compliance with all permit conditions. Programs have been ongoing with remaining staff. Fernald has been selected by DDS for closure and remains in active closure status during this period. Jon Graves left employment at Fernald in October, 2008. Paul Bermingham has assumed Jon Graves's duties. As of April 20, 2011 the Fernald census is at 16 developmentally disabled individuals living at Fernald. The Marquardt Nursing Center is also located on the Fernald campus and has a census of 29. The 200 acre campus is being shut down except for the Marquardt Nursing Center which is currently under renovation to be a stand alone building.

As of May 1, 2014, Fernald continues in active closure status. The Fernald census is at 6 developmentally disabled individuals living at Fernald. The Marquardt Nursing Center remains open with a census of 29. DDS still plans to operate the Marquardt Nursing Center after Fernald is shut down.

Fernald continues to work with other agencies on the Fernald shutdown. The Commonwealth Division of Capital Asset Management, (DCAM) and its contractors are working with the City Of Waltham on issues related to the connection to a new water line in Trapelo Road. This new water line will allow the Commonwealth to discontinue use of the current Water Tower and pumping system at the Fernald Power Plant, which is antiquated. Eventually, the Power Plant will be shut down and the oil tanks removed pursuant to Phase 1 of the Fernald Closure Plan.

Additionally, DCAM and its contractors are working to assess the Fernald water and sewage systems in order to determine if there are any issues that need to be addressed prior to connection to the City of Waltham's new water line in Trapelo Road.

On April 25, 2014, the Fernald Power Plant boiler failed to operate. State Power Plant staff and two vendors were unable to get the boiler to restart. On April 28, 2014, DCAM, EHS and DDS decided not to continue efforts to restart the Power Plant boiler. The Fernald residential buildings and the Marquardt Nursing center are not dependent on the Power Plant for heat and hot water. A temporary boiler will be brought in by DCAM to heat up the remaining #6 oil in the two underground storage tanks (UST) at the Power Plant. It is estimated that there are 36,000 gallons of #6 oil in the two UST's.

Part III. Summary of Minimum Control Measures
