RE: NPDES Stormwater Phase II Permit
Annual Report Permit Year Twelve
Wakefield, Massachusetts

Dear Sir or Madam:

The Town of Wakefield, Massachusetts is pleased to submit this Annual Report covering Permit Year Twelve (May 1, 2014 through April 30, 2015.) This submittal is in accordance with the Environmental Protection Agency's (EPA) National Pollutant Discharge Elimination System (NPDES) Stormwater Phase II Regulations and the Massachusetts DEP requirements.

The format of this report follows the Section F listing of information items under Part II Massachusetts Small MS4 Storm Water Management Program. See the Table of Contents following this cover letter for identification of each report section.

In summary, the Town of Wakefield has met compliance with the Town's permit application submittal dated July 28, 2003.

The only permit component that was changed was the Adopt-A-Stream Program. In lieu of this program, the Department of Public Works (DPW) implemented a stream-cleaning program, starting in the spring of 2007.

It should also be noted, that in 2014 into 2015 during permit year twelve, the Town engineering consultant continued to perform a drainage study of the Town. The study, which will include a drainage model of the Town's drainage system components, will hopefully result in changes to the existing drain system being recommended and

implemented which will in turn reduce the degree of flooding that occurs, thus reducing the potential uptake and wash off of pollutants and other materials to the receiving waters.

During this permit year the Lake Quannapowitt Committee formed in early 2014 continued compiling and reviewing available information on the lake and its watershed, in particular causes or blue-green algae blooms. Evaluating watershed land use and control measures (including green infrastructure and other measures) to reduce pollutant loadings to the lake (phosphorous being one of the primary pollutants of concern); and in-lake approaches to enhance water quality and eliminate blue-green algae blooms. It is planned that the eventual completion of the committees' work will provide recommendations for the purpose of developing and implementing a plan that will preserve this valuable resource for future generations.

In addition to the permit activities, we corresponded with the Massachusetts Historical Commission (MHC) and National Heritage and Endangered Species Program (NHESP) to ensure that the guidance provided in the Addendum A and B of the NPDES Stormwater Permit is followed. **Correspondence has been received from both MHC and NHESP that verifies that we have no active projects at this time that will require their review and certification.** Their correspondence goes further to provide guidance on what type of projects would require their review and certification, and the process for submitting a proposed project for review.

If you have any questions or comments, please contact me at 781-246-6301.

Very truly yours,

Richard F Stinson

EXECUTIVE SUMMARY

During the Permit Year Twelve (May 1, 2014 through April 30, 2015) the Town of Wakefield complied with the Town's permit application submittal dated July 28, 2003. The overall five-year permit planned permit program is presented on the charts following this page.

During Permit Year Twelve, work activities occurred for each of the six planned Best Management Practices, primarily as an extension of the permit year five activities. The details of work activity conducted for each BMP are presented in Section I of this report.

We do not recommend as of this date, that the identified BMP's or measurable goals be changed with the exception of the Adopt-A-Stream Program, which has been changed to a Department of Public Works Annual Stream Cleaning Program.

The formation of the Lake Quannapowitt Committee with the Town Engineer serving as Chairman has helped local officials better understand water quality impacts and their causes; and approaches to mitigating or eliminating the sources of these impacts.

SECTION I.

SELF-ASSESSMENT OF COMPLIANCE WITH THE PERMIT CONDITIONS.

The purpose of this section is to perform a self-assessment of the work undertaken during Permit Year Twelve (May 1, 2014 through April 30, 2015) in terms of compliance with permit conditions.

The chart presented on the following pages presents an identification of each of the activities scheduled under each BMP, the scheduling of work within Permit Year Twelve and a Self-Assessment of Compliance with Permit Conditions.

SECTION II.

ASSESSMENT OF THE APPROPRIATENESS OF THE SELECTED BMP'S.

The selected items of work as included in the NPDES permit application for each of the BMP's were derived from an extensive review by the Department of Public Works and the NPDES Phase II Committee during the period prior to the July 30, 2003 permit submittal.

During the Permit Year Twelve (May 1, 2014 through April 30, 2015) the Town of Wakefield did identify that all of the pre-planned work items including the Department of Public Works Annual Stream Cleaning Program (implemented in lieu of the Adopt-A-Stream Program) will provide benefit to the Town.

SECTION III.

ASSESSMENT OF PROGRESS TOWARDS ACHIEVING MEASURABLE GOALS.

This section presents an assessment of progress toward achieving the permit related measurable goals from work performed during NPDES Permit Year Twelve (May 1, 2014 through April 30, 2015.)

SECTION IV.

SUMMARY INFORMATION COLLECTED AND ANALYZED. (INCLUDING DATA)

This section illustrates how the Town of Wakefield has catalogued all the information and material that was collected during the first twelve Permit Years (through April 30, 2015) related to the NPDES Phase II Stormwater Regulations.

Information and material shall be continually gathered and logged into the spreadsheet shown on the following pages, and filed in the NPDES Phase II Stormwater library at Town Hall. An area at the Wakefield Town Hall is reserved for the Municipal Stormwater Management Library consisting of reports, technical data, forms, workbooks, guidelines, fact sheets, instructions, product specifications, pamphlets, posters, articles, lists, manuals, maps, letters, memos, emails, magazines, videos, compact discs, seminar material, miscellaneous notes and information. Each item is categorized under an appropriate BMP for ease of reference throughout the permit process.

SECTION V

ONGOING ACTIVITIES

As there has not yet been, a permit submittal required to define the BMP work items for the future, the Town will be continuing the items listed below which we believe will provide the most benefit to the Town's stormwater management program.

- Public education (Press releases, Articles for Newsletters, Additional Fact Sheets, Public Participation at Community Events, Stormwater Forum, Lake Quannapowitt Committee, etc.)
- Cleanup activities (FOLQ Lake Quannapowitt Cleanup, DPW Stream Cleaning Program, Hazardous Waste Collection Days)
- Continuation of Sweeping, Catch basin and Stream Cleaning Programs. Also, continuation of the good housekeeping programs adopted in the first 5-year permit.
- Additional training of municipal staff
- Continuation of our stormwater drainage system investigations and mapping program and monitoring for illicit discharges

SECTION VI.

CHANGES IN IDENTIFIED BMP'S OR MEASURABLE GOALS

At the time of preparing this annual report for May 1, 2014 through April 30, 2015 we have identified that all of the pre-planned work items, including one change which is the Department of Public Works Annual Stream Cleaning Program (implemented in lieu of the Adopt-A-Stream Program), have provided implementation of the planned Best Management Practices and achieving Measurable Goals as identified in the Town's permit application submittal dated July 28, 2003.

SECTION VII

RELIANCE ON ANOTHER ENTITY FOR ACHIEVING ANY MEASURABLE GOAL.

The Town's water bodies do receive stormwater flows from the following entities, upon which the Town relies on the quality of their stormwater discharges in achieving any measurable goal:

1. Massachusetts Highway Department:

Route 95/128, which crosses, through the northern end of Town, from Stoneham to Lynnfield. Most of the drainage system for this interstate-highway as it passes through Wakefield appears to be designed to intercept stormwater runoff from the highway and ultimately discharge to the north side of the highway to the Walker's Brook in Reading, MA and downstream Reading Drainage Canal which discharges to the Saugus River near Vernon Street downstream of the outlet from Lake Quannapowitt. The only exception to this is a reach of the highway between North Avenue and Parker Road where the northbound half of the highway drainage discharges to a wetlands area upstream of Lake Quannapowitt.

2. Massachusetts Department of Conservation and Recreation:

Breakheart Reservation located along the eastern boundary of Wakefield, of which a portion drains to the Mill and Saugus Rivers in Wakefield.

3. Regional School:

Northeast Regional Vocation School (code #853) serving 12-communities, is located along the eastern boundary of Wakefield, also abutting the Breakheart Reservation, which drains to the Mill and Saugus Rivers in Wakefield.

4. Commonwealth of Massachusetts:

Camp Curtis Guild, Massachusetts Army National Guard located at the northern boundary of Wakefield, of which a small portion may drain to the Saugus River.

5. United States Government:

United States Military Reservation, Tarrant Lane military housing located in the northwest corner of Wakefield, of which the stormwater from this area drains to the Walker's Brook in Reading, MA and downstream Reading Drainage Canal which discharges to the Saugus River near Vernon Street downstream of the outlet from Lake Quannapowitt. This land is being auctioned off, last we heard, by the United States Coast Guard which has custody of the property for the government.

6. Surrounding Communities:

The Town of Wakefield has a number of abutting municipalities, which share Wakefield's municipal boundary. Along these boundaries, there are some watershed areas that may flow from one community to the other. These municipalities include: Lynnfield, Melrose, Reading, Saugus and Stoneham.
