RE: NPDES Stormwater Phase II Permit  
Annual Report Permit Year Thirteen  
Wakefield, Massachusetts

Dear Sir or Madam:

The Town of Wakefield, Massachusetts is pleased to submit this Annual Report covering Permit Year Thirteen (May 1, 2015 through April 30, 2016.) This submittal is in accordance with the Environmental Protection Agency's (EPA) National Pollutant Discharge Elimination System (NPDES) Stormwater Phase II Regulations and the Massachusetts DEP requirements.

The format of this report follows the Section F listing of information items under Part II Massachusetts Small MS4 Storm Water Management Program. See the Table of Contents following this cover letter for identification of each report section.

In summary, the Town of Wakefield has met compliance with the Town's permit application submittal dated July 28, 2003.

The only permit component that was changed was the Adopt-A-Stream Program. In lieu of this program, the Department of Public Works (DPW) implemented a stream-cleaning program, starting in the spring of 2007.

It should also be noted, that in 2015 into 2016 during permit year thirteen, the Town engineering consultant completed and submitted a draft of a drainage study of the Town. The study, includes a drainage model of the Town's drainage system components, recommended changes to the existing drain system and downstream receiving channels,

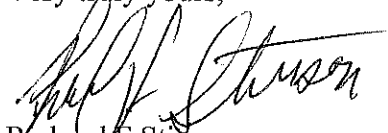

streams and rivers along with implementation priorities; estimated design, permitting and construction costs; which will in turn reduce the frequency and degree of flooding that occurs, thus reducing the potential uptake and wash off of pollutants and other materials to the receiving waters.

During this permit year the Town committee continued to review various watershed and in-lake technologies and approaches for the Lake Quannapowitt water body for the purpose of developing and implementing a plan that will preserve this valuable resource for future generations. A Town committee vote was performed during this permit year to identify to the Town the optimal technologies and approaches which in combination are predicted to work toward achieving the lake water quality goals.

In addition to the permit activities, we corresponded with the Massachusetts Historical Commission (MHC) and National Heritage and Endangered Species Program (NHESP) to ensure that the guidance provided in the Addendum A and B of the NPDES Stormwater Permit is followed. **Correspondence has been received from both MHC and NHESP that verifies that we have no active projects at this time that will require their review and certification.** Their correspondence goes further to provide guidance on what type of projects would require their review and certification, and the process for submitting a proposed project for review.

If you have any questions or comments, please contact me at 781-246-6301.

Very truly yours,

Richard F. Stinson  
Director of Public Works

## EXECUTIVE SUMMARY

During the Permit Year Thirteen (May 1, 2015 through April 30, 2016) the Town of Wakefield complied with the Town's permit application submittal dated July 28, 2003. The overall five-year permit planned permit program is presented on the charts following this page.

During Permit Year Thirteen, work activities occurred for each of the six planned Best Management Practices, primarily as an extension of the permit year five activities. The details of work activity conducted for each BMP are presented in Section I of this report.

We do not recommend as of this date, that the identified BMP's or measurable goals be changed with the exception of the Adopt-A-Stream Program, which has been changed to a Department of Public Works Annual Stream Cleaning Program.

## SECTION I.

### SELF-ASSESSMENT OF COMPLIANCE WITH THE PERMIT CONDITIONS.

The purpose of this section is to perform a self-assessment of the work undertaken during Permit Year Thirteen (May 1, 2015 through April 30, 2016) in terms of compliance with permit conditions.

The chart presented on the following pages presents an identification of each of the activities scheduled under each BMP, the scheduling of work within Permit Year Thirteen and a Self-Assessment of Compliance with Permit Conditions.

WAKEFIELD, MA NPDES STORMWATER PHASE II PERMIT

ANNUAL REPORT COVERING MAY 2015 through APRIL 2016

## SECTION II.

### ASSESSMENT OF THE APPROPRIATENESS OF THE SELECTED BMP'S.

The selected items of work as included in the NPDES permit application for each of the BMP's were derived from an extensive review by the Department of Public Works and the NPDES Phase II Committee during the period prior to the July 30, 2003 permit submittal.

During the Permit Year Thirteen (May 1, 2015 through April 30, 2016) the Town of Wakefield did identify that all of the pre-planned work items including the Department of Public Works Annual Stream Cleaning Program (implemented in lieu of the Adopt-A-Stream Program) will provide benefit to the Town.

### SECTION III.

#### ASSESSMENT OF PROGRESS TOWARDS ACHIEVING MEASURABLE GOALS.

This section presents an assessment of progress toward achieving the permit related measurable goals from work performed during NPDES Permit Year Thirteen (May 1, 2015 through April 30, 2016.)

## SECTION IV.

### SUMMARY INFORMATION COLLECTED AND ANALYZED. (INCLUDING DATA)

This section illustrates how the Town of Wakefield has catalogued all the information and material that was collected during the first thirteen Permit Years (through April 30, 2016) related to the NPDES Phase II Stormwater Regulations.

Information and material shall be continually gathered and logged into the spreadsheet shown on the following pages, and filed in the NPDES Phase II Stormwater library at Town Hall. An area at the Wakefield Town Hall is reserved for the Municipal Stormwater Management Library consisting of reports, technical data, forms, workbooks, guidelines, fact sheets, instructions, product specifications, pamphlets, posters, articles, lists, manuals, maps, letters, memos, emails, magazines, videos, compact discs, seminar material, miscellaneous notes and information. Each item is categorized under an appropriate BMP for ease of reference throughout the permit process.

| 80 | Rinker Materials: Product and Technical Information for Stormceptor           |  | Rinker Materials               | The Stormceptor is a stormwater separator the efficiently removes sediment and hydrocarbons from stormwater run-off, and stores the pollutant for safe and easy removal. The versatile Stormceptor product line consists of In-Line, Inlet, Series and Submerged designs. Unit sizes range from the 450 gallon Inlet Stormceptor to the 16,000 gallon Series Stormceptor. | 3 Ring Binder and CD | <a href="http://www.rinkerstormceptor.com">www.rinkerstormceptor.com</a>   | 8/1/2003  |               |        |        |        | 5.1    |        |
| 81 | Product Design Manual   |  | Stormwater Management Inc.     | Stormwater Management is the leading provider of innovative, long-term, stormwater treatment products the help engineers, develops, contractors, and jurisdictional authorities keep our waterways clean.   | 3 Ring Binder        | <a href="http://www.stormwaterinc.com">www.stormwaterinc.com</a>   | 4/1/2002  |               |        |        |        | 5.1    |        |
| 82 | The Infiltrator Chamber Systems: Technical Manual                             |  | Infiltrator Systems Inc.       | The engineer can use units combined with stone for shallow or deep systems that meet any requirement for storage and treatment, require no heavy equipment except a backhoe for installation, and are highly cost effective.  | 3 Ring Binder        |  | 1/1/1994  |               |        |        |        | 5.1    |        |

## SECTION V

### ONGOING ACTIVITIES

As there has not yet been, a permit submittal required to define the BMP work items for the future, the Town will be continuing the items listed below which we believe will provide the most benefit to the Town's stormwater management program.

- Public education (Press releases, Articles for Newsletters, Additional Fact Sheets, Public Participation at Community Events, Stormwater Forum, NPDES Committee meeting, etc.)
- Cleanup activities (FOLQ Lake Quannapowitt Cleanup, DPW Stream Cleaning Program, Hazardous Waste Collection Days)
- Continuation of Sweeping, Catch basin and Stream Cleaning Programs. Also, continuation of the good housekeeping programs adopted in the first 5-year permit.
- Additional training of municipal staff
- Continuation of our stormwater drainage system investigations and mapping program and monitoring for illicit discharges

## SECTION VI.

### CHANGES IN IDENTIFIED BMP'S OR MEASURABLE GOALS

At the time of preparing this annual report for May 1, 2015 through April 30, 2016 we have identified that all of the pre-planned work items, including one change which is the Department of Public Works Annual Stream Cleaning Program (implemented in lieu of the Adopt-A-Stream Program), have provided implementation of the planned Best Management Practices and achieving Measurable Goals as identified in the Town's permit application submittal dated July 28, 2003.

## SECTION VII

### RELIANCE ON ANOTHER ENTITY FOR ACHIEVING ANY MEASURABLE GOAL.

The Town's water bodies do receive stormwater flows from the following entities, upon which the Town relies on the quality of their stormwater discharges in achieving any measurable goal:

1. Massachusetts Highway Department:

Route 95/128, which crosses, through the northern end of Town, from Stoneham to Lynnfield. Most of the drainage system for this interstate-highway as it passes through Wakefield appears to be designed to intercept stormwater runoff from the highway and ultimately discharge to the north side of the highway to the Walker's Brook in Reading, MA and downstream Reading Drainage Canal which discharges to the Saugus River near Vernon Street downstream of the outlet from Lake Quannapowitt. The only exception to this is a reach of the highway between North Avenue and Parker Road where the northbound half of the highway drainage discharges to a wetlands area upstream of Lake Quannapowitt.

2. Massachusetts Department of Conservation and Recreation:

Breakheart Reservation located along the eastern boundary of Wakefield, of which a portion drains to the Mill and Saugus Rivers in Wakefield.

3. Regional School:

Northeast Regional Vocation School (code #853) serving 12-communities, is located along the eastern boundary of Wakefield, also abutting the Breakheart Reservation, which drains to the Mill and Saugus Rivers in Wakefield.

4. Commonwealth of Massachusetts:

Camp Curtis Guild, Massachusetts Army National Guard located at the northern boundary of Wakefield, of which a small portion may drain to the Saugus River.

5. United States Government:

United States Military Reservation, Tarrant Lane military housing located in the northwest corner of Wakefield, of which the stormwater from this area drains to the Walker's Brook in Reading, MA and downstream Reading Drainage Canal which discharges to the Saugus River near Vernon Street downstream of the outlet from Lake Quannapowitt.

6. Surrounding Communities:

The Town of Wakefield has a number of abutting municipalities, which share Wakefield's municipal boundary. Along these boundaries, there are some watershed areas that may flow from one community to the other. These municipalities include: Lynnfield, Melrose, Reading, Saugus and Stoneham.
