### Part IV. Summary of Information Collected and Analyzed

The Westport Water Resources Management Committee was established by the Board of Selectmen to combine the Water & Sewer Committee, the Ponds Committee, the Stormwater Committee and the Estuaries Committee to work towards consensus on water issues affecting the Town to include drinking water, fresh water, stormwater, nitrogen management and infrastructure options. The Committee consists of nine members, one representative from each of the five voting districts and one representative from the following: the Conservation Commission, the Board of Health, the Highway Department and the Westport River Watershed Alliance.

In FY (June) 2017, the Water Resource Management Committee had two primary focus areas: drafting a denitrification septic system regulation and preparing to file the notice of intent (NOI) on meeting new FY 2018 MS4 requirement. As for the former, we have in April the regulation in draft form that is circulating among the appropriate committees and organizations in Town for comments. As for the MS4 NOI, we have moved its preparation from the Highway Department to the Office of the Assistant Town Administrator to insure a more timely and professional completion. In addition, we have relied upon the guidance of Fred Civian, Mass. DEP's Stormwater Coordinator, on a couple of occasions and will continue to do so. Also, we have worked closely with the Planning Board to co-sponsor an Illicit Stormwater Discharge Bylaw for our 2017 Annual Town Meeting, which meets the requirements of one of the six focus areas of the new MS4.

Other issues we have dealt with in the current fiscal year include the following: worked with the Planning Board to focus the efforts of the new Assistant Town Administrator on water issues; reviewed the "Waste, Wastewater, and Stormwater" chapter of our new Master Plan; discussed the Westport River Nitrogen TMDL issue on many occasions; visited the Director of the Alternative Septic System Test Center on Cape Cod; received a new water and sewer offer from the City of Fall River's utility department; and listened to a presentation by the Buzzards Bay Coalition on a new, carbon-layer, nitrogen-removal septic system technology.
