Part II. Self-Assessment

In November of 2003, the Town of Hooksett contracted with Dufresne-Henry (now Stantec Consulting Services) to develop a Stormwater Management Plan for the Town in developing a Stormwater Management Plan. Since 2003, the Town has continued to budget work for the Stormwater Management Plan. In 2007, the Town was defeated at the voting polls. As a result, the Town uses current funds, if available. The Town is currently working with Stantec Consulting Services (Stantec) to move this process forward. In 2007, the Town has a stormwater ordinance that was to be adopted in July of 2008 by the Hooksett Town Council. Because the Town Administrator did not present this ordinance to the Council, it is recommended that it be adopted, by the Council, in 2009. In addition, Stantec has developed town-wide stormwater base maps. The Town budgeted funds for the development of the base maps, the collection of information and for GPS surveying a portion (1/3) of the Town's storm water system. Stantec has completed the development of the base maps and has provided the Town with the maps and data for approximately 1/3 of the Town's stormwater system. The Town has budgeted additional funds for the next 1/3 of the Town's stormwater system during the 2009/2010 fiscal year. The Town has also budgeted funds for coverage.
