

GET THE NEWS!

Massachusetts Stormwater News is a collaborative effort of the Massachusetts Department of Environmental Protection (MassDEP) and the New England office of the U.S. Environmental Protection Agency (U.S. EPA). This newsletter will be sent via email every few months to provide information to municipalities and others related to the Massachusetts Small Municipal Separate Storm Sewer System (MS4) permit. MA Stormwater News will feature topics of interest, provide updates on upcoming permit deadlines, and highlight assistance resources from MassDEP, U.S. EPA and others.

U.S. EPA and MassDEP know that stormwater management is just one of the many challenges facing municipalities. We are committed to working with municipalities as you move forward on permit implementation.

This issue focuses on preparing and submitting the First Year Annual Progress Report. We also highlight some assistance and training resources from U.S. EPA and MassDEP.

Preparing and Submitting Your MS4 Annual Progress Report

Municipalities permitted to discharge stormwater under the 2016 Massachusetts Municipal Separate Storm Sewer System (MS4) Permit are required to submit an Annual Report to EPA and MassDEP each year of the permit term. Annual Reports include a self-evaluation of program effectiveness and describe a permittee's compliance with all applicable permit terms and progress in addressing stormwater pollution. Annual Reports for the current reporting period (May 1, 2018 through June 30, 2019) are due by September 30, 2019.

In the February 2018 issue of Stormwater News (see the link in the Toolkit on page 5), we discussed many of the important reasons for annual reporting. Self-reporting on progress is a key component to assessing overall compliance with the permit. Through annual reporting, permittees document actions taken, describe program effectiveness and completeness, showcase accomplishments, and identify areas where changes may be needed or were made to the Stormwater Management Program (SWMP) over the reporting period. Comprehensive data management systems that organize and track information over time not only bring efficiency to annual evaluation and reporting, but they help permittees spot trends and problems. Details on what is required in the Annual Reports are discussed later in this issue.

Preparing the Annual Report is an opportunity for collaboration and coordination among municipal departments. It will also yield a tool for informing decision-makers and other community members about expenditures, actions taken, and future expected needs for managing stormwater and protecting water resources. Finally, the Annual Report is a compilation that can be a useful resource during staff transitions such as training new employees.

In this issue we take a closer look at preparing Annual Reports under the new permit. We provide information to help both new permittees and existing permittees that were previously covered under the 2003 permit understand the annual reporting requirements. We also highlight tools and resources for preparing your Annual Report and suggest strategies to help you set yourself up to efficiently prepare reports that are accurate, complete and submitted on time.

REMINDER:

Annual Reports are due **September 30, 2019**

Email them to stormwater.reports@epa.gov and
Frederick.Civian@mass.gov

Please note that there are two different annual reporting templates for use by Massachusetts MS4s. One has been designed for existing MS4s that were previously covered under the 2003 permit, and another is for the new MS4s that are now covered with the 2016 permit. In order to ensure that you are reporting the most accurate data, be sure to use the template that is appropriate for your MS4. Refer to pages 6-9 for the table 'What Must be Included in the Annual Report?' and the Annual Reporting Toolkit on page 5 for information about assistance resources, including:

- [August 22, 2019 webinar](#): *Preparing and Submitting Your MS4 Annual Progress Report Using the New EPA Template*
- [Annual Reporting Templates](#), which we encourage permittees to use.

Preparing Your Annual Report

Permittees must submit an Annual Report each year of the permit term. EPA has prepared Annual Reporting Templates and applicable guidance for use by new permittees and those previously covered by the 2003 permit. These are available on the EPA website at: <https://www.epa.gov/npdes-permits/stormwater-tools-new-england#arr>.

In addition, each permittee should have received a personalized Annual Report template which was sent to the email address provided on their Notice of Intent (NOI) in early August. If you did not receive it, please contact EPA.

Using the EPA Annual Report Template

The templates provide a comprehensive list of all the elements that need to be reported to EPA and MassDEP for this reporting period. While use of a template is not required, it is intended to help you submit all the required information seamlessly. You do not need to search the permit to ensure you have included everything. In addition, the templates are designed to walk you through your self-assessment and focus your efforts on providing information relevant to that specific reporting period.

**GPS Equipment Loan
& On-site Training Program**
EPA has a limited number of Global Positioning System (GPS) units available to loan, at no cost, for stormwater mapping. EPA will also provide on-site training on the use of the GPS equipment. For more information contact Deborah Cohen at cohen.deborah@epa.gov.

How to use the templates?

Please **do not fill out the form in your web browser** as you will be unable to save your information. The annual reporting templates work best when downloaded and opened in Adobe Reader. Right click on the template link, "save as" a PDF document, and then open in Adobe Reader.

If you have previously used EPA's Notice of Intent (NOI) or SWMP template, you will be familiar with the look and feel of the Annual Report template.

- Templates are available for new permittees and permittees that were covered under the 2003 permit.
- Each section of the Annual Report template needs to be completed.
- Unless stated otherwise in the Annual Report template, no optional metrics are required in the Annual Reports under the 2016 Massachusetts MS4 Permit.
- If any checkbox or metric is left blank in the Annual Report template, it will be assumed that the associated permit requirement is **incomplete**. You can use the text boxes in each section of the template to explain the deficiencies.
- As with the NOI, the Annual Report template includes the option for electronic signature prior to submittal. A button is included to print a signature page for those permittees that do not have the ability to sign the Annual Report electronically.
- EPA prefers that you submit your Annual Report electronically to the email addresses provided in the template. Please ensure you attach your completed Annual Report and all other documents required to be submitted as separate files in your email submission.

If you do not use the EPA Template

For those who do not use the template, please ensure that the document(s) you send to EPA and MassDEP contain all the information required to be reported in a given reporting period. The information in the table on page 6, or the Annual Report template, can also be used as a guide to what must be included for this reporting period. The reporting requirements do change from year-to-year so permittees must be careful to ensure the correct information is being submitted in compliance with permit requirements.

What Must be Included in the Annual Report?

Permittees are required to submit information as described in Part 4.0 and in other parts of the permit. Annual reports are intended to be a yearly summary of your Stormwater Management Program (SWMP) implementation and include, among other things, a self-assessment, changes to your SWMP, information on each Minimum Control Measure (MCM) and information on actions taken to address impaired waters and Total Maximum Daily Loads (TMDLs). The template will walk you through each of the sections detailed below to ensure you are reporting the correct information.

Details on Each Minimum Control Measure

Preparing the Annual Report requires a review of the Best Management Practices (BMPs) you've implemented for each MCM. To do this you'll need to examine the data, results, products and other information associated with the activities. Summarized in the table *'What Must be Included in Your Annual Report'* found on pages 6-9 of this issue are the activity measures for each MCM that must be submitted by MS4s that were covered under the 2003 permit. It is important to note that new permittees have different reporting requirements for the first reporting year and different due dates for certain deliverables.

Self-Assessment Review (Part 4.1)

Permittees must annually self-evaluate their compliance with the terms and conditions of the permit. In general, this self-assessment includes an overall evaluation of the appropriateness of the selected BMPs and an assessment of permit compliance through BMP implementation over the reporting period. In short, have you done everything the permit requires during the previous reporting period? In the template, the self-evaluation reviews are prepared as a checklist of year 1 permit requirements and a narrative summary that is submitted with the Annual Report. Be sure to include BMP modifications along with a brief explanation of the modifications.

Best Practices for Preparing an Annual Report

The best MS4 Annual Reports are timely, current and provide enough information in each section to clearly illustrate the status of the SWMP work in your community. Please consider the following best practices when preparing your Annual Report:

Start early! It takes time to create an Annual Report that accurately reflects the work completed during the reporting period. Starting early gives you time to assemble the information and communicate with others. It also provides more time for you to resolve or develop plans for issues or problems you identify while preparing your Annual Report. Annual Reports must be submitted electronically via email or by mail by **September 30, 2019**.

Use an EPA Annual Report Template. Refer to pages 2 and 3 of this issue of Stormwater News for more information about the templates.

Get organized and stay organized. Permittees with an organized system for managing the many field forms, analyses, reports, maps, and other data associated with implementing their SWMP throughout the entire permit term are in the best position to efficiently and comprehensively review their activities for preparing their Annual Report and keeping their SWMP up-to-date.

- Create physical and/or electronic folders for ongoing management of the information associated with your program.
- Using templates, inventories, spreadsheets and other systems that allow you to track information over the course of the year (e.g., street sweeping, catch basin cleaning) further increases reporting efficiency. By compiling information throughout the year in one place, it's easily accessible in your tracking program when you need to report a number (e.g., volume of catch basin material removed) in your Annual Report.

Massachusetts Statewide Education Program

Think Blue Massachusetts is a statewide educational campaign run by the Massachusetts Statewide Municipal Stormwater Coalition to help residents and businesses do their part to reduce polluted runoff and keep Massachusetts lakes, rivers, and streams clean and healthy. Learn more at www.thinkbluemassachusetts.org

Best Practices for Preparing an Annual Report (Cont.)

- The IDDE reporting requirements include all the information related to your IDDE program implementation, including all sampling results. This is a lot of data! The easiest way to report this information is to attach a spreadsheet (or series of spreadsheets) to the email submission of your Annual Report that contains this information. There is no need to retype everything you did. If you have a spreadsheet or a database where this information is kept, just attach it to your Annual Report.
- Citing websites is OK! The Annual Report template contains many documents that must also be submitted with your Annual Report. However, if these documents are available on a website there is no need to resubmit them to EPA or MassDEP. You can provide web links in your Annual Report. For instance, the permit requires you to identify each outfall and interconnection discharging from the MS4, classify each into the relevant category, and priority rank each catchment for IDDE investigation. This data can either be provided in a separate spreadsheet or you can provide the URL to EPA and MassDEP to find the information on a website.

Attend the [August 22nd webinar](#) to learn about the EPA templates and ask your annual reporting questions.

Keep your SWMP up-to-date. As described in the [February 2019 issue of Stormwater News](#), keeping your SWMP up-to-date brings many benefits to permittees. These include efficient annual evaluation and reporting.

Use what you've already submitted in your NOI or a prior Annual Report when the information remains pertinent in the current reporting year. An example of such information is the date a bylaw or ordinance was passed. Submitted copies of NOIs and Annual Reports are available at the links shown in the Toolkit on page 2.

Share your draft report with other municipal departments. Seek their input to ensure the report is complete and accurate and includes a detailed summary of what each department has done.

Double check the entire report before submission. Be sure the information accurately reflects current practice and includes actions or initiatives you've taken over the past year. Check to ensure no inconsistencies exist between the different parts of the report (e.g., the information in each MCM section and your narrative self-assessment review).

How to Submit an Annual Report

Reports and required documents must be sent to **both EPA and MassDEP**. Reports can be submitted electronically OR by mail as shown below.

	EPA	MassDEP
Email	stormwater.reports@epa.gov	frederick.civian@mass.gov
Mail (postage)	Glenda Velez US EPA Stormwater & Construction Permits Section (06-1) 5 Post Office Square, Suite 100 Boston, MA 02109	Fred Civian MassDEP, Bureau of Water Resources, 5 th floor One Winter Street Boston, MA 02108

Submittal of Annual Reports is a requirement of the MS4 permit. Failure to submit Annual Reports may subject the permittee to possible enforcement action. Communities that do not submit Annual Reports are missing an important opportunity to bring focus to the stormwater program, its associated requirements, and budget implications for the community.

Resources and Contacts

Specific questions about the permit should go to:

EPA: Newt Tedder - tedder.newton@epa.gov or 617-918-1038

MassDEP: Fred Civian - frederick.civian@mass.gov or 617-292-5821

Public Education and Outreach Program

The MS4 Permit requires each town to implement a public education and outreach program that reaches four different audiences and that includes messages that are most relevant to that community. Town officials can click on MassDEP's link below to download – and save – brochures, pamphlets and other materials and use those to help comply with Section 2.3.2.c of the MS4 permit:

<https://go.usa.gov/x5dgr>

For “hands on” MS4 training and assistance for your community, call MassDEP's Stormwater Coordinator Fred Civian at 617-292-5821.

Massachusetts Stormwater News is a collaborative effort of MassDEP and the New England office of the U.S. EPA. Suggestions for future topics, questions or assistance, or requests to be added or removed from the Stormwater News mailing list can be sent to: StormwaterNewsMA@epa.gov.

What Must be Included in the Annual Report?

Reporting Section	What is the Requirement?	Find in the Permit
MCM 1: Public Education and Outreach	<p>Evaluate your public education program and provide:</p> <ul style="list-style-type: none"> <input type="checkbox"/> Description of the targeted messages for each audience <input type="checkbox"/> Method of distribution and dates of distribution (be sure to note who completed the messaging if it was done by a third party) <input type="checkbox"/> Measures/methods used to assess the effectiveness of the messages <input type="checkbox"/> Measures/methods used to assess the overall effectiveness of the educational program <input type="checkbox"/> Any changes to the program 	Part 2.3.2
MCM 2: Public Involvement and Participation	<p>Provide a description of the activities used to promote public participation, including the documentation of compliance with state public notice regulations and a description of the opportunity for public involvement in the development of the SWMP.</p>	Part 2.3.3
MCM 3: Illicit Discharge Detection and Elimination Program (IDDE)	<ul style="list-style-type: none"> <input type="checkbox"/> Provide a description of the activities related to your implementation of the IDDE program, including: <input type="checkbox"/> An expeditious schedule for the elimination of illicit discharges and the date of identification when illicit discharge elimination is not possible within 60 days of identification <input type="checkbox"/> Sanitary Sewer Overflow (SSO) Inventory and updates, including: <ul style="list-style-type: none"> <input type="checkbox"/> A copy of the SSO Inventory <input type="checkbox"/> Status of mitigation and corrective measures implemented by permittee to address each SSO identified <input type="checkbox"/> Number of SSOs identified and removed <input type="checkbox"/> System map completion progress (status of the system map) <input type="checkbox"/> Status of all protocols and procedures described in Part 2.3.4 (program responsibilities and systematic procedures) <input type="checkbox"/> Initial outfall and interconnection inventory and priority ranking to assess illicit discharge potential based on existing information/status of ranking and assessment. (Attach the data to your Annual Report or include a link to a website with the information.) <ul style="list-style-type: none"> <input type="checkbox"/> Identification of outfalls and interconnections <input type="checkbox"/> Location and condition <input type="checkbox"/> Framework for tracking inspections, screenings, etc. <input type="checkbox"/> Initial ranking for investigation (Problem, High, or Low) All dry and wet weather outfall screening and sampling results (Attach the data to your Annual Report or include a link to a website with the information.) <ul style="list-style-type: none"> <input type="checkbox"/> Date <input type="checkbox"/> Outfall or interconnection identifier <input type="checkbox"/> Location <input type="checkbox"/> Weather conditions at time of sampling, including the precipitation in previous 48 hours 	Part 2.3.4

What Must be Included in the Annual Report?

Reporting Section	What is the Requirement?	Find in the Permit
MCM 3: Illicit Discharge Detection and Elimination Program (IDDE) (Cont.)	<ul style="list-style-type: none"> <input type="checkbox"/> Field screening parameter results <input type="checkbox"/> Results of all analyses <input type="checkbox"/> All data collected as part of dry and wet weather catchment investigations, including illicit discharge removal information (Attach the data to your Annual Report or include a link to a website with the information.) <ul style="list-style-type: none"> <input type="checkbox"/> Number and percent of total outfall catchments served by the MS4 evaluated using the catchment investigation procedure (include identifier of each catchment evaluated). <input type="checkbox"/> Presence or absence of System Vulnerability Factors (SVFs) in a catchment <input type="checkbox"/> Any field screening parameter results <input type="checkbox"/> Number of illicit discharges identified, and number removed <input type="checkbox"/> For each confirmed source of an illicit discharge, include: <ul style="list-style-type: none"> <input type="checkbox"/> Location and source <input type="checkbox"/> Description <input type="checkbox"/> Method and date of discovery <input type="checkbox"/> Date of elimination, mitigation, or enforcement action OR planned corrective measures and schedule of removal <input type="checkbox"/> Gallons of flow removed, including volume of sewage removed <input type="checkbox"/> Identification of tracking indicators and measures of progress based on those indicators <input type="checkbox"/> The frequency and type of employee training <p>The Annual Report must also include the results from any other stormwater or receiving water quality monitoring or studies conducted during the reporting period where the results are being used by the permittee to inform permit compliance or permit effectiveness. If such monitoring or studies were conducted on behalf of the permittee or if monitoring or studies conducted by other entities were reported to the permittee, a brief description of the type of information gathered or received shall be included in the Annual Report(s) covering the time period(s) the information was received.</p>	Part 2.3.4 (Cont.)
MCM 4: Construction Site Stormwater Runoff Control	<p>Evaluate your activities related to construction runoff management, including:</p> <ul style="list-style-type: none"> <input type="checkbox"/> Number of project plans/sites reviewed <input type="checkbox"/> Number of inspections <input type="checkbox"/> Number of enforcement actions 	Part 2.3.5

What Must be Included in the Annual Report?

Reporting Section	What is the Requirement?	Find in the Permit
MCM 5: Post-Construction Stormwater Management in New Development and Redevelopment	<p>Evaluate your stormwater management activities related to new development and redevelopment, including:</p> <ul style="list-style-type: none"> <input type="checkbox"/> Status of ordinance development <input type="checkbox"/> As-built drawings/procedures <ul style="list-style-type: none"> <input type="checkbox"/> Report on measures utilized to meet requirements <input type="checkbox"/> Street design and parking lots report <ul style="list-style-type: none"> <input type="checkbox"/> Status of assessment, including any planned or completed changes to local regulations and guidelines <input type="checkbox"/> Green infrastructure report <ul style="list-style-type: none"> <input type="checkbox"/> Findings and progress towards making the practices allowable <input type="checkbox"/> Status of retrofit properties inventory <ul style="list-style-type: none"> <input type="checkbox"/> [Beginning with the 5th year Annual Report, identify additional permittee-owned sites and infrastructure that could be retrofitted such that the permittee maintains a minimum of 5 sites in their inventory, until such a time as when the permittee has less than 5 sites remaining] <input type="checkbox"/> Report on all properties that have been modified or retrofitted with BMPs to mitigate impervious areas that were inventoried 	Part 2.3.6
MCM 6: Good Housekeeping and Pollution Prevention for Permittee-Owned Operations	<p>Evaluate the status of Operation & Maintenance programs and the Stormwater Pollution Prevention Program (SWPPP)</p> <ul style="list-style-type: none"> <input type="checkbox"/> Catch basin cleaning <ul style="list-style-type: none"> <input type="checkbox"/> Include your inspection plan and your plan for optimizing catch basin cleaning (or your schedule for gathering information to develop the optimization plan). Include metrics and other information used to reach the determination that the established cleaning and maintenance plan is optimal for the MS4. <input type="checkbox"/> If a catch basin sump is more than 50% full during 2 consecutive routine inspections/cleaning events, document that finding, investigate the contributing drainage area for sources of excessive sediment loading, and to the extent practicable, abate contributing sources. Report on actions taken. <input type="checkbox"/> Include the following metrics: <ul style="list-style-type: none"> <input type="checkbox"/> Total number of catch basins in system <input type="checkbox"/> Number of catch basins inspected <input type="checkbox"/> Number of catch basins cleaned <input type="checkbox"/> Total volume or mass of material removed from all catch basins 	Part 2.3.7

What Must be Included in the Annual Report?

Reporting Section	What is the Requirement?	Find in the Permit
MCM 6: Good Housekeeping and Pollution Prevention for Permittee-Owned Operations	<ul style="list-style-type: none"> <input type="checkbox"/> Street Sweeping <ul style="list-style-type: none"> <input type="checkbox"/> Number of miles of street cleaned or the volume or mass of material removed from street cleaning. <input type="checkbox"/> If applicable: rural uncurbed roadways with no catch basins <ul style="list-style-type: none"> <input type="checkbox"/> Inspection, documentation, and targeted sweeping plan due within 2 years of the effective date of the permit <input type="checkbox"/> Permittee-owned facilities <ul style="list-style-type: none"> <input type="checkbox"/> Status of the inventory (Parks and Open Spaces, Buildings and Facilities, Vehicles and Equipment) and any updates <input type="checkbox"/> Status of the Operations and Maintenance programs for permittee-owned facilities and activities, and maintenance activities associated with each <input type="checkbox"/> Status of Stormwater Pollution Prevention Program (SWPPP) including the site inspection results <input type="checkbox"/> Describe the status of the written procedures for winter road maintenance including storage of salt and sand 	Part 2.3.7
If applicable	<p>Water Quality-Based Effluent Limitations/Discharges to Certain Impaired Waters</p> <p>The Annual Report must also include an update on activities required by Part 2.1 (Water Quality-Based Effluent Limitations) and/or Part 2.2 of the permit (Discharges to Certain Impaired Waters), including the following information:</p> <ul style="list-style-type: none"> <input type="checkbox"/> Identification of all discharges determined to be causing or contributing to an exceedance of water quality standards and a description of the response including all items required by part 2.1.1 of the permit. For this you will be updating any information you included in your NOI. As examples: <ul style="list-style-type: none"> <input type="checkbox"/> You may have found another waterbody to be impaired due to excess phosphorus and now need to list the discharges to that waterbody as being subject to the requirements of Appendix H. <input type="checkbox"/> You will also need to indicate which activities you have conducted in compliance with Appendix H or Appendix F requirements. For instance, did you do a dog waste public education campaign for compliance with Appendix H or was it just for MCM 1? <input type="checkbox"/> For discharges subject to Total Maximum Daily Load (TMDL)-related requirements, you will be indicating which BMPs were done during the reporting period in accordance with the requirements of Appendix F. You will also need to indicate progress on completion of certain plans that are required by Appendix F. 	Part 2.1 and/or Part 2.2
