Notice of Intent (NOI) for coverage under Small MS4 General Permit

Part II: Summary of Receiving Waters

Please list the waterbodies to which your MS4 discharges. For each waterbody, please report the number of outfalls discharging into it and, if applicable, the segment ID and any impairments.

 $Mass a chusetts \ \textit{list of impaired waters:} \ \underline{\textit{Massachusetts 2014 List of Impaired Waters-}} \ \text{http://www.mass.gov/eea/docs/dep/water/resources/07v5/14list2.pdf}$

Waterbody that receives flow from the MS4 and segment ID if applicable	Number of outfalls into receiving water segment	Chloride	Chlorophyll-a	Dissolved Oxygen/ DO Saturation	Nitrogen	Oil & Grease/ PAH	Phosphorus	Solids/ TSS/ Turbidity	E. coli	Enterococcus	Other pollutant(s) causing impairments
Unnamed tributary of Coweeset Brook on western portion of campus	1										No impairments identified
Intermittent stream/drainage ditch running parallel to eastern portion of campus (Queset Brook)	1										No impairments identified

Part III: Stormwater Management Program Summary

Identify the Best Management Practices (BMPs) that will be employed to address each of the six Minimum Control Measures (MCMs). For municipalities/organizations whose MS4 discharges into a receiving water with an approved Total Maximum Daily Load (TMDL) and an applicable waste load allocation (WLA), identify any additional BMPs employed to specifically support the achievement of the WLA in the TMDL section at the end of part III.

For each MCM, list each existing or proposed BMP by category and provide a brief description, responsible parties/departments, measurable goals, and the year the BMP will be employed (public education and outreach BMPs also requires a target audience). Use the drop-down menus in each table or enter your own text to override the drop down menu.

MCM 1: Public Education and Outreach

BMP Media/Category (enter your own text to override the drop down menu)	BMP Description	Targeted Audience	Responsible Department/Parties (enter your own text to override the drop down menu)	Measurable Goal	Beginning Year of BMP Imple- mentation
Brochures/Pamphlets/Infrastructure Marking	Develop and implement targeted public education messages. Distribute messages to target audiences.	Patients	GEMS Program Manager	Development and implementation of a targeted public education program, distribution of a minimum of one message to audience by end of Permit Year 2, 5.	2018
Brochures/Pamphlets/Infrastructure Markin	Develop and implement targeted public education messages. Distribute messages to target audiences.	Visitors	GEMS Program Manager	Development and implementation of a targeted public education program, distribution of a minimum of one message to audience by end of Permit Year 2, 5.	2018
Newsletters/Emails/Trainings/Intranet	Develop and implement targeted public education messages. Distribute messages to target audiences.	Employees	GEMS Program Manager	Development and implementation of a targeted public education program, distribution of a minimum of one message to audience by end of Permit Year 2, 5.	2018

Notice of Intent (NOI) for coverage under Small MS4 General Permit

Part III: Stormwater Management Program Summary (continued)

Actions for Meeting Total Maximum Daily Load (TMDL) Requirements

Use the drop-down menus to select the applicable TMDL, action description to meet the TMDL requirements, and the responsible department/parties. If no options are applicable, or more than one, **enter your own text to override drop-down menus**.

Applicable TMDL	Action Description	Responsible Department/Parties (enter your own text to override the drop down menu)
Not applicable		
		·
	·	

Part III: Stormwater Management Program Summary (continued)

Actions for Meeting Requirements Related to Water Quality Limited Waters

Use the drop-down menus to select the pollutant causing the water quality limitation and enter the waterbody ID(s) experiencing excursions above water quality standards for that pollutant. In addition, if you are subject to additional requirements due to a downstream nutrient impairment (see Part 2.2.2 of the permit) select the pollutant of concern and indicate applicable waterbody IDs or write "all waterbodies" if applicable. Choose the action description from the dropdown menu and indicate the responsible party. If no options are applicable, or more than one, enter your own text to override drop-down menus.

Pollutant	Waterbody ID(s)	Action Description	Responsible Department/Parties (enter your own text to override the drop down menu)
Not applicable			
		· · · · · · · · · · · · · · · · · · ·	

Part IV: Notes and additional information

Use the space below to indicate the part(s) of 2.2.1 and 2.2.2 that you have identified as not applicable to your MS4 because you do not discharge to the impaired water body or a tributary to an impaired water body due to nitrogen or phosphorus. Provide all supporting documentation below or attach additional documents if necessary. Also, provide any additional information about your MS4 program below.

See attachments for supporting documentation.						
The "Final Massachusetts Year 2014 Integrated List of Waters" and related Mass GIS viewer were used to make the determination that parts of 2.2.1 and 2.2.2 are not applicable to the VA BHS Brockton due to the lack of discharges from the MS4 to impaired or TMDL waterbodies.

Mr. Newton Tedder
US Environmental Protection Agency
Stormwater and Construction Permits Section (OEP06-1)
Five Post Office Square, Suite 100
Boston, MA 02109

Re: MA MS4 General Permit Endangered Species Determination - VA Boston Healthcare System Brockton Campus, 940 Belmont Street, Brockton, MA – MAR042009

Dear Mr. Tedder:

The Veterans Affairs Boston Healthcare System Brockton, MA Campus (VA BHS Brockton, site) is a federal, non-traditional MS4 designated by the U.S. Environmental Protection Agency (EPA) for conducting formal or informal consultation with the U.S. Fish and Wildlife Service as a condition of coverage under the 2016 MS4 General Permit (Permit).

Woodard & Curran, on behalf of the VA BHS Brockton, has evaluated the U.S. Fish & Wildlife Service iPAC Biological and Conservation Data System files in accordance with the methodology presented in Appendix C of the Permit to determine the presence of endangered or threatened species within the program implementation area.

Our review evaluated the area of impact related to required program activities, analysis of these program activity areas within the iPAC database, examining maps, and the personal knowledge of staff and/or cooperating experts with knowledge of site operations.

According to the information currently in the iPAC database, there are currently no threatened, endangered, or candidate species and no critical habitat within the project area. The formal U.S. Fish and Wildlife Service consultation response letter is provided as an attachment to this letter. The proposed stormwater program activities being conducted at the VA BHS Brockton are a continuation of previous permitted activities and include non-structural management of stormwater runoff as required by the Permit. These activities will include education, investigation, and pollutant source control on existing facilities and roadways and will not disturb terrestrial vegetation. As such, activities associated with implementation of the Permit requirements will continue to have "no effect" to the habitats receiving stormwater discharges from the site.

Although no threatened, endangered, or candidate species were identified within the project area, the VA BHS Brockton will continue to evaluate potential effects to threatened, endangered, or candidate species and critical habitat related to installation of structural stormwater treatment practices or other land disturbing activities enacted as a result of maintaining compliance with the Permit, and initiate either informal or formal consultation with the U.S. Fish and Wildlife Services to determine potential impacts.

Based on this review and an evaluation of determination requirements outlined in Appendix C of the Permit, we have determined that the VA BHS Brockton meets Criterion A.

Please do not hesitate to contact either of the undersigned if you have any questions about the VA BHS Brockton's stormwater management program.

Sincerely,

John Hughes GEMS Program Manager VA BHS Brockton John.Hughes5@va.gov 1-774-826-2345

Event Code: 05E1NE00-2018-E-06174

Project Name: VA Brockton, MA Medical Campus MS4 General Permit

Subject: List of threatened and endangered species that may occur in your proposed project

location, and/or may be affected by your proposed project

To Whom It May Concern:

The enclosed species list identifies threatened, endangered, proposed and candidate species, as well as proposed and final designated critical habitat, that may occur within the boundary of your proposed project and/or may be affected by your proposed project. The species list fulfills the requirements of the U.S. Fish and Wildlife Service (Service) under section 7(c) of the Endangered Species Act (Act) of 1973, as amended (16 U.S.C. 1531 *et seq.*).

New information based on updated surveys, changes in the abundance and distribution of species, changed habitat conditions, or other factors could change this list. Please feel free to contact us if you need more current information or assistance regarding the potential impacts to federally proposed, listed, and candidate species and federally designated and proposed critical habitat. Please note that under 50 CFR 402.12(e) of the regulations implementing section 7 of the Act, the accuracy of this species list should be verified after 90 days. This verification can be completed formally or informally as desired. The Service recommends that verification be completed by visiting the ECOS-IPaC website at regular intervals during project planning and implementation for updates to species lists and information. An updated list may be requested through the ECOS-IPaC system by completing the same process used to receive the enclosed list.

The purpose of the Act is to provide a means whereby threatened and endangered species and the ecosystems upon which they depend may be conserved. Under sections 7(a)(1) and 7(a)(2) of the Act and its implementing regulations (50 CFR 402 et seq.), Federal agencies are required to utilize their authorities to carry out programs for the conservation of threatened and endangered species and to determine whether projects may affect threatened and endangered species and/or designated critical habitat.

A Biological Assessment is required for construction projects (or other undertakings having similar physical impacts) that are major Federal actions significantly affecting the quality of the human environment as defined in the National Environmental Policy Act (42 U.S.C. 4332(2) (c)). For projects other than major construction activities, the Service suggests that a biological evaluation similar to a Biological Assessment be prepared to determine whether the project may affect listed or proposed species and/or designated or proposed critical habitat. Recommended contents of a Biological Assessment are described at 50 CFR 402.12.

If a Federal agency determines, based on the Biological Assessment or biological evaluation, that listed species and/or designated critical habitat may be affected by the proposed project, the agency is required to consult with the Service pursuant to 50 CFR 402. In addition, the Service recommends that candidate species, proposed species and proposed critical habitat be addressed within the consultation. More information on the regulations and procedures for section 7 consultation, including the role of permit or license applicants, can be found in the "Endangered Species Consultation Handbook" at:

http://www.fws.gov/endangered/esa-library/pdf/TOC-GLOS.PDF

Please be aware that bald and golden eagles are protected under the Bald and Golden Eagle Protection Act (16 U.S.C. 668 *et seq.*), and projects affecting these species may require development of an eagle conservation plan (http://www.fws.gov/windenergy/eagle_guidance.html). Additionally, wind energy projects should follow the wind energy guidelines (http://www.fws.gov/windenergy/) for minimizing impacts to migratory birds and bats.

Guidance for minimizing impacts to migratory birds for projects including communications towers (e.g., cellular, digital television, radio, and emergency broadcast) can be found at: http://www.fws.gov/migratorybirds/CurrentBirdIssues/Hazards/towers/towers.htm; http://www.towerkill.com; and http://www.fws.gov/migratorybirds/CurrentBirdIssues/Hazards/towers/comtow.html.

We appreciate your concern for threatened and endangered species. The Service encourages Federal agencies to include conservation of threatened and endangered species into their project planning to further the purposes of the Act. Please include the Consultation Tracking Number in the header of this letter with any request for consultation or correspondence about your project that you submit to our office.

Official Species List

Event Code: 05E1NE00-2018-E-06174

Official Species List

This list is provided pursuant to Section 7 of the Endangered Species Act, and fulfills the requirement for Federal agencies to "request of the Secretary of the Interior information whether any species which is listed or proposed to be listed may be present in the area of a proposed action".

This species list is provided by:

New England Ecological Services Field Office 70 Commercial Street, Suite 300 Concord, NH 03301-5094 (603) 223-2541

Project Summary

Consultation Code: 05E1NE00-2018-SLI-2641

Event Code: 05E1NE00-2018-E-06174

Project Name: VA Brockton, MA Medical Campus MS4 General Permit

Project Type: ** OTHER **

Project Description: This determination is being conducted in support of Notice of Intent

requirements under the recently reissued MS4 General Permit. MS4 Operations are ongoing throughout the site, which operates as a Veterans

Administration medical campus.

Project Location:

Approximate location of the project can be viewed in Google Maps: https://www.google.com/maps/place/42.06081945673752N71.05364146931326W

Counties: Plymouth, MA

Endangered Species Act Species

There is a total of 0 threatened, endangered, or candidate species on this species list.

Species on this list should be considered in an effects analysis for your project and could include species that exist in another geographic area. For example, certain fish may appear on the species list because a project could affect downstream species.

IPaC does not display listed species or critical habitats under the sole jurisdiction of NOAA Fisheries¹, as USFWS does not have the authority to speak on behalf of NOAA and the Department of Commerce.

See the "Critical habitats" section below for those critical habitats that lie wholly or partially within your project area under this office's jurisdiction. Please contact the designated FWS office if you have questions.

1. <u>NOAA Fisheries</u>, also known as the National Marine Fisheries Service (NMFS), is an office of the National Oceanic and Atmospheric Administration within the Department of Commerce.

Critical habitats

THERE ARE NO CRITICAL HABITATS WITHIN YOUR PROJECT AREA UNDER THIS OFFICE'S JURISDICTION.

Re:

MA MS4 General Permit Historic Properties Evaluation – VA Boston Healthcare System

Brockton Campus, 940 Belmont Street, Brockton, MA – MAR042009

Dear Mr. Tedder:

The Veterans Affairs Boston Healthcare System Brockton, MA Campus (VA BHS Brockton, site) has determined that the discharges regulated under the 2016 MS4 General Permit (Permit) do not have the potential to cause effects to any properties listed on the National Register of Historic Properties. The VA BHS Brockton is an existing facility authorized by the previous 2003 MS4 General Permit. Using the screening process presented in Appendix D of the Permit, the VA BHS Brockton is eligible for Permit coverage under Criterion A.

During an evaluation of the site's MS4 operations it was determined that no properties or structures are located within areas or proximity to known stormwater discharges, allowable non-stormwater discharges, and/or stormwater discharge related activities originating from the VA BHS Brockton that would affect properties that are listed or eligible for listing on the National Register of Historic Places. This information will be periodically verified throughout the Permit term to determine whether additional actions are required to mitigate the effects of stormwater discharges to historic properties, should they occur. It is important to note that no historic properties are located within proximity to the site.

Please do not hesitate to contact either of the undersigned if you have any questions about the VA BHS Brockton's stormwater management program.

Sincerely,

John Hughes

GEMS Program Manager

VA BHS Brockton

Subject: Small MS4 NOI submission - additional or corrected information required

EPA requires additional or corrected information to receive a complete NOI submission for your MS4 and continue the review process.

Please respond to this email with the requested details in the attached report. You do not need to resubmit your entire NOI form. Please respond with the requested information as soon as you can. If the additional information is not received within 30 days of the date on this email EPA may initiate the process to deny your NOI, unless additional time is granted by EPA for such submission.
