S	
Sanitary Sewer Overflows (SSOs)  Check off the box below if the statement is true.	
This SSO section is NOT applicable because we DO NOT ha	ve sanitary sewer
	•
Below, report on the number of SSOs identified in the MS4 system and remov	ved during this reporting period.
Number of SSOs identified: 0	
Number of SSOs removed: 0	
MSA System Manning	
MS4 System Mapping Below, check all that apply.	
The following elements of the Phase I map have been completed:	
○ Outfalls and receiving waters	

Municipally-owned stormwater treatment structures
Waterbodies identified by name and indication of all use impairments
Optional: Describe any additional progress you made on your map during this reporting period or provide additional status information regarding your map:
Significant mapping updates were made including updating/adding multiple areas based on record information as well as field investigations. Field investigations were most significant in the Beacham St., Behan St., and Commercial St areas. City owned BMPs were also mapped.
Screening of Outfalls/Interconnections
If conducted, please submit any outfall monitoring results from this reporting period. Outfall monitoring results should include the date, outfall/interconnection identifier, location, weather conditions at time of sampling, precipitation in previous 48 hours, field screening parameter results, and results from all analyses.
<ul> <li>The outfall screening data is attached to the email submission</li> </ul>
• The outfall screening data can be found at the following website:
https://mysticriver.org/epa-grade All outfalls were previously screened/sampled.
Below, report on the number of outfalls/interconnections screened during this reporting period.
Number of outfalls screened: 0
Catchment Investigations  If conducted, please submit all data collected during this reporting period as part of the dry and wet weather investigations. Also include the presence or absence of System Vulnerability Factors for each catchment.  ○ The catchment investigation data is attached to the email submission  ○ The catchment investigation data can be found at the following website:
Below, report on the number of catchment investigations completed during this reporting period.
Number of catchment investigations completed this reporting period: 1
Below, report on the percent of catchments investigated to date.
Percent of total catchments investigated: 6.3
Optional: Provide any additional information for clarity regarding the catchment investigations below:
12,713 feet of drains were televised on Elm Street and Ferry Street prior to road reconstruction. Additional sampling and investigation was recommended at 10 locations.

entities were re described below	ring or studies were conducted on your behalf or if monitoring or studies conducted by other eported to you, a brief description of the type of information gathered or received shall be w:

Page 18

The US Environmental Protection Agency (EPA) in collaboration with the Mystic River Watershed Association issues a water quality report card for the Mystic River Watershed each year. The grade is based on how frequently waterbodies meet bacteria standards for swimming and boating. The report card grades issued annually for the Mystic River by the EPA are based on the level of bacterial contamination found in samples collected by MyRWA volunteers over the past year at 15 monitoring sites throughout the entire watershed, as well as data collected at numerous locations by the Massachusetts Water Resources Authority (MWRA).

For the first time, ever the Island End received a 'B' grade after having 'F's for many years in the past.

#### **Additional Information**

*Optional:* Enter any additional information relevant to your stormwater management program implementation during the reporting period. Include any BMP modifications made by the MS4 if not already discussed above:

Private developers continue to be held to the updated 15/15A stormwater regulations and standards. Related actions include:

Phosphorus treatment and detention pond at Encore Rivergreen parking lot.

Conditioned National Grid invasive removal along Malden River for substation upgrades.

Worked with Rt 16 abutter, North Creek work design/awarded, south creek permitting.

MS4 System maintenance and improvements included:

Broken tidegate removed and system cleaned at Spring.

Rt 16 siphon cleaned by MassDOT following City cleaning approaches.

#### **COVID-19 Impacts**

Optional: If any of the above year 2 requirements could not be completed due to the impacts of COVID-19, please identify the requirement that could not be completed, any actions taken to attempt to complete the requirement, and reason the requirement could not be completed below:

Due to COVID-19 our staff has been affected by layoffs and therefore reorganization of responsibilities and roles. Planning has been difficult and City hall was closed from March 15 - June 1 of 2020. Grant application delays have seriously affected budgeting.

IDDE training and street catch basin cleaning could not be completed.

#### **Activities Planned for Next Reporting Period**

Please confirm that your SWMP has been, or will be, updated to comply with all applicable permit requirements including but not limited to the year 3 requirements summarized below. (Note: impaired waters and TMDL requirements are not listed below)

Yes, I agree ⊠

- Inspect all outfalls/ interconnections (excluding Problem and Excluded outfalls) for the presence of dry weather flow
- Complete follow-up ranking as dry weather screening becomes available

#### **Annual Requirements**

- Annual report submitted and available to the public
- Annual opportunity for public participation in review and implementation of SWMP
- Keep records relating to the permit available for 5 years and make available to the public
- Properly store and dispose of catch basin cleanings and street sweepings so they do not discharge to receiving waters
- Annual training to employees involved in IDDE program
- Update inventory of all known locations where SSOs have discharged to the MS4
- Continue public education and outreach program
- Update outfall and interconnection inventory and priority ranking and include data collected in

connection with the dry weather screening and other relevant inspections conducted

- Implement IDDE program
- Review site plans of construction sites as part of the construction stormwater runoff control program
- Conduct site inspection of construction sites as necessary
- Inspect and maintain stormwater treatment structures
- Log catch basins cleaned or inspected
- Sweep all uncurbed streets at least annually
- Continue investigations of catchments associated with Problem Outfalls
- Review inventory of all permittee owned facilities in the categories of parks and open space, buildings and facilities, and vehicles and equipment; update if necessary

Provide any additional details on activities planned for permit year 3 below:			
Will continue to be a part of the Mystic River Watershed Association (MRWA) to provide with messaging etc.			

## Part V: Certification of Small MS4 Annual Report 2020

#### 40 CFR 144.32(d) Certification

I certify under penalty of law that this document and all attachments were prepared under my direction or supervision in accordance with a system designed to assure that qualified personnel properly gather and evaluate the information submitted. Based on my inquiry of the person or persons who manage the system, or those persons directly responsible for gathering the information, I certify that the information submitted is, to the best of my knowledge and belief, true, accurate, and complete. I am aware that there are significant penalties for submitting false information, including the possibility of fine and imprisonment for knowing violations.
