# Year 7 Annual Report

## Massachusetts Small MS4 General Permit Reporting Period: July 1, 2024-June 30, 2025

\*\*Please DO NOT attach any documents to this form. Instead, attach all requested documents to an email when submitting the form. Also ensure any websites included on this form are to publicly accessible sites\*\*

Unless otherwise noted, all fields are required to be filled out. If a field is left blank, it will be assumed the requirement or task has not been completed. Please ONLY report on activities between July 1, 2024 and June 30, 2025 unless otherwise requested.

### **Part I: Contact Information**

Name	Name of Municipality or Organization: Town of Sutton						
EPA N	EPA NPDES Permit Number: MAR041241						
Prima	ry MS4 Program Manager Conta	ct Informati	on				
Name:	Nick Repekta		Title:	Highway S	Superinte	endent	
Street	Address Line 1: 4 Uxbridge Road						
Street	Address Line 2:

	○ The updated SSO inve	ntory can be found a	at the following publi	cly available website:	
⊠ Update	ed system map due in year 1	0 with information	from completed catch	nment investigations	
⊠ Provid					
IXI	ly stored and disposed of ca	atch basin cleanings	and street sweepings	so they did not discharge to	

$\boxtimes A$	all curbed roadways were swept at least once within the reporting period
	inclosed all road salt storage piles or facilities and implemented winter road maintenance procedures to ninimize the use of road salt
$\boxtimes \frac{\operatorname{Ir}}{\operatorname{tr}}$	implemented SWPPPs for all permittee owned or operated maintenance garages, public works yards, ransfer stations, and other waste handling facilities
$\boxtimes U$	pdated inventory of all permittee owned facilities as necessary
$\boxtimes C$	2&M programs for all permittee owned facilities have been completed and updated as necessary
1/1	mplemented all maintenance procedures for permittee owned facilities in accordance with O&M rograms
⊠ Ir	mplemented program for MS4 infrastructure maintenance to reduce the discharge of pollutants
⊠ Ir	aspected all permittee owned treatment structures (excluding catch basins)
_	al: If you would like to describe progress made on any incomplete requirements listed above or provide itional details, please use the box below:
Bacteria	a/ Pathogens (Combination of Impaired Waters Requirements and TMDL Requirements as Applicable)
	Requirements
Pub	lic Education and Outreach*
	annual message was distributed encouraging the proper management of pet waste, including noting any xisting ordinances where appropriate
	termittee or its agents disseminated educational material to dog owners at the time of issuance or enewal of dog license, or other appropriate time
1 1	rovided information to owners of septic systems about proper maintenance in any catchment that ischarges to a water body impaired for bacteria
	☐ This is not applicable because there are no septic systems present
	ablic education messages can be combined with other public education requirements as applicable (see endix F and H for more information)
	al: If you would like to describe progress made on any incomplete requirements listed above or provide itional details, please use the box below:
	n (Combination of Impaired Waters Requirements and TMDL Requirements as Applicable)

Page 3

### **Annual Requirements**

Town of Sutton

Public Education and Outreach\*

Distributed an annual message in the spring (April/May) that encourages the proper use and disposal of grass clippings and encourages the proper use of slow-release fertilizers

Town of Sutton
Distributed an annual message in the summer (June/July) encouraging the proper management of pet waste, including noting any existing ordinances where appropriate
Distributed an annual message in the fall (August/September/October) encouraging the proper disposal of leaf litter
* Public education messages can be combined with other public education requirements as applicable (see Appendix $F$ and $H$ for more information)
Good Housekeeping and Pollution Prevention for Permittee Owned Operations  Increased street sweeping frequency of all municipal owned streets and parking lots subject to Permit part 2.3.7.a.iii.(c) to a minimum of two times per year (spring and fall)
Structural BMPs
Installed a structural BMP as a demonstration project within the drainage area of the water quality limited water or its tributaries. The type of BMP installed is (e.g. biofiltration):
Any structural BMPs listed in Attachment 3 to Appendix F already existing or installed in the regulated area by the permittee or its agents was tracked and the nitrogen removal by the BMP was estimated consistent with Attachment 3 to Appendix F. The BMP type, total area treated by the BMP, the design storage volume of the BMP, and the estimated nitrogen removed in mass per year by the BMP were documented.
○ No BMPs were installed
<ul> <li>The above referenced BMP information is attached to the email submission</li> </ul>
The above referenced BMP information can be found at the following publicly available website:
See below
Total estimated nitrogen removed in lbs/year from the installed BMPs: 0
<i>Optional:</i> If you would like to describe progress made on any incomplete requirements listed above or provide any additional details, please use the box below:
Only a very small portion of the Town is located within the Long Island Sound watershed, none of which is considered regulated urbanized area. Thus, the Town is not obligated to meet any of the requirements for the Long Island Sound watershed and no further actions are anticipated
Phosphorus (Combination of Impaired Waters Requirements and TMDL Requirements as Applicable)
Annual Requirements
Public Education and Outreach*
Distributed an annual message in the spring (April/May) encouraging the proper use and disposal of grass clippings and encouraging the proper use of slow-release and phosphorus-free fertilizers
Distributed an annual message in the summer (June/July) encouraging the proper management of pet waste, including noting any existing ordinances where appropriate
Distributed an annual message in the fall (August/September/October) encouraging the proper disposal of leaf litter

Town of Sutton Page 5 \* Public education messages can be combined with other public education requirements as applicable (see *Appendix H and F for more information)* Good Housekeeping and Pollution Prevention for Permittee Owned Operations Increased street sweeping frequency of all municipal owned streets and parking lots subject to Permit part 2.3.7.a.iii.(c) to a minimum of two times per year (spring and fall) Structural BMPs Installed a structural BMP as a demonstration project within the drainage area of the water quality limited water or its tributaries. The type of BMP installed is (*e.g. biofiltration*): See below Any structural BMPs already existing or installed in the regulated area by the permittee or its agents was tracked and the phosphorus removal by the BMP was estimated consistent with Attachment 3 to Appendix F. The BMP type, total area treated by the BMP, the design storage volume of the BMP, and the estimated phosphorus removed in mass per year by the BMP were documented. ○ No BMPs were installed • The above referenced BMP information is attached to the email submission The above referenced BMP information can be found at the following publicly available

*Optional:* If you would like to describe progress made on any incomplete requirements listed above or provide any additional details, please use the box below:

Total estimated phosphorus removed in **lbs/year** from the installed BMPs: 22.8

The Town has constructed a number of stormwater BMPs within the Manchaug Pond watershed, a waterbody that discharges to the Blackstone River. Most projects were funded by a combination of 604b and s319 grant funding. During Year 7, the Town completed a comprehensive reassessment of these BMPs to determine which may need maintenance, as well as calculated pollutant removals provided by each.

### Solids, Oil and Grease (Hydrocarbons), or Metals

website:

#### **Annual Requirements**

Good Housekeeping and Pollution Prevention for Permittee Owned Operations

- Increased street sweeping frequency of all municipal owned streets and parking lots to a schedule that targets areas with potential for high pollutant loads
  - The street sweeping schedule is attached to the email submission
  - The street sweeping schedule can be found at the following publicly available website:

Included as an appendix in the SWMP Plan, available for download at: https://www.suttonma.org/highway-department

Prioritized inspection and maintenance for catch basins to ensure that no sump shall be more than 50 percent full; Cleaned catch basins more frequently if inspection and maintenance activities indicated excessive sediment or debris loadings

<i>Optional:</i> If you would like to describe progress made on any incomplete requirements listed above or provide any additional details, please use the box below:
Street Sweeping - all streets were swept once during Year 7.
Increased Sweeping for High Pollutant Loads - this was determined not to be necessary for the Town as these areas are not observed to accumulate more sediment and debris than other areas within the Town.
Optional: Use the box below to provide any additional information you would like to share as part of your self-assessment:

### Part III: Receiving Waters/Impaired Waters/TMDL

Have you made any	changes to your	lists of receiving	waters, outfalls,	or impairments	since the NOI was
submitted?					

YesNo

If yes, describe below, including any relevant impairments or TMDLs:

The Town has determined it is subject to the following additional TMDL and Impaired Waters requirements: -Blackstone River (MA51-03), bacteria water quality impairments requirements (Appendix H, Part III)

The following changes were made that do not affect TMDL and Impaired Waters requirements:

- -Hudson Pond (MA42029), nutrient/eutrophication biological indicators impairment added to 303(d) list
- -Sutton Falls (MA51163), harmful algal blooms impairment added to 303(d) list

### **Part IV: Minimum Control Measures**

Please fill out all of the metrics below. If applicable, include in the description who completed the task if completed by a third party.

MCM1: Public Education
Number of educational messages completed during this reporting period: 1
Below, report on the educational messages completed during this reporting period. For the measurable goal(s) please describe the method/measures used to assess the overall effectiveness of the educational program.  BMP: Pet Waste Informational Brochure
Message Description and Distribution Method:
Distributed information regarding the proper disposal of pet waste with all dog licenses and renewals.
Targeted Audience: Residents
Responsible Department/Parties: Town Clerk
Measurable Goal(s):
Provide informational brochure/flyer with all applications or renewals. The Town distributed approximately 1,000 flyers during Permit Year 7.
Message Date(s): Continuous / Ongoing
Message Completed for: Appendix F Requirements ⊠ Appendix H Requirements ⊠
Was this message different than what was proposed in your NOI? Yes ○ No ●
If yes, describe why the change was made:

Add an Educational Message

### **MCM2: Public Participation**

Describe the opportunity provided for public involvement in the development of the Stormwater Management Program (SWMP) **during this reporting period**:

SWMP Plan for Download - The Town has posted the SWMP Plan and other relevant information on Town website along with contact information to allow for public comment.

MCM3: Illicit Discharge Detection and Elimination (IDDE)  Sanitary Sewer Overflows (SSOs) Check off the box below if the statement is true.  This SSO section is NOT applicable because we DO NOT have sanitary sewer  Below, report on the number of SSOs identified in the MS4 system and removed during this reporting perion  Number of SSOs identified:  Number of SSOs removed:  Number of SSOs removed:  Percent of Phase II map complete:  All known outfalls, stormwater BMPs, and receiving waterbodies with impairments have been mapped to date. Initial catchment delineations have also been completed based on topographic mapping and available stormwater system information, and are being refined as additional field information is collected during catchment investigations. The Town has also substantially mapped catch basins and manholes, and is work to complete mapping of piping connectivity. Mapping of open channel conveyances and interconnections with other MS4s (e.g. DOT) is ongoing, and it is expected that this will continue as part of DOT's own	Town of Sutton	Page 9

napping efforts to be completed under a future TS4 permit. The Town is also working to identify data gans		
its drainage mapping (e.g., catch basins without piping, disconnected drainage networks, etc.) and is actively	mapping efforts to be completed under a future TS4 permit. The Town is also working to ic	

mapping and investigating these. Any new infrastructure discovered through this process will be mapped and screened as necessary by the end of Year 10.

#### **Screening of Outfalls/Interconnections**

If conducted, please submit any outfall monitoring results from this reporting period. Outfall monitoring results should include the date, outfall/interconnection identifier, location, weather conditions at time of sampling, precipitation in previous 48 hours, field screening parameter results, and results from all analyses. Please also include the updated inventory and ranking of outfalls/interconnections based on monitoring results.

- O No outfalls were inspected
- The above referenced outfall screening data is attached to the email submission

0	The above referenced outfall screening data can be found at the following publicly available website:
Below, report	on the number of outfalls/interconnections screened during this reporting period.
	Number of outfalls screened: 135
Below, report	on the percent of outfalls/interconnections screened to date.
	Percent of outfalls screened: 92
Optional: Pro	vide additional information regarding your outfall/interconnection screening:
<b>Catchment In</b>	vestigations
If conducted, p	Also include the presence or absence of System Vulnerability Factors for each catchment.
	No catchment investigations were conducted
•	The catchment investigation data is attached to the email submission

As-built Drawings Below, report on the number of as-built drawings received during this reporting period.
Number of as-built drawings received: 2
Optional: Enter any additional information relevant to the submission of as-built drawings:
Street Design and Parking Lots Report  Below, describe any changes made or planned to be made to local regulations and guidelines based on the report completed in Year 4:
No changes made to date. To be determined upon final release of the upcoming revised Phase II Permit and pending discussions between various departments and boards.
Green Infrastructure Report  Below, describe progress towards making green infrastructure practices allowable based on the report
completed in Year 4:  No changes made to date. To be determined upon final release of the upcoming revised Phase II Permit and pending discussions between various departments and boards."
Retrofit Properties Inventory

Below, list remaining permittee-owned properties that could be modified or retrofitted with BMPs to mitigate

Sutton Fire Station #3 - Recommend removing a portion of the lower parking lot and installing a sediment

impervious areas (must maintain a minimum of 5 sites in inventory until less than 5 sites remain):

Town of Sutton

Page 12

forebay and infiltration basin. The installation of a double grate catch basin and berm will direct flow into the BMP. One of the existing catch basins can be modified to act as an outlet structure.

Sutton Highway Department - Recommend removing a portion of the parking lot and installing a sediment forebay and infiltration basin. Regrading and paving the parking lot to direct sheet flow into the basin. The basin will also collect sheet flow from Pleasant Valley Road.

Sutton Police Department - While the police department property has extensive existing drainage infrastructure, off-site flows from the intersection of Central Turnpike and Putnam Hill Road have begun to erode the edge of pavement. Recommend installing a stone infiltration trench along the edge of roadway with a perforated collection pipe that connects to an existing catch basin.

Sports Field Parking Lot - Recommend repaying the parking lot and installing a bioretention swale along the southern side of the parcel. This swale will capture runoff via sheet flow and discharge water via a level spreader. Optional porous pavement for the parking stalls.

Sutton Fire Station #3 - Recommend installing a small rain garden to capture and treat runoff from an existing single catch basin in the parking lot. Additionally, catch basins can be installed near the intersection of Manchaug Road and Reservoir Avenue to capture stormwater runoff. This flow could be piped to an infiltration basin with sediment forebay.

Below, list all properties that have been modified or retrofitted with BMPs to mitigate impervious area that were inventoried as part of 2.3.6.d of the permit and the type of BMP(s) implemented. Non-MS4 owned properties that have been modified or retrofitted with BMPs to mitigate impervious area may also be listed, but must be indicated as non-MS4.

The Town has constructed a number of stormwater BMPs within the Manchaug Pond watershed, a waterbody that discharges to the Blackstone River. Most projects were funded by a combination of 604b and s319 grant funding. During Year 7, the Town completed a comprehensive reassessment of these BMPs to determine which may need maintenance, as well as calculated pollutant removals provided by each.

### MCM6: Good Housekeeping

#### **Catch Basin Cleaning**

Below, report on the number of catch basins inspected and cleaned, along with the total volume of material removed from the catch basins during this reporting period.

Number of catch basins inspected: 250

Number of catch basins cleaned: 250

Total volume or mass of material removed from all catch basins: 25

Below, report on the total number of catch basins in the MS4 system.

Total number of catch basins: 1,168

### If applicable:

Report on the actions taken if a catch basin sump is more than 50% full during two consecutive routine inspections/cleaning events:

Catch basin and street sweeping was performed similarly to last year, however, actual Year 7 quantities are unavailable. The previous Highway Superintendent departed the position earlier this spring, and the current Superintendent has only been with the Town for approximately one month. Year 7 reporting quantities are

approximate and estimated based off of Year 6 quantit	ies.	
Street Sweeping		
Report on street sweeping completed during this repor	<b>ting period</b> using <u>one</u> of the three metric	es below.
Number of miles cleaned: 400		
O Volume of material removed: 60	cubic yards	
O Weight of material removed:	[Select Units]	
Stormwater Pollution Prevention Plan (SWPPP) Below, report on the number of site inspections for face reporting period.  Number of site inspections completed:	•	luring this
Describe any corrective actions taken at a facility with	a SWPPP:	
Not applicable, no corrective actions have been taken		
Additional	Information	
Monitoring or Study Results		
Results from any other stormwater or receiving water reporting period not otherwise mentioned above, wher permit effectiveness must be attached.		_
<ul><li>Not applicable</li></ul>		
<ul> <li>The results from additional reports or s</li> </ul>	tudies are attached to the email submissi-	on

The results from additional reports or studies can be found at the following publicly available

Town of Sutton	Page 15
If such monitoring or studies were conducted on your behalf or if monitoring or studies centities were reported to you, a brief description of the type of information gathered or redescribed below:	•
Additional Information	
Enter any additional information relevant to your stormwater management program implementation period. Include any BMP modifications made by the MS4 if not already discussions are provided in the stormwater of the program implementation of the provided in the stormwater of the program implementation of the provided in the pr	_

#### Year 8

#### **Activities Planned for Next Reporting Period**

Please confirm that your SWMP has been, or will be, updated to comply with all applicable permit requirements including but not limited to the year 8 requirements summarized below. (Note: impaired waters and TMDL requirements are not listed below)

Yes, I agree |

#### **Annual Requirements**

- Annual report submitted and available to the public
- Annual opportunity for public participation in review and implementation of SWMP
- Keep records relating to the permit available for 5 years and make available to the public
- Properly store and dispose of catch basin cleanings and street sweepings so they do not discharge to receiving waters
- Annual training to employees involved in IDDE program
- Update inventory of all known locations where SSOs have discharged to the MS4
- Continue public education and outreach program
- Update outfall and interconnection inventory and priority ranking and include data collected in connection with the dry weather screening and other relevant inspections conducted
- Implement IDDE program
- Review site plans of construction sites as part of the construction stormwater runoff control program
- Conduct site inspection of construction sites as necessary

- Inspect and maintain stormwater treatment structures
- Log catch basins cleaned or inspected
- Sweep all curbed streets at least annually
- Continue investigations of catchments associated with Problem Outfalls
- Implemented SWPPPs for all permittee owned or operated maintenance garages, public works yards, transfer stations, and other waste handling facilities
- Review inventory of all permittee owned facilities in the categories of parks and open space, buildings and facilities, and vehicles and equipment; update if necessary
- Review O&M programs for all permittee owned facilities; update if necessary
- Implement all maintenance procedures for permittee owned facilities in accordance with O&M programs
- Implement program for MS4 infrastructure maintenance to reduce the discharge of pollutants
- Enclose all road salt storage piles or facilities and implemented winter road maintenance procedures to minimize the use of road salt
- Review as-built drawings for new and redevelopment to ensure compliance with post construction bylaws, regulations, or regulatory mechanism consistent with permit requirements
- Inspect all permittee owned treatment structures (excluding catch basins)
- Identify additional permittee-owned properties that could potentially be modified or retrofitted with BMPs to reduce impervious areas so that the permittee maintains a minimum of 5 sites in their inventory, until such a time when the permittee has less than 5 sites remaining

Provide any additional details on activities planned for permit year 8 below:							

### Part V: Certification of Small MS4 Annual Report 2025

#### 40 CFR 144.32(d) Certification

I certify under penalty of law that this document and all attachments were prepared under my direction or supervision in accordance with a system designed to assure that qualified personnel properly gather and evaluate the information submitted. Based on my inquiry of the person or persons who manage the system, or those persons directly responsible for gathering the information, I certify that the information submitted is, to the best of my knowledge and belief, true, accurate, and complete. I am aware that there are significant penalties for submitting false information, including the possibility of fine and imprisonment for knowing violations.
