#### Notice of Intent (NOI) for coverage under Small MS4 General Permit

#### Part II: Summary of Receiving Waters

Please list the waterbody segments to which your MS4 discharges. For each waterbody segment, please report the number of outfalls discharging into it and, if applicable, any impairments.

Massachusetts list of impaired waters: Massachusetts 2014 List of Impaired Waters- http://www.mass.gov/eea/docs/dep/water/resources/07v5/14list2.pdf

Check off relevant pollutants for discharges to impaired waterbodies (see above 303(d) lists) without an approved TMDL in accordance with part 2.2.2.a of the permit. List any other pollutants in the last column, if applicable.

Waterbody segment that receives flow from the MS4	Number of outfalls into receiving water segment	Chloride	Chlorophyll-a	Dissolved Oxygen/ DO Saturation	Nitrogen	Oil & Grease/ PAH	Phosphorus	Solids/TSS/	E. coli	Enterococcus	Other pollutant(s) causing impairments
Unnamed Brook (Harding Road)	3										
MA 95-33 Acushnet River	6			$\boxtimes$							Debris/floatables/trash, color, fecal coliform, polychlorinated biphenyls, taste and odor

#### Part III: Stormwater Management Program Summary

Identify the Best Management Practices (BMPs) that will be employed to address each of the six Minimum Control Measures (MCMs). For municipalities/organizations whose MS4 discharges into a receiving water with an approved Total Maximum Daily Load (TMDL) and an applicable waste load allocation (WLA), identify any additional BMPs employed to specifically support the achievement of the WLA in the TMDL section at the end of part III.

For each MCM, list each existing or proposed BMP by category and provide a brief description, responsible parties/departments, measurable goals, and the year the BMP will be employed (public education and outreach BMPs also requires a target audience). **Use the drop-down menus in each table or enter your own text to override the drop down menu.** 

#### MCM 1: Public Education and Outreach

#### Part IV: Notes and additional information

Use the space below to indicate the part(s) of 2.2.1 and 2.2.2 that you have identified as not applicable to your MS4 because you do not discharge to the impaired water body or a tributary to an impaired water body due to nitrogen or phosphorus. Provide all supporting documentation below or attach additional documents if necessary. Also, provide any additional information about your MS4 program below.

1) Where a "beginning year" is requested we have listed the first year of the applicable fiscal year. Fiscal years run from July 1 to June 30 and correspond to permit years (i.e. permit year 1 is 2018).
2) For the purposes of NOI outfall mapping, "receiving waters" are considered as waterbodies and wetlands delineated by the USGS 25k hydrography data layers, which consists of hydrographic (water-related) features including surface waters (rivers, streams, lakes, ponds, springs, impoundments, estuaries, wetlands, coastal waters and vernal pools). The number of outfalls into a receiving water segment listed in Part II: Summary of Receiving Waters include those discharging within a 100' of a wetland or 200' of a surface water. All other outfalls are considered to be upland of receiving waters and are included in the map for use by the Town only.
3) According to Appendix C - Endangered Species Act Eligibility Guidance and the IPaC report, the project meets USFWS Criteria B. A letter requesting concurrence with this and the determination of "may affect, not likely to adversely affect" for the Town of Fairhaven was submitted to USFWS on August 23, 2018. A letter of concurrence from USFWS is expected and will be submitted upon receipt to complete the ESA determination.

#### Part V: Certification

I certify under penalty of law that this document and all attachments were prepared under my direction or supervision in accordance with a system designed to assure that qualified personnel properly gather and evaluate the information submitted. Based on my inquiry of the person or persons who manage the system, or those persons directly responsible for gathering the information, I certify that the information submitted is, to the best of my knowledge and belief, true, accurate, and complete. I am aware that there are significant penalties for submitting false information, including the possibility of fine and imprisonment for knowing violations.

Name:	Title:	
Signature:	Date:	
[To be signed according to Appendix B, Subparagraph B.11, Standard Condition	ons]	
Note: When prompted during signing, save the document under	er a new file name	

#### **NOI Submission**

Please submit the form electronically via email using the "Submit by Email" button below or send in a CD with your completed NOI. You may also print and submit via mail using the address below if you choose not to submit electronically. The outfall map required in Part I of the NOI (if applicable) can be submitted electronically as an email attachment OR as a paper copy.

Permittees that choose to submit their NOI electronically by email or by mailing a CD with the completed NOI form to EPA, will be able to download a partially filled Year 1 Annual Report at a later date from EPA.

Submit by email using this button. Or, send an email with attachments to: <a href="mailto:stormwater.reports@epa.gov">stormwater.reports@epa.gov</a>

Re:

MS4 NOI Fairhaven, MA

Dear Mr. Tedder:

Enclosed please find the MS4 NOI for the Town of Fairhaven, MA.

The submittal is complete except for the signatory page. As Fairhaven is a rare community, where there are two elected bodies who oversee portions of Public Works activities, this document needs to be signed by both the Chairman of the Selectman as well as the Chairman of the Board of Public Works.

The signing of this document, by both elected Boards, is scheduled for October 1, 2018.

So as to not miss the required deadline of submittal, we are forwarding the MS4 NOI and then will submit the signatory page a day or two following.

Should you have any questions, please don't hesitate to contact me at 508-979-4031.

Sincerely,

Vincent D. Furtado

Public Works Superintendent

Fairhaven, MA

Re: Project Review Request, NPDES MS4 Submittal, Fairhaven, Massachusetts, 05E1NE00-2018-SLI-2761

We have reviewed the referenced project using the Environmental Protection Agency's (EPA) project review process for the Town of Fairhaven Municipal Separate Storm Sewer System (MS4) and have followed all guidance and instructions in completing the review. We completed our review on August 2, 2018 and are submitting our project package in accordance with the instructions for further review. The U.S. Fish and Wildlife Service's (Service) Information for Planning and Consultation (IPaC) species list indicated these species may be present in the project area: Northern Long-eared Bat, Roseate Tern, and Red Knot. We are submitting this letter as a non-Federal representative of the EPA pursuant to the requirements of the EPA's process for NPDES/MS4 permits.

Our proposed action consists of: public education and outreach, public involvement and participation, investigation for illicit discharge detection and elimination programs, outfall inspection and monitoring, procedures and regulations for stormwater runoff control, good housekeeping and pollution prevention for municipal facilities and MS4 infrastructure operations and maintenance such as cleaning catch basins and drainage pipes and street sweeping. There are no new structural BMPs proposed at this time and any new BMP construction will be evaluated for effect on endangered or threatened species at the time it is proposed.

The location action area is identified on the enclosed map *Town of Fairhaven, MA NPDES MS4 Submittal* "Biological Evaluation" Appendix B — MS4 Area Map.

Permit implementation will begin in the fall of 2018 and the permit has an expiration date of June 30, 2023. This is a request for review by the Service pursuant to section 7 of the Endangered Species Act. We determined that the project may affect, but is not likely to adversely affect the above listed species, because:

- No field work or alteration of any potential habitat is included in activities covered under this permit
- No new construction is proposed under this permit
- Operations and maintenance work covered by this permit would only affect previously disturbed primarily urbanized areas, where the chance of encountering any of the subject species is discountable
- All stormwater discharges are pre-existing and previously permitted by the EPA

U.S. Fish and Wildlife Service August 23, 2018 Page 2 of 2

> Although discharges from the project may reach the environment used by these species, the project implements BMPs to reduce pollutants to the extent the discharges are not known to have measureable impacts on these species, their habitat, or the food they eat.

The enclosed project package provides the information about the species and/or critical habitat considered in our review, and we identified our determinations for the resources that may be affected by the project. We request you concur with our determination that the project may affect, but is not likely to adversely affect the species described above.

For additional information, please contact Melissa Recos at the address listed below, by phone at 781-255-1982, or mrecos@beta-inc.com.

Very truly yours, BETA Group, Inc.
