**BY FAX:** 617-918-0329  
Attn: David Dickerson (HBO)

EPA's 2006 Supplemental Engineering Evaluation and Cost Analysis is a study of the vacant Aerovox site's contamination and an analysis of five short-term cleanup options which all assume continued commercial/industrial use. It recommends "New Alternative #1" which calls for the building's demolition and the disposal of the demolition waste on-site under a protective cap. The full report is available for review at:

- Wilkes Branch of the New Bedford Free Library: 1911 Acushnet Ave. 508-991-6214
- EPA-New England's Superfund Records Center, 1 Congress St., Boston 617-918-1413
