RE: Central Landfill Superfund Site, Johnston, Rhode Island  
Operable Unit 2 - Surface Water Flow Monitoring Program; and  
Proposed Revised Schedule for Completion of the RI/FS

Dear Mr. aRusso:

The Office of Waste Management has conducted a review of the *Operable Unit 2 - Surface Water Flow Monitoring Program*, dated June 1997 for the Central Landfill Site located in Johnston, Rhode Island. As a result of this review, the Office does not have any comments on the document at this time.

This Office has also completed its review of the revised project schedule that GZA proposed in Progress Report No. 27. Although the Office is concerned with the length of the delay, we will accept the proposed schedule since it appears that the cause of the delay was beyond RIRRC's control. We are look forward to receiving the Remedial Investigation and Risk Assessment Reports on 12 September 1997 and the Feasibility Study Report on 31 October 1997.

If you have any questions please feel free to contact myself or Matt DeStefano at (401) 277-3872.

Sincerely,

A handwritten signature in cursive script that reads "Laurie A. Sclama".

Laurie A. Sclama, Engineer  
Office of Waste Management
