GZA's recommendation for the Deep Well (MW97-ML10) installation zones

Dear Mr. ^{Dennis} aRusso:

We have received GZA's 24th Progress Report (dated February 19, 1997). The progress report contained GZA's recommended well installation zones for the deep multi-level well, MW97-ML10. EPA has reviewed this technical information in this report and, after consulting with our oversight contractor, concurs with GZA's recommendations found in the report. Therefore, EPA approves of the recommended well installation zones. It is my understanding that DEM will notify you of their findings in a separate letter.

With this approval, we anticipate that GZA can proceed immediately with the deep well drilling. Please call me if you have any questions. My number is (617)573-5779.

Sincerely,

A handwritten signature in cursive script, appearing to read "John J. Courcier".

John J. Courcier
Remedial Project Manager
