Boston, MA 02114

SDMS DocID **273455**

Dear Ms. Krasko:

I received your letter requesting copies of the HEC-RAS hydraulic/hydrology model developed for the Woonasquatucket River Dam Removal Flood Study in Providence, Rhode Island. The enclosed CD includes the models for both the existing conditions and proposed conditions. These models were developed using existing FEMA flood maps and survey data collected at Rising Sun Mill Dam, Paragon Dam, and Atlantic Mill Dam. EA Consultants performed the topographic survey at these sites and developed the models.

NRCS believes the data and the models to be current and accurate. If you modify these models, it is your responsibility to verify their accuracy.

Please call me at (401) 822-8822 should you have any questions or need further information.

Sincerely,

A handwritten signature in black ink, appearing to read "Meghan Walter".

Meghan Walter
Civil Engineer
