Hi John:

Pam Sherrill notified us yesterday that the Town has decided that it will no longer consider the potential location of a CDF at the DPW property. She sent a notice that the January 11th community meeting will be cancelled and I spoke with her yesterday to learn more. It sounds like the Mayor and Town Council are struggling with a number of regulatory issues around Central Landfill and that pursuing further disposal of material in Johnston is not in the Town's best interest. For this reason, they have requested that we cease work on the reuse assessment. This is unfortunate, as we had definitely made good progress with town staff internally on reuse concepts for the DPW property.

I let Anna know earlier today and suggested that we plan for a call next week to discuss where to go from here. It may be helpful to have you join that call as well. I'll keep you in the loop on timing. I hope you have a good New Year.

Best,

Matt Robbie
