Mr. Nick Pangaro
GCA Corporation
Technology Division
213 Burlington Road
Bedford, Massachusetts 01730

Dear Mr. Pangaro:

At the request of Ms. Jackie Prince, I am sending you validated data for the New Bedford Site. Included are: PCB and inorganic data from the GZA grid sampling program; PCB air data from the NUS ambient air study; and PCB water data from the Battelle sampling program. Location maps for each sampling program are also enclosed.

None of the data packages enclosed represent complete packages. As the remaining data are validated I will forward them to you for inclusion in your data base.

If you have any questions or need additional information, please call me at 412-788-1080.

Very truly yours,

Robin L. Smith
