Subject Re: NB Harbor ESD for Temp. Storage in Cell #1 

Hi Kerri,

Thanks for looking at the ESD! I'm going to have Elaine Stanley try and answer your question in more detail as she has more of the specifics. I can say in general though that a few rounds of excavated sediments placed in that cell since 2000 have been removed, what we're looking to continue storing temporarily in Cell #1 now, are sediments from last year's shoreline excavation efforts by the old Aerovox Mill. Hope we can help clarify!

Sincerely,

Jeanethe

Subject NB Harbor ESD for Temp. Storage in Cell #1

Hi Jeanethe-

I'm reviewing the ESD for NB Harbor and I was wondering if you could explain how Cell #1 has been used for temporary storage since 2000. Pages 5-6 list the PCB-contaminated sediments that have been placed into Cell #1 since 2000, but have any of those materials been removed, or are they still in Cell #1 and considered to be in temporary storage?

Thank you for your help.
Kerri
