Public Comment Period Extended for Upper and Lower New Bedford Harbor Superfund Site

The EPA has extended the public comment period by 45 days for the proposed cleanup plan for the upper and lower harbor areas of the New Bedford Harbor Superfund Site. The extension will allow the public more time to offer comments to the EPA's preferred cleanup plan as well as the other alternatives evaluated for addressing site contamination.

The closing date of the public comment period is now January 23, 1997. All written comments must be postmarked no later than January 23, 1997, and sent to David Dickerson, EPA Project Manager, JFK Federal Bldg., HBO, Boston, MA 02203.

A collection of all documents considered by the EPA in developing the cleanup plan and a summary of the proposed plan and alternatives are available at the Wilks Branch Library, 1911 Acushnet Avenue, New Bedford, MA (508) 991-6214, or at the EPA Record Center, 90 Canal Street, Boston, MA (617) 573-5729.
