Subject: New Bedford, S. Terminal -- Dec. 2 Mtg w/ State Postponed

Hi Everyone -- Just received a call from Ken Kimmell at Mass EEA saying that in order to develop the WF mitigation plan that we had discussed several weeks ago, they have found that they have to do a lot more field research of the harbor area, which they are currently conducting, to look at water depth, salinity levels, currents, etc. This field work is taking longer than expected, so he suggested that we postpone our meeting time on Dec. 2 for two weeks to Dec. 16 from 10am - noon. While we obviously can't do much on our analysis of WF mitigation without the plan currently being developed by the state, Ken did ask that we continue working on other portions of the enhanced remedy decision so that we'd be ready to issue a draft decision once we had an opportunity to analyze the more detailed WF mitigation plan. Please let Sally Burt and me know if it is difficult/impossible for you to arrange your schedule to accommodate this new meeting time.

Thanks,
Carl
