Subject: New Bedford South Terminal Project - Mitigation  
(See attached file: Christopher\_Boelke.vcf)

Matt,

NMFS has reviewed the proposed mitigation plan for the New Bedford South Terminal in New Bedford, MA. At this point, we have completed our technical review of the mitigation plan and do not have additional technical comments. Upon receipt and review of EPA's public NEPA document for the South Terminal Project, NMFS will provide comments - including EFH Conservation Recommendations - on all aspects of the proposed project, as necessary.

Thanks,  
Chris
