Classification: UNCLASSIFIED
Caveats: NONE

Paul,

An early copy of the proposed South Terminal project was reviewed by me and Geotechnical Branch. Because the proposed bulkheads will reduce flood storage behind the hurricane barrier the City was informed that they needed to mitigate and replace the storage that would be lost. We have not seen any proposed mitigation that would replace the storage lost.

Mike

Ed:

I am working on a short-term detail with EPA writing up the Section 10 and 404 Applicable or Relevant and Appropriate Requirements ("ARARS") Decision Document for the South Marine Terminal Project in New Bedford, Massachusetts. This project is currently being considered as a State Enhanced Remedy under the New Bedford Superfund Project.

As I am beginning to review the application for this project, I am trying to understand potential impacts from the State's ongoing navigation channel dredging on the New Bedford Federal Navigation Project ("FNP"). Has anyone in your office reviewed plans for the proposed South Marine Terminal project? If not, please let me know who to coordinate with. Thanks.

Paul Sneeringer
(978) 505-9216 (Office Cell Phone)

P.S. NOTE: I will be working at an alternate work cubicle in Safety while doing this EPA detail.
