Response to USEPA Letter9-24-10.doc

Attached please find our responses to EPA's requests for additional information. Two CD's containing the appendices referenced in this additional response will be hand delivered to Matt Schweisberg tomorrow.

Please note that the document does not contain a plan for further sampling of sediments. After you have had a chance to review the existing sampling data, we request a meeting between staff and our consultants to discuss that matter further. Other than that, I hope you will find this document responsive to the information you have requested; and be in a position to move forward on the review.

As always, thank you for your attention to this project and your engagement with us.

Kenneth L. Kimmell
