Classification: Small Quantity Generator

Hazardous Waste Summary:

Waste code: MA98
Waste name: OFF SPECIFICATION USED OIL FUEL THAT IS SHIPPED USING A HW MANIFEST

Waste code: D001
Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKEY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

Waste code: D008
Waste name: LEAD

Waste code: D009
Waste name: MERCURY

Waste code: D018
Waste name: BENZENE

Waste code: MA01

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

MA-EPICS - Massachusetts Environmental Protection Integrated Computer System

ICIS (Integrated Compliance Information System) is the Integrated Compliance Information System and provides a database that, when complete, will contain integrated Enforcement and Compliance information across most of EPA's programs. The vision for ICIS is to replace EPA's independent databases that contain Enforcement data with a single repository for that information. Currently, ICIS contains all Federal Administrative and Judicial enforcement actions. This information is maintained in ICIS by EPA in the Regional offices and it Headquarters. A future release of ICIS will replace the Permit Compliance System (PCS) which supports the NPDES and will integrate that information with Federal actions already in the system. ICIS also has the capability to track other activities occurring in the Region that support Compliance and Enforcement programs. These include; Incident Tracking, Compliance Assistance, and Compliance Monitoring.

Facility name: HESS CORPORATION 21504
Classification: Small Quantity Generator

Hazardous Waste Summary:

Waste code: D001
Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKEY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System

US National Pollutant Discharge Elimination System (NPDES) module of the Compliance Information System (ICIS) tracks surface water permits issued under the Clean Water Act. Under NPDES, all facilities that discharge pollutants from any point source into waters of the United States are required to obtain a permit. The permit will likely contain limits on what can be discharged, impose monitoring and reporting requirements, and include other provisions to ensure that the discharge does not adversely affect water quality.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

MA-EPICS - Massachusetts Environmental Protection Integrated Computer System

ICIS (Integrated Compliance Information System) is the Integrated Compliance Information System and provides a database that, when complete, will contain integrated Enforcement and Compliance information across most of EPA's programs. The vision for ICIS is to replace EPA's independent databases that contain Enforcement data with a single repository for that information. Currently, ICIS contains all Federal Administrative and Judicial enforcement actions. This information is maintained in ICIS by EPA in the Regional offices and its Headquarters. A future release of ICIS will replace the Permit Compliance System (PCS) which supports the NPDES and will integrate that information with Federal actions already in the system. ICIS also has the capability to track other activities occurring in the Region that support Compliance and Enforcement programs. These include; Incident Tracking, Compliance Assistance, and Compliance Monitoring.

Historical Generators:

Date form received by agency: 06/24/1980
Facility name: DN KELLEY & SON
Classification: Not a generator, verified

Hazardous Waste Summary:

Waste code: D001
Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKEY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

Waste name: A WASTE WHICH HAS A PH OF LESS THAN 2 OR GREATER THAN 12.5 IS CONSIDERED TO BE A CORROSIVE HAZARDOUS WASTE. SODIUM HYDROXIDE, A CAUSTIC SOLUTION WITH A HIGH PH, IS OFTEN USED BY INDUSTRIES TO CLEAN OR DEGREASE PARTS. HYDROCHLORIC ACID, A SOLUTION WITH A LOW PH, IS USED BY MANY INDUSTRIES TO CLEAN METAL PARTS PRIOR TO PAINTING. WHEN THESE CAUSTIC OR ACID SOLUTIONS BECOME CONTAMINATED AND MUST BE DISPOSED, THE WASTE WOULD BE A CORROSIVE HAZARDOUS WASTE.

Waste code: D003
Waste name: A MATERIAL IS CONSIDERED TO BE A REACTIVE HAZARDOUS WASTE IF IT IS NORMALLY UNSTABLE, REACTS VIOLENTLY WITH WATER, GENERATES TOXIC GASES WHEN EXPOSED TO WATER OR CORROSIVE MATERIALS, OR IF IT IS CAPABLE OF DETONATION OR EXPLOSION WHEN EXPOSED TO HEAT OR A FLAME. ONE EXAMPLE OF SUCH WASTE WOULD BY WASTE GUNPOWDER.

Waste code: F001
Waste name: THE FOLLOWING SPENT HALOGENATED SOLVENTS USED IN DEGREASING: TETRACHLOROETHYLENE, TRICHLOROETHYLENE, METHYLENE CHLORIDE, 1,1,1-TRICHLOROETHANE, CARBON TETRACHLORIDE, AND CHLORINATED FLUOROCARBONS; ALL SPENT SOLVENT MIXTURES/BLENDS USED IN DEGREASING CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE HALOGENATED SOLVENTS OR THOSE SOLVENTS LISTED IN F002, F004, AND F005, AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

Waste code: F002
Waste name: THE FOLLOWING SPENT HALOGENATED SOLVENTS: TETRACHLOROETHYLENE, METHYLENE CHLORIDE, TRICHLOROETHYLENE, 1,1,1-TRICHLOROETHANE, CHLOROBENZENE, 1,1,2-TRICHLORO-1,2,2-TRIFLUOROETHANE, ORTHO-DICHLOROBENZENE, TRICHLOROFLUOROMETHANE, AND 1,1,2-TRICHLOROETHANE; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE HALOGENATED SOLVENTS OR THOSE LISTED IN F001, F004, OR F005, AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

Waste code: F003
Waste name: THE FOLLOWING SPENT NON-HALOGENATED SOLVENTS: XYLENE, ACETONE, ETHYL ACETATE, ETHYL BENZENE, ETHYL ETHER, METHYL ISOBUTYL KETONE, N-BUTYL ALCOHOL, CYCLOHEXANONE, AND METHANOL; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONLY THE ABOVE SPENT NON-HALOGENATED SOLVENTS; AND ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONE OR MORE OF THE ABOVE NON-HALOGENATED SOLVENTS, AND, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THOSE SOLVENTS LISTED IN F001, F002, F004, AND F005, AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

Waste code: F005
Waste name: THE FOLLOWING SPENT NON-HALOGENATED SOLVENTS: TOLUENE, METHYL ETHYL KETONE, CARBON DISULFIDE, ISOBUTANOL, PYRIDINE, BENZENE, 2-ETHOXYETHANOL, AND 2-NITROPROPANE; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE NON-HALOGENATED SOLVENTS OR THOSE SOLVENTS LISTED IN F001, F002, OR F004; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Historical Generators:

Date form received by agency: 08/06/1980
Facility name: ST LUKES HOSPITAL
Classification: Small Quantity Generator

Hazardous Waste Summary:

Waste code: D001
Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKEY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

Waste code: D002
Waste name: A WASTE WHICH HAS A PH OF LESS THAN 2 OR GREATER THAN 12.5 IS CONSIDERED TO BE A CORROSIVE HAZARDOUS WASTE. SODIUM HYDROXIDE, A CAUSTIC SOLUTION WITH A HIGH PH, IS OFTEN USED BY INDUSTRIES TO CLEAN OR DEGREASE PARTS. HYDROCHLORIC ACID, A SOLUTION WITH A LOW PH, IS USED BY MANY INDUSTRIES TO CLEAN METAL PARTS PRIOR TO PAINTING. WHEN THESE CAUSTIC OR ACID SOLUTIONS BECOME CONTAMINATED AND MUST BE DISPOSED, THE WASTE WOULD BE A CORROSIVE HAZARDOUS WASTE.

Waste code: D003
Waste name: A MATERIAL IS CONSIDERED TO BE A REACTIVE HAZARDOUS WASTE IF IT IS NORMALLY UNSTABLE, REACTS VIOLENTLY WITH WATER, GENERATES TOXIC GASES WHEN EXPOSED TO WATER OR CORROSIVE MATERIALS, OR IF IT IS CAPABLE OF DETONATION OR EXPLOSION WHEN EXPOSED TO HEAT OR A FLAME. ONE EXAMPLE OF SUCH WASTE WOULD BY WASTE GUNPOWDER.

Aerometric Data (SAROAD). AIRS is the national repository for information concerning airborne pollution in the United States. AFS is used to track emissions and compliance data from industrial plants. AFS data are utilized by states to prepare State Implementation Plans to comply with regulatory programs and by EPA as an input for the estimation of total national emissions. AFS is undergoing a major redesign to support facility operating permits required under Title V of the Clean Air Act.

The NEI (National Emissions Inventory) database contains information on stationary and mobile sources that emit criteria air pollutants and their precursors, as well as hazardous air pollutants (HAPs).

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

Number of Days to Update: Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

STANDARD ENVIRONMENTAL RECORDS

Federal NPL site list

NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Proposed NPL: Proposed National Priority List Sites

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

NPL LIENS: Federal Superfund Liens

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

Federal Delisted NPL site list

DELISTED NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

Federal CERCLIS list

CERCLIS: Comprehensive Environmental Response, Compensation, and Liability Information System

CERCLIS contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). CERCLIS contains sites which are either proposed to or on the National Priorities List (NPL) and sites which are in the screening and assessment phase for possible inclusion on the NPL.

Federal CERCLIS NFRAP site List

CERCLIS-NFRAP: CERCLIS No Further Remedial Action Planned

Archived sites are sites that have been removed and archived from the inventory of CERCLIS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list this site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. This decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be a potential NPL site.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

Federal RCRA non-CORRACTS TSD facilities list

RCRA-TSDF: RCRA - Treatment, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

Federal RCRA generators list

RCRA-LQG: RCRA - Large Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

RCRA-SQG: RCRA - Small Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

RCRA-CESQG: RCRA - Conditionally Exempt Small Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Conditionally exempt small quantity generators (CESQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

| | Data Release Frequency: Varies |

ADDITIONAL ENVIRONMENTAL RECORDS

Local Brownfield lists

US BROWNFIELDS: A Listing of Brownfields Sites

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

Included in the listing are brownfields properties addresses by Cooperative Agreement Recipients and brownfields properties addressed by Targeted Brownfields Assessments. Targeted Brownfields Assessments-EPA's Targeted Brownfields Assessments (TBA) program is designed to help states, tribes, and municipalities--especially those without EPA Brownfields Assessment Demonstration Pilots--minimize the uncertainties of contamination often associated with brownfields. Under the TBA program, EPA provides funding and/or technical assistance for environmental assessments at brownfields sites throughout the country. Targeted Brownfields Assessments supplement and work with other efforts under EPA's Brownfields Initiative to promote cleanup and redevelopment of brownfields. Cooperative Agreement Recipients-States, political subdivisions, territories, and Indian tribes become Brownfields Cleanup Revolving Loan Fund (BCRLF) cooperative agreement recipients when they enter into BCRLF cooperative agreements with the U.S. EPA. EPA selects BCRLF cooperative agreement recipients based on a proposal and application process. BCRLF cooperative agreement recipients must use EPA funds provided through BCRLF cooperative agreement for specified brownfields-related cleanup activities.

Local Lists of Hazardous waste / Contaminated Sites

US CDL: Clandestine Drug Labs

A listing of clandestine drug lab locations. The U.S. Department of Justice ("the Department") provides this web site as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy. Members of the public must verify the accuracy of all entries by, for example, contacting local law enforcement and local health departments.

Other Ascertainable Records

RCRA-NonGen: RCRA - Non Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

UMTRA: Uranium Mill Tailings Sites

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

HIST FTTS: FIFRA/TSCA Tracking System Administrative Case Listing

A complete administrative case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

EDR PROPRIETARY RECORDS

EDR Proprietary Records

Manufactured Gas Plants: EDR Proprietary Manufactured Gas Plants

The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

CT MANIFEST: Hazardous Waste Manifest Data

Facility and manifest data. Manifest is a document that lists and tracks hazardous waste from the generator through transporters to a tsd facility.

Last EDR Contact: 12/21/2009
Next Scheduled EDR Contact: 04/05/2010
Data Release Frequency: Annually

Oil/Gas Pipelines: This data was obtained by EDR from the USGS in 1994. It is referred to by USGS as GeoData Digital Line Graphs from 1:100,000-Scale Maps. It was extracted from the transportation category including some oil, but primarily gas pipelines.

Electric Power Transmission Line Data

Source: PennWell Corporation
Telephone: (800) 823-6277

This map includes information copyrighted by PennWell Corporation. This information is provided on a best effort basis and PennWell Corporation does not guarantee its accuracy nor warrant its fitness for any particular purpose. Such information has been reprinted with the permission of PennWell.

Sensitive Receptors: There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

AHA Hospitals:

Source: American Hospital Association, Inc.
Telephone: 312-280-5991

The database includes a listing of hospitals based on the American Hospital Association's annual survey of hospitals.

Medical Centers: Provider of Services Listing

Source: Centers for Medicare & Medicaid Services
Telephone: 410-786-3000

A listing of hospitals with Medicare provider number, produced by Centers of Medicare & Medicaid Services, a federal agency within the U.S. Department of Health and Human Services.

Nursing Homes

Source: National Institutes of Health
Telephone: 301-594-6248

Information on Medicare and Medicaid certified nursing homes in the United States.

Public Schools

Source: National Center for Education Statistics
Telephone: 202-502-7300

The National Center for Education Statistics' primary database on elementary and secondary public education in the United States. It is a comprehensive, annual, national statistical database of all public elementary and secondary schools and school districts, which contains data that are comparable across all states.

Private Schools

Source: National Center for Education Statistics
Telephone: 202-502-7300

The National Center for Education Statistics' primary database on private school locations in the United States.

Flood Zone Data: This data, available in select counties across the country, was obtained by EDR in 2003 & 2009 from the Federal Emergency Management Agency (FEMA). Data depicts 100-year and 500-year flood zones as defined by FEMA.

NWI: National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002 and 2005 from the U.S. Fish and Wildlife Service.

Scanned Digital USGS 7.5' Topographic Map (DRG)

Source: United States Geologic Survey

A digital raster graphic (DRG) is a scanned image of a U.S. Geological Survey topographic map. The map images are made by scanning published paper maps on high-resolution scanners. The raster image is georeferenced and fit to the Universal Transverse Mercator (UTM) projection.

South Map: 41070-E8 NEW BEDFORD SOUTH, MA
Most Recent Revision: 1977

EDR's GeoCheck Physical Setting Source Addendum is provided to assist the environmental professional in forming an opinion about the impact of potential contaminant migration.

Assessment of the impact of contaminant migration generally has two principle investigative components:

1. Groundwater flow direction, and
2. Groundwater flow velocity.

Groundwater flow direction may be impacted by surface topography, hydrology, hydrogeology, characteristics of the soil, and nearby wells. Groundwater flow velocity is generally impacted by the nature of the geologic strata.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW DIRECTION INFORMATION

Groundwater flow direction for a particular site is best determined by a qualified environmental professional using site-specific well data. If such data is not reasonably ascertainable, it may be necessary to rely on other sources of information, such as surface topographic information, hydrologic information, hydrogeologic data collected on nearby properties, and regional groundwater flow information (from deep aquifers).

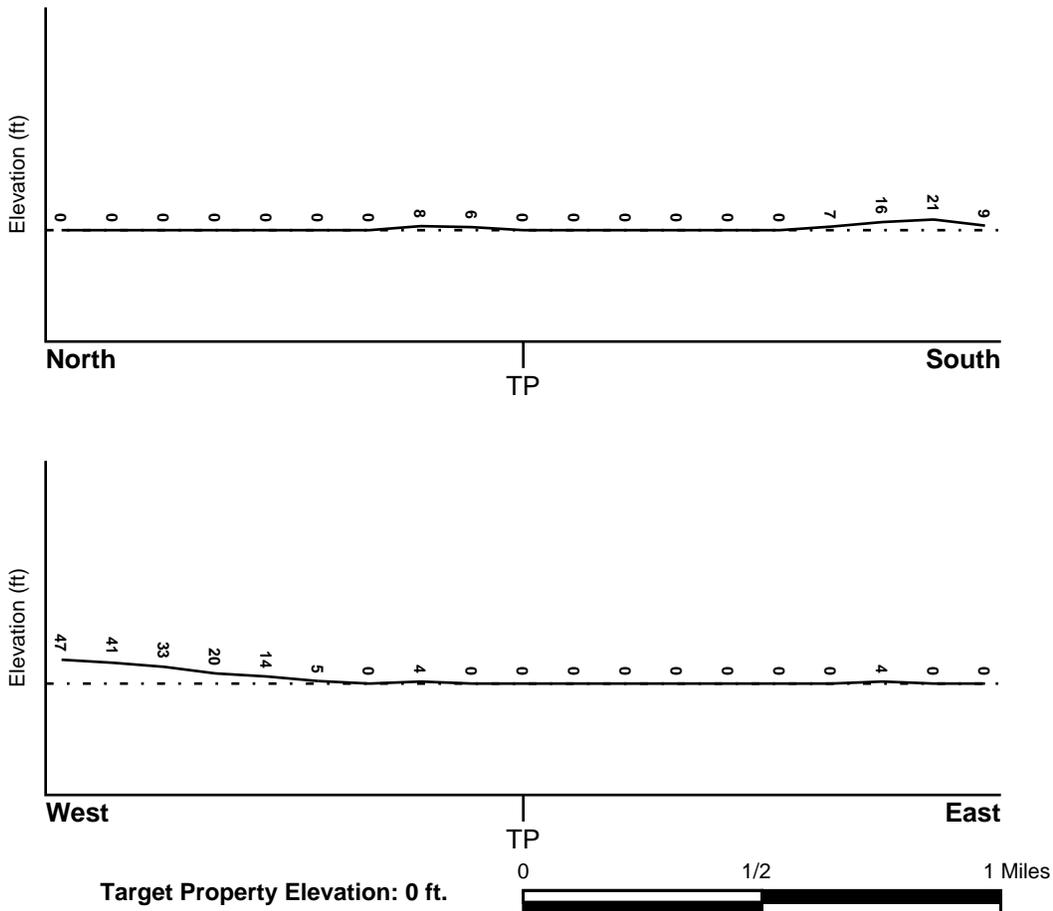

TOPOGRAPHIC INFORMATION

Surface topography may be indicative of the direction of surficial groundwater flow. This information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

TARGET PROPERTY TOPOGRAPHY

General Topographic Gradient: General East

SURROUNDING TOPOGRAPHY: ELEVATION PROFILES

Source: Topography has been determined from the USGS 7.5' Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

HYDROLOGIC INFORMATION

Surface water can act as a hydrologic barrier to groundwater flow. Such hydrologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Refer to the Physical Setting Source Map following this summary for hydrologic information (major waterways and bodies of water).

FEMA FLOOD ZONE

| | |
|----------------------------------------------|-------------------------------------------------------------------------------------|
| <u>Target Property County</u> BRISTOL, MA | <u>FEMA Flood Electronic Data</u> YES - refer to the Overview Map and Detail Map |
| Flood Plain Panel at Target Property: | 25005C - FEMA DFIRM Flood data |
| Additional Panels in search area: | Not Reported |

NATIONAL WETLAND INVENTORY

| | |
|---------------------------------------------------------|---------------------------------------------------------------------------------------|
| <u>NWI Quad at Target Property</u> NEW BEDFORD SOUTH | <u>NWI Electronic Data Coverage</u> YES - refer to the Overview Map and Detail Map |
|---------------------------------------------------------|---------------------------------------------------------------------------------------|

HYDROGEOLOGIC INFORMATION

Hydrogeologic information obtained by installation of wells on a specific site can often be an indicator of groundwater flow direction in the immediate area. Such hydrogeologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

AQUIFLOW®

Search Radius: 1.000 Mile.

EDR has developed the AQUIFLOW Information System to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted by environmental professionals to regulatory authorities at select sites and has extracted the date of the report, groundwater flow direction as determined hydrogeologically, and the depth to water table.

| <u>MAP ID</u> | <u>LOCATION FROM TP</u> | <u>GENERAL DIRECTION GROUNDWATER FLOW</u> |
|---------------|-------------------------|-------------------------------------------|
| 1 | 1/8 - 1/4 Mile WSW | VARIES |
| 17 | 1/2 - 1 Mile NE | VARIES |

For additional site information, refer to Physical Setting Source Map Findings.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW VELOCITY INFORMATION

Groundwater flow velocity information for a particular site is best determined by a qualified environmental professional using site specific geologic and soil strata data. If such data are not reasonably ascertainable, it may be necessary to rely on other sources of information, including geologic age identification, rock stratigraphic unit and soil characteristics data collected on nearby properties and regional soil information. In general, contaminant plumes move more quickly through sandy-gravelly types of soils than silty-clayey types of soils.

GEOLOGIC INFORMATION IN GENERAL AREA OF TARGET PROPERTY

Geologic information can be used by the environmental professional in forming an opinion about the relative speed at which contaminant migration may be occurring.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

DOMINANT SOIL COMPOSITION IN GENERAL AREA OF TARGET PROPERTY

The U.S. Department of Agriculture's (USDA) Soil Conservation Service (SCS) leads the National Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. The following information is based on Soil Conservation Service SSURGO data.

Soil Map ID: 1

Soil Component Name: Urban land

Soil Surface Texture:
Hydrologic Group: Not reported

Soil Drainage Class:
Hydric Status: Unknown

Corrosion Potential - Uncoated Steel: Not Reported

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

No Layer Information available.

Soil Map ID: 2

Soil Component Name: Udorthents

Soil Surface Texture: variable

Hydrologic Group: Class B - Moderate infiltration rates. Deep and moderately deep, moderately well and well drained soils with moderately coarse textures.

Soil Drainage Class:
Hydric Status: Unknown

Corrosion Potential - Uncoated Steel: Not Reported

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

| Soil Layer Information | | | | | | | |
|------------------------|----------|-----------|--------------------|----------------|--------------|-------------------------------------------------|--------------------|
| Layer | Boundary | | Soil Texture Class | Classification | | Saturated hydraulic conductivity micro m/sec | Soil Reaction (pH) |
| | Upper | Lower | | AASHTO Group | Unified Soil | | |
| 1 | 0 inches | 5 inches | variable | Not reported | Not reported | Max: 141.14 Min: 0.42 | Max: Min: |
| 2 | 5 inches | 59 inches | variable | Not reported | Not reported | Max: 141.14 Min: 0.42 | Max: Min: |

Soil Map ID: 3

Soil Component Name: Water

Soil Surface Texture: variable

Hydrologic Group: Class B - Moderate infiltration rates. Deep and moderately deep, moderately well and well drained soils with moderately coarse textures.

Soil Drainage Class:
Hydric Status: Partially hydric

Corrosion Potential - Uncoated Steel: Not Reported

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

No Layer Information available.

LOCAL / REGIONAL WATER AGENCY RECORDS

EDR Local/Regional Water Agency records provide water well information to assist the environmental professional in assessing sources that may impact ground water flow direction, and in forming an opinion about the impact of contaminant migration on nearby drinking water wells.

PHYSICAL SETTING SOURCE RECORDS SEARCHED

TOPOGRAPHIC INFORMATION

USGS 7.5' Digital Elevation Model (DEM)

Source: United States Geologic Survey

EDR acquired the USGS 7.5' Digital Elevation Model in 2002 and updated it in 2006. The 7.5 minute DEM corresponds to the USGS 1:24,000- and 1:25,000-scale topographic quadrangle maps. The DEM provides elevation data with consistent elevation units and projection.

Scanned Digital USGS 7.5' Topographic Map (DRG)

Source: United States Geologic Survey

A digital raster graphic (DRG) is a scanned image of a U.S. Geological Survey topographic map. The map images are made by scanning published paper maps on high-resolution scanners. The raster image is georeferenced and fit to the Universal Transverse Mercator (UTM) projection.

HYDROLOGIC INFORMATION

Flood Zone Data: This data, available in select counties across the country, was obtained by EDR in 2003 & 2009 from the Federal Emergency Management Agency (FEMA). Data depicts 100-year and 500-year flood zones as defined by FEMA.

NWI: National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002 and 2005 from the U.S. Fish and Wildlife Service.

HYDROGEOLOGIC INFORMATION

AQUIFLOW^R Information System

Source: EDR proprietary database of groundwater flow information

EDR has developed the AQUIFLOW Information System (AIS) to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted to regulatory authorities at select sites and has extracted the date of the report, hydrogeologically determined groundwater flow direction and depth to water table information.

GEOLOGIC INFORMATION

Geologic Age and Rock Stratigraphic Unit

Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - A digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

STATSGO: State Soil Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Services

The U.S. Department of Agriculture's (USDA) Natural Resources Conservation Service (NRCS) leads the national Conservation Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps.

SSURGO: Soil Survey Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Services (NRCS)

Telephone: 800-672-5559

SSURGO is the most detailed level of mapping done by the Natural Resources Conservation Services, mapping scales generally range from 1:12,000 to 1:63,360. Field mapping methods using national standards are used to construct the soil maps in the Soil Survey Geographic (SSURGO) database. SSURGO digitizing duplicates the original soil survey maps. This level of mapping is designed for use by landowners, townships and county natural resource planning and management.

PHYSICAL SETTING SOURCE RECORDS SEARCHED

LOCAL / REGIONAL WATER AGENCY RECORDS

FEDERAL WATER WELLS

PWS: Public Water Systems

Source: EPA/Office of Drinking Water

Telephone: 202-564-3750

Public Water System data from the Federal Reporting Data System. A PWS is any water system which provides water to at least 25 people for at least 60 days annually. PWSs provide water from wells, rivers and other sources.

PWS ENF: Public Water Systems Violation and Enforcement Data

Source: EPA/Office of Drinking Water

Telephone: 202-564-3750

Violation and Enforcement data for Public Water Systems from the Safe Drinking Water Information System (SDWIS) after August 1995. Prior to August 1995, the data came from the Federal Reporting Data System (FRDS).

USGS Water Wells: USGS National Water Inventory System (NWIS)

This database contains descriptive information on sites where the USGS collects or has collected data on surface water and/or groundwater. The groundwater data includes information on wells, springs, and other sources of groundwater.

STATE RECORDS

Massachusetts Geographic Information System (MassGIS) Datalayers

Source: Executive Office of Environmental Affairs

Public Water Supply Database: The Public Water Supply datalayer contains the locations of public community surface and groundwater supply sources and public non-community supply sources as defined in 310 CMR 22.00.

OTHER STATE DATABASE INFORMATION

Areas of Critical Environmental Concern Datalayer: The Areas of Critical Environmental Concern (ACEC) datalayer shows the location of areas that have been designated ACECs by the Secretary of Environmental Affairs. ACEC designation requires greater environmental review of certain kinds of proposed development under state jurisdiction within the ACEC boundaries. The ACEC Program is administered by the Department of Environmental Management (DEM) on behalf of the Secretary of Environmental Affairs. The Massachusetts Coastal Zone Management (MCZM) Office managed the original Coastal ACEC Program from 1978 to 1993, and continues to play a key role in monitoring coastal ACECs. Procedures for ACEC designation and the general policies governing the effects of designation are contained in the ACEC regulations (301 CMR 12.00). The ACEC datalayer has been compiled by MCZM and DEM and includes both coastal and inland areas.

EPA Designated Sole Source Aquifers Datalayer: The Sole Source Aquifer datalayer was compiled by the Department of Environmental Protection (DEP) Division of Water Supply (DWS). Seven Sole Source Aquifers have been designated by the US Environmental Protection Agency (EPA) for Massachusetts. A Sole Source Aquifer (SSA) is an aquifer designated by US EPA as the sole or principal source of drinking water for a given aquifer service area; that is, an aquifer which is needed to supply 50% or more of the drinking water for that area and for which there are no reasonably available alternative sources should that aquifer become contaminated. The aquifers were defined by a EPA hydrogeologist.

Aquifers Datalayer: MassGIS produced an aquifer datalayer composed of 20 individual panels, generally based on the boundaries of the major drainage basins. Areas of high and medium yield were mapped. This datalayer includes polygon attribute coding to help in the identification of areas in which cleanup of hazardous waste sites must meet drinking water standards, as defined in the Massachusetts Contingency Plan (MCP) (310 CMR 40.00000).

Non-Potential Drinking Water Source Areas: Non-Potential Drinking Water Source Areas (NPDWSA) are regulatory in nature, representing one of many considerations used in determining the standards to which ground water must be cleaned in the event of a release of oil or hazardous material. NPDWSAs are not based on existing water quality and do not indicate poor ambient conditions.

PHYSICAL SETTING SOURCE RECORDS SEARCHED

DEP Approved Zone IIs Datalayer: The Department of Environmental Protection (DEP) approved Zone IIs datalayer was compiled by the DEP Division of Water Supply (DWS). The database contains 281 approved Zone IIs statewide. As stated in 310 CMR 22.02, a Zone II is "that area of an aquifer which contributes water to a well under the most severe pumping and recharge conditions that can be realistically anticipated (180 days of pumping at safe yield, with no recharge from precipitation.) It is bounded by the groundwater divides which result from pumping the well and by the contact of the aquifer with less permeable materials such as till or bedrock. In some cases, streams or lakes may act as recharge boundaries. In all cases, Zone IIs shall extend up gradient to its point of intersection with prevailing hydrogeologic boundaries (a groundwater flow divide, a contact with till or bedrock, or a recharge boundary)." These data are used in association with the Public Water Supplies datalayer. The following describes certain unique features of this association.

- Any proposed new well which will pump at least 100,000 gallons per day must have a Zone II delineation completed and approved by DEP prior to the well coming on line.
- Additionally, a new source may not be on-line yet, but other, older wells may fall within its Zone II boundary.
- Further, existing wells must have a Zone II delineated as a condition of receiving a water withdrawal permit under the Water Management Act.

RADON

State Database: MA Radon
Source: Department of Health
Telephone: 413-586-7525
Radon Test Results

Area Radon Information

Source: USGS
Telephone: 703-356-4020
The National Radon Database has been developed by the U.S. Environmental Protection Agency (USEPA) and is a compilation of the EPA/State Residential Radon Survey and the National Residential Radon Survey. The study covers the years 1986 - 1992. Where necessary data has been supplemented by information collected at private sources such as universities and research institutions.

EPA Radon Zones

Source: EPA
Telephone: 703-356-4020
Sections 307 & 309 of IRAA directed EPA to list and identify areas of U.S. with the potential for elevated indoor radon levels.

2009 Enhancements to EDR City Directory Abstract

New for 2009, the EDR City Directory Abstract has been enhanced with additional information and features. These enhancements will make your city directory research process more efficient, flexible, and insightful than ever before. The enhancements will improve the options for selecting adjoining properties, and will speed up your review of the report.

City Directory Report. Three important enhancements have been made to the EDR City Directory Abstract:

1. *Executive Summary.* The report begins with an Executive Summary that lists the sources consulted in the preparation of the report. Where available, a parcel map is also provided within the report, showing the locations of properties researched.
2. *Page Images.* Where available, the actual page source images will be included in the Appendix, so that you can review them for information that may provide additional insight. EDR has copyright permission to include these images.
3. *Findings Listed by Location.* Another useful enhancement is that findings are now grouped by address. This will significantly reduce the time you need to review your abstracts. Findings are provided under each property address, listed in reverse chronological order and referencing the source for each entry.

Options for Selecting Adjoining Properties. Ensuring that the right adjoining property addresses are searched is one of the biggest challenges that environmental professionals face when conducting city directory historical research. EDR's new enhancements make it easier for you to meet this challenge. Now, when you place an order for the EDR City Directory Abstract, you have the following choices for determining which addresses should be researched.

1. *You Select Addresses and EDR Selects Addresses.* Use the "Add Another Address" feature to specify the addresses you want researched. Your selections will be supplemented by addresses selected by EDR researchers using our established research methods. Where available, a digital map will be shown, indicating property lines overlaid on a color aerial photo and their corresponding addresses. Simply use the address list below the map to check off which properties shown on the map you want to include. You may also select other addresses using the "Add Another Address" feature at the bottom of the list.
2. *EDR Selects Addresses.* Choose this method if you want EDR's researchers to select the addresses to be researched for you, using our established research methods.
3. *You Select Addresses.* Use this method for research based solely on the addresses you select or enter into the system.
4. *Hold City Directory Research Option.* If you choose to select your own adjoining addresses, you may pause production of your EDR City Directory Abstract report until you have had a chance to look at your other EDR reports and sources. Sources for property addresses include: your Certified Sanborn Map Report may show you the location of property addresses; the new EDR Property Tax Map Report may show the location of property addresses; and your field research can supplement these sources with additional address information. To use this capability, simply click "Hold City Directory research" box under "Other Options" at the bottom of the page. Once you have determined what addresses you want researched, go to your EDR Order Status page, select the EDR City Directory Abstract, and enter the addresses and submit for production.

Questions? Contact your EDR representative at 800-352-0050. For more information about all of EDR's 2009 report and service enhancements, visit www.edrnet.com/2009enhancements

EXECUTIVE SUMMARY

DESCRIPTION

Environmental Data Resources, Inc.'s (EDR) City Directory Abstract is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's City Directory Abstract includes a search and abstract of available city directory data. For each address, the directory lists the name of the corresponding occupant at five year intervals.

RESEARCH SUMMARY

The following research sources were consulted in the preparation of this report. An "X" indicates where information was identified in the source and provided in this report.

EDR Historical Topographic Map Report

EDR Historical Topographic Map Report

Environmental Data Resources, Inc.s (EDR) Historical Topographic Map Report is designed to assist professionals in evaluating potential liability on a target property resulting from past activities. EDRs Historical Topographic Map Report includes a search of a collection of public and private color historical topographic maps, dating back to the early 1900s.

Thank you for your business.
Please contact EDR at 1-800-352-0050
with any questions or comments.

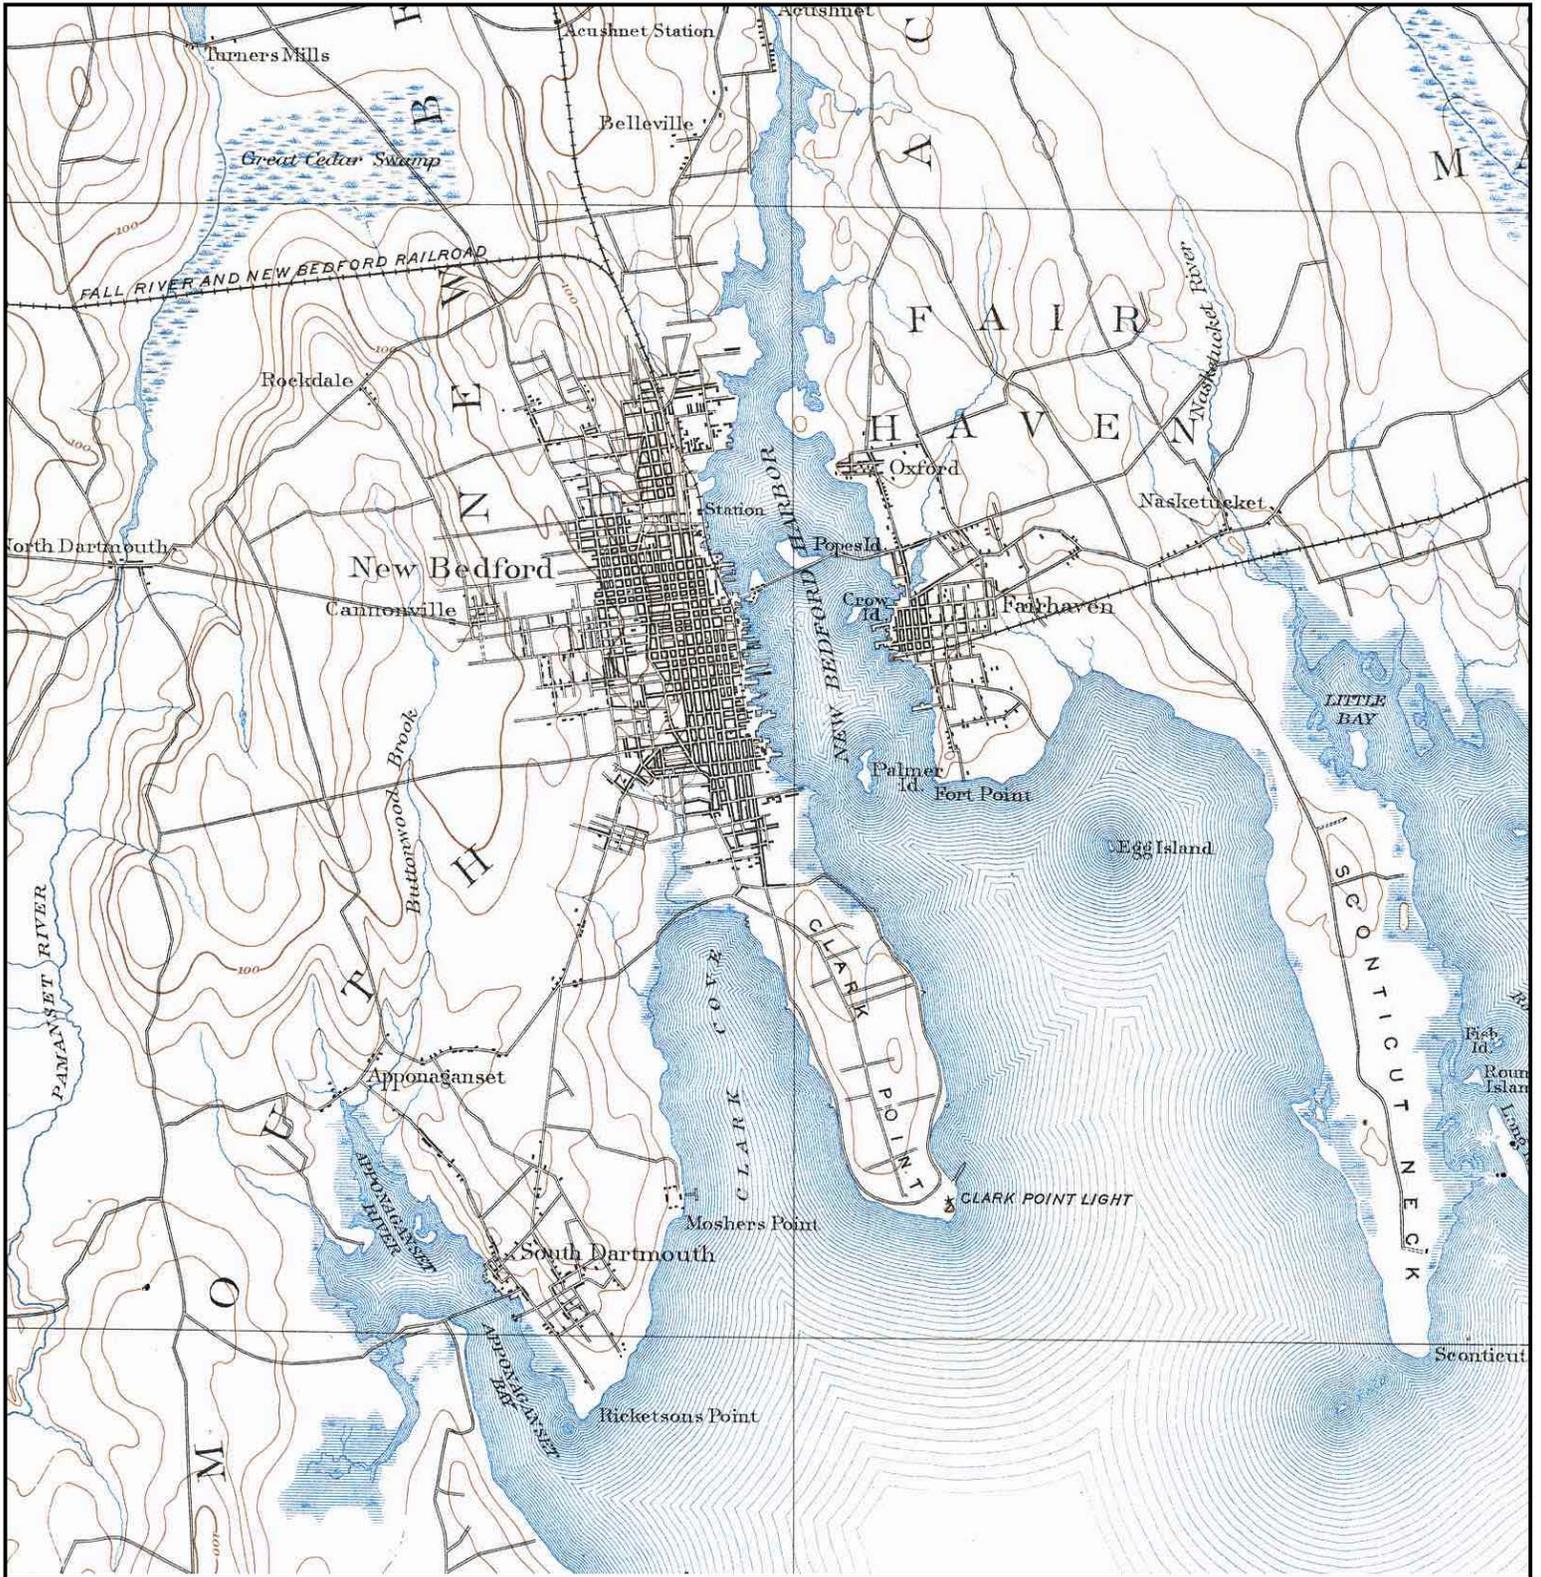

Disclaimer - Copyright and Trademark Notice

This Report contains certain information obtained from a variety of public and other sources reasonably available to Environmental Data Resources, Inc. It cannot be concluded from this Report that coverage information for the target and surrounding properties does not exist from other sources. **NO WARRANTY EXPRESSED OR IMPLIED, IS MADE WHATSOEVER IN CONNECTION WITH THIS REPORT. ENVIRONMENTAL DATA RESOURCES, INC. SPECIFICALLY DISCLAIMS THE MAKING OF ANY SUCH WARRANTIES, INCLUDING WITHOUT LIMITATION, MERCHANTABILITY OR FITNESS FOR A PARTICULAR USE OR PURPOSE. ALL RISK IS ASSUMED BY THE USER. IN NO EVENT SHALL ENVIRONMENTAL DATA RESOURCES, INC. BE LIABLE TO ANYONE, WHETHER ARISING OUT OF ERRORS OR OMISSIONS, NEGLIGENCE, ACCIDENT OR ANY OTHER CAUSE, FOR ANY LOSS OF DAMAGE, INCLUDING, WITHOUT LIMITATION, SPECIAL, INCIDENTAL, CONSEQUENTIAL, OR EXEMPLARY DAMAGES. ANY LIABILITY ON THE PART OF ENVIRONMENTAL DATA RESOURCES, INC. IS STRICTLY LIMITED TO A REFUND OF THE AMOUNT PAID FOR THIS REPORT.** Purchaser accepts this Report AS IS. Any analyses, estimates, ratings, environmental risk levels or risk codes provided in this Report are provided for illustrative purposes only, and are not intended to provide, nor should they be interpreted as providing any facts regarding, or prediction or forecast of, any environmental risk for any property. Only a Phase I Environmental Site Assessment performed by an environmental professional can provide information regarding the environmental risk for any property. Additionally, the information provided in this Report is not to be construed as legal advice.

Maps Provided:

1995
1993
1992
1990

The Sanborn Library includes more than 1.2 million Sanborn fire insurance maps, which track historical property usage in approximately 12,000 American cities and towns. Collections searched:

- Library of Congress
- University Publications of America
- EDR Private Collection

Limited Permission To Make Copies

APEX Companies LLC (the client) is permitted to make up to THREE photocopies of this Sanborn Map transmittal and each fire insurance map accompanying this report solely for the limited use of its customer. No one other than the client is authorized to make copies. Upon request made directly to an EDR Account Executive, the client may be permitted to make a limited number of additional photocopies. This permission is conditioned upon compliance by the client, its customer and their agents with EDR's copyright policy; a copy of which is available upon request.

USER'S GUIDE

This User's Guide provides guidelines for accessing Sanborn Map® images and for transferring them to your Word Processor.

Reading Sanborn Maps

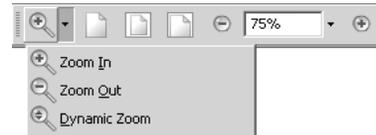

- Sanborn Maps document historical property use by displaying property information through words, abbreviations, and map symbols. The Sanborn Map Key provides information to help interpret the symbols and abbreviations used on Sanborn Maps. The Key is available from EDR's Web Site at: <http://www.edrnet.com/reports/samples/key.pdf>

Organization of Electronic Sanborn Image File

- Sanborn Map Report, listing years of coverage
- User's Guide
- Oldest Sanborn Map Image
- Most recent Sanborn Map Image

Navigating the Electronic Sanborn Image File

1. Open file on screen.
2. Identify TP (Target Property) on the most recent map.
3. Find TP on older printed images.
4. Using Acrobat® Reader®, zoom to 250% in order to view more clearly. (200-250% is the approximate equivalent scale of hardcopy Sanborn Maps.)
 - A. On the menu bar, click "View" and then "Zoom to..."
 - B. Or, use the magnifying tool and drag a box around the TP

Printing a Sanborn Map From the Electronic File

- EDR recommends printing images at 300 dpi (300 dpi prints faster than 600 dpi)
- To print only the TP area, cut and paste from Acrobat to your word processor application.

Acrobat Versions 6 and 7

1. Go to the menu bar
2. Click the "Select Tool"
3. Draw a box around the area selected
4. "Right click" on your mouse
5. Select "Copy Image to Clipboard"
6. Go to Word Processor such as Microsoft Word, paste and print.

Acrobat Version 5

1. Go to the menu bar
2. Click the "Graphics Select Tool"
3. Draw a box around the area selected
4. Go to "Menu"
5. Highlight "Edit"
6. Highlight "Copy"
7. Go to Word Processor such as Microsoft Word, paste and print.

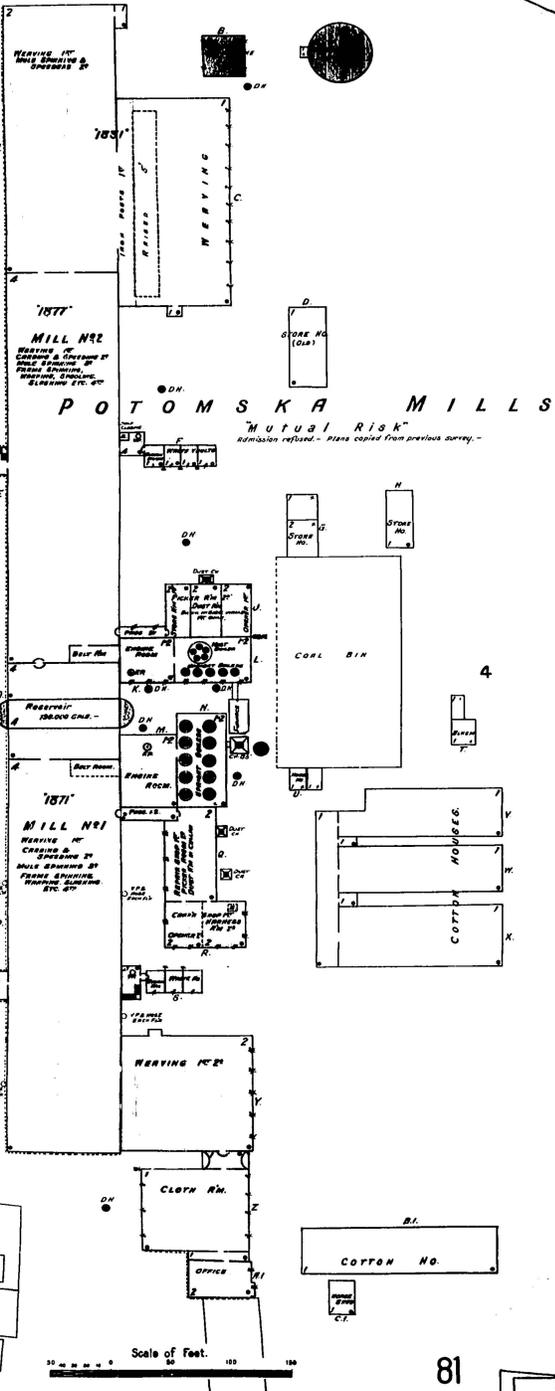

Important Information about Email Delivery of Electronic Sanborn Map Images

- Images are grouped into one file, up to 2MB.
- In cases where in excess of 6-7 map years are available, the file size typically exceeds 2MB. In these cases, you will receive multiple files, labeled as "1 of 3", "2 of 3", etc. including all available map years.
- Due to file size limitations, certain ISPs, including AOL, may occasionally delay or decline to deliver files. Please contact your ISP to identify their specific file size limitations.

EDR Environmental LienSearch™ Report

The EDR Environmental LienSearch Report includes results from a search of available current land title records for environmental cleanup liens and other activity and use limitations, such as engineering controls and institutional controls.

A network of professional, trained researchers follows established procedures to:

- search for parcel information, legal description, and ownership based on client supplied address information;
- research indexes and title repositories;
- obtain a copy of the deed;
- search for environmental encumbering instrument(s) associated with the deed;
- provide a copy of any environmental encumbrance(s) based upon a review of key words in the instrument (title, parties involved, and description); and
- provide a copy of the deed.

Thank you for your business.
Please contact EDR at 1-800-352-0050
with any questions or comments.

EXHIBIT A

QUITCLAIM DEED

I, **BARBARA K. SHUSTER**, individually, as Settlor of Shuster Income Trust dated January 3, 1983 and recorded with the Bristol County (Southern District) Registry of Deeds in Book 1865, Page 111, and as Partner of Southeast Development Company

of 33 Pond Street, Apt. No. 1205, Brookline, Massachusetts

for consideration of \$1.00 paid, the receipt of which is hereby acknowledged,

grant with QUITCLAIM COVENANTS

to **RICHARD A. SHUSTER**,

of 70 William Street, Dartmouth, Massachusetts 02742

the following described premises, with any buildings thereon, situated in New Bedford, Bristol County, Commonwealth of Massachusetts, to wit:

Being a portion of Parcel No. 1 on plan of land entitled "The City of New Bedford, New Bedford Redevelopment Authority, Disposition Parcel Nos. 1, 3 and 5, South Terminal Urban Renewal Project" dated March 20, 1969, recorded with the Bristol County (Southern District) Registry of Deeds, Plan Book 83, Page 103.

Beginning at a point in the south line of Wright Street, said point being the northwest corner of the land hereby conveyed;

Thence north $77^{\circ}17'58''$ east in the southerly line of said Wright Street 139.80 feet to a point;

Thence south $12^{\circ}42'02''$ east 10.00 feet to a point;

Thence north $77^{\circ}17'58''$ east by Lot "D" on said plan 460.20 feet to the west line of a Bulkhead;

Thence south $14^{\circ}26'09''$ east 201.39 feet to a point;

Thence south $75^{\circ}39'23''$ west 606.34 feet to a point;

Thence north $12^{\circ}42'02''$ west 228.70 feet to the point of beginning, containing 128.058 square feet.

Together with an easement to enter upon that portion of said Bulkhead hereinafter described for the purpose of docking vessels, doing business with Southeast Development Company, it

successors and assigns, and for the loading and unloading of such vessels. The bounds of that portion of the Bulkhead are bounded and described as follows:

Beginning at a point in the northeast corner of the property hereby conveyed;

Thence south 14°26'09" east 201.39 feet by said land conveyed;

Thence north 75°39'23" east for a distance of 5.00 feet to the Combined Pierhead and Bulkhead Line;

Thence north 14°26'09" west in said Combined Pierhead and Bulkhead Line 201.39 feet;

Thence south 77°17'58" west for a distance of 5.00 feet to the point of beginning.

The premises are conveyed subject to and with the benefit of all easements, restrictions and covenants set forth in a deed from the New Bedford Redevelopment Authority recorded with said Deeds in Book 1740, Page 960, insofar as the same are now in force and applicable. Intending to convey and hereby conveying the same premises conveyed by deed dated January 3, 1983 and recorded with said Registry in Book 1865, Page 109.

Executed as a sealed instrument this 6th day of August, 1999.

QUITCLAIM DEED

BK 4597 PG 20
01/05/00 03:29 DOC. 225
Bristol Co. S.D.

BHR INC., a corporation duly established under the laws of the Commonwealth of Massachusetts and having its usual place of business at 97 Cove Street, New Bedford, Bristol County, MA 02744 (hereinafter "Grantor"), for consideration of One Dollar paid and in full consideration of the amounts set forth in the deed to South Coast Mills, LLC to which reference is hereinafter made, grants to HATHAWAY MILLS, LLC, a limited liability company duly organized and existing under the laws of the Commonwealth of Massachusetts, having a usual place of business at 84 Gifford Street, New Bedford, MA 02744 (hereinafter "Grantee"), with Quitclaim Covenants, the land with the buildings thereon located in New Bedford, Bristol County, Massachusetts bounded and described as follows:

Beginning at the southwest corner thereof at the intersection of the north line of Cove Street and the east line of Harbor Street; thence northerly in the east line of Harbor Street nine hundred eighteen and 80/100 (918.80) feet to the south line of Gifford Street; thence easterly in the south line of Gifford Street ten hundred twenty-one (1021) feet to a point on a bulkhead and continuing thence in an easterly direction about two hundred (200) feet to the channel of the Acushnet River; thence running southerly along the channel of the Acushnet River for a corner; thence running westerly about two hundred (200) feet to a point on the bulkhead aforesaid one hundred twenty-eight and 20/100 (128.20) feet southerly from the first-mentioned point on said bulkhead and thence continuing in a westerly direction by land now or formerly of the City of New Bedford shown as Parcel No. 3 on Plan of Property belonging to the City of New Bedford dated April 21, 1945 filed in said Registry Plan Book 36, Page 19, two hundred seventeen and 35/100 (217.35) feet; thence southerly in line of last named land six hundred seventy-two and 23/100 (672.23) feet to a stake; thence in line of last named land along a curved line with a radius of thirty (30) feet deflecting to the right thirty-two and 08/100 (32.08) feet to the east line of Rodney French Boulevard East; thence northwesterly in the east line of Rodney French Boulevard East sixteen and 60/100 (16.60) feet to the north line of Cove Street; thence westerly in the north line of

Cove Street one hundred thirty-nine and 43/100 (139.43) feet to a drill hole; thence northerly in the east line of land formerly of the City of New Bedford shown as Parcel No. 1 on said plan, seven hundred twenty-three and 12/100 (723.12) feet to a spike in the tar driveway; thence westerly in line of last named land thirty-one and 02/100 (31.02) feet; thence northerly by last named land thirty-nine and 1/10 (39.1) feet; thence westerly by last named land one hundred ten and 1/10 (110.1) feet; thence north 60° 30' west by last named land and by other land formerly of the City of New Bedford thirty-four and 02/100 (32.04) feet; thence westerly by last named land two hundred four and 51/100 (204.51) feet; thence southerly by last named land eight hundred fifty-eight and 80/100 (858.80) feet to the north line of Cove Street; and thence westerly in the north line of Cove Street two hundred fifty-six and 47/100 (256.47) feet to the east line of Harbor Street and the point of beginning. Together with all the Grantor's right, title and interest in the fee in Cove, Harbor and Gifford Streets and the extension of Gifford Street easterly to the channel of the Acushnet River where they abut the above-described premises.

Excepting so much of said land as lies outside of Assessor's Map 21, Lot 30, conveyed by deed at Book 1602, Page 367, and other deeds and instruments.

New Bedford Assessor's Map 21, Lot 30

Property Address: Cove Street, Harbor Street and Gifford Street, New Bedford, Massachusetts

Together with all the Grantor's right, title and interest in the following licenses and the structures erected pursuant thereto, insofar as the same are applicable to the premises conveyed hereby;

- (1) No. 1895 and No. 2914 from Harbor and Land Commissioner to Dartmouth Manufacturing Corporation dated April 9, 1896 and December 29, 1904 recorded with said Deeds, Book 178, Page 169 and Book 249, Page 408, respectively.
- (2) No. 11 from Commissioner of Waterways and Public Lands to Acushnet Mill Corporation dated September 21, 1916 recorded in Book 451, Page 478.

- (3) No. 372 from Division of Waterways and Public Lands to Acushnet Mill Corporation dated October 25, 1923 recorded in Book 587, Page 312.
- (4) No 2640 from Division of Waterways to Berkshire Hathaway Inc. dated January 25, 1944 recorded in Book 877, Page 187.

Meaning and intending to convey to the Grantee herein all right, title and interest in said parcels, licenses and other property.

For Grantor's title see deed from Berkshire Hathaway Inc. dated July 31, 1987, recorded with said Deeds in Book 2047, Page 1.

The premises conveyed hereby are all or substantially all of the assets of the Grantor in the Commonwealth of Massachusetts.

Said premises are conveyed subject to and together with the benefit of all other rights, restrictions and easements of record, including but not limited to those recited in the deed from Berkshire Hathaway Inc. dated July 31, 1987, recorded with said Deeds in Book 2047, Page 1, insofar as the same are now in force and applicable.

Said premises are further conveyed subject to real estate taxes for fiscal year 2000 which Grantee assumes and agrees to pay.

Whereas the consideration set forth above, which consideration is given for the within conveyance together with the conveyance of the property of the Grantor to South Coast Mills, LLC by deed of even date and recorded herewith, on which deed are affixed the documentary stamps as required by law, no Massachusetts Deed Excise Stamps have been affixed hereto.

IN WITNESS WHEREOF, these presents have been executed under seal as of this 5th day of January, 2000.

DEPARTMENT OF THE ARMY

QUINQUAGENARY DEED

THIS INSTRUMENT made this *27th* day of *May* 1969 by and between the UNITED STATES OF AMERICA, hereinafter referred to as the Grantor, acting by and through the Secretary of the Army, and the CITY OF NEW BEDFORD, whose address is City Hall, New Bedford County of Bristol, a municipality of the Commonwealth of Massachusetts, hereinafter referred to as the grantees:

WITNESSETH THAT

WHEREAS, the Grantor has, under authority of the Act of Congress approved February 26, 1931 (46 Stat 1421, 40 U.S.C. 258a) and acts supplementary thereto and amendatory thereof, and under the further authority of the Acts of Congress approved June 29, 1906 (34 Stat 632, 33 U.S.C. 592), and March 1, 1917 (39 Stat 946, 33 U.S.C. 701), which acts authorize the acquisition of land or easements therein for local river and harbor and flood control projects; and the Act of Congress approved July 3, 1958 (Public Law 85-500), which act authorizes the construction of the New Bedford-Fairhaven-Acushnet Barrier Project for hurricane-flood protection in the New Bedford and Fairhaven Harbor areas, Massachusetts; acquired in its name and is now vested with the fee simple title to and perpetual and assignable easement in the hereinafter described land for use in connection with the establishment of the New Bedford-Fairhaven-Acushnet Hurricane Barrier Project in the New Bedford and Fairhaven Harbor areas, Massachusetts; and

WHEREAS, pursuant to said authority and fee title and easement interest and in accordance with Senate Document No. 59, 85th Congress, 1st Session the Grantor has constructed an earth-filled dike across New Bedford and Fairhaven Harbor at Palmer Island with a connecting dike and sea wall, a dike and sea wall at the head of Clark Cove, a dike in Southeast Fairhaven, together with related drainage and stoplog structures, gated tidal conduits, and alternate interceptor sewer in lieu of a pumping plant, and gated navigation opening, in, on, over, and across the hereinafter-described lands; and

WHEREAS, since the completion of the construction of the said works, and in accordance with assurances of local cooperation granted to the United States of America by the Commonwealth of Massachusetts acting by and through its Water Resources Commission, the Grantee has been and is now operating and maintaining the completed works, except the main harbor barrier, and is now obligated under said assurances to accept title to the hereinafter described fee land and easement interests in the lands for the continued and proper operation and maintenance of the works, except the main harbor barrier.

NOW, THEREFORE, the Secretary of the Army, under and by virtue of the authority vested in him by the Act of Congress approved 3 July 1958, Public Law 85-500, and in accordance with the plans and recommendations in Senate Document No. 59, 85th Congress, 1st Session, having determined that it is in the interest of the United States of America so to do, does hereby relinquish, assign, convey and quitclaim, without covenant or warranty of any kind and without reimbursement or compensation therefor, unto the Grantee, the City of New Bedford, of the County of Bristol, a municipality of the Commonwealth of Massachusetts, all the right, title and interest of the United States of America in and to the land and existing easements in its favor in, over, across and upon the hereinafter described land as follows, to wit:

The following being the same tracts of land involved and consist of:
 Fee simple title to land acquired by the United States of America by the filing of a Declaration of Taking on 18 April 1963, in condemnation proceedings of the United States District Court for the District of Massachusetts, entitled "United States of America vs. 0.40 of an Acre of Land, More or Less, in the City of New Bedford, Bristol County, Commonwealth of Massachusetts, and Frank Travers, Et Al, Civil No. 63-358-J," subject however to existing easements for public roads and highways, public utilities, railroads and pipelines.

TRACT NO. 512

A certain parcel of land situated in the City of New Bedford, County of Bristol, Commonwealth of Massachusetts, on the east side of Rodney French

Boulevard (East), bounded on the north by Rodney Street, and bounded on the east by New Bedford Harbor, being more particularly bounded and described as follows:

Beginning at a drill hole in a boulder in the southwest corner of the lot hereinafter described, said drill hole being the northwest corner of land of New Bedford Marina Corporation, also said drill hole is North $69^{\circ} 32' 03''$ East and a distance of 55.75 feet from the intersection of the south line of a twenty-five foot wide way and the west line of Rodney French Boulevard (East).

thence running northwesterly along a curve deflecting to the right with a radius of 2212.01 feet along the East line of Rodney French Boulevard (East), a distance of 133.59 feet to the point of tangency;

thence running North $37^{\circ} 41' 27''$ West, still along the east line of Rodney French Boulevard (East), a distance of 129.11 feet to the intersection of the east line of Rodney French Boulevard (East) with the south line of Rodney Street;

thence turning and running North $69^{\circ} 12' 34''$ East along the south line of Rodney Street for a distance of 130 feet, more or less, to mean high water of New Bedford Harbor;

thence turning and running southerly along the mean high water line for a distance of 252 feet, more or less, to a corner; thence turning and running South $69^{\circ} 32' 03''$ West by land of New Bedford Marina Corporation, a distance of 35 feet, more or less, to the point of beginning, said line being the southerly line extended of a twenty five foot wide way; containing 0.40 acres, more or less.

See simple title to land acquired by the United States of America by the filing of a Declaration of Taking on 31 May 1963, in condemnation proceedings of the United States District Court for the District of Massachusetts entitled "United States of America vs. 36.90 Acres of Land, More or Less, in the City of New Bedford, Bristol County, Commonwealth of Massachusetts, and E. Anthony & Sons, Incorporated Et Al, Civil No. 63-481-J," subject, however, to existing easements for public roads and highways, public utilities, railroads and pipelines.

TRACT NO. 200

A certain parcel of land situated on Palmer Island in New Bedford Harbor in the City of New Bedford, County of Bristol, Commonwealth of Massachusetts, being more particularly bounded and described as follows:

Being that portion of Palmer Island above mean high water line and lying southerly of two concrete bounds set in ground at the following coordinated positions: North $227, 765.15$ East $761, 211.71$ and North $227, 809.58$ East $761, 301.29$. The coordinates refer to the Massachusetts State Plane Coordinate System.

Containing 0.40 acres, more or less.

BOOK 1585 PAGE 1134

TRACT NO. 100

A certain parcel of land situated in the City of New Bedford, County of Bristol, Commonwealth of Massachusetts, and being more particularly bounded and described as follows:

Beginning at a stake set in the Northwest corner of 1st hereinafter described, said stake being North $75^{\circ} 00' 12''$ East and a distance of 871.08 feet from a stakebound in the Northwest corner of the intersection of Dalano Street and Front Street;

thence running North $74^{\circ} 45' 53''$ East, by other land of E. Anthony & Sons, Inc., for a distance of 280 feet, more or less, to the mean high water line of New Bedford Harbor;

thence turning and running Southerly, along the mean high water line of New Bedford Harbor, for a distance of 160 feet, more or less, to a corner;

thence turning and running South $74^{\circ} 45' 53''$ West, by land of Berkshire Hathaway, Inc., for a distance of 280 feet, more or less, to a corner;

thence turning and running North $15^{\circ} 11' 07''$ West, by land of E. Anthony & Sons, Inc., for a distance of 155.00 feet to the point of beginning.

Containing 1.00 acres, more or less.

TRACT NO. 100

A certain parcel of land situated in the City of New Bedford, County of Bristol, Commonwealth of Massachusetts, being more particularly bounded and described as follows:

Beginning at a stake on the Northeast corner of the intersection of the Easterly line of Rodney French Blvd. and the Northerly line of Ruth Street Extension, said stake being North $54^{\circ} 27' 30''$ East and a distance of 86.27 feet from a stakebound on the Northwest corner of Rodney French Blvd. and Ruth Street and being also the Southwest corner of the lot hereinafter described:

thence running North $57^{\circ} 49' 27''$ West, along the Easterly street line of Rodney French Blvd. for a distance of 550.87 feet to a drill hole set at an angle point;

thence running North $47^{\circ} 01' 37''$ West, still along the Easterly street line of Rodney French Blvd. for a distance of 325.18 feet to a drill hole at a curve;

thence running Northwesterly, along a curve to the left with a radius of 30.00 feet, by land of Berkshire Hathaway, Inc., for a distance of 32.08 feet to a stake;

thence running North $18^{\circ} 02' 27''$ West, still by land of Berkshire Hathaway, Inc., for a distance of 672.05 feet to a spike as shown on the plan of land hereinafter mentioned;

thence turning and running North $74^{\circ} 57' 53''$ East, still by land of Berkshire Hathaway, Inc., for a distance of 190 feet, more or less, to the mean high water line of New Bedford Harbor;

thence turning and running Southerly, by the mean high water line of New Bedford Harbor, to the Northerly line of Ruth Street Extension;

thence turning and running South $70^{\circ} 17' 23''$ West, along the Northerly line of Ruth Street Extension to the point of beginning.

Containing 2.97 acres, more or less.

TRACT NO. 401-1

A certain parcel of land situated on the South side of Gifford Street and bounded on the East by New Bedford Harbor in the City of New Bedford, County of Bristol, Commonwealth of Massachusetts, being more particularly bounded and described as follows:

Beginning at a spike in the Southwest corner of the lot hereinafter described, said spike being the Northwest corner of land of E. Anthony & Sons, Inc., shown on plan dated September 12, 1945, recorded in the New Bedford Registry of deeds, Plan Book 36, Page 52;

thence running North $18^{\circ} 02' 27''$ West, by other land of Berkshire Hathaway, Inc., a distance of 130.82 feet to a stake, said stake being North $75^{\circ} 06' 00''$ East and a distance of 1335.96 feet from a stonebound at the Southeast corner of Gifford Street and Court Street;

thence turning and running North $74^{\circ} 45' 53''$ East, along the Southerly line of Gifford Street, for a distance of 215 feet, more or less, to mean high water line of New Bedford Harbor;

thence turning and running Southerly, along the mean high water line of New Bedford Harbor, for a distance of 129 feet, more or less, to a corner;

thence turning and running South $74^{\circ} 27' 53''$ West, by land of E. Anthony & Sons, Inc., for a distance of 190 feet, more or less, to the point of beginning.

Containing 0.60 acres, more or less.

TRACT NO. 401-2

A certain parcel of land situated on the Northerly side of Gifford Street and bounded on the East by New Bedford Harbor in the City of New Bedford, County of Bristol, Commonwealth of Massachusetts, being more particularly bounded and described as follows:

Beginning at a point in the Northerly line of Gifford Street, said point being North $71^{\circ} 55' 55''$ East and a distance of 936.42 feet from a stonebound on the Southeast corner of Gifford Street and Court Street and is also the Southwest corner of the lot hereinafter described;

thence running North $15^{\circ} 14' 07''$ West, by other land of Berkshire Hathaway, Inc., for a distance of 195.00 feet to a corner;

thence turning and running North $74^{\circ} 45' 53''$ East, by land of E. Anthony & Sons, Inc., for a distance of 280 feet, more or less, to mean high water line of New Bedford Harbor.

thence turning and running Southerly and Easterly, along the mean high water line of New Bedford Harbor, for a distance of 460 feet, more or less, to a corner;

BOOK 1585 PAGE 1136

thence turning and running South $74^{\circ} 45' 35''$ West, along the Northerly line of Gifford Street, for a distance of 600 feet, more or less, to the point of beginning. Containing 1.43 acres, more or less.

TRACT NO. 510

A certain parcel of land situated north of Frederick Street and bounded on the north by a twenty-five foot wide way and bounded on the east by Rodney French Boulevard (East) in the City of New Bedford, County of Bristol, and the Commonwealth of Massachusetts, being more particularly bounded and described as follows:

Beginning at a point in the northwest corner of the lot hereinafter described, said point being the northeast corner of land of Marine Realty Corp. as shown on plan of land owned by John V. O'Neill and Joseph A. Lardner, dated May 13, 1922, and recorded in the Bristol County (50) Registry of Deeds, Plan Book 25, Page 14;

thence running North $69^{\circ} 32' 03''$ East along the south line of a way twenty-five feet wide, a distance of 85.46 feet to a point on a curve at the intersection of the south line of a twenty-five foot way and the west line of Rodney French Boulevard (East);

thence turning and running along a curve deflecting to the left with a radius of 2292.01 feet for a distance of 47.37 feet to a concrete bound;

thence turning and running South $69^{\circ} 35' 35''$ West by land of Richard and Leonora L. Carvels, a distance of 102.55 feet to a concrete bound;

thence turning and running North $20^{\circ} 24' 25''$ West by land of Marine Realty Corp., a distance of 44.00 feet to the point of beginning;

Containing 0.09 acres, more or less.

TRACT NO. 511

A certain parcel of land situated north of Frederick Street and bounded on the south by twenty-five foot wide way and bounded on the east by Rodney French Boulevard (East) in the City of New Bedford, County of Bristol, and the Commonwealth of Massachusetts, being more particularly bounded and described as follows:

Beginning at a point at the northeast corner of the lot hereinafter described, said point being the southeast corner of remaining land of Ruth D. and Clara Beale, and is the point of curvature of a curve, and is South $51^{\circ} 29' 44''$ West and a distance of 2.00 feet from a concrete bound;

thence running southeasterly along the curve deflecting to the left with a radius of 2292.01 feet along the west line of Rodney French Boulevard (East) a distance of 80.63 feet to the intersection of the north line of a twenty-five foot wide way and the west line of Rodney French Boulevard (East);

thence turning and running South $69^{\circ} 32' 03''$ West along the north line of a way twenty-five feet wide, a distance of 746.23 feet to a corner; thence turning and running North $16^{\circ} 04' 41''$ East along the east line of Dennis Street so called and by land of Samuel Kaplan, a distance of 10.71 feet to a corner; thence turning and running North $70^{\circ} 00' 00''$ East by other remaining land of Ruth D. and Clara Beale, a distance of 539.43 feet to a stake set at an angle point; thence turning and running North $48^{\circ} 12' 08''$ East still by remaining land of Ruth D. and Clara Beale, a distance of 193.4 feet to the point of beginning; Containing 0.30 acres, more or less.

TRACT NO. 601

A certain parcel of land situated on the Northwest corner of Grit Street and Shore Street in the City of New Bedford, County of Bristol, and the Commonwealth of Massachusetts, being more particularly bounded and described as follows:

Beginning at a stake in the Southeast corner of the lot hereinafter described, said stake being at the intersection of the North edge of Grit Street with the West edge of Shore Street.

thence running South $74^{\circ} 39' 46''$ West along the Northernly line of Grit Street, for a distance of 130 feet more or less, to mean high water of Clarke Cove; thence turning and running Northernly along the mean high water line of Clarke Cove, for a distance of 190 feet, more or less, to a corner; thence turning and running North $82^{\circ} 28' 29''$ East along land of the City of New Bedford and land of Manual and Edward Barco, for a distance of 100 feet, more or less, to a corner; thence turning and running South $7^{\circ} 31' 31''$ East along the West line of Shore Street 172.86 feet, more or less, to the point of beginning. Containing 0.51 acres, more or less.

TRACT NO. 605

A certain parcel of land situated on the East side of Rodney French Boulevard (West) in the City of New Bedford, County of Bristol, and the Commonwealth of Massachusetts, being more particularly bounded and described as follows:

Beginning at that point of curvature on the East side of Rodney French Boulevard about 380.41 feet North of a bound at the Northeast corner of Woodlawn Street and Rodney French Boulevard (West) and in the line of said Rodney French Boulevard (West); thence Northernly, following the curve of the road on a radius of 1218.00 feet, a distance of 31.44 feet to a point;

0001585 1138

thence turning and running by other land of the Mattleson Apartments, Inc., North $88^{\circ} 05' 27''$ East 47.30 feet and South $48^{\circ} 41' 49''$ East 203.66 feet to land of John C. Baptiste;

thence turning and running South $61^{\circ} 01' 55''$ West, along land of John C. Baptiste and land of Russell F. Sand, a distance of 130.11 feet to a point;

thence turning and running North $40^{\circ} 41' 49''$ West, by other land of Mattleson Apartments, Inc., 110.08 feet to a point in the line of the easterly side of said Rodney French Boulevard (West);

thence turning and running North $00^{\circ} 02' 32''$ East, by the Boulevard, 85.74 feet to the point of beginning. Containing 0.50 acres, more or less.

TRACT NO. 707

A certain parcel of land situated on the southeast corner of Cove Road and Shore Street in the City of New Bedford, County of Bristol, and Commonwealth of Massachusetts, being more particularly bounded and described as follows:

Beginning at a stone bound at the intersection of the southerly line of Cove Road with the westerly line of Shore Street;

thence running South $7^{\circ} 31' 31''$ East by the westerly line of Shore Street, a distance of 130.00 feet, to a corner;

thence turning and running South $82^{\circ} 28' 29''$ West by land of Mary Francis, a distance of 160 feet, more or less, to the Mean High Water Line of Clarke Cove;

thence turning and running northwesterly along the Mean Water Line of said Clarke Cove, a distance of 75 feet, more or less, to a point;

thence turning and running North $82^{\circ} 28' 29''$ East by land of the City of New Bedford, a distance of 135 feet, more or less, to a point;

thence turning and running northerly by an irregular course along land of said City of New Bedford, a distance of 135 feet, more or less, to a point on the southerly line of Cove Road;

thence turning and running South $63^{\circ} 07' 20''$ East along the southerly line of Cove Road, a distance of 98.35 feet to the point of beginning.

Containing 0.38 acres, more or less.

TRACT NO. 708

A certain parcel of land situated on the west side of Shore Street in the City of New Bedford, County of Bristol, and the Commonwealth of Massachusetts, being more particularly bounded and described as follows:

Beginning at the northeast corner of the lot hereinafter described, said corner being 130.00 feet from the bound at the intersection of the southerly line of Cove Road with the westerly line of Shore Street, and in the westerly line of said Shore Street;

thence turning South $77^{\circ} 31' 31''$ East along the westerly line of said Shore Street 60.00 feet, to a corner;

thence turning and running South $82^{\circ} 28' 29''$ West along land of Manuel and Edward Barao 80 feet, more or less, to the Mean High Water line of said Clarke Cove, thence turning and running by the Mean High Water line of said Clarke Cove 120 feet, more or less, to a corner;

thence turning and running North $82^{\circ} 28' 29''$ East by land of George W. and Ruth E. Ripley, 160 feet, more or less, to the point of beginning.
Containing .21 acres, more or less.

Fee simple title to land acquired by the United States of America by the filing of a Declaration of Taking on 20 September 1963 in condemnation proceedings of the United States District Court for the District of Massachusetts, entitled "United States of America vs. 0.02 of an Acre of Land, More or Less, Situate in the City of New Bedford, Bristol County, Commonwealth of Massachusetts and Samuel Kaplan, Et Al, Civil No. 63-795E," subject, however, to existing easements for public roads and highways, public utilities, railroads and pipelines.

TRACT NO. 500

A certain parcel of land situated east of Cleveland Street and bounded on the south by Dennis Street so called, in the City of New Bedford, County of Bristol, and the Commonwealth of Massachusetts, being more particularly bounded and described as follows:

Beginning at a stake set in the northwest corner of the lot hereinafter described, said stake being the southwest corner of other land of Samuel Kaplan as shown on plan of Wing and Hussy Land dated June 2, 1924 and recorded in the Bristol County (SD) Registry of Deeds, Plan Book 25, Page 161;

thence running North $70^{\circ} 00' 00''$ East by other land of Samuel Kaplan, a distance of 146.39 feet to a corner;

thence turning and running South $16^{\circ} 04' 41''$ East by land of Ruth D. and Clara Beeble, a distance of 7.04 feet to the north line of Dennis Street so called;

thence turning and running South $65^{\circ} 54' 19''$ West along the north line of Dennis Street, a distance of 145.87 feet to the intersection of the north line of Dennis Street so called and the east line of Cleveland Street, said intersection is North $20^{\circ} 05' 04''$ West and a distance of 200.00 feet from the intersection of the north line of Frederick Street and the east line of Cleveland Street;

thence turning and running North $20^{\circ} 05' 04''$ West along the easterly line of Cleveland Street, a distance of 7.04 feet to the point of beginning;

Containing 0.02 acres, more or less.

TRACT NO. 503

A certain parcel of land situated east of Cleveland Street and bounded on the north by Dennis Street so called in the City of New Bedford, County of

Bristol, and the Commonwealth of Massachusetts, being more particularly bounded and described as follows:

Beginning at a stake set in the southeast corner of the lot hereinafter described, said stake being the northeast corner of land of Alvares and Dorothy A. Horta as shown on plan of Wing and Hossay land dated June 2, 1924 and recorded in the Bristol County (SD) Registry of Deeds, Plan Book 25, Page 161;

thence running South $69^{\circ} 54' 19''$ West by land of Alvares and Dorothy A. Horta and by land of Alice and Edgar Scott, a distance of 92.12 feet to a corner;

thence turning and running North $20^{\circ} 05' 41''$ West by land of Joseph A. LeClair, a distance of 75.00 feet to a corner at the westerly line of Dennis Street so called, said corner being North $69^{\circ} 54' 19''$ East and a distance of 45.00 feet from the intersection of the east line of Cleveland Street and the south line of Dennis Street so called;

thence turning and running North $69^{\circ} 54' 19''$ East along the south line of Dennis Street so called, a distance of 97.37 feet to a corner;

thence turning and running South $16^{\circ} 04' 41''$ East by land of the City of New Bedford, a distance of 75.16 feet to the point of beginning;

Containing 0.17 acres, more or less.

TRACT NO. 507

A certain parcel of land situated between Cleveland Street and Rodney French Boulevard (East) and between Frederick Street and Rodney Street and bounded on the north by a twenty-five foot wide way in the City of New Bedford, County of Bristol, and the Commonwealth of Massachusetts, being more particularly bounded and described as follows:

Beginning at a point in the northwest corner of the lot hereinafter described, said point being the northeast corner of land of the City of New Bedford as shown on Plan of Land owned by John V. O'Neil and Joseph A. Lardner dated May 13, 1928, and recorded in the Bristol County Registry of Deeds, Plan Book 25, Page 14;

thence running North $89^{\circ} 32' 03''$ East along the south line of a way twenty-five feet wide, a distance of 50.00 feet to a corner, said corner is South $89^{\circ} 32' 03''$ West and a distance of 378.46 feet west of the intersection of the west line of Rodney French Boulevard (East) and the south line of a twenty-five foot wide way;

thence turning and running South $20^{\circ} 27' 57''$ East by land of the City of New Bedford, a distance of 76.00 feet to a corner;

thence turning and running South $69^{\circ} 32' 03''$ West by land of Clementina G. DeMello, a distance of 50.00 feet to a corner;

thence turning and running North $20^{\circ} 27' 57''$ West by land of the City of New Bedford, a distance of 76.00 feet to the point of beginning;

Containing 0.09 acres, more or less.

TRACT NO. 509

A certain parcel of land situated between Cleveland Street and Rodney French Boulevard (East) and between Frederick Street and Rodney Street and bounded on the north by a twenty-five foot wide way in the City of New Bedford, County of Bristol, and the Commonwealth of Massachusetts, being more particularly bounded and described as follows:

Beginning at a point in the northwest corner of the lot hereinafter described, said point being the northeast corner of land of the City of New Bedford as shown on plan of land owned by John V. O'Neill and Joseph A. Lardner, dated May 13, 1922 and recorded in the Bristol County (SD) Registry of Deeds, Plan Book 25, Page 11;

thence running North $69^{\circ} 32' 03''$ East along the south line of a way twenty-five feet wide, a distance of 240.00 feet to a corner, said corner is South $69^{\circ} 32' 03''$ West and a distance of 65.46 feet west of the intersection of the west line of Rodney French Boulevard (East) and the south line of a twenty-five foot wide way;

thence turning and running South $20^{\circ} 24' 24''$ East by land of the New Bedford Fishing Club, Inc., a distance of 44.00 feet to a concrete bound;

thence turning and running South $20^{\circ} 24' 25''$ East by land of Richard and Leonora L. Garrlers, a distance of 44.00 feet to an iron pipe;

thence turning and running South $69^{\circ} 32' 03''$ West by land of John S. Arruda, Raymond and Maria L. Perry, John S. Arruda and George and Elizabeth F. Demello, a distance of 240.00 feet to a stake;

thence turning and running North $20^{\circ} 27' 57''$ West by land of William Micka and by land of City of New Bedford a distance of 88.00 feet to the point of beginning;

Containing 0.48 acres, more or less.

TRACT NO. 705

A certain parcel of land situated on the east side of Cove Road in the City of New Bedford, County of Bristol, and the Commonwealth of Massachusetts, being more particularly bounded and described as follows:

Beginning at an angle point of the easterly line of Cove Road, said angle point being 70.66 feet northerly at the intersection of east line of Padanaram Avenue with the east line of Cove Road;

thence running North $15^{\circ} 12' 01''$ East, along the east line of Cove Road, 64 feet, more or less;

thence turning and running southerly, by an irregular course by land of the City of New Bedford, 70 feet, more or less, to a stake;

thence turning and running South $6^{\circ} 59' 26''$ East, by land of the City of New Bedford, 44.72 feet to a point;

thence turning and running North $70^{\circ} 25' 30''$ West, by other land of Mary R. Travers, 65.20 feet to a point on the easterly line of Cove Road;

thence turning and running North $45^{\circ} 12' 38''$ East, along the east line of Cove Road, 44.37 feet to the point of beginning.

Containing 0.06 of an acre, more or less.

Fee simple title to land and perpetual easement acquired by the United States of America by the filing of a Declaration of Taking on 6 February 1964, and Amendment No. 1 thereto on 21 September 1966, in condemnation proceedings of the United States District Court for the District of Massachusetts entitled "United States of America vs. 2.09 Acres of Land, More or Less, in the City of New Bedford, Bristol County, Commonwealth of Massachusetts and Clark's Cove Realty, Incorporated, Et Al, Civil No. 64-955," subject, however, to existing easements for public roads and highways, public utilities, railroads and pipelines.

TRACT NO. 604

A certain parcel of land situated on the West line of Rodney French Boulevard (West) in the City of New Bedford, County of Bristol, and the Commonwealth of Massachusetts, being more particularly bounded and described as follows:

Beginning at a steel pin driven at the point of Reverse Curvature in the West line of Rodney French Boulevard (West), said point of Reverse Curvature lying between Grit Street and Woodlawn Avenue and about 1190 feet Southeastly from South line of Grit Street;

thence running Southerly along Rodney French Boulevard (West) along a curve to the left with radius of 167.56 feet and a distance of 279.67 feet to a stake at a Point of Reverse Curvature;

thence turning and running Southerly along Rodney French Boulevard (West) along a curve to the right with radius of 287.56 feet and a distance of 122.92 feet to a stake;

thence turning and running South $02^{\circ} 55' 47''$ East, along Rodney French Boulevard (West), 26.99 feet to a stake in the Southerly line of land of City of New Bedford;

thence turning and running South $64^{\circ} 01' 53''$ West, along said Southerly line of City of New Bedford, 10 feet, more or less, to the mean high water line of Clark's Cove;

thence turning and running Northerly and Northwesterly along the mean high water line of Clark's Cove 1350 feet, more or less, to land of the Calvina Mills, Inc.;

thence turning and running North $59^{\circ} 33' 15''$ East by land of the Calvina Mills, Inc. 30 feet, more or less, to a point;

thence turning and running, by other land of the City of New Bedford, South $32^{\circ} 37' 08''$ East 288.45 feet to a stake, South $50^{\circ} 11' 28''$ East 156.26 feet to a stake, South $82^{\circ} 01' 09''$ East 185.00 feet to a spike, South $42^{\circ} 31' 09''$ East 210.00 feet to a stake and South $82^{\circ} 39' 04''$ East 113.51 feet to the point of beginning.

Containing 1.75 acres, more or less.

A perpetual and assignable easement and right of way to locate, construct, operate, maintain, repair, patrol and remove a storm drain pipeline with

necessary drain inlets in, upon, over and across the following described tracts, together with the right to trim, cut, fell, and remove therefrom all trees, underbrush, obstructions, and any other vegetation, structures or obstacles within the limits of the right of way.

TRACT NO. 604E-1

A certain parcel of land situated in the City of New Bedford, County of Bristol, and the Commonwealth of Massachusetts, being more particularly bounded and described as follows:

Beginning at a steel pin driven at the Point of Reverse Curvature in the West line of Rodney French Boulevard (West), said Point of Reverse Curvature lying between Grit Street and Woodlawn Avenue and about 1190 feet Southeasterly from South line of Grit Street;
thence by land to be acquired in fee from owner as Tract 604, North $62^{\circ} 39' 04''$ West 143.51 feet to a stake, North $42^{\circ} 34' 09''$ West 210.00 feet to a stake, North $82^{\circ} 00' 09''$ West 185.00 feet to a stake and North $50^{\circ} 11' 28''$ West 158.26 feet to a stake at the TRUE POINT OF BEGINNING of the herein described parcel of land;
thence North $32^{\circ} 37' 08''$ West, by land to be acquired from owner in fee as Tract 604, 288.45 feet to land of the Calvina Mills, Inc.;
thence turning and running North $59^{\circ} 33' 45''$ East, by land of Calvina Mills, Inc., 8.92 feet to a point;
thence turning and running South $36^{\circ} 30' 04''$ East, by other land of the City of New Bedford, 403.43 feet to a point at land to be acquired in fee from owner as Tract 604;
thence turning and running North $50^{\circ} 11' 28''$ West, by land to be acquired in fee from owner as Tract 604, 120.00 feet to the TRUE POINT OF BEGINNING.
Containing 0.17 acres, more or less.

TRACT NO. 604E-2

A certain parcel of land situated in the City of New Bedford, County of Bristol and the Commonwealth of Massachusetts, being more particularly bounded and described as follows:

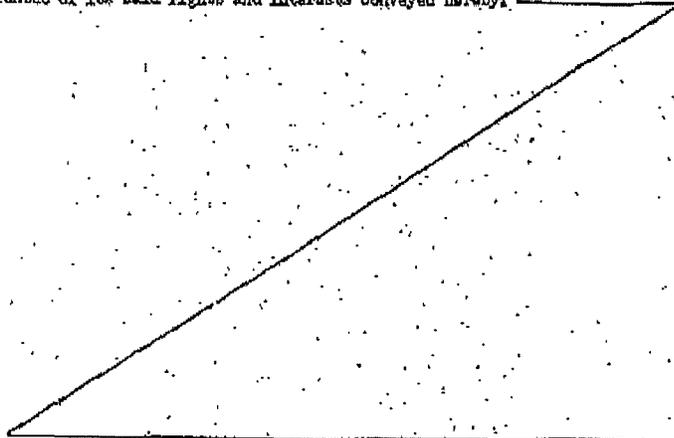

Beginning at a steel pin driven at the Point of Reverse Curvature in the West line of Rodney French Boulevard (West), said Point of Reverse Curvature lying between Grit Street and Woodlawn Avenue and about 1190 feet Southeasterly from South line of Grit Street;
thence North $62^{\circ} 39' 04''$ West, by land to be acquired in fee from owner and known as Tract 604, 143.51 feet to a stake at the TRUE POINT OF BEGINNING of the herein described parcel of land;
thence by land to be acquired in fee from owner and known as Tract 604, North $42^{\circ} 34' 09''$ West 210.00 feet to a stake, North $82^{\circ} 00' 09''$ West 185.00 feet to a stake and North $50^{\circ} 11' 28''$ West 158.26 feet to a point;

BOOK 1585 PAGE 1144

thence turning and running by other land of City of
New Bedford South $80^{\circ} 40'$ East 236.00 feet, South $40^{\circ} 55'$
East 83.00 feet and South $37^{\circ} 01'$ East 141.97 feet to land
to be acquired in fee from owner and known as Tract 604;
thence turning and running by said Tract 604, North
 $62^{\circ} 39' 04''$ West 20.45 feet to the TRUE POINT OF BEGINNING.
Containing 0.17 acres, more or less.

TO HAVE AND TO HOLD the same unto the said Grantee and unto its
successors and assigns forever, with all appurtenances thereto belonging.

By the acceptance of this instrument or any rights thereunder, the
said Grantee covenants and agrees that it will save, hold harmless, and
defend the United States, its officers, agents, servants, and employees from
and against any and all liability, claim, demand, or cause of action whatso-
ever, either in law or in equity, asserted by the holder of any interest in
the above-described land, or arising as a result of this conveyance, and the
said Grantee further agrees to save, hold harmless, and indemnify the United
States, its officers, agents, servants, and employees from and against any
and all liability, claim, demand, or cause of action caused by damage to
property or injury to any person whatsoever, arising from the exercise by the
grantee of its said rights and interests conveyed hereby.

IN WITNESS WHEREOF, the parties have hereunto subscribed their names as of the date first above written.

EXHIBIT G

MASSACHUSETTS QUITCLAIM DEED

Hall Communications, Inc., A Delaware Corporation, with a usual place of business in Lancaster, Pennsylvania, for consideration of Seven Hundred Twenty-Five Thousand (\$725,000.00) Dollars grants to Rist, LLC, a Massachusetts Limited Liability Company, with a usual place of business at 4 Wright Street, New Bedford, Bristol County, Massachusetts 02740, with quitclaim covenants, the land in New Bedford, Bristol County, Massachusetts, bounded and described as follows:

BEGINNING at a point at the southwesterly corner of the land to be conveyed and at the southeasterly corner of Parcel 2 as shown on a plan of land hereinafter mentioned;

thence NORTH 14°20'37" West 389.26 feet to land now or formerly of Bayside Nominee Trust as shown on said plan;

thence NORTH 75°39'23" East 849.94 feet to the Acushnet River and continuing to and into the Acushnet River as far as granting rights extend;

thence SOUTH 14°26'09" East in line of said Acushnet River 404.49 feet to land now or formerly of the New Bedford Redevelopment Authority as shown on said plan;

thence SOUTH 76°40'57" West 850.73 feet to said Parcel 2 and to the point of beginning.

CONTAINING 337,446 square feet and being shown as Parcel 1 on Approval Not Required Plan of Land located in New Bedford, Massachusetts prepared for Hall Communications, Inc., Kenneth R. Ferreira Engineering, Inc. dated September 26, 2005 and recorded in the Bristol County (S.D.) Registry of Deeds in Plan Book 157, Page 74.

FOR TITLE IN THIS GRANTOR see deed dated September 30, 1966 and recorded in said Registry in Book 1536, Page 1120. Also, see Articles of Merger recorded in said Registry in Book 1845, Page 103.

This property is being conveyed subject to the following:

A. A drainage easement as shown in deed recorded in the Bristol County (S.D.) Registry of Deed, Book 1845 Page 50; and

B. Subject to the following restrictions:

No communication tower, radio station or other similar structure or facility shall be erected on Parcel 1 and no buildings, fences or other structures of any kind (herewith "construction activity") shall be erected upon any portion of the property being conveyed (hereinafter property being conveyed shall be referred to as "Parcel 1", as shown on a plan attached hereto) that will interfere with the broadcast operations, and signals of Seller (hereafter "Seller" shall include their heirs, devisees, transferees, successors and/or assigns) from Seller's property (hereafter shall be referred to as "Parcel 2" as shown on the aforementioned plan), or diminish or restrict such operations and signals, only as long as Seller (as defined above) continues to operate a Federal Communications Commission ("FCC") authorized facility on said Parcel 2. Accordingly to that end:

(a.) No construction activity, as defined above, shall take place on Parcel 1 without written notice to Seller, which shall provide specific details of the proposed construction activity and be accompanied by a written report by a fully qualified Consulting Communications Engineer, who is a member of the Association of Federal Communications Commission Engineers (AFCCE).

Property Address: Lot 1 on plan recorded with said Deeds in Plan Book 157, Page 74
E.S. Rist, S. Rist St.

(b.) The Seller shall have thirty (30) days, following receipt of the notice, to advise Buyer of objections and/or concerns as to such construction activity. Such advice must be accompanied by a written report by a fully qualified Consulting Communications Engineer (AFCCE), who is a member of the Association of Federal Communications Commission Engineers (AFCCE), setting forth in detail said objections and concerns. In the event the Seller's Consulting Engineer cannot, because of legitimate business reasons is not able to meet the initial thirty (30) day period, upon notice to the Buyer prior to the expiration of the initial thirty (30) day period, Seller will be entitled to an additional thirty (30) days.

(c.) The failure of the Seller to respond within the time period(s) noted in (b) above shall be considered as an agreement with and approval of the proposed construction activity and the Buyer needs to do nothing further.

(d.) Should there be a dispute between the parties as to the proposed construction activity, the parties shall within fourteen (14) days agree to (1) select a third Consulting Engineer, who will be a member of the AFCCE, and to accept the conclusion of such engineer or (2) turn the matter over for arbitration, before an arbitrator, who has had at least ten (10) year experience as a Broadcast Communications Attorney and is a member of the Federal Communications Bar Association (FCBA) and to accept, without the right of appeal, the decision of said arbitrator.

(e.) Should the parties elect to proceed under (d) above, the losing party shall be solely responsible for the costs of either the third Consulting Engineer or the arbitrator as well as the reasonable legal and engineering costs of the winning party, as approved by the arbitrator.

(f.) The parties may proceed either in equity or law to protect their interests herein, if there has been a violation of the provisions of this restriction.

(g.) The restrictions herein shall survive closing of the sale to the Buyer and shall remain with Parcel 1 as long as the Sellers (as defined above) operate a FCC authorized broadcast facility on Parcel 2, and shall be contained in the deed to Parcel 1 and shall run with the land.

(h.) These restrictions shall terminate at such time as Parcel 2 is no longer used for the operation of the FCC authorized broadcast facility and Parcel 1 shall thereafter and forever be free of these restrictions.

This conveyance does not constitute a sale of all or substantially all of the assets in Massachusetts of the Grantor.

COMMONWEALTH OF MASSACHUSETTS
DEPARTMENT OF FISH AND GAME

CONSENSUAL ORDER OF TAKING

The Commonwealth of Massachusetts, acting by and through its Department of Fish and Game, under the authority and in pursuance of Section 15 of Chapter 15 of the Acts of 1996 and Sections 2(26) and 8 of Chapter 21A of the Massachusetts General Laws, as amended, and pursuant to the applicable provisions of Massachusetts General Laws Chapter 79 and of any and every other power and authority to it granted or implied and for the purpose of acquiring lands for marine fisheries research and conservation and the construction of facilities associated therewith, does hereby take in fee simple absolute by eminent domain for the purpose hereinbefore set forth, the area of land hereinafter described, including all parcels of land described therein except those specifically excepted, the trees, buildings, shrubs, and all structures standing or affixed thereto, said area or areas being more particularly bounded and described as follows:

Two certain parcels of land situate on Blackmer Street in New Bedford, Bristol County, Massachusetts, bounded and described as follows:

PARCEL 1

That certain parcel of land shown as Lot 3B on Plan entitled "Approval Not Required Plan of Land located in New Bedford, MA prepared for City of New Bedford Redevelopment Authority", Scale 1" = 60', dated Nov. 21, 2001, prepared by Kenneth R. Ferreira Engineering, Inc., New Bedford, MA, recorded in the Bristol South Registry of Deeds in Plan Book 148 at Page 92, and bounded and described as follows:

Return to: Mass Wildlife
251 Causeway Str
Roston, MA 02114

Parcel located on Blackmer Street, New Bedford, MA

BEGINNING at a point on the easterly side of a cul-de-sac of said Blackmer Street marking the southwest corner of the parcel herein described as shown on said Plan; thence

NORTHWESTERLY on a curve to the left with a radius of 75.00 feet an arc distance of 85.64 feet by said cul-de-sac of Blackmer Street to a point as shown on said Plan; thence

NORTHERLY on a curve to the right with a radius of 30.00 feet an arc distance of 24.04 feet by said cul-de-sac of Blackmer Street and by Lot 2B to a point as shown on said Plan; thence

NORTH 13° 21' 47" West 183.45 feet by said Lot 2B to a point marking the northwest corner of the parcel herein described and the southwest corner of Lot 3A as shown on said Plan; thence

SOUTH 76° 40' 57" West 371.74 feet by said Lot 3A to a point marking the northeast corner of the parcel herein described and the southeast corner of said Lot 3A as shown on said Plan; thence

SOUTH 01° 54' 01" East 289.61 feet to a point as shown on said Plan; thence

SOUTH 76° 40' 53" West 296.56 feet the PLACE OF BEGINNING.

Containing 95,197 square feet, more or less, as shown on said Plan.

PARCEL 2

That certain parcel of land shown as Lot 3A on Plan entitled "Approval Not Required Plan of Land located in New Bedford, MA prepared for City of New Bedford Redevelopment Authority", Scale 1" = 60', dated Nov. 21, 2001, prepared by Kenneth R. Ferreira Engineering, Inc., New Bedford, MA, recorded in the Bristol South Registry of Deeds in Plan Book 148 at Page 92, and bounded and described as follows:

BEGINNING at a point on the westerly line of Lot 2B marking the southwest corner of the parcel herein described and the northwest corner of Lot 3B as shown on said Plan; thence

NORTH 13° 21' 47" West 138.81 feet by said Lot 2B to a point on the southerly line of Lot 234 being land now or formerly of New Bedford Radio, Inc., said point marking the northwest corner of the parcel herein described; thence

NORTH 76° 40' 57" East 399.89 feet by said land of New Bedford Radio, Inc. to a point marking the northeast corner of the parcel herein described as shown on said Plan; thence

SOUTH 01° 54' 01" East 141.61 feet to a point marking the southeast corner of the parcel herein described and the northeast corner of Lot 3B as shown on said Plan; thence

SOUTH 76° 40' 57" West 371.74 feet by said Lot 3B to the PLACE OF BEGINNING.

Containing 53,555 square feet, more or less, as shown on said Plan.

FOR SUPPOSED OWNER'S TITLE, see deed from Warren Five Cents Savings Bank to the New Bedford Redevelopment Authority, dated November 16, 1998 and recorded in the Bristol South Registry of Deeds in Book 4272 at Page 209.

MEANING AND INTENDING to take and hereby taking the same premises shown as Lots 3A & 3B on Plan entitled "Approval Not Required Plan of Land located in New Bedford, MA prepared for City of New Bedford Redevelopment Authority", Scale 1" = 60', dated Nov. 21, 2001, prepared by Kenneth R. Ferreira Engineering, Inc., New Bedford, MA, recorded in the Bristol South Registry of Deeds in Plan Book 148 at Page 92, howsoever the same may be bounded and described, and including any and all fee interest in the streets, roads, and ways referred to in the above description which may be held by the supposed owner(s).

Excepted from the rights herein taken by the Commonwealth are all easements for wires, pipes, conduits, poles, and other appurtenances for the conveyance of water, sewage, gas, oil, electricity, cable television transmission, and telephone communication lawfully in or upon said land, including but not limited to 1) pole and wire easement to New England Telephone and Telegraph Company, dated November 2, 1999 and recorded in said Registry in Book 4551 at Page 287; 2) transmission line easement to Commonwealth Electric Company, dated November 9, 2000 and recorded in said Registry in Book 4822 at Page 186; 3) utilities easement to the City

of New Bedford, dated November 14, 2000 and recorded in said Registry in Book 4822 at Page 222; 4) reservation of rights to maintain and extend sewers set forth in deed dated April 13, 1946 and recorded in said Registry in Book 908 at Page 311; and 5) 15-foot-wide utility easement shown on unrecorded Plan attached hereto as Exhibit A.

Further excepted from the rights herein taken are 1) all rights-of-way of record now lawfully still in force and in or upon said area or areas hereby taken; 2) title to and/or rights of the public and others entitled thereto, if any, in and to any portion of the premises taken lying within the bounds of any roads or highway, including but not limited to Blackmer Street; 3) any rights of others in the uninterrupted flow of any brooks and streams on the premises, any riparian rights, and any rights of the public in any portion of the premises herein described located below the mean high water line of the Acushnet River; 4) easements and Perpetual Easement shown on Plan recorded in said Registry in Plan Book 113 at Page 47; 5) Public Access Easement shown on Plan recorded in said Registry in Plan Book 146 at Page 68; 6) Drainage Easement shown on Plan recorded in said Registry in Plan Book 145 at Page 89; and 7) restrictions attached hereto as Exhibit B.

And, the Commissioner of the Department of Fish and Game makes the following award(s) for the damages sustained by the owner(s) and all other persons, parties, or entities including all mortgagees, lessees, and/or obligees of record having any and all interest in the area or areas hereinbefore described in the said taking to his/her/its property or entitled to any damage by reason of said taking:

| <u>Supposed Owner</u> | <u>Award</u> |
|-------------------------------------|--------------|
| New Bedford Redevelopment Authority | \$300,000 |

Said award is made subject to satisfactory proof of ownership or entitlement by individuals and/or entities claiming ownership of said parcels and/or entitlement to said award. The

Commonwealth herein reserves the right to amend the award, including but not limited to the right to increase or decrease the amount of damages to be paid, at any time prior to payment thereof for good cause shown.

IN WITNESS WHEREOF, the Commonwealth of Massachusetts has caused these presents to be executed in its name and on its behalf by David M. Peters, Commissioner of the Department of Fish and Game, herewith duly authorized, who does hereunto set his hand and seal this 30th day of June, 2005.

EXHIBIT B

BK 7642 PG 351

B. The public easement in public streets and alleys abutting the property.

C. The following covenants:

1. That the Grantee, covenants and agrees for itself, its successors and assigns to or of the property or any part thereof, that the Grantee, and such successors and assigns shall:

a. Not discriminate upon the basis of race, religion, color, sex or national origin in the sale, lease or in the rental or in the use and occupancy of the premises or any improvements erected or to be erected thereon, or any part thereof.

b. Comply with all State and Local Laws, in effect from time to time, prohibiting discrimination or segregation by reason of race, religion, color, sex or national origin, in the sale, lease or in the use and occupancy of the premises and not effect or execute any agreement, lease, conveyance or other instrument whereby the premises or any part thereof is restricted upon the basis of race, religion, color, sex or national origin in the sale, lease or occupancy thereof.

c. Promptly begin and diligently prosecute to completion the redevelopment of the Property, the construction of the Improvements thereon and that such construction shall begin within 180 days of the date of acquisition and shall be completed within a reasonable period of time thereafter .

2. The Grantee for itself, and its successors and assigns, agrees that the aforementioned restrictions, covenants and agreements shall be covenants running with the land, and that they shall, in any event, and without regard to technical classification or designation, legal or otherwise be to the fullest extent permitted by law and equity, binding for the benefit and in favor, and enforceable by, the Grantor, its successors, and assigns, against the Grantee, and its successors and assigns to or of the Property or any part thereof or any interest therein and any party in possession or occupancy of the Property or any part thereof.

3. The Grantee, for itself, its successors and assigns, further covenants and agrees that the said covenants running with the land shall be in effect until December 31, 2035, or on which date, as the case may be, such covenants shall terminate, except for the covenants provided in paragraphs 1 (b) and (c) hereof, which shall remain in effect forever, and except for the covenants relating to the construction of the Improvements which shall only remain in effect as to the Property or individual part thereof until such time as a Certificate of Completion is issued by the Grantor as to the property or the particular part and is recorded. The Grantee, for itself, its successors and assigns, further covenants and agrees that all the said covenants running with the land shall be enforceable for said period of time without regard to whether the Grantor is or remains an owner of any land or interest therein to which said covenants relate.

4. The Grantor, for itself and its successors and assigns, covenants and agrees that after completion of the Improvements on the Property or on an individual part or parcel thereof, as provided for in the Redevelopment Contract & Access Agreement, it will furnish an appropriate instrument so certifying as to the Property or the individual part or parcel respectively. That such certification by the Grantor shall be a conclusive determination of the satisfaction and termination of the restrictions, agreements and covenants with respect to the obligations of the Grantee and its successors and assigns, to construct the Improvements on the Property or individual part or parcel thereof, as the case may be, and shall be in such form as can be recorded in the Bristol County (S.D.) Registry of Deeds. The Grantor, for itself,

and its successors and assigns, further covenants and agrees that such certification shall mean and provide that any party purchasing or leasing such individual parts or parcels of the Property, shall not, because of such purchase or lease incur any obligations with respect to the construction of the Improvements relating to such part or parcel or to any other part or parcel of the Property, and shall mean and provide that the Grantor, its successors and assigns, shall not thereafter be entitled to exercise any rights, remedies or controls with respect to such individual part or parcel of the Property, which it would otherwise be entitled to exercise by reason of default or breach by the Grantee except as provided in the Redevelopment Contract & Access Agreement.

5. This conveyance is subject to the SOUTH TERMINAL EXTENSION DEED RESTRICTIONS set forth below:

SOUTH TERMINAL EXTENSION DEED RESTRICTIONS.

The grantee hereby covenants and agrees that this conveyance is subject to the following South Terminal Extension Deed Restrictions which shall run with the land and be binding upon the grantee, its executors, administrators, heirs, successors and/or assigns:

Pre-Review

All proposed construction either vertical or horizontal including additions or improvements shall be pre-reviewed by the New Bedford Redevelopment Authority at its regularly scheduled meeting before the application for a building permit is permitted.

Parking Regulations

1 space per each 1,500 square feet of building space. Owner shall provide on-site parking sufficient for all employees and visitors; and shall not permit such parking on the public ways. All parking shall be confined to the rear or sides of the buildings. All parking areas shall be paved, lined and screened from view in such a manner as required by applicable provisions of the City of New Bedford, Code of Ordinances.

All truck loading platforms or loading doors shall be located at the rear or side of the building and screened from view in such a manner as required by applicable provisions of the City of New Bedford, Code of Ordinances.

Screening Materials

Chain link fence - Galvanized 3 foot maximum height - barbed wire is not permitted.
Wood materials - Stockade or wood slats.

All exterior storage and rubbish areas shall be screened on all sides.

Paving Materials

The only materials considered for permanent paving are concrete and bituminous concrete (asphalt). Reprocessed asphalt is not allowed.

Setbacks

All buildings or structures shall set back from each street line or lot line a distance of

25 feet. No parking, loading areas or storage shall be conducted in the front yard setback area.

Landscaping

The front yard setback area shall be appropriately landscaped and maintained in accordance with applicable provision of the City of New Bedford, Code of Ordinances. The rear and side yard setback areas shall preserve a 5 foot wide strip which shall also be appropriately landscaped in accordance with applicable provisions of the City of New Bedford, Code of Ordinances.

Use

No use shall be made of the premises to be conveyed which would be inconsistent with the current zoning or which would be obnoxious to other occupants of the South Terminal Extension, create a nuisance or fail to conform to plans and development strategies promulgated from time to time by the New Bedford Redevelopment Authority.

Architectural Review

The front elevation facing either Blackmer or Silva Street shall conform to the following design guidelines:

Exterior Materials

A basic harmony of architecture shall prevail so that no building shall detract from the attractiveness of the overall environment.

Allowable materials for the front elevation:

- Split face architectural concrete block
- Brick
- Stucco (Drivit, EHFS Systems)

All exterior finish materials shall be painted or finished.

The side and rear elevations shall conform to the following design guidelines:

Exterior Materials

A basic harmony of architecture shall prevail so that no building shall detract from the attractiveness of the overall environment.

Allowable materials for side and rear elevations:

- Metal
- Concrete block (painted)
- Split face architectural concrete block
- Brick
- Stucco
- Wood

All exterior finish materials shall be painted or finished.

B. Findings

1. Findings pursuant to the Massachusetts Wetlands Protection Act:

Following the review of the above-referenced Notice of Intent and based on the information provided in this application and presented at the public hearing, this Commission finds that the areas in which work is proposed is significant to the following interests of the Wetlands Protection Act. Check all that apply:

- a. Public Water Supply
- b. Land Containing Shellfish
- c. Prevention of Pollution
- d. Private Water Supply
- e. Fisheries
- f. Protection of Wildlife Habitat
- g. Groundwater Supply
- h. Storm Damage Prevention
- i. Flood Control

2. This Commission hereby finds the project, as proposed, is: (check one of the following boxes)

Approved subject to:

- a. the following conditions which are necessary in accordance with the performance standards set forth in the wetlands regulations. This Commission orders that all work shall be performed in accordance with the Notice of Intent referenced above, the following General Conditions, and any other special conditions attached to this Order. To the extent that the following conditions modify or differ from the plans, specifications, or other proposals submitted with the Notice of Intent, these conditions shall control.

Denied because:

- b. the proposed work cannot be conditioned to meet the performance standards set forth in the wetland regulations. Therefore, work on this project may not go forward unless and until a new Notice of Intent is submitted which provides measures which are adequate to protect these interests, and a final Order of Conditions is issued. **A description of the performance standards which the proposed work cannot meet is attached to this Order.**
- c. the information submitted by the applicant is not sufficient to describe the site, the work, or the effect of the work on the interests identified in the Wetlands Protection Act. Therefore, work on this project may not go forward unless and until a revised Notice of Intent is submitted which provides sufficient information and includes measures which are adequate to protect the Act's interests, and a final Order of Conditions is issued. **A description of the specific information which is lacking and why it is necessary is attached to this Order as per 310 CMR 10.05(6)(c).**

Inland Resource Area Impacts: Check all that apply below. (For Approvals Only)

- 3. Buffer Zone Impacts: Shortest distance between limit of project disturbance and wetland boundary (if available)

C. General Conditions Under Massachusetts Wetlands Protection Act

(only applicable to approved projects)

1. Failure to comply with all conditions stated herein, and with all related statutes and other regulatory measures, shall be deemed cause to revoke or modify this Order.
2. The Order does not grant any property rights or any exclusive privileges; it does not authorize any injury to private property or invasion of private rights.
3. This Order does not relieve the permittee or any other person of the necessity of complying with all other applicable federal, state, or local statutes, ordinances, bylaws, or regulations.
4. The work authorized hereunder shall be completed within three years from the date of this Order unless either of the following apply:
 - a. the work is a maintenance dredging project as provided for in the Act; or
 - b. the time for completion has been extended to a specified date more than three years, but less than five years, from the date of issuance. If this Order is intended to be valid for more than three years, the extension date and the special circumstances warranting the extended time period are set forth as a special condition in this Order.
5. This Order may be extended by the issuing authority for one or more periods of up to three years each upon application to the issuing authority at least 30 days prior to the expiration date of the Order.
6. Any fill used in connection with this project shall be clean fill. Any fill shall contain no trash, refuse, rubbish, or debris, including but not limited to lumber, bricks, plaster, wire, lath, paper, cardboard, pipe, tires, ashes, refrigerators, motor vehicles, or parts of any of the foregoing.
7. This Order is not final until all administrative appeal periods from this Order have elapsed, or if such an appeal has been taken, until all proceedings before the Department have been completed.
8. No work shall be undertaken until the Order has become final and then has been recorded in the Registry of Deeds or the Land Court for the district in which the land is located, within the chain of title of the affected property. In the case of recorded land, the Final Order shall also be noted in the Registry's Grantor Index under the name of the owner of the land upon which the proposed work is to be done. In the case of the registered land, the Final Order shall also be noted on the Land Court Certificate of Title of the owner of the land upon which the proposed work is done. The recording information shall be submitted to this Conservation Commission on the form at the end of this Order, which form must be stamped by the Registry of Deeds, prior to the commencement of work.
9. A sign shall be displayed at the site not less than two square feet or more than three square feet in size bearing the words,

"Massachusetts Department of Environmental Protection" [or, "MA DEP"]

"File Number SE49-596"

Massachusetts Department of Environmental Protection
Bureau of Resource Protection - Wetlands
WPA Form 5 – Order of Conditions
Massachusetts Wetlands Protection Act M.G.L. c. 131, §40

DEP File Number:

C. General Conditions Under Massachusetts Wetlands Protection Act

- 10. Where the Department of Environmental Protection is requested to issue a Superseding Order, the Conservation Commission shall be a party to all agency proceedings and hearings before DEP.
- 11. Upon completion of the work described herein, the applicant shall submit a Request for Certificate of Compliance (WPA Form 8A) to the Conservation Commission.
- 12. The work shall conform to the plans and special conditions referenced in this order.
- 13. Any change to the plans identified in Condition #12 above shall require the applicant to inquire of the Conservation Commission in writing whether the change is significant enough to require the filing of a new Notice of Intent.
- 14. The Agent or members of the Conservation Commission and the Department of Environmental Protection shall have the right to enter and inspect the area subject to this Order at reasonable hours to evaluate compliance with the conditions stated in this Order, and may require the submittal of any data deemed necessary by the Conservation Commission or Department for that evaluation.
- 15. This Order of Conditions shall apply to any successor in interest or successor in control of the property subject to this Order and to any contractor or other person performing work conditioned by this Order.
- 16. Prior to the start of work, and if the project involves work adjacent to a Bordering Vegetated Wetland, the boundary of the wetland in the vicinity of the proposed work area shall be marked by wooden stakes or flagging. Once in place, the wetland boundary markers shall be maintained until a Certificate of Compliance has been issued by the Conservation Commission.
- 17. All sedimentation barriers shall be maintained in good repair until all disturbed areas have been fully stabilized with vegetation or other means. At no time shall sediments be deposited in a wetland or water body. During construction, the applicant or his/her designee shall inspect the erosion controls on a daily basis and shall remove accumulated sediments as needed. The applicant shall immediately control any erosion problems that occur at the site and shall also immediately notify the Conservation Commission, which reserves the right to require additional erosion and/or damage prevention controls it may deem necessary. Sedimentation barriers shall serve as the limit of work unless another limit of work line has been approved by this Order.
- 18. All work associated with this Order is required to comply with the Massachusetts Stormwater Policy Standards.

City of New Bedford
Scott W. Lang, Mayor

SPECIAL CONDITIONS
SE49-596

16 Blackmer Street (Map 25A, Lots 49 & 53)

Applicant/Owner: MA Dept of Fish & Game Division of Marine Fisheries

19. No activity shall occur prior to obtaining all necessary and required permits, licenses, and approvals; and until copies of the same have been furnished to the Conservation Commission.
20. Any design modifications, alterations, amendments, or additions shall be subject to the approval of the New Bedford Conservation Commission. Requests for any changes shall be made in writing and shall be accompanied by a revised plan.
21. No modification to surface features, drainage or topography shall be permitted except as indicated by this Order of Conditions.
22. Contours shall remain unchanged except as permitted by this Order of Conditions.
23. There shall be no construction other than that proposed by the Notice of Intent and included on the submitted plan.
24. Immediately upon completion of the exterior construction and grading, permanent stabilization landscaping shall be carried out in order to minimize erosion.
25. All wet areas not to be altered shall be kept clear of rubbish, debris, and construction material.
26. All exposed soil or subsoil shall be replanted with vegetation such as grass, groundcover or shrubs so as to minimize erosion and siltation.
27. There shall be minimum disruption of existing grades and vegetation in order to minimize erosion.
28. No runoff shall be caused to drain on to adjoining property or on any public ways.
29. All excess material shall be removed from the site.
30. The owners shall notify the Conservation Commission of the work-start date prior to its commencement so that regular inspections may be made.

31. All work performed in accordance with said plans and this Order of Conditions shall be in compliance with the state building and/or plumbing code.
32. The Inspector and/or the Commission members shall have the right to enter upon the land for the purpose of the inspection and/or the taking of pictures to determine and evaluate compliance with this order.
33. The design engineer will certify, in writing, that this project has been complete in accordance with the above Order of Conditions before the Certificate of Compliance will be issued.
34. All facilities and equipment shall be continually operated and maintained so as to comply with this order of conditions and M.G.L. Ch. 131, S 40, the Wetlands Protection Act.
35. Certain conditions, such as maintenance or monitoring are on-going and are not to expire at the end of three years or with the issuance of a Certificate of Compliance.
36. This order of Conditions shall apply to any successor in interest or successor in control.
37. Any changes required by any other board or authority may require a new filing with the Conservation Commission.
38. At the discretion of the Conservation Commission, the applicant may be required to file with any or all of the following agencies:

**The Department of Environmental Protection
Army Corps of Engineers
Coastal Zone Management
Division of Waterways**

39. The Conservation Commission and/or the City of New Bedford shall not be responsible or liable for the construction, the operation, or the maintenance of any part of this project and does not warrant the safety of the same.
40. Any fill and/or construction materials shall be placed in upland areas.
41. Any mitigation and resource protection devices and measures, e.g. hay bales, siltation fence, etc., are to be installed prior to initiation of any work under this Order of Conditions. The Conservation Agent shall be notified when in place for inspection and verification. No work to be undertaken under the Order of Conditions until written or verbal approval is received from the Conservation Commission or its Agent.
42. In accordance with Condition number thirteen (13), no activity shall take place until the applicant has furnished written documentation that the plans on file with

the Conservation Commission are consistent with permits and approvals of other Town Boards.

43. Prior to any construction, an on-site inspection is to be held between the proposed contractor, the engineer, and the Conservation Commission Agent to go over the sequence of construction and all other restrictions and requirements as noted on the Order of Conditions. A written construction schedule to be received at that time.
44. All erosion control barriers shall be constructed of snow fencing, silt fencing and staked hay bales and clearly depicted on the plans, and placement shall be inspected both pre and post construction by Agent
45. Any changes in proposed drainage patterns will require written approval by the Conservation Commission.
46. Wetland flagging to remain in place until the project has been completed and Certificate of Compliance issued.
47. Notice of Intent, Order of Conditions and plans shall be retained on the site during construction and made available to all contractors.
48. All conditions are on going and do not expire until the issuance of a Certificate of Compliance.
49. The design engineer will certify, with an as-built plan, that this project has been complete in accordance with the above Order of Conditions before the certificate of Compliance will be issued.
50. The owner of the property covered by this Order of Conditions, or their successors in title, shall be responsible for the maintenance and operation of all components of the Stormwater Management System in accordance with the Operation and maintenance schedule provided on the approved plans. This Condition is on going and does not expire with the issuance of a Certificate of Compliance.
51. Prior to the onset of any construction activity, an indigenous Planting plan is to be submitted to the Conservation Commission listing the native species to be planted in the Buffer Zone.

F. Appeals

The applicant, the owner, any person aggrieved by this Order, any owner of land abutting the land subject to this Order, or any ten residents of the city or town in which such land is located, are hereby notified of their right to request the appropriate DEP Regional Office to issue a Superseding Order of Conditions. The request must be made by certified mail or hand delivery to the Department, with the appropriate filing fee and a completed Request of Departmental Action Fee Transmittal Form, as provided in 310 CMR 10.03(7) within ten business days from the date of issuance of this Order. A copy of the request shall at the same time be sent by certified mail or hand delivery to the Conservation Commission and to the applicant, if he/she is not the appellant. Any appellants seeking to appeal the Department's Superseding Order associated with this appeal will be required to demonstrate prior participation in the review of this project. Previous participation in the permit proceeding means the submission of written information to the Conservation Commission prior to the close of the public hearing, requesting a Superseding Order or Determination, or providing written information to the Department prior to issuance of a Superseding Order or Determination.

The request shall state clearly and concisely the objections to the Order which is being appealed and how the Order does not contribute to the protection of the interests identified in the Massachusetts Wetlands Protection Act, (M.G.L. c. 131, § 40) and is inconsistent with the wetlands regulations (310 CMR 10.00). To the extent that the Order is based on a municipal ordinance or bylaw, and not on the Massachusetts Wetlands Protection Act or regulations, the Department has no appellate jurisdiction.

Section G, Recording Information is available on the following page.

EXHIBIT J

CONSERVATION RESTRICTION
To
TOWN OF DARTMOUTH CONSERVATION COMMISSION

I. GRANTORS CLAUSE:

For good and valuable consideration, the undersigned David R Peck IV and Jeffrey D. Gosciminski, (the "Grantors"), recorded with the Bristol County, Registry of Deeds, Book 7227, Page 299, acting pursuant to Sections 31-33 of Chapter 184 of the Massachusetts General Laws, hereby grant, in perpetuity and exclusively for conservation purposes, to the Town of Dartmouth, by through it's Conservation Commission, 400 Slocum Road, Dartmouth, MA 02747 (the "Grantee") the following described Conservation Restriction (the "Conservation Restriction") on certain land (the "Premises") located in the Town of Dartmouth, Massachusetts, constituting approximately 14.625 acres and shown as Conservation parcels A and B on a plan entitled Subdivision Plan 1 of 2 (Sheet 4) and Plan 2 of 2 (Sheet 5) ("Exhibit A"), Special Permit Proposal for a Cluster Subdivision named "Ledgemont Estates" located in Dartmouth, MA drawn for Ledgemont Development, LLC, dated April 20, 2005, Revised October 5, 2005, prepared by Prime Engineering Inc. (the "Plans"). For our title, see Book 8023, Page 40.

II. PURPOSES:

The Grantors and the Grantee acknowledge and agree that the Premises have a scenic and wildlife habitat value in the present state thereof as natural land and wetlands. The Premises have not been subjected to development incompatible with said features and resources, and constitute a unique and valuable Massachusetts landscape embodying the special character of the region, the protection of which in their predominately natural condition will provide valuable benefits to the public. The Grantors and the Grantee share the common purpose of conserving the natural values of the Premises for the present generation and future generations. The shared purpose is to assure that the Premises will be retained in perpetuity predominantly in their natural and scenic condition for habitat preservation. The public benefits resulting from conservation of the Premises include, without limitation:

- A. Wildlife habitat protection: Conservation of the land will protect habitat used by a variety of wildlife, and in particular habitat for the Spotted Turtle (*Clemmys guttata*).
- B. Scenic landscape preservation: The land comprises part of a scenic landscape associated with a natural, undisturbed environment.
- C. Water quality protection: Preserving the natural, undisturbed environment will provide for groundwater recharge and protect wetland resource areas.
- D. Nearby natural areas: The Premises lie adjacent to upland and wetland ecosystems that will benefit from the protection and conservation of the Premises.
- E. Furtherance of governmental policy: Protection of the Premises is consistent with the Town of Dartmouth's Open Space and Recreation Plan which advocates for the protection of the town's scenic landscape and forest.

III. PROHIBITED ACTS AND USES, EXCEPTIONS THERETO, AND PERMITTED USES:

- A. Except as provided herein, the Grantors, and their successors and/or assigns shall not perform nor allow others to perform any of the following activities or uses on the Premises, and the Grantors hereby grant to the Grantee the right to enforce these restrictions against all persons:
1. Constructing, placing or permitting to remain, any building, tennis court, landing strip, mobile home, swimming pool, asphalt or concrete pavement, sign, billboard or other advertising display, antenna, utility pole, tower, conduit, line or other temporary or permanent structure or facility, on, below or above the ground on the Premises, except those structures or facilities permitted by existing easements, and except for ornamental landscaping which is allowed to be installed and maintained on conservation parcel C and the portion of conservation parcel A which immediately abuts the intersection of the proposed Ledgemont Lane and Rock O Dundee Road a distance of 40 feet from Rock O Dundee Road and a distance of 130 feet from Ledgemont Lane
 2. Mining, excavating, dredging or removal of soil, loam, peat, gravel, sand, rock or other mineral substances or natural deposits;
 3. Placing, filling, storing or dumping of refuse, trash, compost, yard waste, vehicle bodies or parts, rubbish, debris, junk, solid or chemical waste or the installation of underground storage tanks or other unsightly or offensive substance or material whatsoever on or below the Premises;
 4. Cutting, removing or otherwise destroying trees, shrubs, grasses, or other vegetation;
 5. The disruption, removal, or destruction of the stone walls on the Premises;
 6. Activities detrimental to drainage, flood control, water conservation, erosion control, soil conservation, prevention of pollution, protection of groundwater, or wildlife habitat;
 7. Use of motorized vehicles of any nature or kind, including but not limited to cars, trucks, motorcycles, all-terrain vehicles and ski mobiles, except (1) as reasonably necessary in exercising any of the reserved rights in paragraph B and (2) as required by the police, fire department or any other governmental agents in carrying out their lawful duties;
 8. Division of the Premises into lots that could be conveyed into separate ownership;
 9. Camping, hunting, fishing or trapping; and
 10. Any other use or activity which would materially impair conservation interests unless necessary for the protection of the conservation interests that are the subject of this Conservation Restriction;

- B. Notwithstanding anything contained in subparagraph III.A hereof, the Grantors reserve unto themselves and to their successors and/or assigns in title, the right of access onto and across the Premises and the right to conduct or permit the following activities and uses on the Premises, but only if such acts or uses do not materially impair conservation interests and only if such acts or uses are in compliance with all existing and future enacted federal, state laws and statutes and local laws, by-laws, rules and regulations:
1. Removal of trash, debris, and other unnatural materials from the Premises;
 2. Measures designed to restore native biotic communities, or to maintain, enhance or restore wildlife, wildlife habitat, or rare or endangered species provided that such activities are approved in writing by the Massachusetts Division of Fisheries and Wildlife (hereinafter, the "Division") and the Grantee;
 3. In accordance with generally accepted forest management practices, and provided that such activities are approved in writing by the Division and the Grantee, selective cutting or clearing of trees or other vegetation for: habitat enhancement and protection, fire protection, new trails and roads, maintenance of new trails and roads, tick and insect control, foot traffic would be an allowed usage, which, must be subject of review by State and Grantee or otherwise to preserve the condition of the Premises and its conservation values.
 4. Maintenance within the boundaries of the existing, unpaved, permeable surface trails on the Premises;
 5. Passive, non-motorized outdoor recreational activities that do not disturb the topography of the Premises or diminish or impair its conservation values, including hiking, nature observation, picnicking, and cross-country skiing.
 6. Erection, maintenance and replacement of signs with respect to hunting trespass, trail access, the Grantee's interest in the Premises, and the protected conservation values.

IV. LEGAL REMEDIES OF THE GRANTEE:

A. Legal and Injunctive Relief

The rights hereby granted shall include the right to enforce this Conservation Restriction by appropriate legal proceedings and to obtain injunctive and other equitable relief against any violations hereof including, without limitation, relief requiring restoration of the Premises to its condition prior to the time of the violation complained of (it being agreed that the Grantee may have no adequate remedy at law), and shall be in addition to, and not in limitation of, any other rights and remedies available to the Grantee.

B. Grantee Disclaimer of Liability

By its acceptance of this Conservation Restriction, the Grantee does not undertake any liability or obligation relating to the condition of the Premises.

C. Severability Clause

If any provision of this Conservation Restriction shall to any extent be held invalid, the remainder shall not be thereby affected.

D. Non-Waiver

Any election by the Grantee as to the manner and timing of its right to enforce this Conservation Restriction or otherwise exercise its rights hereunder shall not be deemed or construed to be a waiver of such rights.

E. Enforcement Rights of the Division

The Massachusetts Division of Fisheries and Wildlife shall have the same enforcement rights and legal remedies as provided to the Grantee in subparagraphs IV.A through IV.D, inclusive. These rights shall be in addition to, and not in limitation of, the rights and remedies available to the Grantee.

V. ACCESS:

The Conservation Restriction hereby conveyed does not grant to the Grantee, to the Division, to the general public, or to any other person any right to enter upon the Premises except as follows. There is hereby granted to Grantee, the Division, and their representatives the right to enter the Premises (a) at reasonable times in a reasonable manner for the purpose of inspecting the same to determine compliance herewith and (b) after 45 days prior written notice, to take any and all actions with respect to the Premises as may be necessary or appropriate, and allowed by applicable federal, state or local laws and regulations, with or without order of court, to remedy, abate or otherwise enforce any violation hereof, provided that such prior notice has identified the violation(s) and that Grantors have not, in good faith, commenced steps to remedy the same. Any notices required under this paragraph shall be sufficiently given if delivered personally or sent by overnight courier or registered or certified mail, postage prepaid, to the Grantors.

VI. Extinguishment:

A. Grantee's Receipt of Property Right

The Grantors and the Grantee agree that the grant of this Conservation Restriction gives rise for purposes of this paragraph to a real property right, immediately vested in the Grantee, with a fair market value that is at least equal to the proportionate value that this Conservation Restriction determined at the time of the gift bears to the value of the unrestricted Premises at that time.

B. Value of Grantee's Property Right

Such proportionate value of the Grantee's property right shall remain constant.

C. Right of Grantee to Recover Proportional Value at Disposition

If any occurrence ever gives rise to extinguishment or other release of the Conservation Restriction under applicable law, then the Grantee, on a subsequent

sale, exchange or involuntary conversion of the Premises, shall be entitled to a portion of the proceeds equal to such proportionate value, subject, however, to any applicable law which expressly provides for a different disposition of proceeds.

D. Grantors Grantee Cooperation Regarding Public Action

Whenever all or any part of the Premises or any interest therein is taken by public authority under power of eminent domain or other act of public authority, then the Grantors and the Grantee shall cooperate in recovering the full value of all direct and consequential damages resulting from such action.

E. Allocation of Expenses upon Disposition

All related expenses incurred by the Grantors and the Grantee shall first be paid out of any recovered proceeds, and the remaining proceeds shall be distributed between the Grantors and Grantee in shares equal to such proportionate value.

F. Continuing Trust of Grantee's Share of Proceeds of Conservation Restriction Disposition

The Grantee shall use its share of the proceeds in a manner consistent with the conservation purposes of this grant.

VII. ASSIGNABILITY:

A. Running of the Burden

The burdens of this Conservation Restriction shall run with the Premises in perpetuity, and shall be enforceable against the Grantors and their successors in title and assigns holding any interest in the Premises.

B. Running of the Benefit

The benefits of this Conservation Restriction shall be in gross and shall not be assignable by the Grantee, except in the following instances and from time to time:

1. as a condition of any assignment, the Grantee requires that the purpose of this Conservation Restriction continue to be carried out, and
2. the assignee, at the time of the assignment, qualifies under Section 170(h) of the Internal Revenue code of 1986, as amended, and applicable regulations thereunder, and under Section 32 of Chapter 184 of the Massachusetts General Laws as an eligible donee to receive this Conservation Restriction directly.

VIII. SUBSEQUENT TRANSFERS:

The Grantors agree to incorporate by reference the terms of this Conservation Restriction in any deed or other legal instrument by which the Grantors divests themselves of any interest in all or a portion of the Premises. Grantors further agree to notify Grantee in writing at least fourteen (14) days prior to the date of such transfer. Failure of Grantors to do so shall not impair the validity of this Conservation Restriction or limit its enforceability in any way.

IX. ESTOPPEL CERTIFICATES:

Upon request by the Grantors, the Grantee shall within twenty days execute and deliver to the Grantors any document, including an estoppel certification, which certifies the Grantor's compliance with any obligation of the Grantors contained in this Conservation Restriction.

X. EFFECTIVE DATE:

This Conservation Restriction shall be effective when the Grantors and the Grantee have executed it, the administrative approvals required by Section 32 of Chapter 184 of the Massachusetts General Laws have been obtained, and it has been recorded with the Bristol County Registry of Deeds (Southern District).

XI. MISCELLANEOUS

Approval of this Conservation Restriction pursuant to Section 32 of Chapter 184 of the Massachusetts General Laws by any municipal officials and by the Secretary of Environmental Affairs is not to be construed as representing the existence or non-existence of any pre-existing rights of the public, if any, in and to the Premises, and any such pre-existing rights of the public, if any, are not affected by the granting of this Conservation Restriction.

XII. RECORDATION:

The Grantors shall record this instrument in timely fashion in the Bristol County Registry of Deeds (Southern District).

NOTICE OF ACTIVITY AND USE LIMITATION
M.G.L. c. 21E, § 6 and 310 CMR 40.0000

Disposal Site Name: Former Standard Times Site - Lot 3, 16 Blackmer Street, New Bedford, MA
DEP Release Tracking No.(s): 4-15490

This Notice of Activity and Use Limitation ("Notice") is made as of this 5th day of March 2009, by the Commonwealth of Massachusetts Department of Fish and Game located at 251 Causeway Street, Suite 400, Boston, Massachusetts 02114, together with his/her/its/their successors and assigns (collectively "Owner").

WITNESSETH:

WHEREAS, the Commonwealth of Massachusetts Department of Fish and Game, is the owner in fee simple of that certain parcel of vacant land located in New Bedford, Bristol County, Massachusetts, pursuant to a deed recorded with the Bristol County Registry of Deeds (Southern District) in Book 7642, Page 344;

WHEREAS, said parcel of land, which is more particularly bounded and described in Exhibit A, attached hereto and made a part hereof ("Property") is subject to this Notice of Activity and Use Limitation. The Property is shown on a plan recorded in the Bristol County Registry of Deeds (Southern District) in Plan Book 148, Plan 92,

WHEREAS, a portion of the Property ("Portion of the Property") is subject to this Notice of Activity and Use Limitation. The Portion of the Property is more particularly bounded and described in Exhibit A-1, attached hereto and made a part hereof. The Portion of the Property is shown on a plan recorded with the Bristol County Registry of Deeds (Southern District) in Plan Book 163, Plan 106, and/or on a sketch plan attached hereto and filed herewith for registration;

WHEREAS, the Portion of the Property comprises part of a disposal site as the result of a release of oil and/or hazardous material. Exhibit B is a sketch plan showing the relationship of the Portion of the Property subject to this Notice of Activity and Use Limitation to the boundaries of said disposal site existing within the limits of the Property and to the extent such boundaries have been established. Exhibit B is attached hereto and made a part hereof; and

WHEREAS, one or more response actions have been selected for the Portion of the Disposal Site in accordance with M.G.L. c. 21E ("Chapter 21E") and the Massachusetts Contingency Plan, 310 CMR 40.0000 ("MCP"). Said response actions are based upon (a) the restriction of human access to and contact with oil and/or hazardous material in soil and/or (b) the restriction of certain activities occurring in, on, through, over or under the Portion of the Property. The basis for such restrictions is set forth in an Activity and Use Limitation Opinion ("AUL Opinion"), dated March 5, 2009 (which is attached hereto as Exhibit C and made a part hereof);

NOW, THEREFORE, notice is hereby given that the activity and use limitations set forth in said AUL Opinion are as follows:

1. Activities and Uses Consistent with the AUL Opinion. The AUL Opinion provides that a condition of No Significant Risk to health, safety, public welfare or the environment exists for any foreseeable period of time (pursuant to 310 CMR 40.0000) so long as any of the following activities and uses occur on the Portion of the Property:

- (i) Commercial and industrial activities and uses including, but not limited to, vehicular parking, pedestrian and vehicular traffic, passive recreation, landscaping, routine maintenance or any other use that does not compromise the structural integrity of the protective barrier, as defined in 3.(iv) and/or disturb contaminated soil located directly beneath the barrier;
- (ii) Excavation associated with emergency or short term (three months or less) underground utility and/or construction work, provided it is conducted in accordance with a Soil Management Plan and a Health and Safety Plan in accordance with Obligations (i) and (ii) of this Notice; and involves the repair and/or replacement of the protective barrier with a comparable barrier immediately following the completion of the project;
- (iii) Activities and uses that are not identified by this Notice as being inconsistent with maintaining a condition of No Significant Risk; and
- (iv) Such other activities and uses which, in the Opinion of an LSP, shall present no greater risk of harm to health, safety, public welfare, or the environment than the activities and uses set forth in this paragraph.

2. Activities and Uses Inconsistent with the AUL Opinion. Activities and uses that are inconsistent with the objectives of this Notice of Activity and Use Limitation, and which, if implemented at the Portion of the Property, may result in a significant risk of harm to health, safety, public welfare or the environment or in a substantial hazard, are as follows:

- (i) Use of the Property as a residence, school, nursery, daycare, recreational area and/or other such use at which a child's regular presence is likely
- (ii) Activities and/or uses which are likely to involve the removal and/or disturbance of the protective barrier in the AUL Area and/or

the disturbance of the contaminated soil located beneath the protective barrier without prior development of a Soil Management Plan and a Health and Safety Plan in accordance with Obligations (i) and (ii) of this Opinion;

- (iii) Relocation of the contaminated soil from beneath the protective barrier in the AUL Area unless an LSP renders an Opinion that states such relocation is consistent with maintaining a condition of No Significant Risk; and
- (iv) Activities and/or uses that may cause physical or chemical deterioration, breakage, or structural damage to the protective barrier.

3. Obligations and Conditions Set Forth in the AUL Opinion. If applicable, obligations and/or conditions to be undertaken and/or maintained at the Portion of the Property to maintain a condition of No Significant Risk as set forth in the AUL Opinion shall include the following:

- (i) A Soil Management Plan must be prepared by an LSP and implemented prior to the commencement of any activity that is likely to disturb the contaminated soil located immediately beneath the protective barrier. The Soil Management Plan must be prepared in accordance with the guidelines discussed in the Activity and Use Limitation opinion attached hereto as Exhibit C;
- (ii) A Health and Safety Plan must be prepared and implemented in accordance with the guidelines discussed in the Activity and Use Limitation Opinion attached hereto as Exhibit C prior to the commencement of any activity that involves the removal and/or disturbance of the protective barrier and/or is likely to disturb the underlying contaminated soil within the AUL Area;
- (iii) The protective barrier within the AUL Area must be repaired and/or replaced with a comparable barrier to prevent future exposures to underlying contaminated soil immediately following the completion of any activity that involves its removal and/or disturbance;
- (iv) The protective barrier shall consist of either a minimum of 3-inches of asphalt pavement (or concrete), 3-feet of clean soil or a building
- (v) The protective barrier must be maintained within the designated AUL area to ensure that the contaminated soil located beneath the barrier remains inaccessible; and

- (vi) Annual inspections and associated record-keeping activities must be performed to confirm that the barrier is being properly maintained to prevent exposure(s) to contaminated soil located immediately beneath the protective barrier.

4. Proposed Changes in Activities and Uses. Any proposed changes in activities and uses at the Portion of the Property that may result in higher levels of exposure to oil and/or hazardous material than currently exist shall be evaluated by an LSP who shall render an Opinion, in accordance with 310 CMR 40.1080 *et seq.*, as to whether the proposed changes will present a significant risk of harm to health, safety, public welfare or the environment. Any and all requirements set forth in the Opinion to meet the objective of this Notice shall be satisfied before any such activity or use is commenced.

5. Violation of a Response Action Outcome. The activities, uses and/or exposures upon which this Notice is based shall not change at any time to cause a significant risk of harm to health, safety, public welfare, or the environment or to create substantial hazards due to exposure to oil and/or hazardous material without the prior evaluation by an LSP in accordance with 310 CMR 40.1080 *et seq.*, and without additional response actions, if necessary, to achieve or maintain a condition of No Significant Risk or to eliminate substantial hazards.

If the activities, uses, and/or exposures upon which this Notice is based change without the prior evaluation and additional response actions determined to be necessary by an LSP in accordance with 310 CMR 40.1080 *et seq.*, the owner or operator of the Portion of the Property subject to this Notice at the time that the activities, uses and/or exposures change, shall comply with the requirements set forth in 310 CMR 40.0020.

6. Incorporation Into Deeds, Mortgages, Leases, and Instruments of Transfer. This Notice shall be incorporated either in full or by reference into all future deeds, easements, mortgages, leases, licenses, occupancy agreements or any other instrument of transfer, whereby an interest in and/or a right to use the Property or a portion thereof is conveyed.

Owner hereby authorizes and consents to the filing and recordation and/or registration of this Notice, said Notice to become effective when executed under seal by the undersigned LSP, and recorded and/or registered with the appropriate Registry(ies) of Deeds and/or Land Registration Office(s).

WITNESS the execution hereof under seal this 25th day of February, 2009.

 16 BLACKMER STREET
 NEW BEDFORD, MASSACHUSETTS

EXHIBIT:

B

Exhibit C
LSP Activity & Use Limitation Opinion

In accordance with the requirements of 310 CMR 40.1074, this Licensed Site Professional (LSP) Opinion has been prepared in support of the Notice of Activity and Use Limitation (AUL) for a portion of the parcel of land identified on City of New Bedford Assessor's Plat 25A as Lot 49, and addressed as 16 Blackmer Street, New Bedford, Massachusetts (the Property). At the time of the recording of this AUL, the 2.185 acre parcel of vacant land is located within a working waterfront district zoned for industrial use. As illustrated in Exhibit B attached hereto, a large paved parking area occupies the southernmost portion of the Property. A City drainage easement abuts the southern Property line.

Site History

Multiple 21E investigations conducted at the Property have identified elevated levels of lead, petroleum hydrocarbons and polycyclic aromatic hydrocarbons (PAH's) in soil, likely attributable to the presence of historic urban fill emplaced along the New Bedford waterfront area. The Department of Environmental Protection (DEP) was notified of the release condition (lead and PAH), and Phase I and Phase II site investigations were completed at the site to define the extent and magnitude of contamination. The primary contaminant of concern was identified as lead and was detected at concentrations ranging from 42 mg/kg to 287 mg/kg in surface and subsurface soil (from 0 to 8 feet in depth) situated throughout the unpaved northern portion of the Property. Higher levels of lead were found in soil samples collected from the same depths beneath the currently paved southern portion of the Property at concentrations ranging from 30 to 5780 mg/kg. Other contamination detected above state reportable concentrations identified at the site generally mirrored the locations and trends exhibited by lead and specifically consisted of Benzo(a)pyrene at concentrations as high as 13 mg/kg; Dibenzo(a,h)anthracene at concentrations as high as 10 mg/kg; and petroleum hydrocarbons at concentrations as high as 900 mg/kg. Groundwater monitoring has adequately demonstrated that the release has not affected groundwater.

Reason for Activity and Use Limitation

A Method 3 Risk Characterization was prepared to support a Response Action Outcome for the site. The Risk Characterization concluded that No Significant Risk to human health, safety, public welfare, and the environment exists for activities and uses consistent with current commercial/industrial uses of the Property including emergency utility work and/or any construction projects. However, a level of No Significant Risk is not supported for future unrestricted activities and uses of the southern paved portion of the Property, such as those which may result in a child's exposure through direct contact with and/or ingestion of the contaminated soil. In order to maintain a level of No Significant Risk for future foreseeable site activities and uses, an Activity and Use Limitation is necessary to ensure that the soil currently located beneath the paved area located on the southern portion of the Property remains inaccessible and the exposure pathways remain incomplete. To that end, the Activity and Use Limitation will require the maintenance of the current pavement or other suitable physical barrier (including

buildings and concrete sidewalks) so that direct contact with underlying soils is not possible by visitors to the subject Property. In addition, activities which may result in the disturbance or relocation of the underlying soil to more accessible areas must also be restricted. The following presents said obligations and conditions as provided in the Activity and Use Limitation.

Permitted Uses and Activities

- (i) Commercial and industrial activities and uses including, but not limited to, vehicular parking, pedestrian and vehicular traffic, passive recreation, landscaping, routine maintenance or any other use that does not compromise the structural integrity of the protective barrier, as defined in 3.(iv) and/or disturb contaminated soil located directly beneath the barrier;
- (ii) Excavation associated with emergency or short term (three months or less) underground utility and/or construction work, provided it is conducted in accordance with a Soil Management Plan and a Health and Safety Plan in accordance with Obligations (i) and (ii) of this Notice; and involves the repair and/or replacement of the protective barrier with a comparable barrier immediately following the completion of the project;
- (iii) Activities and uses that are not identified by this Notice as being inconsistent with maintaining a condition of No Significant Risk; and
- (iv) Such other activities and uses which, in the Opinion of an LSP, shall present no greater risk of harm to health, safety, public welfare, or the environment than the activities and uses set forth in this paragraph.

Restricted Uses and Activities

- (i) Use of the Property as a residence, school, nursery, daycare, recreational area and/or other such use at which a child's regular presence is likely;
- (ii) Activities and/or uses which are likely to involve the removal and/or disturbance of the protective barrier in the AUL Area and/or the disturbance of the contaminated soil located beneath the protective barrier without prior development of a Soil Management Plan and a Health and Safety Plan in accordance with Obligations (i) and (ii) of this Opinion;
- (iii) Relocation of the contaminated soil from beneath the protective barrier in the AUL Area unless an LSP renders an Opinion that states such relocation is consistent with maintaining a condition of No Significant Risk; and
- (iv) Activities and/or uses that may cause physical or chemical deterioration, breakage, or structural damage to the protective barrier.

Obligations and Conditions

- (i) A Soil Management Plan must be prepared by an LSP and implemented prior to the commencement of any activity that is likely to disturb the contaminated soil located immediately beneath the protective barrier. The Soil Management Plan should describe appropriate soil excavation, handling, storage, transport, and disposal procedures and include a description of the engineering controls and air monitoring procedures necessary to ensure that workers and receptors in the vicinity are not affected by fugitive dust or particulates. On-site workers must be informed of the requirements of the Soil Management Plan, and the plan must be available on-site throughout the course of the project;
- (ii) A Health and Safety Plan must be prepared by a Certified Industrial Hygienist or other qualified individual sufficiently trained in worker health and safety requirements and implemented prior to the commencement of any activity which involves the removal and/or disturbance of the protective barrier and/or is likely to disturb the underlying contaminated soil, rendering it more accessible. The plan should clearly describe the location of the contaminated soil and specifically identify the types of personal protective equipment, monitoring devices, and engineering controls necessary to ensure that workers are not exposed to the contaminated soil through dermal contact, ingestion, and/or the inhalation of particulate dusts. Workers who may come in contact with contaminated soil within the designated AUL area must be informed of the location of the contamination and all requirements of the Health and Safety Plan. The plan must be available on-site throughout the course of the project;
- (iii) The protective barrier within the AUL Area must be repaired and/or replaced with a comparable barrier to prevent future exposures to underlying contaminated soil immediately following the completion of any activity that involves its removal and/or disturbance;
- (iv) The protective barrier shall consist of either a minimum of 3-inches of asphalt pavement (or concrete), 3-feet of clean soil or a building;
- (v) The protective barrier must be maintained within the designated AUL area to ensure that the contaminated soil located beneath the barrier remains inaccessible; and
- (vi) Annual inspections and associated record-keeping activities must be performed to confirm that the barrier is being properly maintained to prevent exposure(s) to contaminated soil located immediately beneath the protective barrier.

EXHIBIT L

CONFIRMATORY NOTICE OF ACTIVITY AND USE LIMITATION

M.G.L. c. 21E, § 6 and 310 CMR 40.0000

Disposal Site Name: Former Standard Times Site - Lot 3, 16 Blackmer Street, New Bedford, MA
DEP Release Tracking No.(s): 4-15490

This Confirmatory Notice of Activity and Use Limitation ("Notice") is made as of this 2nd day of February, 2010, by the Commonwealth of Massachusetts Department of Fish and Game located at 251 Causeway Street, Suite 400, Boston, Massachusetts 02114, together with his/her/its/their successors and assigns (collectively "Owner").

WITNESSETH:

WHEREAS, the Commonwealth of Massachusetts Department of Fish and Game, is the owner in fee simple of that certain parcel of vacant land located in New Bedford, Bristol County, Massachusetts, pursuant to a deed recorded with the Bristol County Registry of Deeds (Southern District) in Book 7642, Page 344;

WHEREAS, said parcel of land, which is more particularly bounded and described in Exhibit A, attached hereto and made a part hereof ("Property") is subject to this Notice of Activity and Use Limitation. The Property is shown on a plan recorded in the Bristol County Registry of Deeds (Southern District) in Plan Book 148, Plan 92,

WHEREAS, a portion of the Property ("Portion of the Property") is subject to this Notice of Activity and Use Limitation. The Portion of the Property is more particularly bounded and described in Exhibit A-1, attached hereto and made a part hereof. The Portion of the Property is shown on a plan recorded with the Bristol County Registry of Deeds (Southern District) in Plan Book 163, Plan 106, and/or on a sketch plan attached hereto and filed herewith for registration;

WHEREAS, the Portion of the Property comprises part of a disposal site as the result of a release of oil and/or hazardous material. Exhibit B is a sketch plan showing the relationship of the Portion of the Property subject to this Notice of Activity and Use Limitation to the boundaries of said disposal site existing within the limits of the Property and to the extent such boundaries have been established. Exhibit B is attached hereto and made a part hereof; and

WHEREAS, one or more response actions have been selected for the Portion of the Disposal Site in accordance with M.G.L. c. 21E ("Chapter 21E") and the Massachusetts Contingency Plan, 310 CMR 40.0000 ("MCP"). Said response actions are based upon (a) the restriction of human access to and contact with oil and/or hazardous material in soil and/or (b) the restriction of certain activities occurring in, on, through, over or under the Portion of the Property. The basis for such restrictions is set forth in an Activity and Use Limitation Opinion ("AUL Opinion"), dated March 5, 2009 (which is

attached as Exhibit C of the original Notice of Activity and Use Limitation dated March 9, 2009, and recorded with the Registry of Deeds in Book 9289, Page 7.

NOW, THEREFORE, notice is hereby given that the activity and use limitations set forth in said AUL Opinion are as follows:

1. Activities and Uses Consistent with the AUL Opinion. The AUL Opinion provides that a condition of No Significant Risk to health, safety, public welfare or the environment exists for any foreseeable period of time (pursuant to 310 CMR 40.0000) so long as any of the following activities and uses occur on the Portion of the Property:

- (i) Commercial and industrial activities and uses including, but not limited to, vehicular parking, pedestrian and vehicular traffic, passive recreation, landscaping, routine maintenance or any other use that does not compromise the structural integrity of the protective barrier, as defined in 3.(iv) and/or disturb contaminated soil located directly beneath the barrier;
- (ii) Excavation associated with emergency or short term (three months or less) underground utility and/or construction work, provided it is conducted in accordance with a Soil Management Plan and a Health and Safety Plan in accordance with Obligations (i) and (ii) of this Notice; and involves the repair and/or replacement of the protective barrier with a comparable barrier immediately following the completion of the project;
- (iii) Activities and uses that are not identified by this Notice as being inconsistent with maintaining a condition of No Significant Risk; and
- (iv) Such other activities and uses which, in the Opinion of an LSP, shall present no greater risk of harm to health, safety, public welfare, or the environment than the activities and uses set forth in this paragraph.

2. Activities and Uses Inconsistent with the AUL Opinion. Activities and uses that are inconsistent with the objectives of this Notice of Activity and Use Limitation, and which, if implemented at the Portion of the Property, may result in a significant risk of harm to health, safety, public welfare or the environment or in a substantial hazard, are as follows:

- (i) Use of the Property as a residence, school, nursery, daycare, recreational area and/or other such use at which a child's regular presence is likely

- (ii) Activities and/or uses which are likely to involve the removal and/or disturbance of the protective barrier in the AUL Area and/or the disturbance of the contaminated soil located beneath the protective barrier without prior development of a Soil Management Plan and a Health and Safety Plan in accordance with Obligations (i) and (ii) of the LSP Opinion;
 - (iii) Relocation of the contaminated soil from beneath the protective barrier in the AUL Area unless an LSP renders an Opinion that states such relocation is consistent with maintaining a condition of No Significant Risk; and
 - (iv) Activities and/or uses that may cause physical or chemical deterioration, breakage, or structural damage to the protective barrier.
3. Obligations and Conditions Set Forth in the AUL Opinion. If applicable, obligations and/or conditions to be undertaken and/or maintained at the Portion of the Property to maintain a condition of No Significant Risk as set forth in the AUL Opinion shall include the following:
- (i) A Soil Management Plan must be prepared by an LSP and implemented prior to the commencement of any activity that is likely to disturb the contaminated soil located immediately beneath the protective barrier. The Soil Management Plan must be prepared in accordance with the guidelines discussed in the Activity and Use Limitation opinion attached hereto as Exhibit C of the original Notice of Activity and Use Limitation;
 - (ii) A Health and Safety Plan must be prepared and implemented in accordance with the guidelines discussed in the Activity and Use Limitation Opinion attached hereto as Exhibit C of the original Notice of Activity and Use Limitation prior to the commencement of any activity that involves the removal and/or disturbance of the protective barrier and/or is likely to disturb the underlying contaminated soil within the AUL Area;
 - (iii) The protective barrier within the AUL Area must be repaired and/or replaced with a comparable barrier to prevent future exposures to underlying contaminated soil immediately following the completion of any activity that involves its removal and/or disturbance;
 - (iv) The protective barrier shall consist of either a minimum of 3-inches of asphalt pavement (or concrete), 3-feet of clean soil or a building

- (v) The protective barrier must be maintained within the designated AUL area to ensure that the contaminated soil located beneath the barrier remains inaccessible; and
- (vi) Annual inspections and associated record-keeping activities must be performed to confirm that the barrier is being properly maintained to prevent exposure(s) to contaminated soil located immediately beneath the protective barrier.

4. Proposed Changes in Activities and Uses. Any proposed changes in activities and uses at the Portion of the Property that may result in higher levels of exposure to oil and/or hazardous material than currently exist shall be evaluated by an LSP who shall render an Opinion, in accordance with 310 CMR 40.1080 *et seq.*, as to whether the proposed changes will present a significant risk of harm to health, safety, public welfare or the environment. Any and all requirements set forth in the Opinion to meet the objective of this Notice shall be satisfied before any such activity or use is commenced.

5. Violation of a Response Action Outcome. The activities, uses and/or exposures upon which this Notice is based shall not change at any time to cause a significant risk of harm to health, safety, public welfare, or the environment or to create substantial hazards due to exposure to oil and/or hazardous material without the prior evaluation by an LSP in accordance with 310 CMR 40.1080 *et seq.*, and without additional response actions, if necessary, to achieve or maintain a condition of No Significant Risk or to eliminate substantial hazards.

If the activities, uses, and/or exposures upon which this Notice is based change without the prior evaluation and additional response actions determined to be necessary by an LSP in accordance with 310 CMR 40.1080 *et seq.*, the owner or operator of the Portion of the Property subject to this Notice at the time that the activities, uses and/or exposures change, shall comply with the requirements set forth in 310 CMR 40.0020.

6. Incorporation Into Deeds, Mortgages, Leases, and Instruments of Transfer. This Notice shall be incorporated either in full or by reference into all future deeds, easements, mortgages, leases, licenses, occupancy agreements or any other instrument of transfer, whereby an interest in and/or a right to use the Property or a portion thereof is conveyed.

Owner hereby authorizes and consents to the filing and recordation and/or registration of this Confirmatory Notice, said Confirmatory Notice to become effective when executed under seal by the undersigned LSP, and recorded and/or registered with the appropriate Registry(ies) of Deeds and/or Land Registration Office(s).

This Confirmatory Notice of Activity and Use Limitation is given to correct

the inadvertent error(s) made in the Notice of Activity and Use Limitation dated March 9, 2009, and recorded with the Registry of Deeds in Book 9289, Page 7, said error(s) being as follows:

- (i) Exhibit B of the recorded Notice of Activity and Use Limitation did not properly depict AUL limits relative to the defined Site boundaries.

The corrected Site Sketch has been provided and attached hereto as Exhibit B. In all other respects, the terms of the Notice of Activity and Use Limitation remain unchanged.

WITNESS the execution hereof under seal this 20th day of January, 2010.

The EDR Aerial Photo Decade Package

EDR Aerial Photo Decade Package

Environmental Data Resources, Inc. (EDR) Aerial Photo Decade Package is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's professional researchers provide digitally reproduced historical aerial photographs, and when available, provide one photo per decade.

When delivered electronically by EDR, the aerial photo images included with this report are for ONE TIME USE ONLY. Further reproduction of these aerial photo images is prohibited without permission from EDR. For more information contact your EDR Account Executive.

Thank you for your business.
Please contact EDR at 1-800-352-0050
with any questions or comments.

Disclaimer - Copyright and Trademark Notice

This Report contains certain information obtained from a variety of public and other sources reasonably available to Environmental Data Resources, Inc. It cannot be concluded from this Report that coverage information for the target and surrounding properties does not exist from other sources. **NO WARRANTY EXPRESSED OR IMPLIED, IS MADE WHATSOEVER IN CONNECTION WITH THIS REPORT. **GEOPHYSICAL INVESTIGATION REPORT
NEW BEDFORD MARINE COMMERCE TERMINAL
UPLAND GEOPHYSICAL INVESTIGATIONS**

**For the:
Massachusetts Clean Energy Center**

June 2011

*Apex Companies, LLC
184 High Street - Suite 502
Boston, MA 02210*

INTRODUCTION AND PURPOSE

This “Geophysical Investigation Report – New Bedford Marine Commerce Terminal, Upland Geophysical Investigations” was prepared by Apex Companies, LLC (Apex) for the Massachusetts Clean Energy Center.

The objective of this geophysical investigation was to detect and characterize the subsurface at the site in an attempt to identify potential underground man-made structures (which could include buried pipes, buried septic systems, buried debris, buried former foundations, vaults, underground storage tanks (USTs), and/or other potential buried objects within the survey area) which might affect proposed surface construction, future foundation construction, and/or other subsurface investigation activities.

UPLAND STUDY AREA DEFINITION AND MEASUREMENT SPACING

The geophysical data was collected within the Areas of Interest (AOI), within properties anticipated to be included within the New Bedford Marine Commerce Terminal, including portions of (or the entire area of) the following properties (as referenced by Map and Block numbers issued by the New Bedford Assessor’s Office): Map 31 Block 288 (also referred to as the “Unoccupied Shuster Property”, Map 25A, Block 53 (also referred to as the “Northern Department of Marine Fisheries (DMF) Property”, Map 25A, Block 49 (also referred to as the “Southern DMF Property”), and Map 25A, Block 48 (also referred to as the “City of New Bedford Property”). The exact boundaries of the Areas of Interest were determined during a walkthrough of the above-noted properties, but generally consisted of accessible areas (i.e. areas that allowed access of geophysical equipment) within the above-noted properties. Certain areas of the Unoccupied Shuster Property were densely covered with vegetation and therefore were not accessible, similarly certain areas contained a high concentration of rocks which also impeded data collection. It is Apex’s estimate that data collection represents a sampling frequency sufficient to provide analysis of approximately 80% of the area of the above-noted properties.

Complete coverage Time Domain Electromagnetic Induction (TDEM) data was collected continuously (at a rate of at least 4 readings per second) over the Areas of Interest along traverses spaced approximately 2 – 3 feet apart. The TDEM data was position-stamped utilizing Differential Global Position System (DGPS) coordinates, and cross-checked with the grid established for the Ground Penetrating Radar (GPR) survey. Survey lines are shown on **Figure 1**.

Ground Penetrating Radar (GPR) data was collected continuously along “north-south” and “east-west” transects spaced approximately 5 to 15 feet apart over the survey footprint. GPR lines over select electromagnetic targets were also collected to further characterize potential subsurface anomalies identified from the EM data results.

METHODOLOGY

The geophysical methods best suited for this type of subsurface characterization are Time Domain Electromagnetic Induction (TDEM) in conjunction with Ground Penetrating Radar (GPR). TDEM instruments are sensitive to both ferrous and non-ferrous metals, are able to detect a buried 10 inch pipe to depths approaching 10 feet, are fast and easy to operate over rough terrain, and can be operated near buildings, fences, and power-lines. GPR utilizes electromagnetic waves propagated from an antenna focused on the ground surface to detect features or structures in the subsurface having contrasting electromagnetic properties, and is used in conjunction with TDEM data to further characterize anomalies identified from the TDEM data and to identify non-metallic structures in the subsurface.

The results of TDEM data collection were gridded and contoured into a color-coded plan-view contour map of the TDEM data. From this map, it is generally easy to pick out buried metallic structures, which show up as high intensity (red, orange, or pink) “anomalies” on the map view, examples of the field data can be found in **Appendix B**.

GPR results are obtained as cross-sectional representations of the response of the subsurface to emitted electromagnetic waves. This combination of TDEM data in map view with GPR data in cross-sectional view provides for the geophysical interpreter a three-dimensional representation of how the subsurface responds to induced electromagnetic energy.

Apex geophysicists performed the geophysical survey design, data collection, data reduction, and data interpretation. Details concerning the specific equipment utilized are presented in the sections below.

Instrumentation

Apex performed Time Domain Electromagnetics (TDEM) survey on February 21st – 25th, February 28th – March 4th, March 7th – March 11th, 2011.

The Geonics EM61 Mk-II is a Time Domain Electromagnetic (TDEM) instrument that is currently considered one of the state-of-the-art technologies for the detection of subsurface metallic objects and features. The EM61 utilizes two receiver coils to measure the residual magnetic field generated by conductive and/or magnetic materials. In general, the EM61 employed for this project was designed to measure the residual magnetic field at a time when the response from conductive and/or magnetic objects is maximized compared to the response from most earth materials. The use of two receiver coils also makes it possible to differentiate, in a simplistic fashion, shallow versus deeper objects. An additional benefit of the specific design of the EM61 system is that it permits a more focused observation of the subsurface in areas of cultural interference, as well as in areas characterized by a high

spatial density of subsurface objects (i.e., it can differentiate between a high number of smaller buried metallic objects than its predecessor models, even in areas with high background noise). This capability is due to both the mechanical design and operational parameters of the instrument, as well as the inherent nature of active electromagnetic fields, which diminish in magnitude at a much higher rate than other sensor technologies such as magnetometry.

The primary factors that affect the “detectability” of objects or features with TDEM methods include: volumetric size and orientation; distance from the sensor; and material properties contrast between the object or feature and the surrounding materials.

Differential Global Positioning System (DGPS)

The Differential Global Positioning System (DGPS) system used for this project was a Trimble Pathfinder-ProXRS. The system utilizes satellite navigation technology to precisely (within approximately one meter accuracy) identify location in real-time (readings are collected approximately once per second). The Trimble Pathfinder is a dual frequency system that can provide the highest location accuracy (given the current technology) under the conditions anticipated at the site under investigation. An additional benefit is that the DGPS antenna is small and can be mounted directly onto the EM61 coils without significantly interfering with the TDEM signal.

The EM61 and DGPS instrumentation were operated in a manner consistent with the general procedures documented in their respective operational manuals. DGPS functional checks included occupation of known control points, as well as the reacquisition of specific targets or above-ground features generated from the interpretation of the geophysical data.

Ground Penetrating Radar (GPR)

Apex performed GPR surveys on April 6th – April 8th, 2011 with the GSSI SIR-3000. The GSSI SIR-3000 GPR instrument is a portable, field-rugged system that has a built-in 8.5-inch high resolution monitor for real-time data analysis. Data is stored on an internal disk drive. The SIR-3000 can be used with a variety of antennas from 2500 megahertz (MHz) to less than 50 MHz. Based on the objectives of this geophysical investigation, a 400 MHz antenna was utilized, as it was considered the most likely to provide the necessary resolution and depth penetration for the targets and features sought.

GPR is a geophysical technique that utilizes the propagation of short wavelength (high frequency) electromagnetic waves into the subsurface to detect buried features. Records of the waves reflected back by features and structures in the subsurface that possesses contrasts in electrical properties are obtained in digital format. The GPR record is most

often displayed as a distance (horizontal) versus time (vertical) plot (in cross-section), and is recorded digitally to allow for post-acquisition processing. Although a GPR record is a complex composition of interface patterns, loss mechanisms (geometric, mechanical, and chemical), and reflections, its picture-like character can make it a very useful tool in the detection of buried subsurface features. The depth of investigation of radar is generally shallow due to the high frequencies utilized, however this disadvantage is (at least) partially offset by the increased resolution it offers over other geophysical techniques.

The "picture-like" character of GPR can make it a very useful tool to delineate many shallow subsurface features. The detection of an object or feature by the GPR system depends primarily upon the electrical properties of the host (i.e., natural site conditions, or "background") and target (i.e., buried structure, utility, void, etc.) materials. The subsurface parameters that dominate the propagation of the radar wave are the dielectric permittivity and the conductivity. The dielectric permittivity controls the velocity of the radar wave, and the conductivity controls the attenuation of the radar wave. Accordingly, subsurface materials or objects characterized by higher conductivities (i.e., metallic objects, moist or wet clays, saline water, and other conductive materials) attenuate the radar signal more readily.

PROCEDURES - Data Collection

Survey Design - EM61 Electromagnetics

The survey line spacing for the EM61 survey was approximately 2 - 3 feet (EM61 data was collected along lines spaced approximately 2 feet apart), resulting in complete, overlapping EM coverage of the AOI footprint. The survey was conducted along multiple parallel lines within the survey area. Several cross-lines were included within the survey area in order to provide data quality cross-checks. The EM61 data collection track lines are shown in **Figure 1**.

The survey setup involved a mounted coil (sensor) system placed on a specially designed wheel "harness" which was pulled by the field geophysicist along pre-designated survey lines. The GPS receiver was attached to the EM61 via a (non-metallic) fiberglass-pipe tripod mounting bracket attached to the EM61 top coil. A continuous data stream was collected from both the EM61 and the GPS units, and logged via a PC data-logger for post processing of position and TDEM data merging.

Survey Design - Ground Penetrating Radar

The GPR data was collected along "north-south" and "east-west" traverses along a 10 - 15 foot grid established over the proposed area of construction and along selected traverses across TDEM anomalies. **Figure 1** shows the approximate location of GPR survey lines collected for the initial phase of the investigation.

The GPR data collected in the field was both saved in the internal memory of the GPR unit, and saved to a removable disk for later post-processing and data play-back. Position information was obtained simultaneously and streamed into the data collector at the same time as surveying. Surveying in the cross points of the major grid lines and known corners for verification (utilizing the hand-held DGPS receiver), which transferred the position data to a data-logger for downloading after completion of the survey.

Data Processing

The data processing for this study was conducted in keeping with industry standards, and was performed using state-of-the-art and well-tested software. The Apex on-site geophysicist performed preliminary geophysical data processing in the field. Processing, analysis and interpretation of the data was performed with internally and commercially developed software that has been specifically produced to integrate and interpret digital geophysical data acquired with DGPS positioning systems. Several steps were performed to process the geophysical data prior to analysis:

Electromagnetics (TDEM)

GPS data was processed and transformed into the Universal Transverse Mercator coordinate system. GPS/TDEM data merging was checked for lag errors by analyzing linear anomalous trends for offsets. Offset corrections were applied where necessary. EM61 instrument bias was removed, signal drift was corrected where necessary, and minor instrument positioning corrections were applied.

Positioning and EM61 signal statistics were calculated; erroneous measurements were identified and removed from the data file. The TDEM data was analyzed utilizing the GeoSoft, Inc. "Oasis Montaj" geophysical data analysis software.

Data was interpreted using two independent modes of target prediction (1-D profile data and 2.5-D color-coded image data) to provide location information for each set of anomalous readings (different from surrounding readings). A color-coded image of the TDEM intensity (blues and greens for low TDEM readings, reds and oranges for high TDEM readings) was generated in order to assist the interpreter.

Ground Penetrating Radar (GPR)

The clarity of the images is influenced by the signal attenuation (in the subsurface), the amount of debris in the subsurface causing strong reflectors to be present, and the moisture content of the subsurface materials. Calibration of the system using gain controls and high and low pass filters were regularly performed to account for changing subsurface soil conditions within certain areas of survey, thus ensuring the best possible images were obtained.

Interpretation Techniques

The following sections describe the procedures utilized by Apex geophysicists in their interpretation of the multi-phased geophysical data collected on both of the properties respectfully. Initially, the interpretations of the TDEM and GPR data were conducted independently then merged. Discrepancies between the two interpreted data sets were resolved through interactive re-interpretation. An interactive interpretation procedure is utilized, whereby the interpreting geophysicist defines a possible interpretation scenario from the first "layer" of data (i.e., the TDEM data), then adds another "layer" of data (i.e., the GPR data), then re-interprets the resulting composite data interpretation, (and so-on) until the best fit interpretation for all of the available qualified data is achieved.

Electromagnetics (TDEM)

For the interpretation of the Time Domain Electromagnetic (TDEM) data, two primary modes of interpretation were used: 1D profile interpretation; and 2.5D interpretation using color-coded measurement data. For the profile interpretation, EM61 data maps were graphically displayed on the computer screen for review by the interpreter, data used for

this interpretation is attached in **Appendix B**. TDEM data were displayed with EM61 amplitudes along the y-axis, versus distance or sample points along the x-axis. The geographic positions of the displayed data were also graphically displayed on the computer screen along with any comments entered into the positioning system (e.g. surface metal, etc.). The anomalies selected were based on peak amplitudes above background values and/or the percentage of points above a local background value. The interpreter selected the minimum amplitude and percentage above background for anomaly targets. Background values are determined using the mode of a specified number of points in the data acquisition session, or by taking the median value of the data within a user-defined number of samples around the anomaly.

For 2.5D color-coded interpretation, the interpreter plots the target selection results of the 1D process on a mathematically gridded color-coded map (see **Figure 2**). The interpreter has the ability to modify targets based on evaluation of the spatial relationships within the data (e.g., pick a single target location for several 1D interpretation points that are closely-spaced), as well as deselect targets and features that appear to be aboveground features.

Ground Penetrating Radar

The interpretation of the GPR data consisted of the interpreting geophysicist identifying features and targets of interest on the data profiles (printing out data and data playback conducted in a digitally controlled environment on next-generation computing platforms using the GPR data processing and interpretation software RADAN©) and mapping these features in terms of their lateral extent. The amplitude of the response as well as the shape of the reflection was collectively utilized to interpret the data. Representative symbols were transcribed onto the plan maps of the site, representing the potential objects and features of interest for further investigation.

RESULTS

The following sections describe the results of the TDEM and GPR surveys conducted on the Unoccupied Shuster Property, Northern and Southern DMF Properties and City of New Bedford Properties.

The results of the TDEM survey are shown on the color registered contour plans of the TDEM response data shown on **Figure 2**. All EM61 data was compiled into a single file containing relative X and Y coordinates and the EM61 response data (Z coordinates). Data for each of the two instrument reading “coils” was interpolated to a regular grid using a minimum curvature gridding algorithm. The data was then displayed as high resolution color plots as shown. High electromagnetic responses appear as pinks or reds, whereas a low or “quiet” response is identified by blue or green colors.

The results of the GPR transects were interpreted by experienced geophysicists in order to identify areas of potential GPR anomalies. Results have been rendered on **Figure 3** as target “tick-marks” and “areas of anomalous GPR signature”.

Electromagnetics (EM)

The Electromagnetic response within the survey area shows a variety of buried and surficial metallic objects (see **Figure 2**). The high electromagnetic responses are seen as pinks and reds, indicative of metallic objects or materials that have metallic or magnetic content or inclusions. Surface metal was noted during data collection and disregarded during the interpretation of subsurface objects.

Surficial metallic objects displayed in the EM data include:

- Fence that surrounds part of the Northern and Southern DMF properties;
- Manholes and utility covers;
- Catch basins;
- Utility poles;
- Light posts;
- Drain clean outs;
- Fire hydrants;
- Metal fences and gates;
- Traffic and other signs in parking area;
- Reinforced sidewalks;
- The curb surrounding the parking areas and street;
- Surficial debris located at the edge of the woods and within the woods;
- Surficial debris in grassy area and area that had been cleared on the properties;

- Metallic objects within possible old building footprint will also give a high EM response.

An EM response related to subsurface objects can come from a many types of structures including, pipes, septic systems, buried debris, and geologic features. Subsurface metallic features that may result in anomalous EM data include:

- Linear anomalies which indicate possible pipes and/or cables; and
- Isolated high EM responses indicate buried metallic debris or metallic or magnetic material in the subsurface.

A portion of the heavily vegetated area in the middle of the Unoccupied Shuster property was included as an area of interest for this survey. Due to the difficulty/incomplete clearing of the area, it was only possible to collect EM in a section of the area as seen in **Figure 2**. The interpretation of the data from this area suggests the possibility of some subsurface features. It may be necessary to clear the remaining vegetation in order to gain a clearer understanding of the potential features that may be found in the area.

Ground Penetrating Radar (GPR)

GPR results indicate the presence of multiple subsurface anomalies within the survey area. Anomalies are depicted as tick marks on **Figure 3** and identified with the anomalous objects approximate depth and orientation. Selected GPR transects are included in this report as **Appendix A**. GPR response will vary due to varying surface conditions such as grass, asphalt and other surface conditions, and the GPR was re-calibrated in the field when the GPR crossed between grass and asphalt whenever possible.

Anomalies interpreted indicate the potential presence of the following subsurface features:

Buried utility lines: numerous parabolic reflectors were noted in the GPR data, indicating the likely presence of buried utility lines, when oriented linearly. These varied from (small) possible buried electric lines to (larger) storm water drainage lines, or septic lines.

Chaotic/complex anomalies associated with EM anomalies in the within the area believed to be the buried building footprint. These very complex and chaotic anomalies were identified in the data ranging from shallow to deep. The random nature and chaotic signature of the anomalies is consistent with debris and/or possible structures buried in the subsurface.

INTERPRETATIONS

The geophysical data collected on both properties was processed and interpreted by Apex geophysicists. An interpretation of the composite EM and GPR data is presented on the “Electromagnetics and GPR Interpreted Results Map” in **Figure 2**. An “Interpretive Results Map” depicting only the interpretive lines is presented as **Figure 3**. It should be noted that not all anomalies identified in the EM and/or GPR data were interpreted as subsurface targets of interest. EM and GPR anomalies can be caused by a variety of subsurface conditions such as single item debris, rocks, and roots from trees, certain geological configurations, etc. Anomalies that were interpreted as being the result of either small debris, natural objects, or were not significant, were generally not translated onto the interpretive maps (unless they were deemed significant or of interest, or could be significant or of interest).

Many of the EM and GPR targets identified in the data exhibited coincident EM and GPR anomalies, while other features were interpreted from either singular EM responses or GPR-only anomalies. The following subsurface features were interpreted from the combined EM and GPR data:

Anomalies and Structures:

Within the fenced-in areas of the Northern and Southern DMF properties, as well as the grassy areas to the west of the DMF properties, the geophysical data indicates several drainage features:

- GPR anomalies indicate a possible drainage feature associated with a catch basin in the east within the fenced-in area of the Northern and Southern DMF properties and a catch basin/drywell in the southeast of the area. GPR anomalies suggest that a subsurface drainage structure connects these two catch basins. Anomalies also suggest a structure that trends southwest from the catch basin/drywell, which appears to split into two east/west trending structures.
- EM and GPR anomalies suggest that the more southern potential east/west trending structure discussed above may continue to the east where it appears to fork into a northwest/southeast trending structure that runs towards a potential drainage basin/wetland area. Anomalies also suggest that the east/west trending potential structure may continue to the south, where it appears to turn 90° to the east to potentially connect with a manhole located at the edge of the southern fence line.
- EM and GPR anomalies appear to indicate the presence of a structure that is associated with the drain and manhole located at the southern end of the fence line of the Northern and Southern DMF properties.

- EM and GPR anomalies suggest the presence of another drainage structure that originates to the west of the fence-line of the Northern and Southern DMF properties. The anomalies suggest the structure may trend east, where it appears to intersect with another drainage structure that trends north-south or possible underground storage.
- On the northeastern part of the Unoccupied Shuster property, EM and GPR anomalies suggest the presence of a drainage system that appears to include a large pipe trending southeast toward the water.
- In the grassy area on the western portion of the Unoccupied Shuster property, EM and GPR anomalies indicate the presence of possible building structure rubble.
- EM and GPR anomalies in the western part of the grassy area of the Unoccupied Shuster Property may indicate the presence of a building structure footprint north-south, anomalies also suggest that the possible footprint structure continues to the southeast, potentially into the Northern DMF Property.
- EM and associated GPR anomalies also indicate the presence of a potential structure that trends east-west, appearing to terminate at the northwest of the grassy area. It appears that the potential structure may connect with the above noted structure.
- There are linear EM and GPR anomalies that appear to be associated with the catch basins located west of the Northern and Southern DMF property fence, south of the Unoccupied Shuster Property, near Blackmer Street. The anomalies suggest potential subsurface drainage structures that connect the catch basins. The anomalies also indicate that a drainage structure may continue to the east toward the Northern and Southern DMF properties.

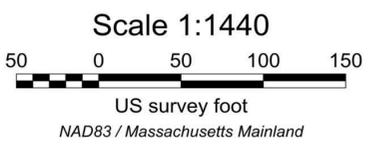

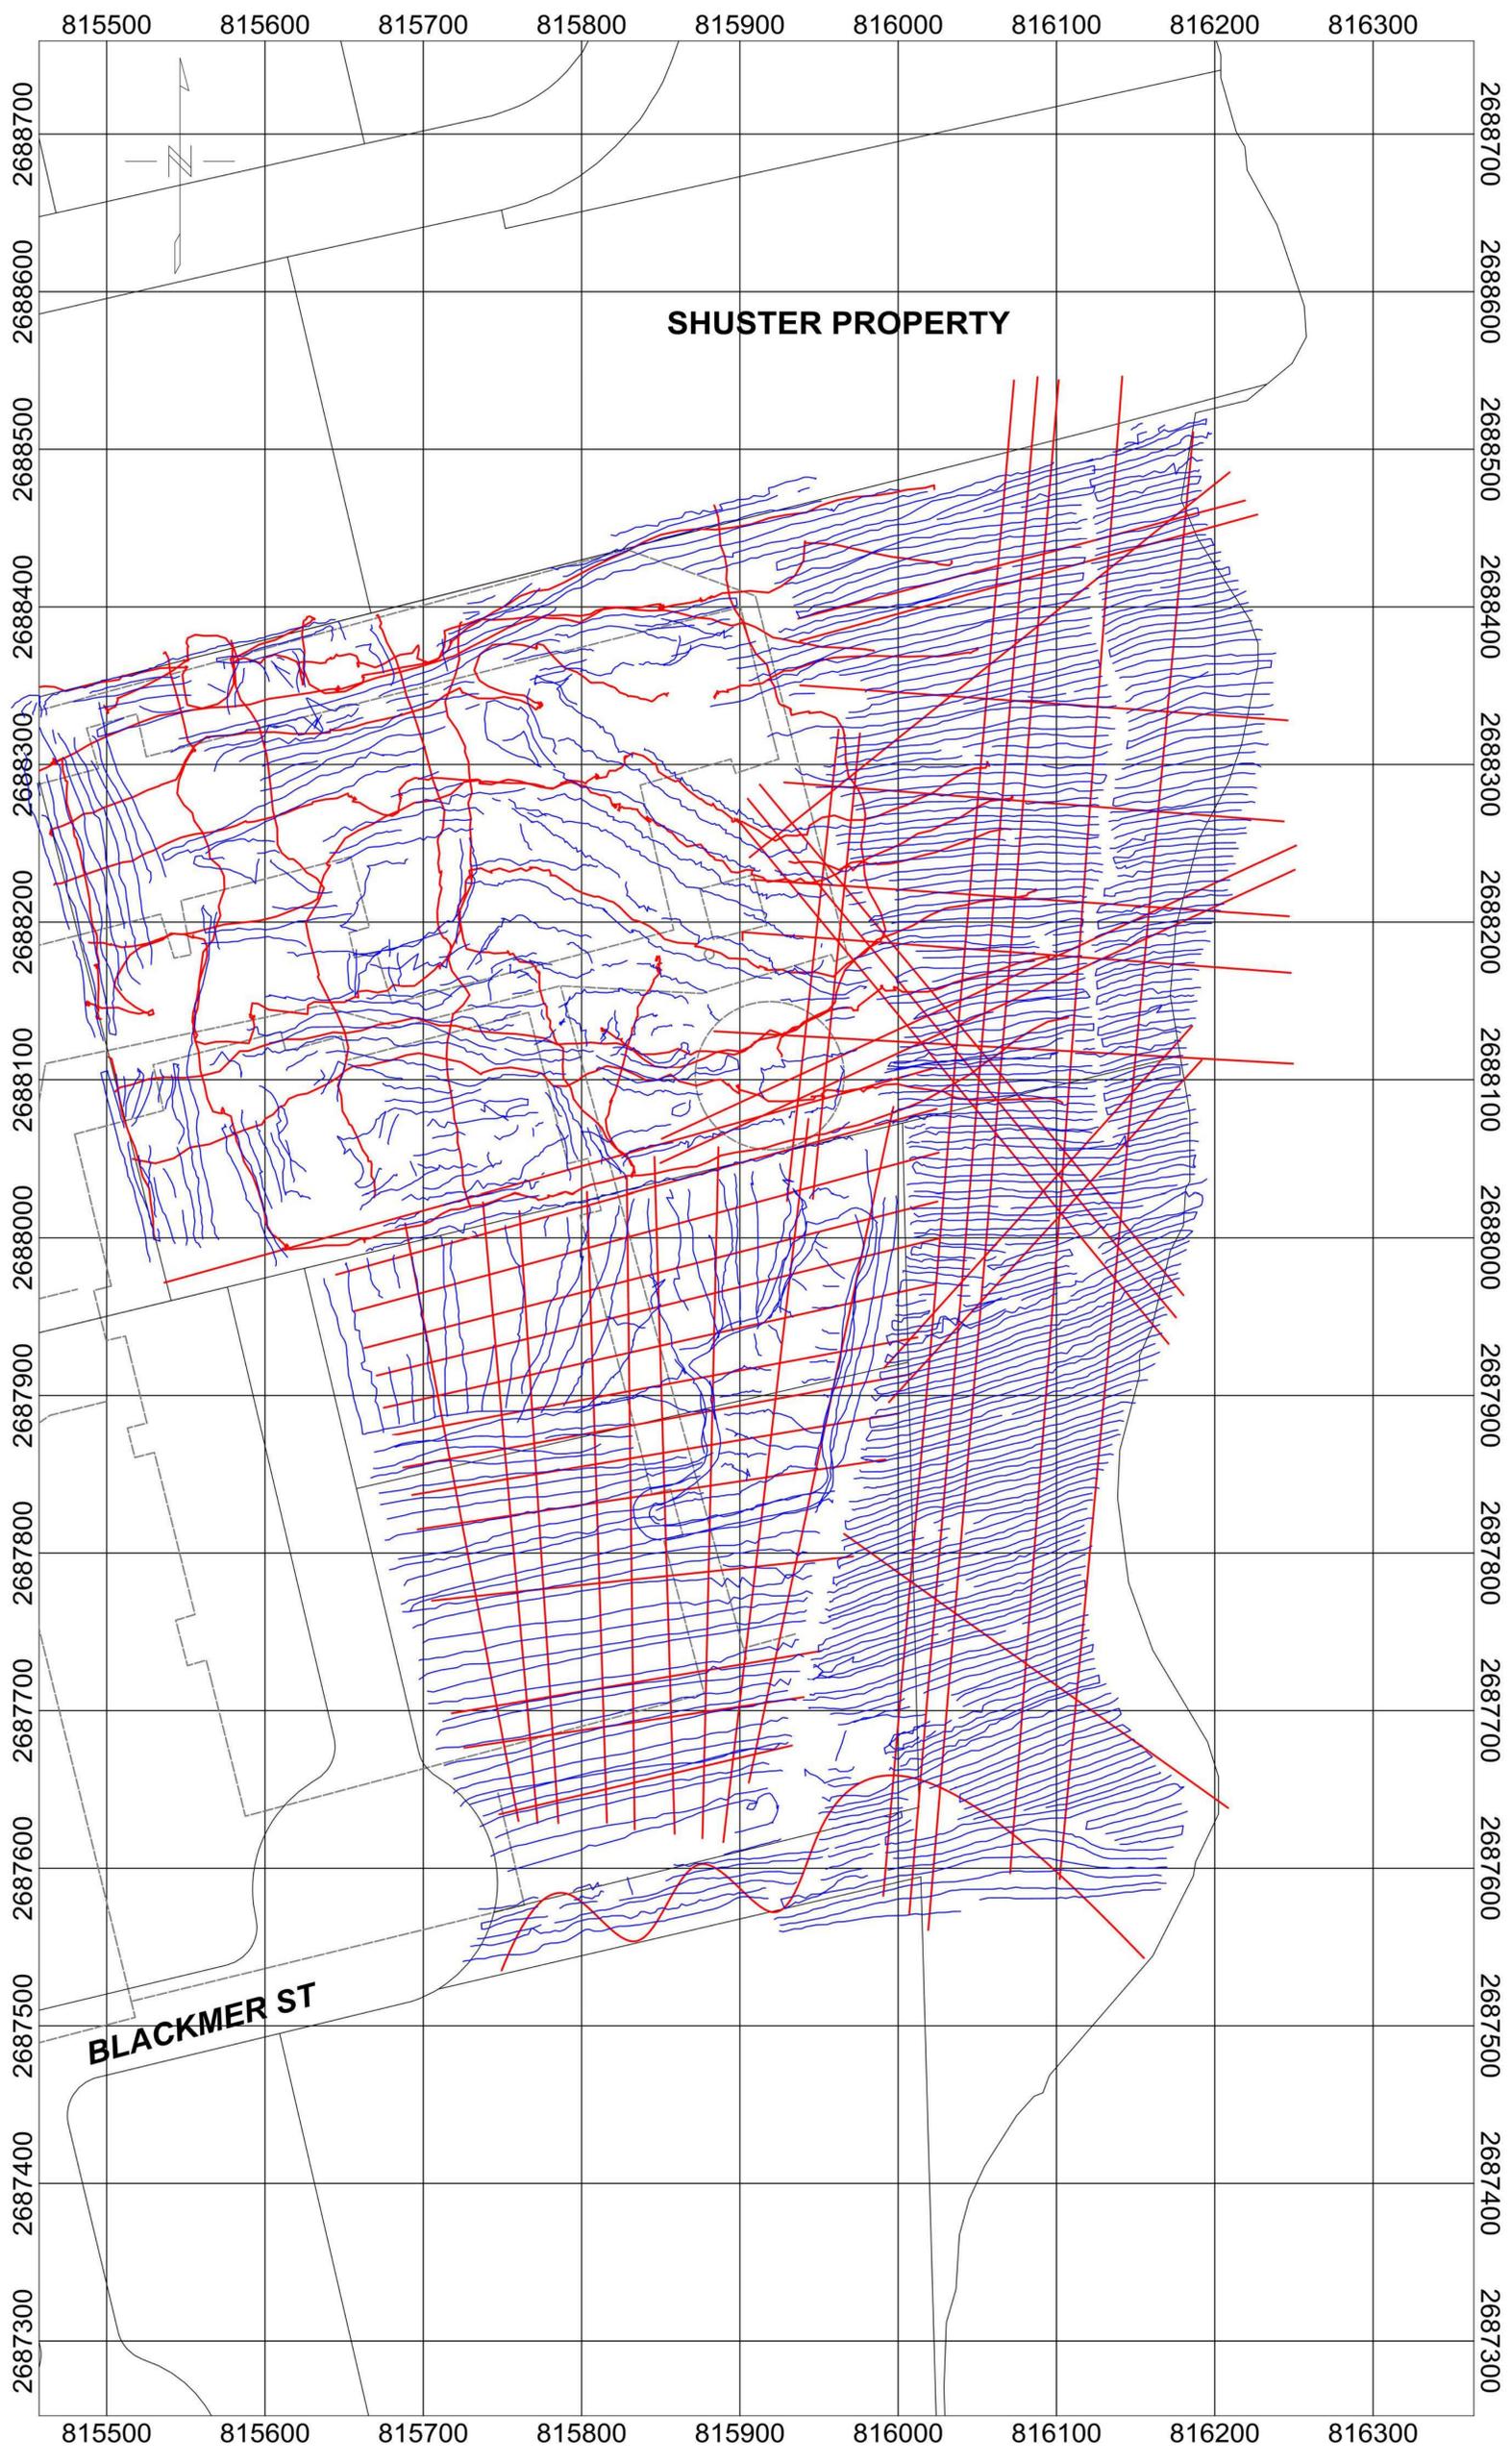

Buried Utilities:

The interpreted geophysical results suggest the presence of several linear anomalies likely to be indicative of the presence of buried utility lines at the site.

- There are EM and GPR anomalies that appear to extend from the north to the south. The anomalies appear to connect the riser with an overhead light pole. It is possible that these anomalies indicate the presence of a buried electric line. GPR anomalies also suggest that the potential electric line extends further to the east from the overhead light to another overhead light east of the parking lot. GPR anomalies also indicate that electric lines may run north and south from this overhead light to other lights in the north and south of the paved land with the Northern and Southern DMF properties.

Other Anomalous Subsurface Features:

1. EM and GPR data background levels varied depending upon the type of surface that existed in the survey areas (i.e., pavement areas exhibited a different background signature than did grassy or treed areas). Additionally, some of the low amplitude “scatter” seen in the EM and/or GPR data is likely the result of surficial or near-surficial debris or unknown structures. Features that were interpreted from the EM and GPR data include:
2. In the paved area within the Southern DMF property, the GPR data revealed a large underground anomaly. The GPR anomaly was very chaotic, and had high reflective properties. It is possible that it represents some debris or fill in the subsurface.
3. On the east side of the Northern and Southern DMF properties, EM and GPR anomalies may represent some subsurface features. It is unclear whether these anomalies have some relation to other possible buried structures, such as a potential leach field/wetland, or are just the result of subsurface debris.
4. In the grassy areas on the west side of the Unoccupied Shuster property, there are several EM and GPR anomalies that do not appear to be associated with any of the possible features or structures discussed above. They may potentially represent unknown buried structures, or may be the result of scattered subsurface debris or fill. To the north of the grassy area, some of these features appear to be subsurface structures as indicated by EM and GPR anomalies. The extent and nature of these features is unclear. In the southern half of the grassy area, geophysical anomalies may represent buried debris, such as a building footprint structure.
5. On the northeast side of the Unoccupied Shuster property, in a sandy environment, there is an EM and GPR anomaly that may potentially be related with several drainage structures discussed above. The EM anomaly may represent buried metallic debris, or a potential drywell and drainage structure.

| MCP Upper Concentration Limits (U) | | NP | NP | NP | NP | NP | NP | 100 |
| MCP S-3/GW-2 | | NP | NP | NP | NP | NP | NP | 3 |
| MCP S-3/GW-3 | | NP | NP | NP | NP | NP | NP | 3 |
| Reporting Category - RCS-2 | | NP | NP | NP | NP | NP | NP | 3 |

Notes:

U = Concentration is below the laboratory's method detection limit. One half of the method detection limit is utilized in the summation.

*Duplicate 1 is a duplicate sample of sample TP-3.

**Duplicate 2 is a duplicate sample of sample TP-6.

NP = Not Promulgated

ND = Analyzed Aroclors were non-detected.

J = Estimated value.

Exceedance of MCP Reporting Category and/or Standard, which also exceeds EPA's unrestricted use standard of 1 ppm.

Exceedance of EPA's unrestricted use Standard in High Occupancy Use Areas (e.g., residential) of 1 ppm, but not its respective MCP Reporting Category and/or Standard.

NOTE: EPA Standard for Low Occupancy Use Areas (e.g., commercial) is less than or equal to 25 ppm (and greater than 1 ppm).

A = Shallow Sample

M = Middle Sample

B = Bottom

Notes:
Only detected compounds are reported in the table. Please refer to Appendix _ for a complete listing of analytes.
U = Concentration is below the laboratory's method detection limit.
NP = Not Promulgated
*Duplicate 1 is a duplicate sample of sample TP-3.
**Duplicate 2 is a duplicate sample of sample TP-6.
- Exceedance of Reporting Category and/or Standard
Testing results for trip blanks analyzed during the testing program were all non-detect (ND).
Acetone and Carbon disulfide detected in TP6-N-B at low ppb levels considered an artifact of laboratory.

MADEP MCP Response Action Analytical Report Certification

This form provides certifications for all samples performed by MCP methods. Please refer to the Sample Results and Container Information sections of this report for specification of MCP methods used for each analysis. The following questions pertain only to MCP Analytical Methods.

| An affirmative response to questions A through F is required for "Presumptive Certainty" status | | |
|--------------------------------------------------------------------------------------------------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----|
| A | Were all samples received in a condition consistent with those described on the Chain-of-Custody, properly preserved (including temperature) in the field or laboratory, and prepared/analyzed within method holding times? | YES |
| B | Were the analytical method(s) and all associated QC requirements specified in the selected CAM protocol(s) followed? | YES |
| C | Were all required corrective actions and analytical response actions specified in the selected CAM protocol(s) implemented for all identified performance standard non-conformances? | YES |
| D | Does the laboratory report comply with all the reporting requirements specified in CAM VII A, "Quality Assurance and Quality Control Guidelines for the Acquisition and Reporting of Analytical Data?" | YES |
| E a. | VPH, EPH, and APH Methods only: Was each method conducted without significant modification(s)? (Refer to the individual method(s) for a list of significant modifications). | YES |
| E b. | APH and TO-15 Methods only: Was the complete analyte list reported for each method? | N/A |
| F | Were all applicable CAM protocol QC and performance standard non-conformances identified and evaluated in a laboratory narrative (including all "No" responses to Questions A through E)? | YES |
| A response to questions G, H and I is required for "Presumptive Certainty" status | | |
| G | Were the reporting limits at or below all CAM reporting limits specified in the selected CAM protocol(s)? | NO |
| H | Were all QC performance standards specified in the CAM protocol(s) achieved? | NO |
| I | Were results reported for the complete analyte list specified in the selected CAM protocol(s)? | NO |
| For any questions answered "No", please refer to the case narrative section on the following page(s). | | |

Please note that sample matrix information is located in the Sample Results section of this report.

Project Name: SOUTH TERMINAL NEW BEDFORD
Project Number: 6690

Lab Number: L1105817
Report Date: 05/09/11

Case Narrative

The samples were received in accordance with the Chain of Custody and no significant deviations were encountered during the preparation or analysis unless otherwise noted. Sample Receipt, Container Information, and the Chain of Custody are located at the back of the report.

Results contained within this report relate only to the samples submitted under this Alpha Lab Number and meet all of the requirements of NELAC, for all NELAC accredited parameters. The data presented in this report is organized by parameter (i.e. VOC, SVOC, etc.). Sample specific Quality Control data (i.e. Surrogate Spike Recovery) is reported at the end of the target analyte list for each individual sample, followed by the Laboratory Batch Quality Control at the end of each parameter. If a sample was re-analyzed or re-extracted due to a required quality control corrective action and if both sets of data are reported, the Laboratory ID of the re-analysis or re-extraction is designated with an "R" or "RE", respectively. When multiple Batch Quality Control elements are reported (e.g. more than one LCS), the associated samples for each element are noted in the grey shaded header line of each data table. Any Laboratory Batch, Sample Specific % recovery or RPD value that is outside the listed Acceptance Criteria is bolded in the report. Definitions of all data qualifiers and acronyms used in this report are provided in the Glossary located at the back of the report.

Please see the associated ADEx data file for a comparison of laboratory reporting limits that were achieved with the regulatory Numerical Standards requested on the Chain of Custody.

For additional information, please contact Client Services at 800-624-9220.

MCP Related Narratives

Volatile Organics

L1105817-05 and -18 have elevated detection limits due to the dilutions required by the elevated concentrations of non-target compounds in the samples.

L1105817-07 and -19 have elevated detection limits due to the dilution required by the elevated concentrations of target compounds in the sample.

In reference to question G:

L1105817-05, -09, -18 and -19: One or more of the target analytes did not achieve the requested CAM reporting limits.

In reference to question H:

The initial calibration, associated with L1105817-05, -07, -18 and -19, did not meet the method required

Project Name: SOUTH TERMINAL NEW BEDFORD
Project Number: 6690

Lab Number: L1105817
Report Date: 05/09/11

Case Narrative (continued)

minimum response factors on the lowest calibration standards for 1,4-Dioxane (0.00392), as well as the average response factor for Chloroethane and 1,4-Dioxane.

The continuing calibration standard, associated with L1105817-05, -07, -18 and -19, is outside the acceptance criteria for several compounds; however, it is within overall method allowances. A copy of the continuing calibration standard is included as an addendum to this report.

Semivolatile Organics

L1105817-02 and -07 have elevated detection limits due to the dilutions required by the elevated concentrations of target compounds in the samples.

L1105817-03, -04 and -16 have elevated detection limits due to the dilutions required by the sample matrix (the sample extracts were dark and viscous).

L1105817-06 has elevated detection limits due to the dilution required by the matrix interferences encountered during the concentration of the sample and the analytical dilution required by the sample matrix (the sample extract was dark and viscous).

L1105817-07 was re-analyzed on dilution in order to quantitate the sample within the calibration range. The result should be considered estimated, and is qualified with an E flag, for any compound that exceeded the calibration on the initial analysis. The re-analysis was performed only for the compound that exceeded the calibration range.

In reference to question G:

L1105817-02 through -04, -06, -07 and -16: One or more of the target analytes did not achieve the requested CAM reporting limits.

In reference to question H:

The surrogate recoveries for L1105817-03 are outside the individual acceptance criteria for 2-Fluorophenol (28%) and Nitrobenzene-d5 (27%), but within the overall method allowances. The results of the original analysis are reported; however, all associated compounds are considered to have a potential bias.

The surrogate recoveries for L1105817-06 are below the acceptance criteria for 2-Fluorophenol, Phenol-d6, Nitrobenzene-d5, 2-Fluorobiphenyl, 4-Terphenyl-d14 and 2,4,6-Tribromophenol (all at 0%) due to the dilution required to quantitate the sample. Re-extraction was not required; therefore, the results of the original analysis

Project Name: SOUTH TERMINAL NEW BEDFORD
Project Number: 6690

Lab Number: L1105817
Report Date: 05/09/11

Case Narrative (continued)

are reported.

The WG465512-2/-3 LCS/LCSD recoveries, associated with L1105817-01 through -12, are below the individual acceptance criteria for Aniline (39%/32%), but within the overall method allowances. The results of the associated samples are reported; however, all results are considered to have a potentially low bias for this compound.

The WG465512-2/-3 LCS/LCSD RPDs, associated with L1105817-01 through -12, are above the acceptance criteria for 2-Chloronaphthalene (39%), 1,2-Dichlorobenzene (32%), 1,4-Dichlorobenzene (31%), Hexachlorobutadiene (31%), Nitrobenzene (32%), Acenaphthylene (34%), 4-Chloroaniline (33%), 2-Methylnaphthalene (42%), Acetophenone (31%) and 2-Methylphenol (32%); however, the individual LCS/LCSD recoveries are within method limits.

The WG465513-2/-3 LCS/LCSD recoveries, associated with L1105817-13 through -19, are below the individual acceptance criteria for Aniline (28%/34%) and 4-Chloroaniline (LCS at 39%), but within the overall method allowances. The results of the associated samples are reported; however, all results are considered to have a potentially low bias for these compounds.

EPH

L1105817-07 has elevated detection limits due to the dilution required by the elevated concentrations of target compounds in the sample.

L1105817-19 has elevated detection limits due to the dilution required by the matrix interferences encountered during the concentration of the sample and the analytical dilution required by the target compounds present in the sample.

In reference to question G:

L1105817-07 and -19: One or more of the target analytes did not achieve the requested CAM reporting limits.

In reference to question H:

The surrogate recoveries for the following samples are outside the acceptance criteria for o-Terphenyl; however, the samples were not re-extracted due to coelution with obvious interferences. Copies of the chromatograms are included as an attachment to this report. The results are not considered to be biased.

L1105817-05: 143%

Project Name: SOUTH TERMINAL NEW BEDFORD
Project Number: 6690

Lab Number: L1105817
Report Date: 05/09/11

Case Narrative (continued)

L1105817-07: 295%

L1105817-18: 288%

The surrogate recoveries for L1105817-19 are below the acceptance criteria for Chloro-Octadecane and o-Terphenyl (both at 0%) due to the dilution required to quantitate the sample. Re-extraction was not required; therefore, the results of the original analysis are reported.

In reference to question I:

All samples were analyzed for a subset of MCP compounds per the Chain of Custody.

VPH

L1105817-05, -07 and -18 exceeded the recommended 1:1 methanol:soil ratio, due to excessive soil in the sample vials.

L1105817-05, -07, -18 and -19 have elevated detection limits due to the dilutions required by the elevated concentrations of target compounds in the samples.

In reference to question G:

L1105817-05, -07 and -19: One or more of the target analytes did not achieve the requested CAM reporting limits.

In reference to question H:

The surrogate recoveries for L1105817-05 are outside the acceptance criteria for 2,5-Dibromotoluene-PID (161%) and 2,5-Dibromotoluene-FID (189%); however, the sample was not re-analyzed due to coelution with obvious interferences. Copies of the chromatograms are included as an attachment to this report. The results are not considered to be biased.

The surrogate recoveries for L1105817-07 are below the acceptance criteria for 2,5-Dibromotoluene-PID (0%) and 2,5-Dibromotoluene-FID (0%) due to the dilution required to quantitate the sample. Re-analysis is not required; therefore, the results of the original analysis are reported.

The surrogate recovery for L1105817-18 is outside the acceptance criteria for 2,5-Dibromotoluene-FID (144%); however, the sample was not re-analyzed due to coelution with obvious interferences. A copy of the chromatogram is included as an attachment to this report. The results are not considered to be biased.

Project Name: SOUTH TERMINAL NEW BEDFORD
Project Number: 6690

Lab Number: L1105817
Report Date: 05/09/11

Case Narrative (continued)

In reference to question I:

All samples were analyzed for a subset of MCP compounds per the Chain of Custody.

Metals

In reference to question H:

L1105817-04: The internal standard (IS) responses for Lead and Thallium were outside the acceptance criteria (70-120%); however, the criteria was achieved upon re-analysis on 1:5 dilution. The results of the re-analyses are reported.

The WG465733-4 MS recovery, performed on L1105817-01, is above the acceptance criteria for Antimony (46%); however, the associated LCS recovery was within criteria. No further action was taken.

The WG465733-3 Laboratory Duplicate RPD, performed on L1105817-01, is above the acceptance criteria for Silver (54%); however, the sample and Duplicate results are less than five times the reporting limit. Therefore, the RPD is valid.

The WG465734-3 Laboratory Duplicate RPD, performed on L1105817-01, is outside the acceptance criteria for Mercury (171%). The elevated RPD has been attributed to the non-homogeneous nature of the sample utilized for the laboratory duplicate.

The WG465743-3 Laboratory Duplicate RPDs, performed on L1105817-01, are above the acceptance criteria for Cadmium (34%), Selenium (21%) and Thallium (66%); however, the sample and Duplicate results are less than five times the reporting limit. Therefore, the RPD is valid.

In reference to question I:

All samples were analyzed for a subset of MCP elements per the Chain of Custody.

Non-MCP Related Narratives

TPH

L1105817-02, -07, -18, -19 and the associated WG65572-3 Laboratory Duplicate have elevated detection limits due to the dilutions required by the elevated concentrations of target compounds in the samples.

L1105817-03 has an elevated detection limit due to the dilution required by matrix interferences encountered

Project Name: SOUTH TERMINAL NEW BEDFORD
Project Number: 6690

Lab Number: L1105817
Report Date: 05/09/11

Case Narrative (continued)

during the concentration of the sample.

L1105817-06 has an elevated detection limit due to the dilution required by the matrix interferences encountered during the concentration of the sample and the analytical dilution required by the target compounds present in the sample.

I, the undersigned, attest under the pains and penalties of perjury that, to the best of my knowledge and belief and based upon my personal inquiry of those responsible for providing the information contained in this analytical report, such information is accurate and complete. This certificate of analysis is not complete unless this page accompanies any and all pages of this report.

GLOSSARY

Acronyms

- EPA** - Environmental Protection Agency.
- LCS** - Laboratory Control Sample: A sample matrix, free from the analytes of interest, spiked with verified known amounts of analytes or a material containing known and verified amounts of analytes.
- LCS D** - Laboratory Control Sample Duplicate: Refer to LCS.
- MDL** - Method Detection Limit: This value represents the level to which target analyte concentrations are reported as estimated values, when those target analyte concentrations are quantified below the reporting limit (RL). The MDL includes any adjustments from dilutions, concentrations or moisture content, where applicable.
- MS** - Matrix Spike Sample: A sample prepared by adding a known mass of target analyte to a specified amount of matrix sample for which an independent estimate of target analyte concentration is available.
- MS D** - Matrix Spike Sample Duplicate: Refer to MS.
- NA** - Not Applicable.
- NC** - Not Calculated: Term is utilized when one or more of the results utilized in the calculation are non-detect at the parameter's reporting unit.
- NI** - Not Ignitable.
- RL** - Reporting Limit: The value at which an instrument can accurately measure an analyte at a specific concentration. The RL includes any adjustments from dilutions, concentrations or moisture content, where applicable.
- RPD** - Relative Percent Difference: The results from matrix and/or matrix spike duplicates are primarily designed to assess the precision of analytical results in a given matrix and are expressed as relative percent difference (RPD). Values which are less than five times the reporting limit for any individual parameter are evaluated by utilizing the absolute difference between the values; although the RPD value will be provided in the report.

Terms

Analytical Method: Both the document from which the method originates and the analytical reference method. (Example: EPA 8260B is shown as 1,8260B.) The codes for the reference method documents are provided in the References section of the Addendum.

Data Qualifiers

- A** - Spectra identified as "Aldol Condensation Product".
- B** - The analyte was detected above the reporting limit in the associated method blank. Flag only applies to associated field samples that have detectable concentrations of the analyte at less than five times (5x) the concentration found in the blank. For MCP-related projects, flag only applies to associated field samples that have detectable concentrations of the analyte at less than ten times (10x) the concentration found in the blank. For DOD-related projects, flag only applies to associated field samples that have detectable concentrations of the analyte at less than ten times (10x) the concentration found in the blank AND the analyte was detected above one-half the reporting limit (or above the reporting limit for common lab contaminants) in the associated method blank.
- C** - Co-elution: The target analyte co-elutes with a known lab standard (i.e. surrogate, internal standards, etc.) for co-extracted analyses.
- D** - Concentration of analyte was quantified from diluted analysis. Flag only applies to field samples that have detectable concentrations of the analyte.
- E** - Concentration of analyte exceeds the range of the calibration curve and/or linear range of the instrument.
- G** - The concentration may be biased high due to matrix interferences (i.e. co-elution) with non-target compound(s). The result should be considered estimated.
- H** - The analysis of pH was performed beyond the regulatory-required holding time of 15 minutes from the time of sample collection.
- I** - The RPD between the results for the two columns exceeds the method-specified criteria; however, the lower value has been reported due to obvious interference.
- P** - The RPD between the results for the two columns exceeds the method-specified criteria.

Report Format: Data Usability Report

Project Name: SOUTH TERMINAL NEW BEDFORD
Project Number: 6690

Lab Number: L1105817
Report Date: 05/09/11

Data Qualifiers

- Q** - The quality control sample exceeds the associated acceptance criteria. Note: This flag is not applicable for matrix spike recoveries when the sample concentration is greater than 4x the spike added or for batch duplicate RPD when the sample concentrations are less than 5x the RL. (Metals only.)
- R** - Analytical results are from sample re-analysis.
- RE** - Analytical results are from sample re-extraction.
- J** - Estimated value. This represents an estimated concentration for Tentatively Identified Compounds (TICs).
- ND** - Not detected at the reporting limit (RL) for the sample.

LIMITATION OF LIABILITIES

Alpha Analytical performs services with reasonable care and diligence normal to the analytical testing laboratory industry. In the event of an error, the sole and exclusive responsibility of Alpha Analytical shall be to re-perform the work at it's own expense. In no event shall Alpha Analytical be held liable for any incidental, consequential or special damages, including but not limited to, damages in any way connected with the use of, interpretation of, information or analysis provided by Alpha Analytical.

We strongly urge our clients to comply with EPA protocol regarding sample volume, preservation, cooling, containers, sampling procedures, holding time and splitting of samples in the field.

Certificate/Approval Program Summary

Last revised February 23, 2011 - Westboro Facility

The following list includes only those analytes/methods for which certification/approval is currently held.
For a complete listing of analytes for the referenced methods, please contact your Alpha Customer Service Representative.

Connecticut Department of Public Health Certificate/Lab ID: PH-0574. **NELAP Accredited Solid Waste/Soil.**

Drinking Water (Inorganic Parameters: Color, pH, Turbidity, Conductivity, Alkalinity, Chloride, Free Residual Chlorine, Fluoride, Calcium Hardness, Sulfate, Nitrate, Nitrite, Aluminum, Antimony, Arsenic, Barium, Beryllium, Cadmium, Calcium, Chromium, Copper, Iron, Lead, Magnesium, Manganese, Mercury, Molybdenum, Nickel, Potassium, Selenium, Silver, Sodium, Thallium, Vanadium, Zinc, Total Dissolved Solids, Total Organic Carbon, Total Cyanide, Perchlorate. Organic Parameters: Volatile Organics 524.2, Total Trihalomethanes 524.2, 1,2-Dibromo-3-chloropropane (DBCP), Ethylene Dibromide (EDB), 1,4-Dioxane (Mod 8270). Microbiology Parameters: Total Coliform-MF mEndo (SM9222B), Total Coliform – Colilert (SM9223 P/A), E. Coli. – Colilert (SM9223 P/A), HPC – Pour Plate (SM9215B), Fecal Coliform – MF m-FC (SM9222D))

Wastewater/Non-Potable Water (Inorganic Parameters: Color, pH, Conductivity, Acidity, Alkalinity, Chloride, Total Residual Chlorine, Fluoride, Total Hardness, Silica, Sulfate, Sulfide, Ammonia, Kjeldahl Nitrogen, Nitrate, Nitrite, O-Phosphate, Total Phosphorus, Aluminum, Antimony, Arsenic, Barium, Beryllium, Boron, Cadmium, Calcium, Chromium, Hexavalent Chromium, Cobalt, Copper, Iron, Lead, Magnesium, Manganese, Mercury, Molybdenum, Nickel, Potassium, Selenium, Silver, Sodium, Strontium, Thallium, Tin, Titanium, Vanadium, Zinc, Total Residue (Solids), Total Dissolved Solids, Total Suspended Solids (non-filterable), BOD, CBOD, COD, TOC, Total Cyanide, Phenolics, Foaming Agents (MBAS), Bromide, Oil and Grease. Organic Parameters: PCBs, Organochlorine Pesticides, Technical Chlordane, Toxaphene, 2,4-D, 2,4,5-T, 2,4,5-TP(Silvex), Acid Extractables (Phenols), Benzidines, Phthalate Esters, Nitrosamines, Nitroaromatics & Isophorone, Polynuclear Aromatic Hydrocarbons, Haloethers, Chlorinated Hydrocarbons, Volatile Organics, TPH (HEM/SGT), Extractable Petroleum Hydrocarbons (ETPH), MA-EPH, MA-VPH. Microbiology Parameters: Total Coliform – MF mEndo (SM9222B), Total Coliform – MTF (SM9221B), HPC – Pour Plate (SM9215B), Fecal Coliform – MF m-FC (SM9222D), Fecal Coliform – A-1 Broth (SM9221E).)

Solid Waste/Soil (Inorganic Parameters: pH, Sulfide, Aluminum, Antimony, Arsenic, Barium, Beryllium, Boron, Cadmium, Calcium, Chromium, Hexavalent Chromium, Cobalt, Copper, Iron, Lead, Magnesium, Manganese, Mercury, Molybdenum, Nickel, Potassium, Selenium, Silver, Sodium, Thallium, Tin, Vanadium, Zinc, Total Cyanide, Ignitability, Phenolics, Corrosivity, TCLP Leach (1311), SPLP Leach (1312 metals only), Reactivity. Organic Parameters: PCBs, PCBs in Oil, Organochlorine Pesticides, Technical Chlordane, Toxaphene, Extractable Petroleum Hydrocarbons (ETPH), MA-EPH, MA-VPH, Dicamba, 2,4-D, 2,4,5-T, 2,4,5-TP(Silvex), Volatile Organics, Acid Extractables (Phenols), 3,3'-Dichlorobenzidine, Phthalates, Nitrosamines, Nitroaromatics & Cyclic Ketones, PAHs, Haloethers, Chlorinated Hydrocarbons.)

Maine Department of Human Services Certificate/Lab ID: 2009024.

Drinking Water (Inorganic Parameters: SM9215B, 9222D, 9223B, EPA 180.1, 353.2, SM2130B, 2320B, 4500CI-D, 4500CN-C, 4500CN-E, 4500F-C, 4500H+B, 4500NO3-F, EPA 200.7, EPA 200.8, 245.1, EPA 300.0. Organic Parameters: 504.1, 524.2.)

Wastewater/Non-Potable Water (Inorganic Parameters: EPA 120.1, 1664A, 350.1, 351.1, 353.2, 410.4, 420.1, SM2320B, 2510B, 2540C, 2540D, 426C, 4500CI-D, 4500CI-E, 4500CN-C, 4500CN-E, 4500F-B, 4500F-C, 4500H+B, 4500Norg-B, 4500Norg-C, 4500NH3-B, 4500NH3-G, 4500NH3-H, 4500NO3-F, 4500P-B, 4500P-E, 5210B, 5220D, 5310C, EPA 200.7, 200.8, 245.1. Organic Parameters: 608, 624, ME-DRO, ME-GRO, MA-EPH, MA-VPH.)

Solid Waste/Soil (Organic Parameters: ME-DRO, ME-GRO, MA-EPH, MA-VPH.)

Massachusetts Department of Environmental Protection Certificate/Lab ID: M-MA086.

Drinking Water (Inorganic Parameters: (EPA 200.8 for: Sb,As,Ba,Be,Cd,Cr,Cu,Pb,Ni,Se,Tl) (EPA 200.7 for: Ba,Be,Ca,Cd,Cr,Cu,Na,Ni) 245.1, (300.0 for: Nitrate-N, Fluoride, Sulfate); (EPA 353.2 for: Nitrate-N, Nitrite-N); (SM4500NO3-F for: Nitrate-N and Nitrite-N); 4500F-C, 4500CN-CE, EPA 180.1, SM2130B, SM4500CI-D, 2320B, SM2540C, SM4500H-B. Organic Parameters: (EPA 524.2 for: Trihalomethanes, Volatile Organics); (504.1 for: 1,2-Dibromoethane, 1,2-Dibromo-3-Chloropropane), EPA 332. Microbiology Parameters: SM9215B; ENZ. SUB. SM9223; ColilertQT SM9223B; MF-SM9222D.)

Non-Potable Water (Inorganic Parameters:, (EPA 200.8 for: Al,Sb,As,Be,Cd,Cr,Cu,Pb,Mn,Ni,Se,Ag,Tl,Zn); (EPA 200.7 for: Al,Sb,As,Be,Cd,Ca,Cr,Co,Cu,Fe,Pb,Mg,Mn,Mo,Ni,K,Se,Ag,Na,Sr,Ti,Tl, V,Zn); 245.1, SM4500H,B, EPA 120.1, SM2510B, 2540C, 2340B, 2320B, 4500CL-E, 4500F-BC, 426C, SM4500NH3-BH, (EPA 350.1 for: Ammonia-N), LCHAT 10-107-06-1-B for Ammonia-N, SM4500NO3-F, 353.2 for Nitrate-N, SM4500NH3-BC-NES, EPA 351.1, SM4500P-E, 4500P-B,E, 5220D, EPA 410.4, SM 5210B, 5310C, 4500CL-D, EPA 1664, SM14 510AC, EPA 420.1, SM4500-CN-CE, SM2540D.

Organic Parameters: (EPA 624 for Volatile Halocarbons, Volatile Aromatics),(608 for: Chlordane, Aldrin, Dieldrin, DDD, DDE, DDT, Heptachlor, Heptachlor Epoxide, PCBs-Water), (EPA 625 for SVOC Acid Extractables and SVOC Base/Neutral Extractables), 600/4-81-045-PCB-Oil. Microbiology Parameters: (ColilertQT SM9223B;Enterolert-QT: SM9222D-MF.)

New Hampshire Department of Environmental Services Certificate/Lab ID: 200307. *NELAP Accredited.*

Drinking Water (Inorganic Parameters: SM 9222B, 9223B, 9215B, EPA 200.7, 200.8, 245.2, 300.0, SM4500CN-E, 4500H+B, 4500NO3-F, 2320B, 2510B, 2540C, 4500F-C, 5310C, 2120B, EPA 332.0. Organic Parameters: 504.1, 524.2.)

Non-Potable Water (Inorganic Parameters: SM9222D, 9221B, 9222B, 9221E-EC, EPA 3005A, 200.7, 200.8, 245.1, 245.2, SW-846 6010B, 6020, 7196A, 7470A, SM3500-CR-D, EPA 120.1, 300.0, 350.1, 351.1, 353.2, 410.4, 420.1, 1664A, SW-846 9010, 9030, 9040B, 9050A, SM426C, SM2120B, 2310B, 2320B, 2540B, 2540D, 4500H+B, 4500CL-E, 4500CN-E, 4500NH3-H, 4500NO3-F, 4500NO2-B, 4500P-E, 4500-S2-D, 5210B, 5220D, 2510B, 2540C, 4500F-C, 5310C, 5540C, LACHAT 10-204-00-1-A, LACHAT 10-107-06-2-D. Organic Parameters: SW-846 3510C, 5030B, 8260B, 8270C, 8330, EPA 624, 625, 608, SW-846 8082, 8081A, 8151A.)

Solid & Chemical Materials (Inorganic Parameters: SW-846 6010B, 7196A, 7471A, 1010, 1030, 9010, 9012A, 9014, 9030B, 9040B, 9045C, 9050C, 9065,1311, 1312, 3005A, 3050B. Organic Parameters: SW-846 3540C, 3546, 3580A, 5030B, 5035, 8260B, 8270C, 8330, 8151A, 8015B, 8082, 8081A.)

New Jersey Department of Environmental Protection Certificate/Lab ID: MA935. *NELAP Accredited.*

Drinking Water (Inorganic Parameters: SM9222B, 9221E, 9223B, 9215B, 4500CN-CE, 4500NO3-F, 4500F-C, EPA 300.0, 200.7, 200.8, 245.2, 2540C, SM2120B, 2320B, 2510B, 5310C, SM4500H-B. Organic Parameters: EPA 332, 504.1, 524.2.)

Non-Potable Water (Inorganic Parameters: SM5210B, EPA 410.4, SM5220D, 4500CI-E, EPA 300.0, SM2120B, SM4500F-BC, EPA 200.7, 351.1, LACHAT 10-107-06-2-D, EPA 353.2, SM4500NO3-F, 4500NO2-B, EPA 1664A, SM5310B, C or D, 4500-PE, EPA 420.1, SM510ABC, SM4500P-B5+E, 2540B, 2540C, 2540D, EPA 120.1, SM2510B, SM15 426C, 9222D, 9221B, 9221C, 9221E, 9222B, 9215B, 2310B, 2320B, 4500NH3-H, 4500-S D, EPA 350.1, 350.2, SW-846 1312, 6020, 7470A, 5540C, 4500H-B, EPA 200.8, SM3500Cr-D, 4500CN-CE, EPA 245.1, 245.2, SW-846 9040B, 3005A, EPA 6010B, 7196A, SW-846 9010B, 9030B. Organic Parameters: SW-846 8260B, 8270C, 8270C-SIM, 3510C, EPA 608, 624, 625, SW-846 3630C, 5030B, 8081A, 8082, 8151A, 8330, NJ OQA-QAM-025 Rev.7, NJ EPH.)

Solid & Chemical Materials (Inorganic Parameters: SW-846, 6010B, 7196A, 9010B, 9030B, 1010, 1030, 1311, 1312, 3005A, 3050B, 7471A, 9014, 9012A, 9040B, 9045C, 9050A, 9065. Organic Parameters: SW-846 8015B, 8081A, 8082, 8151A, 8330, 8260B, 8270C, 8270C-SIM, 3540C, 3545, 3546, 3550B, 3580A, 3630C, 5030B, 5035L, 5035H, NJ OQA-QAM-025 Rev.7, NJ EPH.)

New York Department of Health Certificate/Lab ID: 11148. *NELAP Accredited.*

Drinking Water (Inorganic Parameters: SM9223B, 9222B, 9215B, EPA 200.8, 200.7, 245.2, SM5310C, EPA 332.0, SM2320B, EPA 300.0, SM2120B, 4500CN-E, 4500F-C, 4500H-B, 4500NO3-F, 2540C, SM 2510B. Organic Parameters: EPA 524.2, 504.1.)

Non-Potable Water (Inorganic Parameters: SM9221E, 9222D, 9221B, 9222B, 9215B, 5210B, 5310C, EPA 410.4, SM5220D, 2310B-4a, 2320B, EPA 200.7, 300.0, SM4500CL-E, 4500F-C, SM15 426C, EPA 350.1, SM4500NH3-BH, EPA 351.1, LACHAT 10-107-06-2, EPA 353.2, LACHAT 10-107-04-1-C, SM4500-NO3-F, 4500-NO2-B, 4500P-E, 2540C, 2540B, 2540D, EPA 200.8, EPA 6010B, 6020, EPA 7196A, SM3500Cr-D, EPA 245.1, 245.2, 7470A, SM2120B, LACHAT 10-204-00-1-A, EPA 9040B, SM4500-HB, EPA 1664A, EPA 420.1, SM14 510C, EPA 120.1, SM2510B, SM4500S-D, SM5540C, EPA 3005A, 9010B, 9030B. Organic Parameters: EPA 624, 8260B, 8270C, 625, 608, 8081A, 8151A, 8330, 8082, EPA 3510C, 5030B.)

Solid & Hazardous Waste (Inorganic Parameters: 1010, 1030, EPA 6010B, 7196A, 7471A, 9012A, 9014, 9040B, 9045C, 9065, 9050, EPA 1311, 1312, 3005A, 3050B, 9010B, 9030B. Organic Parameters: EPA 8260B, 8270C, 8015B, 8081A, 8151A, 8330, 8082, 3540C, 3545, 3546, 3580, 5030B, 5035.)

North Carolina Department of the Environment and Natural Resources Certificate/Lab ID : 666. Organic Parameters: MA-EPH, MA-VPH.

Pennsylvania Department of Environmental Protection Certificate/Lab ID : 68-03671. *NELAP Accredited.*

Drinking Water (Organic Parameters: EPA 524.2)

Non-Potable Water (Inorganic Parameters: EPA 1312. Organic Parameters: EPA 3510C, 5030B, 625, 624, 608, 8081A, 8082, 8151A, 8260B, 8270C, 8330)

Solid & Hazardous Waste (Inorganic Parameters: EPA 350.1, 1010, 1030, 1311, 1312, 3050B, 6010B, 7196A, 7471A, 9010B, 9012A, 9014, 9040B, 9045C, 9050, 9065, SM 4500NH3-H. Organic Parameters: 3540C, 3545, 3546, 3550B,

3580A, 3630C, 5035, 8015B, 8081A, 8082, 8151A, 8260B, 8270C, 8330)

Rhode Island Department of Health Certificate/Lab ID: LAO00065. *NELAP Accredited via NY-DOH.*

Refer to MA-DEP Certificate for Potable and Non-Potable Water.

Refer to NJ-DEP Certificate for Potable and Non-Potable Water.

Texas Commisson on Environmental Quality Certificate/Lab ID: T104704476-09-1. *NELAP Accredited.*

Non-Potable Water (Inorganic Parameters: EPA 120.1, 1664, 200.7, 200.8, 245.1, 245.2, 300.0, 350.1, 351.1, 353.2, 376.2, 410.4, 420.1, 6010, 6020, 7196, 7470, 9040, SM 2120B, 2310B, 2320B, 2510B, 2540B, 2540C, 2540D, 426C, 4500CL-E, 4500CN-E, 4500F-C, 4500H+B, 4500NH3-H, 4500NO2B, 4500P-E, 4500 S²⁻ D, 510C, 5210B, 5220D, 5310C, 5540C. Organic Parameters: EPA 608, 624, 625, 8081, 8082, 8151, 8260, 8270, 8330.)

Solid & Hazardous Waste (Inorganic Parameters: EPA 1311, 1312, 9012, 9014, 9040, 9045, 9050, 9065.)

Department of Defense Certificate/Lab ID: L2217.

Drinking Water (Inorganic Parameters: SM 4500H-B. Organic Parameters: EPA 524.2, 504.1.)

Non-Potable Water (Inorganic Parameters: EPA 200.7, 200.8, 6010B, 6020, 245.1, 245.2, 7470A, 9040B, 300.0, 332.0, 6860, 353.2, 410.4, 9060, 1664A, SM 4500CN-E, 4500H-B, 4500NO3-F, 5220D, 5310C, 2320B, 2540C, 3005A, 3015, 9010B, 9056. Organic Parameters: EPA 8260B, 8270C, 8330A, 625, 8082, 8081A, 3510C, 5030B, MassDEP EPH, MassDEP VPH.)

Solid & Hazardous Waste (Inorganic Parameters: EPA 200.7, 6010B, 7471A, 9010, 9012A, 6860, 1311, 1312, 3050B, 7196A, 9010B, 3500-CR-D, 4500CN-CE, 2540G, Organic Parameters: EPA 8260B, 8270C, 8330A/B-prep, 8082, 8081A, 3540C, 3546, 3580A, 5035A, MassDEP EPH, MassDEP VPH.)

Analytes Not Accredited by NELAP

Certification is not available by NELAP for the following analytes: **EPA 8260B:** Freon-113, 1,2,4,5-Tetramethylbenzene, 4-Ethyltoluene. **EPA 8330A:** PETN, Picric Acid, Nitroglycerine, 2,6-DANT, 2,4-DANT. **EPA 8270C:** Methyl naphthalene, Dimethyl naphthalene, Total Methylnaphthalenes, Total Dimethylnaphthalenes, 1,4-Diphenylhydrazine (Azobenzene). **EPA 625:** 4-Chloroaniline. **EPA 350.1** for Ammonia in a Soil matrix.

Certificate/Approval Program Summary

Last revised March 23, 2011 – Mansfield Facility

The following list includes only those analytes/methods for which certification/approval is currently held. For a complete listing of analytes for the referenced methods, please contact your Alpha Customer Service Representative.

Connecticut Department of Public Health Certificate/Lab ID: PH-0141.

Wastewater/Non-Potable Water (Inorganic Parameters: pH, Turbidity, Conductivity, Alkalinity, Aluminum, Antimony, Arsenic, Barium, Beryllium, Boron, Cadmium, Calcium, Chromium, Cobalt, Copper, Iron, Lead, Magnesium, Manganese, Mercury, Molybdenum, Nickel, Potassium, Selenium, Silver, Sodium, Strontium, Thallium, Tin, Vanadium, Zinc, Total Residue (Solids), Total Suspended Solids (non-filterable), Total Cyanide. Organic Parameters: PCBs, Organochlorine Pesticides, Technical Chlordane, Toxaphene, Acid Extractables, Benzidines, Phthalate Esters, Nitrosamines, Nitroaromatics & Isophorone, PAHs, Haloethers, Chlorinated Hydrocarbons, Volatile Organics.)

Solid Waste/Soil (Inorganic Parameters: pH, Aluminum, Antimony, Arsenic, Barium, Beryllium, Cadmium, Calcium, Chromium, Hexavalent Chromium, Cobalt, Copper, Iron, Lead, Magnesium, Manganese, Mercury, Molybdenum, Nickel, Potassium, Selenium, Silver, Sodium, Thallium, Vanadium, Zinc, Total Organic Carbon, Total Cyanide, Corrosivity, TCLP 1311. Organic Parameters: PCBs, Organochlorine Pesticides, Technical Chlordane, Toxaphene, Volatile Organics, Acid Extractables, Benzidines, Phthalates, Nitrosamines, Nitroaromatics & Cyclic Ketones, PAHs, Haloethers, Chlorinated Hydrocarbons.)

Florida Department of Health Certificate/Lab ID: E87814. *NELAP Accredited.*

Non-Potable Water (Inorganic Parameters: SM2320B, SM2540D, SM2540G.)

Solid & Chemical Materials (Inorganic Parameters: 6020, 7470, 7471, 9045. Organic Parameters: EPA 8260, 8270, 8082, 8081.)

Air & Emissions (EPA TO-15.)

Louisiana Department of Environmental Quality Certificate/Lab ID: 03090. *NELAP Accredited.*

Non-Potable Water (Inorganic Parameters: EPA 180.1, 245.7, 1631E, 3020, 6020A, 7470A, 9040, 9050A, SM2320B, 2540D, 2540G, 4500H-B, Organic Parameters: EPA 3510C, 3580A, 3630C, 3640A, 3660B, 3665A, 5030B, 8015D, 3570, 8081B, 8082A, 8260B, 8270C.)

Solid & Chemical Materials (Inorganic Parameters: EPA 1311, 3050, 3051A, 3060A, 6020A, 7196A, 7470A, 7471B, 7474, 9040B, 9045C, 9060. Organic Parameters: EPA 3540C, 3570B, 3580A, 3630C, 3640A, 3660, 3665A, 5035, 8015D, 8081B, 8082A, 8260B, 8270C.)

Biological Tissue (Inorganic Parameters: EPA 6020A. Organic Parameters: EPA 3570, 3510C, 3610B, 3630C, 3640A, 8270C.)

Air & Emissions (EPA TO-15.)

New Hampshire Department of Environmental Services Certificate/Lab ID: 2206. *NELAP Accredited.*

Non-Potable Water (Inorganic Parameters: EPA, 245.1, 245.7, 1631E, 180.1, 6020A, 7470A, 9040B, 9050A, SM2540D, 2540G, 4500H+B, 2320B. Organic Parameters: EPA 8081, 8082, 8260B, 8270C.)

Solid & Chemical Materials (Inorganic Parameters: SW-846 1311, 1312, 3050B, 3051A, 3060A, 6020A, 7470A, 7471A, 9040B, 9045C, 7196A. Organic Parameters: SW-846 3540C, 3580, 3630C, 3640A, 3660B, 3665A, 5035, 8260B, 8270C, 8015D, 8082, 8081A.)

New Jersey Department of Environmental Protection Certificate/Lab ID: MA015. *NELAP Accredited.*

Non-Potable Water (Inorganic Parameters: SW-846 1312, 3010, 3020A, 3015, SM2320B, EPA 200.8, SM2540D, 2540G, EPA 120.1, SM2510B, EPA 180.1, 245.1, 1631E, SW-846 7470A, 9040B, 6020, 9010B, 9014 Organic Parameters: SW-846 3510C, 3580A, 5030B, 5035L, 5035H, 3630C, 3640C, 3660B, 3665A, 8015B, 8081A, 8082, 8260B, 8270C)

Solid & Chemical Materials (Inorganic Parameters: SW-846 6020, 9010B, 9014, 1311, 1312, 3050B, 3051, 3060A, 7196A, 7470A, 7471A, 9040B, 9045C, 9060. Organic Parameters: SW-846 3540C, 3570, 3580A, 5030B, 5035L, 5035H, 3630C, 3640A, 3660B, 3665A, 8081A, 8082, 8260B, 8270C, 8015B.)

Atmospheric Organic Parameters (EPA TO-15)

Biological Tissue (Inorganic Parameters: SW-846 6020 Organic Parameters: SW-846 8270C, 3510C, 3570, 3630C, 3640A)

New York Department of Health Certificate/Lab ID: 11627. **NELAP Accredited.**

Non-Potable Water (Inorganic Parameters: SM2320B, SM2540D, EPA 200.8, 6020, 1631E, 245.1, 9014, 9040B, 120.1, SM2510B, 4500CN-E, 4500H-B, EPA 376.2, 180.1, 9010B. Organic Parameters: EPA 8260B, 8270C, 8081A, 8082, 3510C, 5030B.)

Solid & Hazardous Waste (Inorganic Parameters: EPA 6020, 7196A, 3060A, 7471A, 7474, 9014, 9040B, 9045C, 9010B. Organic Parameters: EPA 8260B, 8270C, 8081A, DRO 8015B, 8082, 1311, 1312, 3050B, 3580, 3570, 3051, 5035, 5030B.)

Air & Emissions (EPA TO-15.)

Rhode Island Department of Health Certificate/Lab ID: LAO00299. **NELAP Accredited via LA-DEQ.**

Refer to LA-DEQ Certificate for Non-Potable Water.

Texas Commission of Environmental Quality Certificate/Lab ID: T104704419-08-TX. **NELAP Accredited.**

Solid & Chemical Materials (Inorganic Parameters: EPA 6020, 7470, 7471, 1311, 7196, 9014, 9040, 9045, 9060. Organic Parameters: EPA 8015, 8270, 8260, 8081, 8082.)

Air (Organic Parameters: EPA TO-15)

Washington State Department of Ecology Certificate/Lab ID: C954. *Non-Potable Water* (Inorganic Parameters: SM2540D, 2510B, EPA 120.1, 180.1, 1631E, 245.7.)

Solid & Chemical Materials (Inorganic Parameters: EPA 9040, 9060, 6020, 7470, 7471, 7474. Organic Parameters: EPA 8081, 8082, 8015 Mod, 8270, 8260.)

U.S. Army Corps of Engineers

Department of Defense Certificate/Lab ID: L2217.01.

Non-Potable Water (Inorganic Parameters: EPA 6020A, SM4500H-B. Organic Parameters: 3020A, 3510C, 5030B, 8260B, 8270C, 8270C-ALK-PAH, 8082, 8081A, 8015D-SHC.)

Solid & Hazardous Waste (Inorganic Parameters: EPA 1311, 1312, 3050B, 6020A, 7471A, 9045C, 9060, SM 2540G, ASTM D422-63. Organic Parameters: EPA 3580A, 3570, 3540C, 5035A, 8260B, 8270C, 8270-ALK-PAH, 8082, 8081A, 8015D-SHC, 8015-DRO.

Air & Emissions (EPA TO-15.)

Analytes Not Accredited by NELAP

Certification is not available by NELAP for the following analytes: **8270C**: Biphenyl. **TO-15**: Halothane, 2,4,4-Trimethyl-2-pentene, 2,4,4-Trimethyl-1-pentene, Thiophene, 2-Methylthiophene, 3-Methylthiophene, 2-Ethylthiophene, 1,2,3-Trimethylbenzene, Indan, Indene, 1,2,4,5-Tetramethylbenzene, Benzothiophene, 2-Methylnaphthalene, 1-Methylnaphthalene.

MADEP MCP Response Action Analytical Report Certification

This form provides certifications for all samples performed by MCP methods. Please refer to the Sample Results and Container Information sections of this report for specification of MCP methods used for each analysis. The following questions pertain only to MCP Analytical Methods.

| An affirmative response to questions A through F is required for "Presumptive Certainty" status | | |
|--------------------------------------------------------------------------------------------------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----|
| A | Were all samples received in a condition consistent with those described on the Chain-of-Custody, properly preserved (including temperature) in the field or laboratory, and prepared/analyzed within method holding times? | YES |
| B | Were the analytical method(s) and all associated QC requirements specified in the selected CAM protocol(s) followed? | YES |
| C | Were all required corrective actions and analytical response actions specified in the selected CAM protocol(s) implemented for all identified performance standard non-conformances? | YES |
| D | Does the laboratory report comply with all the reporting requirements specified in CAM VII A, "Quality Assurance and Quality Control Guidelines for the Acquisition and Reporting of Analytical Data?" | YES |
| E a. | VPH, EPH, and APH Methods only: Was each method conducted without significant modification(s)? (Refer to the individual method(s) for a list of significant modifications). | N/A |
| E b. | APH and TO-15 Methods only: Was the complete analyte list reported for each method? | N/A |
| F | Were all applicable CAM protocol QC and performance standard non-conformances identified and evaluated in a laboratory narrative (including all "No" responses to Questions A through E)? | YES |
| A response to questions G, H and I is required for "Presumptive Certainty" status | | |
| G | Were the reporting limits at or below all CAM reporting limits specified in the selected CAM protocol(s)? | YES |
| H | Were all QC performance standards specified in the CAM protocol(s) achieved? | YES |
| I | Were results reported for the complete analyte list specified in the selected CAM protocol(s)? | YES |
| For any questions answered "No", please refer to the case narrative section on the following page(s). | | |

Please note that sample matrix information is located in the Sample Results section of this report.

Project Name: SOUTH TERMINAL NEW BEDFORD
Project Number: 6690

Lab Number: L1106422
Report Date: 05/16/11

Case Narrative

The samples were received in accordance with the Chain of Custody and no significant deviations were encountered during the preparation or analysis unless otherwise noted. Sample Receipt, Container Information, and the Chain of Custody are located at the back of the report.

Results contained within this report relate only to the samples submitted under this Alpha Lab Number and meet all of the requirements of NELAC, for all NELAC accredited parameters. The data presented in this report is organized by parameter (i.e. VOC, SVOC, etc.). Sample specific Quality Control data (i.e. Surrogate Spike Recovery) is reported at the end of the target analyte list for each individual sample, followed by the Laboratory Batch Quality Control at the end of each parameter. If a sample was re-analyzed or re-extracted due to a required quality control corrective action and if both sets of data are reported, the Laboratory ID of the re-analysis or re-extraction is designated with an "R" or "RE", respectively. When multiple Batch Quality Control elements are reported (e.g. more than one LCS), the associated samples for each element are noted in the grey shaded header line of each data table. Any Laboratory Batch, Sample Specific % recovery or RPD value that is outside the listed Acceptance Criteria is bolded in the report. Definitions of all data qualifiers and acronyms used in this report are provided in the Glossary located at the back of the report.

Please see the associated ADEx data file for a comparison of laboratory reporting limits that were achieved with the regulatory Numerical Standards requested on the Chain of Custody.

For additional information, please contact Client Services at 800-624-9220.

MCP Related Narratives

Report Submission

All MCP required questions were answered with affirmative responses; therefore, there are no relevant protocol-specific QC and/or performance standard non-conformances to report.

I, the undersigned, attest under the pains and penalties of perjury that, to the best of my knowledge and belief and based upon my personal inquiry of those responsible for providing the information contained in this analytical report, such information is accurate and complete. This certificate of analysis is not complete unless this page accompanies any and all pages of this report.

GLOSSARY

Acronyms

- EPA** - Environmental Protection Agency.
- LCS** - Laboratory Control Sample: A sample matrix, free from the analytes of interest, spiked with verified known amounts of analytes or a material containing known and verified amounts of analytes.
- LCSD** - Laboratory Control Sample Duplicate: Refer to LCS.
- MDL** - Method Detection Limit: This value represents the level to which target analyte concentrations are reported as estimated values, when those target analyte concentrations are quantified below the reporting limit (RL). The MDL includes any adjustments from dilutions, concentrations or moisture content, where applicable.
- MS** - Matrix Spike Sample: A sample prepared by adding a known mass of target analyte to a specified amount of matrix sample for which an independent estimate of target analyte concentration is available.
- MSD** - Matrix Spike Sample Duplicate: Refer to MS.
- NA** - Not Applicable.
- NC** - Not Calculated: Term is utilized when one or more of the results utilized in the calculation are non-detect at the parameter's reporting unit.
- NI** - Not Ignitable.
- RL** - Reporting Limit: The value at which an instrument can accurately measure an analyte at a specific concentration. The RL includes any adjustments from dilutions, concentrations or moisture content, where applicable.
- RPD** - Relative Percent Difference: The results from matrix and/or matrix spike duplicates are primarily designed to assess the precision of analytical results in a given matrix and are expressed as relative percent difference (RPD). Values which are less than five times the reporting limit for any individual parameter are evaluated by utilizing the absolute difference between the values; although the RPD value will be provided in the report.

Terms

Analytical Method: Both the document from which the method originates and the analytical reference method. (Example: EPA 8260B is shown as 1,8260B.) The codes for the reference method documents are provided in the References section of the Addendum.

Data Qualifiers

- A** - Spectra identified as "Aldol Condensation Product".
- B** - The analyte was detected above the reporting limit in the associated method blank. Flag only applies to associated field samples that have detectable concentrations of the analyte at less than five times (5x) the concentration found in the blank. For MCP-related projects, flag only applies to associated field samples that have detectable concentrations of the analyte at less than ten times (10x) the concentration found in the blank. For DOD-related projects, flag only applies to associated field samples that have detectable concentrations of the analyte at less than ten times (10x) the concentration found in the blank AND the analyte was detected above one-half the reporting limit (or above the reporting limit for common lab contaminants) in the associated method blank.
- C** - Co-elution: The target analyte co-elutes with a known lab standard (i.e. surrogate, internal standards, etc.) for co-extracted analyses.
- D** - Concentration of analyte was quantified from diluted analysis. Flag only applies to field samples that have detectable concentrations of the analyte.
- E** - Concentration of analyte exceeds the range of the calibration curve and/or linear range of the instrument.
- G** - The concentration may be biased high due to matrix interferences (i.e. co-elution) with non-target compound(s). The result should be considered estimated.
- H** - The analysis of pH was performed beyond the regulatory-required holding time of 15 minutes from the time of sample collection.
- I** - The RPD between the results for the two columns exceeds the method-specified criteria; however, the lower value has been reported due to obvious interference.
- P** - The RPD between the results for the two columns exceeds the method-specified criteria.

Report Format: Data Usability Report

Project Name: SOUTH TERMINAL NEW BEDFORD
Project Number: 6690

Lab Number: L1106422
Report Date: 05/16/11

Data Qualifiers

- Q** - The quality control sample exceeds the associated acceptance criteria. Note: This flag is not applicable for matrix spike recoveries when the sample concentration is greater than 4x the spike added or for batch duplicate RPD when the sample concentrations are less than 5x the RL. (Metals only.)
- R** - Analytical results are from sample re-analysis.
- RE** - Analytical results are from sample re-extraction.
- J** - Estimated value. This represents an estimated concentration for Tentatively Identified Compounds (TICs).
- ND** - Not detected at the reporting limit (RL) for the sample.

Project Name: SOUTH TERMINAL NEW BEDFORD
Project Number: 6690

Lab Number: L1106422
Report Date: 05/16/11

LIMITATION OF LIABILITIES

Alpha Analytical performs services with reasonable care and diligence normal to the analytical testing laboratory industry. In the event of an error, the sole and exclusive responsibility of Alpha Analytical shall be to re-perform the work at it's own expense. In no event shall Alpha Analytical be held liable for any incidental, consequential or special damages, including but not limited to, damages in any way connected with the use of, interpretation of, information or analysis provided by Alpha Analytical.

We strongly urge our clients to comply with EPA protocol regarding sample volume, preservation, cooling, containers, sampling procedures, holding time and splitting of samples in the field.

Certificate/Approval Program Summary

Last revised February 23, 2011 - Westboro Facility

The following list includes only those analytes/methods for which certification/approval is currently held.
For a complete listing of analytes for the referenced methods, please contact your Alpha Customer Service Representative.

Connecticut Department of Public Health Certificate/Lab ID: PH-0574. **NELAP Accredited Solid Waste/Soil.**

Drinking Water (Inorganic Parameters: Color, pH, Turbidity, Conductivity, Alkalinity, Chloride, Free Residual Chlorine, Fluoride, Calcium Hardness, Sulfate, Nitrate, Nitrite, Aluminum, Antimony, Arsenic, Barium, Beryllium, Cadmium, Calcium, Chromium, Copper, Iron, Lead, Magnesium, Manganese, Mercury, Molybdenum, Nickel, Potassium, Selenium, Silver, Sodium, Thallium, Vanadium, Zinc, Total Dissolved Solids, Total Organic Carbon, Total Cyanide, Perchlorate. Organic Parameters: Volatile Organics 524.2, Total Trihalomethanes 524.2, 1,2-Dibromo-3-chloropropane (DBCP), Ethylene Dibromide (EDB), 1,4-Dioxane (Mod 8270). Microbiology Parameters: Total Coliform-MF mEndo (SM9222B), Total Coliform – Colilert (SM9223 P/A), E. Coli. – Colilert (SM9223 P/A), HPC – Pour Plate (SM9215B), Fecal Coliform – MF m-FC (SM9222D))

Wastewater/Non-Potable Water (Inorganic Parameters: Color, pH, Conductivity, Acidity, Alkalinity, Chloride, Total Residual Chlorine, Fluoride, Total Hardness, Silica, Sulfate, Sulfide, Ammonia, Kjeldahl Nitrogen, Nitrate, Nitrite, O-Phosphate, Total Phosphorus, Aluminum, Antimony, Arsenic, Barium, Beryllium, Boron, Cadmium, Calcium, Chromium, Hexavalent Chromium, Cobalt, Copper, Iron, Lead, Magnesium, Manganese, Mercury, Molybdenum, Nickel, Potassium, Selenium, Silver, Sodium, Strontium, Thallium, Tin, Titanium, Vanadium, Zinc, Total Residue (Solids), Total Dissolved Solids, Total Suspended Solids (non-filterable), BOD, CBOD, COD, TOC, Total Cyanide, Phenolics, Foaming Agents (MBAS), Bromide, Oil and Grease. Organic Parameters: PCBs, Organochlorine Pesticides, Technical Chlordane, Toxaphene, 2,4-D, 2,4,5-T, 2,4,5-TP(Silvex), Acid Extractables (Phenols), Benzidines, Phthalate Esters, Nitrosamines, Nitroaromatics & Isophorone, Polynuclear Aromatic Hydrocarbons, Haloethers, Chlorinated Hydrocarbons, Volatile Organics, TPH (HEM/SGT), Extractable Petroleum Hydrocarbons (ETPH), MA-EPH, MA-VPH. Microbiology Parameters: Total Coliform – MF mEndo (SM9222B), Total Coliform – MTF (SM9221B), HPC – Pour Plate (SM9215B), Fecal Coliform – MF m-FC (SM9222D), Fecal Coliform – A-1 Broth (SM9221E).)

Solid Waste/Soil (Inorganic Parameters: pH, Sulfide, Aluminum, Antimony, Arsenic, Barium, Beryllium, Boron, Cadmium, Calcium, Chromium, Hexavalent Chromium, Cobalt, Copper, Iron, Lead, Magnesium, Manganese, Mercury, Molybdenum, Nickel, Potassium, Selenium, Silver, Sodium, Thallium, Tin, Vanadium, Zinc, Total Cyanide, Ignitability, Phenolics, Corrosivity, TCLP Leach (1311), SPLP Leach (1312 metals only), Reactivity. Organic Parameters: PCBs, PCBs in Oil, Organochlorine Pesticides, Technical Chlordane, Toxaphene, Extractable Petroleum Hydrocarbons (ETPH), MA-EPH, MA-VPH, Dicamba, 2,4-D, 2,4,5-T, 2,4,5-TP(Silvex), Volatile Organics, Acid Extractables (Phenols), 3,3'-Dichlorobenzidine, Phthalates, Nitrosamines, Nitroaromatics & Cyclic Ketones, PAHs, Haloethers, Chlorinated Hydrocarbons.)

Maine Department of Human Services Certificate/Lab ID: 2009024.

Drinking Water (Inorganic Parameters: SM9215B, 9222D, 9223B, EPA 180.1, 353.2, SM2130B, 2320B, 4500CI-D, 4500CN-C, 4500CN-E, 4500F-C, 4500H+B, 4500NO3-F, EPA 200.7, EPA 200.8, 245.1, EPA 300.0. Organic Parameters: 504.1, 524.2.)

Wastewater/Non-Potable Water (Inorganic Parameters: EPA 120.1, 1664A, 350.1, 351.1, 353.2, 410.4, 420.1, SM2320B, 2510B, 2540C, 2540D, 426C, 4500CI-D, 4500CI-E, 4500CN-C, 4500CN-E, 4500F-B, 4500F-C, 4500H+B, 4500Norg-B, 4500Norg-C, 4500NH3-B, 4500NH3-G, 4500NH3-H, 4500NO3-F, 4500P-B, 4500P-E, 5210B, 5220D, 5310C, EPA 200.7, 200.8, 245.1. Organic Parameters: 608, 624, ME-DRO, ME-GRO, MA-EPH, MA-VPH.)

Solid Waste/Soil (Organic Parameters: ME-DRO, ME-GRO, MA-EPH, MA-VPH.)

Massachusetts Department of Environmental Protection Certificate/Lab ID: M-MA086.

Drinking Water (Inorganic Parameters: (EPA 200.8 for: Sb,As,Ba,Be,Cd,Cr,Cu,Pb,Ni,Se,Tl) (EPA 200.7 for: Ba,Be,Ca,Cd,Cr,Cu,Na,Ni) 245.1, (300.0 for: Nitrate-N, Fluoride, Sulfate); (EPA 353.2 for: Nitrate-N, Nitrite-N); (SM4500NO3-F for: Nitrate-N and Nitrite-N); 4500F-C, 4500CN-CE, EPA 180.1, SM2130B, SM4500CI-D, 2320B, SM2540C, SM4500H-B. Organic Parameters: (EPA 524.2 for: Trihalomethanes, Volatile Organics); (504.1 for: 1,2-Dibromoethane, 1,2-Dibromo-3-Chloropropane), EPA 332. Microbiology Parameters: SM9215B; ENZ. SUB. SM9223; ColilertQT SM9223B; MF-SM9222D.)

Non-Potable Water (Inorganic Parameters: (EPA 200.8 for: Al,Sb,As,Be,Cd,Cr,Cu,Pb,Mn,Ni,Se,Ag,Tl,Zn); (EPA 200.7 for: Al,Sb,As,Be,Cd,Ca,Cr,Co,Cu,Fe,Pb,Mg,Mn,Mo,Ni,K,Se,Ag,Na,Sr,Ti,Tl, V,Zn); 245.1, SM4500H,B, EPA 120.1, SM2510B, 2540C, 2340B, 2320B, 4500CL-E, 4500F-BC, 426C, SM4500NH3-BH, (EPA 350.1 for: Ammonia-N), LCHAT 10-107-06-1-B for Ammonia-N, SM4500NO3-F, 353.2 for Nitrate-N, SM4500NH3-BC-NES, EPA 351.1, SM4500P-E, 4500P-B,E, 5220D, EPA 410.4, SM 5210B, 5310C, 4500CL-D, EPA 1664, SM14 510AC, EPA 420.1, SM4500-CN-CE, SM2540D.

Organic Parameters: (EPA 624 for Volatile Halocarbons, Volatile Aromatics),(608 for: Chlordane, Aldrin, Dieldrin, DDD, DDE, DDT, Heptachlor, Heptachlor Epoxide, PCBs-Water), (EPA 625 for SVOC Acid Extractables and SVOC Base/Neutral Extractables), 600/4-81-045-PCB-Oil. Microbiology Parameters: (ColilertQT SM9223B;Enterolert-QT: SM9222D-MF.)

New Hampshire Department of Environmental Services Certificate/Lab ID: 200307. *NELAP Accredited.*

Drinking Water (Inorganic Parameters: SM 9222B, 9223B, 9215B, EPA 200.7, 200.8, 245.2, 300.0, SM4500CN-E, 4500H+B, 4500NO3-F, 2320B, 2510B, 2540C, 4500F-C, 5310C, 2120B, EPA 332.0. Organic Parameters: 504.1, 524.2.)

Non-Potable Water (Inorganic Parameters: SM9222D, 9221B, 9222B, 9221E-EC, EPA 3005A, 200.7, 200.8, 245.1, 245.2, SW-846 6010B, 6020, 7196A, 7470A, SM3500-CR-D, EPA 120.1, 300.0, 350.1, 351.1, 353.2, 410.4, 420.1, 1664A, SW-846 9010, 9030, 9040B, 9050A, SM426C, SM2120B, 2310B, 2320B, 2540B, 2540D, 4500H+B, 4500CL-E, 4500CN-E, 4500NH3-H, 4500NO3-F, 4500NO2-B, 4500P-E, 4500-S2-D, 5210B, 5220D, 2510B, 2540C, 4500F-C, 5310C, 5540C, LACHAT 10-204-00-1-A, LACHAT 10-107-06-2-D. Organic Parameters: SW-846 3510C, 5030B, 8260B, 8270C, 8330, EPA 624, 625, 608, SW-846 8082, 8081A, 8151A.)

Solid & Chemical Materials (Inorganic Parameters: SW-846 6010B, 7196A, 7471A, 1010, 1030, 9010, 9012A, 9014, 9030B, 9040B, 9045C, 9050C, 9065,1311, 1312, 3005A, 3050B. Organic Parameters: SW-846 3540C, 3546, 3580A, 5030B, 5035, 8260B, 8270C, 8330, 8151A, 8015B, 8082, 8081A.)

New Jersey Department of Environmental Protection Certificate/Lab ID: MA935. *NELAP Accredited.*

Drinking Water (Inorganic Parameters: SM9222B, 9221E, 9223B, 9215B, 4500CN-CE, 4500NO3-F, 4500F-C, EPA 300.0, 200.7, 200.8, 245.2, 2540C, SM2120B, 2320B, 2510B, 5310C, SM4500H-B. Organic Parameters: EPA 332, 504.1, 524.2.)

Non-Potable Water (Inorganic Parameters: SM5210B, EPA 410.4, SM5220D, 4500CI-E, EPA 300.0, SM2120B, SM4500F-BC, EPA 200.7, 351.1, LACHAT 10-107-06-2-D, EPA 353.2, SM4500NO3-F, 4500NO2-B, EPA 1664A, SM5310B, C or D, 4500-PE, EPA 420.1, SM510ABC, SM4500P-B5+E, 2540B, 2540C, 2540D, EPA 120.1, SM2510B, SM15 426C, 9222D, 9221B, 9221C, 9221E, 9222B, 9215B, 2310B, 2320B, 4500NH3-H, 4500-S D, EPA 350.1, 350.2, SW-846 1312, 6020, 7470A, 5540C, 4500H-B, EPA 200.8, SM3500Cr-D, 4500CN-CE, EPA 245.1, 245.2, SW-846 9040B, 3005A, EPA 6010B, 7196A, SW-846 9010B, 9030B. Organic Parameters: SW-846 8260B, 8270C, 8270C-SIM, 3510C, EPA 608, 624, 625, SW-846 3630C, 5030B, 8081A, 8082, 8151A, 8330, NJ OQA-QAM-025 Rev.7, NJ EPH.)

Solid & Chemical Materials (Inorganic Parameters: SW-846, 6010B, 7196A, 9010B, 9030B, 1010, 1030, 1311, 1312, 3005A, 3050B, 7471A, 9014, 9012A, 9040B, 9045C, 9050A, 9065. Organic Parameters: SW-846 8015B, 8081A, 8082, 8151A, 8330, 8260B, 8270C, 8270C-SIM, 3540C, 3545, 3546, 3550B, 3580A, 3630C, 5030B, 5035L, 5035H, NJ OQA-QAM-025 Rev.7, NJ EPH.)

New York Department of Health Certificate/Lab ID: 11148. *NELAP Accredited.*

Drinking Water (Inorganic Parameters: SM9223B, 9222B, 9215B, EPA 200.8, 200.7, 245.2, SM5310C, EPA 332.0, SM2320B, EPA 300.0, SM2120B, 4500CN-E, 4500F-C, 4500H-B, 4500NO3-F, 2540C, SM 2510B. Organic Parameters: EPA 524.2, 504.1.)

Non-Potable Water (Inorganic Parameters: SM9221E, 9222D, 9221B, 9222B, 9215B, 5210B, 5310C, EPA 410.4, SM5220D, 2310B-4a, 2320B, EPA 200.7, 300.0, SM4500CL-E, 4500F-C, SM15 426C, EPA 350.1, SM4500NH3-BH, EPA 351.1, LACHAT 10-107-06-2, EPA 353.2, LACHAT 10-107-04-1-C, SM4500-NO3-F, 4500-NO2-B, 4500P-E, 2540C, 2540B, 2540D, EPA 200.8, EPA 6010B, 6020, EPA 7196A, SM3500Cr-D, EPA 245.1, 245.2, 7470A, SM2120B, LACHAT 10-204-00-1-A, EPA 9040B, SM4500-HB, EPA 1664A, EPA 420.1, SM14 510C, EPA 120.1, SM2510B, SM4500S-D, SM5540C, EPA 3005A, 9010B, 9030B. Organic Parameters: EPA 624, 8260B, 8270C, 625, 608, 8081A, 8151A, 8330, 8082, EPA 3510C, 5030B.)

Solid & Hazardous Waste (Inorganic Parameters: 1010, 1030, EPA 6010B, 7196A, 7471A, 9012A, 9014, 9040B, 9045C, 9065, 9050, EPA 1311, 1312, 3005A, 3050B, 9010B, 9030B. Organic Parameters: EPA 8260B, 8270C, 8015B, 8081A, 8151A, 8330, 8082, 3540C, 3545, 3546, 3580, 5030B, 5035.)

North Carolina Department of the Environment and Natural Resources Certificate/Lab ID : 666. Organic Parameters: MA-EPH, MA-VPH.

Pennsylvania Department of Environmental Protection Certificate/Lab ID : 68-03671. *NELAP Accredited.*

Drinking Water (Organic Parameters: EPA 524.2)

Non-Potable Water (Inorganic Parameters: EPA 1312. Organic Parameters: EPA 3510C, 5030B, 625, 624, 608, 8081A, 8082, 8151A, 8260B, 8270C, 8330)

Solid & Hazardous Waste (Inorganic Parameters: EPA 350.1, 1010, 1030, 1311, 1312, 3050B, 6010B, 7196A, 7471A, 9010B, 9012A, 9014, 9040B, 9045C, 9050, 9065, SM 4500NH3-H. Organic Parameters: 3540C, 3545, 3546, 3550B,

3580A, 3630C, 5035, 8015B, 8081A, 8082, 8151A, 8260B, 8270C, 8330)

Rhode Island Department of Health Certificate/Lab ID: LAO00065. *NELAP Accredited via NY-DOH.*

Refer to MA-DEP Certificate for Potable and Non-Potable Water.

Refer to NJ-DEP Certificate for Potable and Non-Potable Water.

Texas Commission on Environmental Quality Certificate/Lab ID: T104704476-09-1. *NELAP Accredited.*

Non-Potable Water (Inorganic Parameters: EPA 120.1, 1664, 200.7, 200.8, 245.1, 245.2, 300.0, 350.1, 351.1, 353.2, 376.2, 410.4, 420.1, 6010, 6020, 7196, 7470, 9040, SM 2120B, 2310B, 2320B, 2510B, 2540B, 2540C, 2540D, 426C, 4500CL-E, 4500CN-E, 4500F-C, 4500H+B, 4500NH3-H, 4500NO2B, 4500P-E, 4500 S²⁻ D, 510C, 5210B, 5220D, 5310C, 5540C. Organic Parameters: EPA 608, 624, 625, 8081, 8082, 8151, 8260, 8270, 8330.)

Solid & Hazardous Waste (Inorganic Parameters: EPA 1311, 1312, 9012, 9014, 9040, 9045, 9050, 9065.)

Department of Defense Certificate/Lab ID: L2217.

Drinking Water (Inorganic Parameters: SM 4500H-B. Organic Parameters: EPA 524.2, 504.1.)

Non-Potable Water (Inorganic Parameters: EPA 200.7, 200.8, 6010B, 6020, 245.1, 245.2, 7470A, 9040B, 300.0, 332.0, 6860, 353.2, 410.4, 9060, 1664A, SM 4500CN-E, 4500H-B, 4500NO3-F, 5220D, 5310C, 2320B, 2540C, 3005A, 3015, 9010B, 9056. Organic Parameters: EPA 8260B, 8270C, 8330A, 625, 8082, 8081A, 3510C, 5030B, MassDEP EPH, MassDEP VPH.)

Solid & Hazardous Waste (Inorganic Parameters: EPA 200.7, 6010B, 7471A, 9010, 9012A, 6860, 1311, 1312, 3050B, 7196A, 9010B, 3500-CR-D, 4500CN-CE, 2540G, Organic Parameters: EPA 8260B, 8270C, 8330A/B-prep, 8082, 8081A, 3540C, 3546, 3580A, 5035A, MassDEP EPH, MassDEP VPH.)

Analytes Not Accredited by NELAP

Certification is not available by NELAP for the following analytes: **EPA 8260B:** Freon-113, 1,2,4,5-Tetramethylbenzene, 4-Ethyltoluene. **EPA 8330A:** PETN, Picric Acid, Nitroglycerine, 2,6-DANT, 2,4-DANT. **EPA 8270C:** Methyl naphthalene, Dimethyl naphthalene, Total Methyl naphthalenes, Total Dimethyl naphthalenes, 1,4-Diphenylhydrazine (Azobenzene). **EPA 625:** 4-Chloroaniline. **EPA 350.1** for Ammonia in a Soil matrix.

PO Number: None
Report Number: 20948
Date Received: 04/29/11
Date Reported: 05/26/11

Project: South Terminal.6690

Attached please find results for analyses performed on samples received on 04/29/11 at 1020.

Samples were received in acceptable condition and under chain of custody.

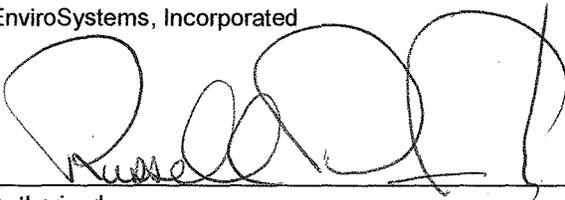

Instruments used in analysis were calibrated with the appropriate frequency and to the specifications of the referenced methods.

Analytes in blanks were below levels affecting sample results.

Matrix effects as monitored by matrix spike recovery or unusual physical properties were not apparent, except where noted.

Accuracy and precision as monitored by laboratory control sample analyses were within acceptance limits.

MADEP MCP Response Action Analytical Report Certification

This form provides certifications for all samples performed by MCP methods. Please refer to the Sample Results and Container Information sections of this report for specification of MCP methods used for each analysis. The following questions pertain only to MCP Analytical Methods.

| An affirmative response to questions A through F is required for "Presumptive Certainty" status | | |
|--------------------------------------------------------------------------------------------------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----|
| A | Were all samples received in a condition consistent with those described on the Chain-of-Custody, properly preserved (including temperature) in the field or laboratory, and prepared/analyzed within method holding times? | YES |
| B | Were the analytical method(s) and all associated QC requirements specified in the selected CAM protocol(s) followed? | YES |
| C | Were all required corrective actions and analytical response actions specified in the selected CAM protocol(s) implemented for all identified performance standard non-conformances? | YES |
| D | Does the laboratory report comply with all the reporting requirements specified in CAM VII A, "Quality Assurance and Quality Control Guidelines for the Acquisition and Reporting of Analytical Data?" | YES |
| E a. | VPH, EPH, and APH Methods only: Was each method conducted without significant modification(s)? (Refer to the individual method(s) for a list of significant modifications). | N/A |
| E b. | APH and TO-15 Methods only: Was the complete analyte list reported for each method? | N/A |
| F | Were all applicable CAM protocol QC and performance standard non-conformances identified and evaluated in a laboratory narrative (including all "No" responses to Questions A through E)? | YES |
| A response to questions G, H and I is required for "Presumptive Certainty" status | | |
| G | Were the reporting limits at or below all CAM reporting limits specified in the selected CAM protocol(s)? | NO |
| H | Were all QC performance standards specified in the CAM protocol(s) achieved? | NO |
| I | Were results reported for the complete analyte list specified in the selected CAM protocol(s)? | NO |
| For any questions answered "No", please refer to the case narrative section on the following page(s). | | |

Please note that sample matrix information is located in the Sample Results section of this report.

Project Name: SOUTH TERMINAL NEW BEDFORD
Project Number: 6690

Lab Number: L1106586
Report Date: 05/20/11

Case Narrative

The samples were received in accordance with the Chain of Custody and no significant deviations were encountered during the preparation or analysis unless otherwise noted. Sample Receipt, Container Information, and the Chain of Custody are located at the back of the report.

Results contained within this report relate only to the samples submitted under this Alpha Lab Number and meet all of the requirements of NELAC, for all NELAC accredited parameters. The data presented in this report is organized by parameter (i.e. VOC, SVOC, etc.). Sample specific Quality Control data (i.e. Surrogate Spike Recovery) is reported at the end of the target analyte list for each individual sample, followed by the Laboratory Batch Quality Control at the end of each parameter. If a sample was re-analyzed or re-extracted due to a required quality control corrective action and if both sets of data are reported, the Laboratory ID of the re-analysis or re-extraction is designated with an "R" or "RE", respectively. When multiple Batch Quality Control elements are reported (e.g. more than one LCS), the associated samples for each element are noted in the grey shaded header line of each data table. Any Laboratory Batch, Sample Specific % recovery or RPD value that is outside the listed Acceptance Criteria is bolded in the report. Definitions of all data qualifiers and acronyms used in this report are provided in the Glossary located at the back of the report.

Please see the associated ADEx data file for a comparison of laboratory reporting limits that were achieved with the regulatory Numerical Standards requested on the Chain of Custody.

For additional information, please contact Client Services at 800-624-9220.

MCP Related Narratives

Semivolatile Organics

L1106586-04 and -07 have elevated detection limits due to the dilutions required by the sample matrices (extracts were dark and viscous).

L1106586-06 has elevated detection limits due to the dilution required by the elevated concentrations of target compounds in the sample.

In reference to question G:

L1106586-04, -06 and -07: One or more of the target analytes did not achieve the requested CAM reporting limits.

In reference to question H:

The WG467545-2/-3 LCS/LCSD recoveries, associated with L1106586-01, are below the individual

Project Name: SOUTH TERMINAL NEW BEDFORD
Project Number: 6690

Lab Number: L1106586
Report Date: 05/20/11

Case Narrative (continued)

acceptance criteria for Aniline (37%/34%), but within the overall method allowances. The results of the associated sample are reported; however, all results are considered to have a potentially low bias for this compound.

The WG467889-2/-3 LCS/LCSD recoveries, associated with L1106586-02 through -07, are below the individual acceptance criteria for Aniline (22%/28%) and 4-Chloroaniline (LCS at 37%), but within the overall method allowances. The results of the associated samples are reported; however, all results are considered to have a potentially low bias for these compounds.

Metals

In reference to question H:

The WG467817-4 MS recovery, performed on L1106586-01, is below the acceptance criteria for Antimony (46%); however, the associated LCS recovery was within criteria. No further action was taken.

The WG467819-3 Laboratory Duplicate RPDs, performed on L1106586-01, are outside the acceptance criteria for Arsenic (30%) and Zinc (43%). The elevated RPDs have been attributed to the non-homogeneous nature of the sample utilized for the laboratory duplicate.

The WG467819-3 Laboratory Duplicate RPDs, performed on L1106586-01, are above the acceptance criteria for Beryllium (65%), Selenium (81%) and Thallium (91%); however, the sample and duplicate results are less than five times the reporting limit. Therefore, the RPDs are valid.

In reference to question I:

All samples were analyzed for a subset of MCP elements per the Chain of Custody.

Non-MCP Related Narratives

Petroleum Hydrocarbon Quantitation

L1106586-06 has an elevated detection limit due to the dilution required by the elevated concentration of target compound in the sample.

I, the undersigned, attest under the pains and penalties of perjury that, to the best of my knowledge and belief and based upon my personal inquiry of those responsible for providing the information contained in this analytical report, such information is accurate and complete. This certificate of analysis is not complete unless this page accompanies any and all pages of this report.

GLOSSARY

Acronyms

- EPA** - Environmental Protection Agency.
- LCS** - Laboratory Control Sample: A sample matrix, free from the analytes of interest, spiked with verified known amounts of analytes or a material containing known and verified amounts of analytes.
- LCS D** - Laboratory Control Sample Duplicate: Refer to LCS.
- MDL** - Method Detection Limit: This value represents the level to which target analyte concentrations are reported as estimated values, when those target analyte concentrations are quantified below the reporting limit (RL). The MDL includes any adjustments from dilutions, concentrations or moisture content, where applicable.
- MS** - Matrix Spike Sample: A sample prepared by adding a known mass of target analyte to a specified amount of matrix sample for which an independent estimate of target analyte concentration is available.
- MS D** - Matrix Spike Sample Duplicate: Refer to MS.
- NA** - Not Applicable.
- NC** - Not Calculated: Term is utilized when one or more of the results utilized in the calculation are non-detect at the parameter's reporting unit.
- NI** - Not Ignitable.
- RL** - Reporting Limit: The value at which an instrument can accurately measure an analyte at a specific concentration. The RL includes any adjustments from dilutions, concentrations or moisture content, where applicable.
- RPD** - Relative Percent Difference: The results from matrix and/or matrix spike duplicates are primarily designed to assess the precision of analytical results in a given matrix and are expressed as relative percent difference (RPD). Values which are less than five times the reporting limit for any individual parameter are evaluated by utilizing the absolute difference between the values; although the RPD value will be provided in the report.

Terms

Analytical Method: Both the document from which the method originates and the analytical reference method. (Example: EPA 8260B is shown as 1,8260B.) The codes for the reference method documents are provided in the References section of the Addendum.

Data Qualifiers

- A** - Spectra identified as "Aldol Condensation Product".
- B** - The analyte was detected above the reporting limit in the associated method blank. Flag only applies to associated field samples that have detectable concentrations of the analyte at less than five times (5x) the concentration found in the blank. For MCP-related projects, flag only applies to associated field samples that have detectable concentrations of the analyte at less than ten times (10x) the concentration found in the blank. For DOD-related projects, flag only applies to associated field samples that have detectable concentrations of the analyte at less than ten times (10x) the concentration found in the blank AND the analyte was detected above one-half the reporting limit (or above the reporting limit for common lab contaminants) in the associated method blank.
- C** - Co-elution: The target analyte co-elutes with a known lab standard (i.e. surrogate, internal standards, etc.) for co-extracted analyses.
- D** - Concentration of analyte was quantified from diluted analysis. Flag only applies to field samples that have detectable concentrations of the analyte.
- E** - Concentration of analyte exceeds the range of the calibration curve and/or linear range of the instrument.
- G** - The concentration may be biased high due to matrix interferences (i.e. co-elution) with non-target compound(s). The result should be considered estimated.
- H** - The analysis of pH was performed beyond the regulatory-required holding time of 15 minutes from the time of sample collection.
- I** - The RPD between the results for the two columns exceeds the method-specified criteria; however, the lower value has been reported due to obvious interference.
- P** - The RPD between the results for the two columns exceeds the method-specified criteria.

Report Format: Data Usability Report

Project Name: SOUTH TERMINAL NEW BEDFORD
Project Number: 6690

Lab Number: L1106586
Report Date: 05/20/11

Data Qualifiers

- Q** - The quality control sample exceeds the associated acceptance criteria. Note: This flag is not applicable for matrix spike recoveries when the sample concentration is greater than 4x the spike added or for batch duplicate RPD when the sample concentrations are less than 5x the RL. (Metals only.)
- R** - Analytical results are from sample re-analysis.
- RE** - Analytical results are from sample re-extraction.
- J** - Estimated value. This represents an estimated concentration for Tentatively Identified Compounds (TICs).
- ND** - Not detected at the reporting limit (RL) for the sample.

LIMITATION OF LIABILITIES

Alpha Analytical performs services with reasonable care and diligence normal to the analytical testing laboratory industry. In the event of an error, the sole and exclusive responsibility of Alpha Analytical shall be to re-perform the work at it's own expense. In no event shall Alpha Analytical be held liable for any incidental, consequential or special damages, including but not limited to, damages in any way connected with the use of, interpretation of, information or analysis provided by Alpha Analytical.

We strongly urge our clients to comply with EPA protocol regarding sample volume, preservation, cooling, containers, sampling procedures, holding time and splitting of samples in the field.

Certificate/Approval Program Summary

Last revised February 23, 2011 - Westboro Facility

The following list includes only those analytes/methods for which certification/approval is currently held.
For a complete listing of analytes for the referenced methods, please contact your Alpha Customer Service Representative.

Connecticut Department of Public Health Certificate/Lab ID: PH-0574. NELAP Accredited Solid Waste/Soil.

Drinking Water (Inorganic Parameters: Color, pH, Turbidity, Conductivity, Alkalinity, Chloride, Free Residual Chlorine, Fluoride, Calcium Hardness, Sulfate, Nitrate, Nitrite, Aluminum, Antimony, Arsenic, Barium, Beryllium, Cadmium, Calcium, Chromium, Copper, Iron, Lead, Magnesium, Manganese, Mercury, Molybdenum, Nickel, Potassium, Selenium, Silver, Sodium, Thallium, Vanadium, Zinc, Total Dissolved Solids, Total Organic Carbon, Total Cyanide, Perchlorate. Organic Parameters: Volatile Organics 524.2, Total Trihalomethanes 524.2, 1,2-Dibromo-3-chloropropane (DBCP), Ethylene Dibromide (EDB), 1,4-Dioxane (Mod 8270). Microbiology Parameters: Total Coliform-MF mEndo (SM9222B), Total Coliform – Colilert (SM9223 P/A), E. Coli. – Colilert (SM9223 P/A), HPC – Pour Plate (SM9215B), Fecal Coliform – MF m-FC (SM9222D))

Wastewater/Non-Potable Water (Inorganic Parameters: Color, pH, Conductivity, Acidity, Alkalinity, Chloride, Total Residual Chlorine, Fluoride, Total Hardness, Silica, Sulfate, Sulfide, Ammonia, Kjeldahl Nitrogen, Nitrate, Nitrite, O-Phosphate, Total Phosphorus, Aluminum, Antimony, Arsenic, Barium, Beryllium, Boron, Cadmium, Calcium, Chromium, Hexavalent Chromium, Cobalt, Copper, Iron, Lead, Magnesium, Manganese, Mercury, Molybdenum, Nickel, Potassium, Selenium, Silver, Sodium, Strontium, Thallium, Tin, Titanium, Vanadium, Zinc, Total Residue (Solids), Total Dissolved Solids, Total Suspended Solids (non-filterable), BOD, CBOD, COD, TOC, Total Cyanide, Phenolics, Foaming Agents (MBAS), Bromide, Oil and Grease. Organic Parameters: PCBs, Organochlorine Pesticides, Technical Chlordane, Toxaphene, 2,4-D, 2,4,5-T, 2,4,5-TP(Silvex), Acid Extractables (Phenols), Benzidines, Phthalate Esters, Nitrosamines, Nitroaromatics & Isophorone, Polynuclear Aromatic Hydrocarbons, Haloethers, Chlorinated Hydrocarbons, Volatile Organics, TPH (HEM/SGT), Extractable Petroleum Hydrocarbons (ETPH), MA-EPH, MA-VPH. Microbiology Parameters: Total Coliform – MF mEndo (SM9222B), Total Coliform – MTF (SM9221B), HPC – Pour Plate (SM9215B), Fecal Coliform – MF m-FC (SM9222D), Fecal Coliform – A-1 Broth (SM9221E).)

Solid Waste/Soil (Inorganic Parameters: pH, Sulfide, Aluminum, Antimony, Arsenic, Barium, Beryllium, Boron, Cadmium, Calcium, Chromium, Hexavalent Chromium, Cobalt, Copper, Iron, Lead, Magnesium, Manganese, Mercury, Molybdenum, Nickel, Potassium, Selenium, Silver, Sodium, Thallium, Tin, Vanadium, Zinc, Total Cyanide, Ignitability, Phenolics, Corrosivity, TCLP Leach (1311), SPLP Leach (1312 metals only), Reactivity. Organic Parameters: PCBs, PCBs in Oil, Organochlorine Pesticides, Technical Chlordane, Toxaphene, Extractable Petroleum Hydrocarbons (ETPH), MA-EPH, MA-VPH, Dicamba, 2,4-D, 2,4,5-T, 2,4,5-TP(Silvex), Volatile Organics, Acid Extractables (Phenols), 3,3'-Dichlorobenzidine, Phthalates, Nitrosamines, Nitroaromatics & Cyclic Ketones, PAHs, Haloethers, Chlorinated Hydrocarbons.)

Maine Department of Human Services Certificate/Lab ID: 2009024.

Drinking Water (Inorganic Parameters: SM9215B, 9222D, 9223B, EPA 180.1, 353.2, SM2130B, 2320B, 4500CI-D, 4500CN-C, 4500CN-E, 4500F-C, 4500H+B, 4500NO3-F, EPA 200.7, EPA 200.8, 245.1, EPA 300.0. Organic Parameters: 504.1, 524.2.)

Wastewater/Non-Potable Water (Inorganic Parameters: EPA 120.1, 1664A, 350.1, 351.1, 353.2, 410.4, 420.1, SM2320B, 2510B, 2540C, 2540D, 426C, 4500CI-D, 4500CI-E, 4500CN-C, 4500CN-E, 4500F-B, 4500F-C, 4500H+B, 4500Norg-B, 4500Norg-C, 4500NH3-B, 4500NH3-G, 4500NH3-H, 4500NO3-F, 4500P-B, 4500P-E, 5210B, 5220D, 5310C, EPA 200.7, 200.8, 245.1. Organic Parameters: 608, 624, ME-DRO, ME-GRO, MA-EPH, MA-VPH.)

Solid Waste/Soil (Organic Parameters: ME-DRO, ME-GRO, MA-EPH, MA-VPH.)

Massachusetts Department of Environmental Protection Certificate/Lab ID: M-MA086.

Drinking Water (Inorganic Parameters: (EPA 200.8 for: Sb,As,Ba,Be,Cd,Cr,Cu,Pb,Ni,Se,Tl) (EPA 200.7 for: Ba,Be,Ca,Cd,Cr,Cu,Na,Ni) 245.1, (300.0 for: Nitrate-N, Fluoride, Sulfate); (EPA 353.2 for: Nitrate-N, Nitrite-N); (SM4500NO3-F for: Nitrate-N and Nitrite-N); 4500F-C, 4500CN-CE, EPA 180.1, SM2130B, SM4500CI-D, 2320B, SM2540C, SM4500H-B. Organic Parameters: (EPA 524.2 for: Trihalomethanes, Volatile Organics); (504.1 for: 1,2-Dibromoethane, 1,2-Dibromo-3-Chloropropane), EPA 332. Microbiology Parameters: SM9215B; ENZ. SUB. SM9223; ColilertQT SM9223B; MF-SM9222D.)

Non-Potable Water (Inorganic Parameters: (EPA 200.8 for: Al,Sb,As,Be,Cd,Cr,Cu,Pb,Mn,Ni,Se,Ag,Tl,Zn); (EPA 200.7 for: Al,Sb,As,Be,Cd,Ca,Cr,Co,Cu,Fe,Pb,Mg,Mn,Mo,Ni,K,Se,Ag,Na,Sr,Ti,Tl, V,Zn); 245.1, SM4500H,B, EPA 120.1, SM2510B, 2540C, 2340B, 2320B, 4500CL-E, 4500F-BC, 426C, SM4500NH3-BH, (EPA 350.1 for: Ammonia-N), LACHAT 10-107-06-1-B for Ammonia-N, SM4500NO3-F, 353.2 for Nitrate-N, SM4500NH3-BC-NES, EPA 351.1, SM4500P-E, 4500P-B,E, 5220D, EPA 410.4, SM 5210B, 5310C, 4500CL-D, EPA 1664, SM14 510AC, EPA 420.1, SM4500-CN-CE, SM2540D.

Organic Parameters: (EPA 624 for Volatile Halocarbons, Volatile Aromatics),(608 for: Chlordane, Aldrin, Dieldrin, DDD, DDE, DDT, Heptachlor, Heptachlor Epoxide, PCBs-Water), (EPA 625 for SVOC Acid Extractables and SVOC Base/Neutral Extractables), 600/4-81-045-PCB-Oil. Microbiology Parameters: (ColilertQT SM9223B;Enterolert-QT: SM9222D-MF.)

New Hampshire Department of Environmental Services Certificate/Lab ID: 200307. NELAP Accredited.

Drinking Water (Inorganic Parameters: SM 9222B, 9223B, 9215B, EPA 200.7, 200.8, 245.2, 300.0, SM4500CN-E, 4500H+B, 4500NO3-F, 2320B, 2510B, 2540C, 4500F-C, 5310C, 2120B, EPA 332.0. Organic Parameters: 504.1, 524.2.)

Non-Potable Water (Inorganic Parameters: SM9222D, 9221B, 9222B, 9221E-EC, EPA 3005A, 200.7, 200.8, 245.1, 245.2, SW-846 6010B, 6020, 7196A, 7470A, SM3500-CR-D, EPA 120.1, 300.0, 350.1, 351.1, 353.2, 410.4, 420.1, 1664A, SW-846 9010, 9030, 9040B, 9050A, SM426C, SM2120B, 2310B, 2320B, 2540B, 2540D, 4500H+B, 4500CL-E, 4500CN-E, 4500NH3-H, 4500NO3-F, 4500NO2-B, 4500P-E, 4500-S2-D, 5210B, 5220D, 2510B, 2540C, 4500F-C, 5310C, 5540C, LACHAT 10-204-00-1-A, LACHAT 10-107-06-2-D. Organic Parameters: SW-846 3510C, 5030B, 8260B, 8270C, 8330, EPA 624, 625, 608, SW-846 8082, 8081A, 8151A.)

Solid & Chemical Materials (Inorganic Parameters: SW-846 6010B, 7196A, 7471A, 1010, 1030, 9010, 9012A, 9014, 9030B, 9040B, 9045C, 9050C, 9065,1311, 1312, 3005A, 3050B. Organic Parameters: SW-846 3540C, 3546, 3580A, 5030B, 5035, 8260B, 8270C, 8330, 8151A, 8015B, 8082, 8081A.)

New Jersey Department of Environmental Protection Certificate/Lab ID: MA935. NELAP Accredited.

Drinking Water (Inorganic Parameters: SM9222B, 9221E, 9223B, 9215B, 4500CN-CE, 4500NO3-F, 4500F-C, EPA 300.0, 200.7, 200.8, 245.2, 2540C, SM2120B, 2320B, 2510B, 5310C, SM4500H-B. Organic Parameters: EPA 332, 504.1, 524.2.)

Non-Potable Water (Inorganic Parameters: SM5210B, EPA 410.4, SM5220D, 4500CI-E, EPA 300.0, SM2120B, SM4500F-BC, EPA 200.7, 351.1, LACHAT 10-107-06-2-D, EPA 353.2, SM4500NO3-F, 4500NO2-B, EPA 1664A, SM5310B, C or D, 4500-PE, EPA 420.1, SM510ABC, SM4500P-B5+E, 2540B, 2540C, 2540D, EPA 120.1, SM2510B, SM15 426C, 9222D, 9221B, 9221C, 9221E, 9222B, 9215B, 2310B, 2320B, 4500NH3-H, 4500-S D, EPA 350.1, 350.2, SW-846 1312, 6020, 7470A, 5540C, 4500H-B, EPA 200.8, SM3500Cr-D, 4500CN-CE, EPA 245.1, 245.2, SW-846 9040B, 3005A, EPA 6010B, 7196A, SW-846 9010B, 9030B. Organic Parameters: SW-846 8260B, 8270C, 8270C-SIM, 3510C, EPA 608, 624, 625, SW-846 3630C, 5030B, 8081A, 8082, 8151A, 8330, NJ OQA-QAM-025 Rev.7, NJ EPH.)

Solid & Chemical Materials (Inorganic Parameters: SW-846, 6010B, 7196A, 9010B, 9030B, 1010, 1030, 1311, 1312, 3005A, 3050B, 7471A, 9014, 9012A, 9040B, 9045C, 9050A, 9065. Organic Parameters: SW-846 8015B, 8081A, 8082, 8151A, 8330, 8260B, 8270C, 8270C-SIM, 3540C, 3545, 3546, 3550B, 3580A, 3630C, 5030B, 5035L, 5035H, NJ OQA-QAM-025 Rev.7, NJ EPH.)

New York Department of Health Certificate/Lab ID: 11148. NELAP Accredited.

Drinking Water (Inorganic Parameters: SM9223B, 9222B, 9215B, EPA 200.8, 200.7, 245.2, SM5310C, EPA 332.0, SM2320B, EPA 300.0, SM2120B, 4500CN-E, 4500F-C, 4500H-B, 4500NO3-F, 2540C, SM 2510B. Organic Parameters: EPA 524.2, 504.1.)

Non-Potable Water (Inorganic Parameters: SM9221E, 9222D, 9221B, 9222B, 9215B, 5210B, 5310C, EPA 410.4, SM5220D, 2310B-4a, 2320B, EPA 200.7, 300.0, SM4500CL-E, 4500F-C, SM15 426C, EPA 350.1, SM4500NH3-BH, EPA 351.1, LACHAT 10-107-06-2, EPA 353.2, LACHAT 10-107-04-1-C, SM4500-NO3-F, 4500-NO2-B, 4500P-E, 2540C, 2540B, 2540D, EPA 200.8, EPA 6010B, 6020, EPA 7196A, SM3500Cr-D, EPA 245.1, 245.2, 7470A, SM2120B, LACHAT 10-204-00-1-A, EPA 9040B, SM4500-HB, EPA 1664A, EPA 420.1, SM14 510C, EPA 120.1, SM2510B, SM4500S-D, SM5540C, EPA 3005A, 9010B, 9030B. Organic Parameters: EPA 624, 8260B, 8270C, 625, 608, 8081A, 8151A, 8330, 8082, EPA 3510C, 5030B.)

Solid & Hazardous Waste (Inorganic Parameters: 1010, 1030, EPA 6010B, 7196A, 7471A, 9012A, 9014, 9040B, 9045C, 9065, 9050, EPA 1311, 1312, 3005A, 3050B, 9010B, 9030B. Organic Parameters: EPA 8260B, 8270C, 8015B, 8081A, 8151A, 8330, 8082, 3540C, 3545, 3546, 3580, 5030B, 5035.)

North Carolina Department of the Environment and Natural Resources Certificate/Lab ID : 666. Organic Parameters: MA-EPH, MA-VPH.

Pennsylvania Department of Environmental Protection Certificate/Lab ID : 68-03671. NELAP Accredited.

Drinking Water (Organic Parameters: EPA 524.2)

Non-Potable Water (Inorganic Parameters: EPA 1312. Organic Parameters: EPA 3510C, 5030B, 625, 624, 608, 8081A, 8082, 8151A, 8260B, 8270C, 8330)

Solid & Hazardous Waste (Inorganic Parameters: EPA 350.1, 1010, 1030, 1311, 1312, 3050B, 6010B, 7196A, 7471A, 9010B, 9012A, 9014, 9040B, 9045C, 9050, 9065, SM 4500NH3-H. Organic Parameters: 3540C, 3545, 3546, 3550B,

3580A, 3630C, 5035, 8015B, 8081A, 8082, 8151A, 8260B, 8270C, 8330)

Rhode Island Department of Health Certificate/Lab ID: LAO00065. *NELAP Accredited via NY-DOH.*

Refer to MA-DEP Certificate for Potable and Non-Potable Water.

Refer to NJ-DEP Certificate for Potable and Non-Potable Water.

Texas Commission on Environmental Quality Certificate/Lab ID: T104704476-09-1. *NELAP Accredited.*

Non-Potable Water (Inorganic Parameters: EPA 120.1, 1664, 200.7, 200.8, 245.1, 245.2, 300.0, 350.1, 351.1, 353.2, 376.2, 410.4, 420.1, 6010, 6020, 7196, 7470, 9040, SM 2120B, 2310B, 2320B, 2510B, 2540B, 2540C, 2540D, 426C, 4500CL-E, 4500CN-E, 4500F-C, 4500H+B, 4500NH3-H, 4500NO2B, 4500P-E, 4500 S²⁻ D, 510C, 5210B, 5220D, 5310C, 5540C. Organic Parameters: EPA 608, 624, 625, 8081, 8082, 8151, 8260, 8270, 8330.)

Solid & Hazardous Waste (Inorganic Parameters: EPA 1311, 1312, 9012, 9014, 9040, 9045, 9050, 9065.)

Department of Defense Certificate/Lab ID: L2217.

Drinking Water (Inorganic Parameters: SM 4500H-B. Organic Parameters: EPA 524.2, 504.1.)

Non-Potable Water (Inorganic Parameters: EPA 200.7, 200.8, 6010B, 6020, 245.1, 245.2, 7470A, 9040B, 300.0, 332.0, 6860, 353.2, 410.4, 9060, 1664A, SM 4500CN-E, 4500H-B, 4500NO3-F, 5220D, 5310C, 2320B, 2540C, 3005A, 3015, 9010B, 9056. Organic Parameters: EPA 8260B, 8270C, 8330A, 625, 8082, 8081A, 3510C, 5030B, MassDEP EPH, MassDEP VPH.)

Solid & Hazardous Waste (Inorganic Parameters: EPA 200.7, 6010B, 7471A, 9010, 9012A, 6860, 1311, 1312, 3050B, 7196A, 9010B, 3500-CR-D, 4500CN-CE, 2540G, Organic Parameters: EPA 8260B, 8270C, 8330A/B-prep, 8082, 8081A, 3540C, 3546, 3580A, 5035A, MassDEP EPH, MassDEP VPH.)

Analytes Not Accredited by NELAP

Certification is not available by NELAP for the following analytes: **EPA 8260B:** Freon-113, 1,2,4,5-Tetramethylbenzene, 4-Ethyltoluene. **EPA 8330A:** PETN, Picric Acid, Nitroglycerine, 2,6-DANT, 2,4-DANT. **EPA 8270C:** Methyl naphthalene, Dimethyl naphthalene, Total Methyl naphthalenes, Total Dimethyl naphthalenes, 1,4-Diphenylhydrazine (Azobenzene). **EPA 625:** 4-Chloroaniline. **EPA 350.1** for Ammonia in a Soil matrix.

Certificate/Approval Program Summary

Last revised March 23, 2011 – Mansfield Facility

The following list includes only those analytes/methods for which certification/approval is currently held. For a complete listing of analytes for the referenced methods, please contact your Alpha Customer Service Representative.

Connecticut Department of Public Health Certificate/Lab ID: PH-0141.

Wastewater/Non-Potable Water (Inorganic Parameters: pH, Turbidity, Conductivity, Alkalinity, Aluminum, Antimony, Arsenic, Barium, Beryllium, Boron, Cadmium, Calcium, Chromium, Cobalt, Copper, Iron, Lead, Magnesium, Manganese, Mercury, Molybdenum, Nickel, Potassium, Selenium, Silver, Sodium, Strontium, Thallium, Tin, Vanadium, Zinc, Total Residue (Solids), Total Suspended Solids (non-filterable), Total Cyanide. Organic Parameters: PCBs, Organochlorine Pesticides, Technical Chlordane, Toxaphene, Acid Extractables, Benzidines, Phthalate Esters, Nitrosamines, Nitroaromatics & Isophorone, PAHs, Haloethers, Chlorinated Hydrocarbons, Volatile Organics.)

Solid Waste/Soil (Inorganic Parameters: pH, Aluminum, Antimony, Arsenic, Barium, Beryllium, Cadmium, Calcium, Chromium, Hexavalent Chromium, Cobalt, Copper, Iron, Lead, Magnesium, Manganese, Mercury, Molybdenum, Nickel, Potassium, Selenium, Silver, Sodium, Thallium, Vanadium, Zinc, Total Organic Carbon, Total Cyanide, Corrosivity, TCLP 1311. Organic Parameters: PCBs, Organochlorine Pesticides, Technical Chlordane, Toxaphene, Volatile Organics, Acid Extractables, Benzidines, Phthalates, Nitrosamines, Nitroaromatics & Cyclic Ketones, PAHs, Haloethers, Chlorinated Hydrocarbons.)

Florida Department of Health Certificate/Lab ID: E87814. *NELAP Accredited.*

Non-Potable Water (Inorganic Parameters: SM2320B, SM2540D, SM2540G.)

Solid & Chemical Materials (Inorganic Parameters: 6020, 7470, 7471, 9045. Organic Parameters: EPA 8260, 8270, 8082, 8081.)

Air & Emissions (EPA TO-15.)

Louisiana Department of Environmental Quality Certificate/Lab ID: 03090. *NELAP Accredited.*

Non-Potable Water (Inorganic Parameters: EPA 180.1, 245.7, 1631E, 3020, 6020A, 7470A, 9040, 9050A, SM2320B, 2540D, 2540G, 4500H-B, Organic Parameters: EPA 3510C, 3580A, 3630C, 3640A, 3660B, 3665A, 5030B, 8015D, 3570, 8081B, 8082A, 8260B, 8270C.)

Solid & Chemical Materials (Inorganic Parameters: EPA 1311, 3050, 3051A, 3060A, 6020A, 7196A, 7470A, 7471B, 7474, 9040B, 9045C, 9060. Organic Parameters: EPA 3540C, 3570B, 3580A, 3630C, 3640A, 3660, 3665A, 5035, 8015D, 8081B, 8082A, 8260B, 8270C.)

Biological Tissue (Inorganic Parameters: EPA 6020A. Organic Parameters: EPA 3570, 3510C, 3610B, 3630C, 3640A, 8270C.)

Air & Emissions (EPA TO-15.)

New Hampshire Department of Environmental Services Certificate/Lab ID: 2206. *NELAP Accredited.*

Non-Potable Water (Inorganic Parameters: EPA, 245.1, 245.7, 1631E, 180.1, 6020A, 7470A, 9040B, 9050A, SM2540D, 2540G, 4500H+B, 2320B. Organic Parameters: EPA 8081, 8082, 8260B, 8270C.)

Solid & Chemical Materials (Inorganic Parameters: SW-846 1311, 1312, 3050B, 3051A, 3060A, 6020A, 7470A, 7471A, 9040B, 9045C, 7196A. Organic Parameters: SW-846 3540C, 3580, 3630C, 3640A, 3660B, 3665A, 5035, 8260B, 8270C, 8015D, 8082, 8081A.)

New Jersey Department of Environmental Protection Certificate/Lab ID: MA015. *NELAP Accredited.*

MADEP MCP Response Action Analytical Report Certification

This form provides certifications for all samples performed by MCP methods. Please refer to the Sample Results and Container Information sections of this report for specification of MCP methods used for each analysis. The following questions pertain only to MCP Analytical Methods.

| An affirmative response to questions A through F is required for "Presumptive Certainty" status | | |
|--------------------------------------------------------------------------------------------------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----|
| A | Were all samples received in a condition consistent with those described on the Chain-of-Custody, properly preserved (including temperature) in the field or laboratory, and prepared/analyzed within method holding times? | YES |
| B | Were the analytical method(s) and all associated QC requirements specified in the selected CAM protocol(s) followed? | YES |
| C | Were all required corrective actions and analytical response actions specified in the selected CAM protocol(s) implemented for all identified performance standard non-conformances? | YES |
| D | Does the laboratory report comply with all the reporting requirements specified in CAM VII A, "Quality Assurance and Quality Control Guidelines for the Acquisition and Reporting of Analytical Data?" | YES |
| E a. | VPH, EPH, and APH Methods only: Was each method conducted without significant modification(s)? (Refer to the individual method(s) for a list of significant modifications). | YES |
| E b. | APH and TO-15 Methods only: Was the complete analyte list reported for each method? | N/A |
| F | Were all applicable CAM protocol QC and performance standard non-conformances identified and evaluated in a laboratory narrative (including all "No" responses to Questions A through E)? | YES |
| A response to questions G, H and I is required for "Presumptive Certainty" status | | |
| G | Were the reporting limits at or below all CAM reporting limits specified in the selected CAM protocol(s)? | NO |
| H | Were all QC performance standards specified in the CAM protocol(s) achieved? | NO |
| I | Were results reported for the complete analyte list specified in the selected CAM protocol(s)? | NO |
| For any questions answered "No", please refer to the case narrative section on the following page(s). | | |

Please note that sample matrix information is located in the Sample Results section of this report.

Project Name: SOUTH TERMINAL N. BEFORD
Project Number: 6690

Lab Number: L1106741
Report Date: 05/20/11

Case Narrative

The samples were received in accordance with the Chain of Custody and no significant deviations were encountered during the preparation or analysis unless otherwise noted. Sample Receipt, Container Information, and the Chain of Custody are located at the back of the report.

Results contained within this report relate only to the samples submitted under this Alpha Lab Number and meet all of the requirements of NELAC, for all NELAC accredited parameters. The data presented in this report is organized by parameter (i.e. VOC, SVOC, etc.). Sample specific Quality Control data (i.e. Surrogate Spike Recovery) is reported at the end of the target analyte list for each individual sample, followed by the Laboratory Batch Quality Control at the end of each parameter. If a sample was re-analyzed or re-extracted due to a required quality control corrective action and if both sets of data are reported, the Laboratory ID of the re-analysis or re-extraction is designated with an "R" or "RE", respectively. When multiple Batch Quality Control elements are reported (e.g. more than one LCS), the associated samples for each element are noted in the grey shaded header line of each data table. Any Laboratory Batch, Sample Specific % recovery or RPD value that is outside the listed Acceptance Criteria is bolded in the report. Definitions of all data qualifiers and acronyms used in this report are provided in the Glossary located at the back of the report.

Please see the associated ADEx data file for a comparison of laboratory reporting limits that were achieved with the regulatory Numerical Standards requested on the Chain of Custody.

For additional information, please contact Client Services at 800-624-9220.

MCP Related Narratives

Volatile Organics

L1106741-02 has elevated detection limits due to the dilution required by the elevated concentrations of target compounds in the sample.

In reference to question G:

One or more of the target analytes did not achieve the requested CAM reporting limits.

In reference to question H:

The WG468024-1/-2 LCS/LCSD recoveries, associated with L1106741-02 and -03, are above the individual acceptance criteria for Trichlorofluoromethane (LCS at 133%) and Isopropyl Ether (136%/134%), but within the overall method allowances. The results of the associated samples are reported; however, all positive detects are considered to have a potentially high bias for these compounds.

Project Name: SOUTH TERMINAL N. BEFORD
Project Number: 6690

Lab Number: L1106741
Report Date: 05/20/11

Case Narrative (continued)

The WG468024-1/-2 LCS/LCSD recoveries, associated with L1106741-02 and -03, are below the acceptance criteria for Dichlorodifluoromethane (61%/57%); however, it has been identified as a "difficult" analyte and is within the 40-160% acceptance limits. The results of the associated samples are reported; however, all results are considered to have a potentially low bias for this compound.

The WG468384-1/-2 LCS/LCSD recoveries, associated with L1106741-01, are below the acceptance criteria for Dichlorodifluoromethane (54%/51%); however, it has been identified as a "difficult" analyte and is within the 40-160% acceptance limits. The results of the associated sample are reported; however, all results are considered to have a potentially low bias for this compound.

The initial calibration, associated with L1106741-01, -02 and -03, did not meet the method required minimum response factors on the lowest calibration standards for 1,4-Dioxane (0.00392), as well as the average response factor for Chloroethane and 1,4-Dioxane.

The continuing calibration standards, associated with L1106741-01, -02 and -03, are outside the acceptance criteria for several compounds; however, they are within overall method allowances. Copies of the continuing calibration standards are included as an addendum to this report.

Semivolatile Organics

L1106741-02 has elevated detection limits due to the dilution required by the elevated concentrations of target compounds in the sample.

In reference to question G:

L1106741-02: One or more of the target analytes did not achieve the requested CAM reporting limits.

In reference to question H:

The WG467953-2/-3 LCS/LCSD recoveries, associated with L1106741-01, -02 and -03, are below the individual acceptance criteria for Aniline (14%/19%) and 4-Chloroaniline (25%/32%), but within the overall method allowances. The results of the associated samples are reported; however, all results are considered to have a potentially low bias for these compounds.

The WG467953-2/-3 LCS/LCSD RPD, associated with L1106741-01, -02 and -03, is above the acceptance criteria for 3,3'-Dichlorobenzidine (33%); however, the individual LCS/LCSD recoveries are within method limits.
