Subject: RE: Report on Acoustic Model

Hi Phil,

We have been running around like crazy people trying to get everything done, so sorry for the delay in getting this to you.

Attached please find the final acoustic modeling report, which includes the details for the model, assumptions, how the model works, etc, as you requested.

As you know, the results of the acoustic modeling were previously included in the Biological Assessment report, which was forwarded to EPA on October 22nd.

Thanks,

Subject: Report on Acoustic Model

Chet,

I was just wondering if you had received and was able to share any report that you might have received that provides the details on the acoustic model. What assumptions were made and the details of how the model works. We have been citing the results, with the big caveat that we haven't had an opportunity to review the model. Not sure that we will even have time to do that, but it probably would be helpful for NMFS to have the same information.

Thanks
Phil
