**Subject:** RE: South Terminal Project in New Bedford - Potential meeting with EPA to discuss the REVISED Successional Marsh Mitigation Plans (UNCLASSIFIED)  
**Date:** Wednesday, August 08, 2012 5:28:55 PM

---

Thanks Paul,

Has EPA resolved its position as to whether or not it accepts the wetland delineations submitted to EPA to date, conducted by the Commonwealth's third-party wetland scientists?

The Commonwealth would like this issue resolved so it can focus on the appropriate quantity of mitigation necessary, particularly if EPA is not satisfied with the REVISED design for the Successional Marsh Mitigation project and the Commonwealth needs to locate other mitigation sites.

Caveats: NONE

Chet, Jay, and Gary:

The EPA South Terminal Team is interested in scheduling a time to meet with the Commonwealth and Apex to discuss the REVISED design for the Successional Marsh Mitigation work associated with the South Terminal Project. The EPA wants to get a better idea if the necessary salt marsh (and possibly the freshwater wetland) mitigation can still be accomplished at the Successional Marsh Mitigation site.

Please let Ann Williams and I know if you would be available to meet next Tuesday, August 14th at 1:00 p.m. at the EPA offices to discuss this issue. Thanks.
