Subject: RE: South Terminal

We had always thought that our decision on the state's request for both additional dredging and blasting would be contained in a modification to the 11/19/12 Final Determination. We only sent a separate letter on site control because you indicated the urgency of receiving our early determination on that issue in order to allow construction to proceed. Both of these issues were the subjects of our previous consultation with NMFS and as we explained, we are required to re-initiate consultation before any changes could be approved in the modification to the FD. We have held up our re-initiation letter to NMFS at your request to allow for a meeting on blasting. We are prepared to send our letter once we've had time to digest the information from that meeting.

Subject: Re: Hall Radio Tower Options

Sorry...one more ask. Can you let us know the status of EPA sending you a letter regarding 200 feet to north and 50 foot width.
