**Subject:** RE: Weekly monitoring and maintenance report on FDS

Good Evening Cindy, Dave and Paul,

It was just brought to my attention that there is a confusing entry in the 6th week's FDS monitoring report that warrants explanation. Please note that on page four of the document under the heading "Results of Inspection (CAD Cell Area):" the box "None Encountered" is checked for "2. Fin Fish Observations", but just below that entry 1 school is noted. This apparent discrepancy is the result of a sonar return without a corroborating diver or video detection of the sonar identified "fish" on the same monitoring survey transect. If this occurs in the future, a note will be included in the Monitoring Survey Form to clarify. Please be aware that if there had been three of these sonar returns during the monitoring survey, that Fish Exclusion Efforts would have been initiated in accordance with the Fish Deterrent Plan.

Thank you for your time.

Sincerely,  
Greg Dolan
