I looked over the latest Fish monitoring reports and had one comments o the May 8 to 14 Report.

Form FDS-FIF-02, 4. Last sentence, "All fish viewed were than 2 inches in size." Change to "All fish viewed were less than 2 inches in size."

Subject: Weekly Monitoring and Maintenance Report on the FDS

Dear Cindy, Dave and Paul,

Please find attached to this message the seventeenth, eighteenth, and nineteenth weekly reports on the Fish Deterrent System. I again apologize for the delay in organizing and transmitting the attached reports.

Please note that during the week eighteen monitoring survey, three flat fish were encountered in the CAD Cell Fish Exclusion Area. Fish Exclusion efforts were undertaken in accordance with the Fish Deterrent Plan, and a subsequent monitoring survey was conducted. During the second monitoring survey, flat fish were again encountered, and a second Exclusion Effort was undertaken. The entire CAD Cell Fish Exclusion area was covered again by the Exclusion Efforts, but a focused effort was directed to the area of the transect in which the monitoring survey had identified flat fish. The third monitoring survey found the CAD Cell Fish Exclusion Area to be free of flat fish. The eighteenth week provided the first opportunity to date to proof test of the efficacy of the "Fish Startle System" and of the Exclusion Efforts prescribed in the Fish Deterrent Plan. The results indicate that the program as designed and as it is currently operated is successful.

If you have any questions, please do not hesitate to contact us.

Sincerely,
Greg Dolan
