Chet,

Been kicking this around with some colleagues. Is there any potential to use the area around Fish Island? I don't know how much navigation occurs on the west side of the island and the shoreline, but that seems like a natural chokepoint. If one could use the island and prevent them from making their passage on the west side they may follow the channel the rest of the way. The good thing is that by the time this happens, hopefully the peak of the outward migration will have already passed.

Phil

Hi Phil,

Attached are a few locations that we could place curtains at a 45 degree angle to shore to help encourage fish to migrate toward the center of the Harbor.

We are trying to avoid blocking navigational traffic and/or putting structures into the Federal Channel and/or Federal Turning Basin.

Give me a call after you get a chance to look at this and we can discuss.

Thanks,
