Anne et al.,

I talked to Chet and he was very good. He thinks that his client would be amenable, but will need to check in with him. They were hoping to have a call with us tomorrow on the early side (8:00 AM to 9:00). The point of that call was hoping to convince us of why September 15 would be protective of fisheries. This afternoon's discussion may have turned that discussion on its head. I also spoke to Greg Dolan about the 5 schools versus 3 individual fish question. The 10 fish were seen by a diver, not by a fish finder. He agrees that there should be some consideration of 1 large school or a few moderate schools versus the number 5. He'll get back to me and I will forward his answer.

Phil
