Re: New Bedford Harbor Sampling Data

Dear Mr. Bering:

I am filing this request to obtain all hydrographic data including salinity, temperature, and other field measurements that were collected during Batelle's 1984-1985 cruises as part of EPA's remedial investigation of the Acushnet River Estuary and New Bedford Harbor. This information is part of the database maintained by Batelle Duxbury. In addition, I request current meter measurements taken in the Acushnet River and New Bedford Harbor which would provide inputs into the Batelle Northwest model and thus would be maintained by its program manager, Jerry Miller.

If you have problems with this request, please call me. Note that this request is submitted on behalf of Federal Pacific Electric and, therefore, I would request that you communicate directly with me about it.

Thank you for your assistance.

Sincerely,

*Leslie Ritts*  
Leslie S. Ritts
