Dear Charlie:

Kate Mueller from Rizzo Associates was at the laboratory on October 3, 4 and 5. She brought a Xerox machine and a person from Xerox on site and copied documents related to our work in New Bedford Harbor. She requested and I provided paperwork (chromatograms, computer printouts and Chain of Custody Forms) related to the measurement of PCBs in monitoring samples (Task 2) taken as part of the Pilot Dredging Project.

Sincerely yours,

Rich Pruell
Research Chemist
