Re: Technical data concerning PCB analyses

Dear Mr. Bering:

In order to facilitate defendant's continued analysis of EPA's technical data generated during its New Bedford Harbor investigations to date, I would request you to make available all of the original gas chromatograms for any PCB sampling done in the upper estuary or any other part of the New Bedford Harbor.

Please call me if you have any questions with respect to this matter. Thank you for your assistance.

Very truly yours,

Mary K. Ryan
