Evan M. Slavitt, Esquire
Assistant United States Attorney
1107 John W. McCormack POCH
Boston, Massachusetts 02109

Dear Evan:

This is to confirm my request to you for data from Battelle. Specifically, I requested the ion chromatograms for the TETRA and PENTA isomers contained in their sampling data submitted as part of the plaintiffs' requests. It is my belief that it is possible for Battelle to generate this information from its computerized data base. You said you would check on it and get back to me.

In addition, I would request that you furnish the current meter and drifter data noted in your new Requests #5793-5796. It would be most convenient if this data were provided in computer tape format; 9-track computer tape specification:

- DENSITY - 1600 BPI
- FORMAT - A) if generated on a VAX computer from Files 11-disk files, use BACKUP utility, enclose copy of log of BACKUP run.
- B) if generated on a PRIME computer, use MAGSAV utility and include log of MAGSAV run.
- C) if neither of the above, send flat file ASCII data in fixed blocked format with blocksize of less than 4,000 bytes.

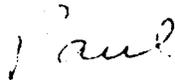

Evan M. Slavitt, Esquire

-2-

December 7, 1986

I would appreciate it if you could obtain the foregoing information for me as soon as possible.

Very truly yours,

A handwritten signature in cursive script, appearing to read "Paul".
