Re: United States v. AVX, Inc.,

Dear Mr. Allshouse:

In response to your request of March 8, 1988, I have enclosed the following documents from Battelle Laboratories:

- Item 1: Biota lookup table  
sample tracking information for ETR numbers 9151 thru 9156
- Item 2: Laboratory sample identification logs  
sample tracking information for the remaining biota ETR numbers
- Item 3: Sediment lookup table  
sample tracking information for ETR numbers 9049, 9051 9052, and 9507  
Please note that ETR 9050 is included in 9051
- Item 4: Laboratory sample identification logs  
Sample tracking information for ETR numbers 9506 and 9250
- Item 5: SAS #2476A ETR 9250 data package  
copy of original raw data

The data in package SAS #2476A SAIC have the Battelle sample designator written in the top right hand corner beneath the sample number box.

The samples in the following batches were prepared at Battelle and analyzed by SAIC:

- Batch 042 A & B
- Batch 043
- Batch 077

Batch 010  
Batch 012  
Batch 008

The analytical data for these samples are found in the SAS #2476A SAIC data package. The only analytical data in the Battelle folders was the sample weight information.

Yours sincerely,

Charles Bering  
Assistant Regional Counsel
