**Subject:** RE: Pile Driving Pilot Test

Wednesday at 9am works for me

**From:** Michael Stover [mailto:Stover.Michael@epamail.epa.gov]

**Sent:** Monday, August 01, 2011 1:39 PM

**To:** bettina@wampanoagtribe.net; Chuckie Green

**Subject:** Fw: Pile Driving Pilot Test

Bettina/Chuckie,

Gary is available only early tomorrow and Wednesday.... assuming that early tomorrow does not work for Bettina, does Wednesday at 9am work?

**Subject:** Re: FW: Pile Driving Pilot Test

Gary,

Chuckie Green, Bettina Washington and I would like to set up a conference call to discuss this activity and to confirm the tentative meeting this Friday at 10:30. I understand that you will be out of the office for the remainder of the afternoon. Please let me know of your availability tomorrow afternoon to participate in a conference call. Once we have a firm time, I will set up a conference line for the call and will relay the call-in number.

Thank you,

**To:** Davis, Gary (ENV)  
**Subject:** RE: Pile Driving Pilot Test

Hi Gary,

The pile-driving will take place along the eastern face of the proposed facility, which, even at the southern-most edge of the bulkhead, is still between 250 and 300 feet from the nearest boundary of either Paleosol (see attached figure).

During the driving process, the barge will be located to the east of the driving operation, such that it should be located further away than the test pile (which, as stated earlier, will already be between 250 and 300 feet from the nearest boundary of a paleosol, at its closest).

The sheets will be driven and removed. The sheets are shaped in a Z, are approximately 1.5 feet wide and approximately  $\frac{1}{2}$  in thickness, and are 30-40 feet in length.

At present, we anticipate driving 5 sheets in 5 separate locations. The sheets will be driven, and then removed. We anticipate that they will slip into the subsurface without

causing a major disturbance, and that they will similarly be removed without any major disturbance.

The purpose of the pilot test is to generate a higher degree of certainty regarding the anticipated penetration of the sheets during construction.

Thanks,

Chet Myers, PE, LSP
