Hello all,

We will meet in the **Redfield building in Room 214, Tuesday, July 3rd at 9am**. I have the room reserved for three hours. The building is right near the Woods Hole ferry dock; see attached map, and we will see you there. My cell phone number is 857-829-8217 if you need to contact me.

Thanks!

Hello Bettina, Ramona and Gary,

I have been able to work out a time to meet and discuss the January 18th 2012 report and discuss other topics of interest. We will plan on meeting on next **Tuesday, July 3rd at 9:00 am** in Woods Hole. I am working with NOAA to reserve a conference room on their compound, and I will forward you the information as soon as I receive the confirmation. Please be sure to bring along your copy of the report.

Thank you for sending along the information below, Gary.

Mike Stover

Subject: RE: reports of August boring/pile driving and October 2011 vibracores

Hi Gary,

We have not provided reports for the collection of that information either because the final report was engineering in nature and did not provide any relevant permitting or archeological assessment value, or because no final product associated with the activity was necessary, and therefore, there was no product to forward to EPA:

1). The pile-driving pilot test information was conducted to collect additional engineering information and was not intended to provide any relevant information with regard to permitting or assessment of archeological resources. No samples were collected during this activity. The tribes were alerted and onsite so they could observe the proceedings.

2). The borings collected in August 2011 were completed to collect additional samples for geotechnical analysis and were collected in the same location as previous borings had been collected; as a result, there was no need to re-catalog the soils. The tribes were alerted and onsite so they could observe the proceedings.

3). The vibracores in October 2011 were completed to collect additional samples for environmental analysis, and were also collected in the same location as previous vibracores has been collected; as a result, there was no need to re-catalog the soils. Again, the tribes were alerted and onsite so they could observe the proceedings.

Subject: reports of August boring/pile driving and October 2011 vibracores

Hello Gary,

Have any reports been produced on the findings of the August 2011 boring operations followed by the pile-driving pilot test.... as well as the October 2011 additional vibracore borings? I did not see it in the report appendixes or in any separate mailings or emails. If you like, I can communicate directly with Chet Meyers.

Thank you,

Mike Stover
