Subject: Fw: Additional Analytical Data - Federal Channel and Re-Aligned Channel

Here's PCB data through potential dredge areas. I don't have all project people, so forward to whomever you think needs to see this.

Subject: Additional Analytical Data - Federal Channel and Re-Aligned Channel

Hi Kim,

Attached please find additional EPA sampling data, combined with the existing sampling data for the New Bedford Marine Commerce Terminal project.

As you know, we are currently unsure if the Federal Channel portion of the dredging will need to be addressed. Therefore, we tabulated the data separately from the channel and boat basin data. We have created volumetric-based average concentrations, similar to that produced for the CAD Cell #3 drawing and the Stormwater Drainage Swale Drawing we delivered to you last week.

We realize that we had discussed that there is USACE data in these locations as well, which is true; however, the nature of the data (which was composited), made it difficult to combine in an apples-to-apples basis with the other available data. We can add it at a later date, but we wanted to get this to you now.

Please contact me with any questions.
