Subject: Fw: 2009 Draft LTM-V Report

Ann,

I've attached a spreadsheet where I've summarized the PCB,, toxicity and metals data for the four sampling locations in the vicinity of the SER and dredging areas. The 2009 data does not include metals or toxicity because they have stopped sampling them. It would be helpful to get the PCB data. That said, the sediment samples were only from the top 2 centimeters of sediment. So the core sediment sampling that is planned will be more revealing as to the actual characteristics of the dredged sediment.

According to the SER report, the plan is to use specific procedures (developed for the New Bedford Superfund Site) to monitor and minimize turbidity during the construction of the CDF and CAD cell. The procedures, intended to meet the anti-degradation provisions of the MA WQS, are included as Appendix 25 in the SER report. I don't have the Weaver's Cove report handy, but I don't recall such procedures being proposed there. I'll bring Appendix 25 with me to the meeting.

See you at 2:30

Ellen

Dave -- can you please forward the appendices, which have the station-specific data?

Thanks,

Ann

Matt - here is the DRAFT 2009 LTM V report as discussed previously. Since it is draft, please do not distribute outside of the agency.

Dave
