Delivered Date: 10/30/2012 06:32 PM EST

Subject: RE: FW: Additional Questions/Comments/Plans

Hi Cindy,

One more clarification. Contaminated material to be dredged includes the material that is to be disposed of within CAD Cell #2 and the material that is to be disposed of within CAD Cell #3. It is more than just the "Top of Dredge" material.

You can see the totals to be disposed in the two rows of the Appendix S table (Disposal at CAD Cell #2 and Disposal at CAD Cell #3).

We can discuss if you require further clarification.

Thanks,

Chet Myers

Hi Cindy,

Attached please find the updated Appendix S from the June 18, 2012 submission to EPA.

Please note that all of the volumes in the table are engineering estimates only.

Please note that a number of the estimated volumes have changed based on minor changes to the design and changes in the ultimate destination for some of the material that have taken place since the Draft Determination was issued.

These include: removal of the Stormwater Drainage Swale Mitigation Area, refinement of the easement areas, and some refinements on the estimates of volumes that would be generated from the potential expansions. Some of the refinements have resulted in a slight increase in the total volumetric number for the project. If you wish to discuss the source of these changes, we would be more than happy to explain.

As requested, we have broken out the individual expansion items, including the expansions to the north and south, the channel width expansion and the maintenance dredging in the Federal Channel and have shaded those for your reference.

Thanks,

Chet Myers

Chet,

Thanks, this looks like what we needed.

Can I add one more request: Could you update Appendix S to the June 18, 2012 submittal. When you are updating, could you either add another column or add a footnote explaining how many cubic yards are associated with each of the additional work tasks of deep draft dredging, expanded channel width, and larger CAD. Once updated, should I assume that the figure in the column entitled, "Top of Dredge" is the total amount of contaminated sediments to be dredged?

Hi Cindy,

Attached is an updated A2 Configuration with the land areas on each property as you requested.

We are working on the other drawing as well.

Thanks,

Chet Myers
