Subject: Clarification of EPA comments on ISCP for River's End Park

Hi Chet - Just a point of clarification on the comments we sent on November 7, 2012, regarding the Invasive Species Management Plan for the River's End Park mitigation project. Item 4 (on page 1) references language from the October version of the Mitigation Plan, which indicated that the City of New Bedford would be responsible for long term maintenance of the River's End Park mitigation area. EPA understands that the Plan has been modified such that the Commonwealth will be responsible for long term maintenance of the River's End Park mitigation project, and we support this approach.

Hope this clears up any potential confusion.

Thanks,

Mike
