Subject: RE: Are you interested in a 1:00 p.m. meeting next Tuesday? (UNCLASSIFIED)

Hi Paul,

Even if the re-designed Stormwater Drainage Swale Mitigation Area does not (as previously anticipated) mitigate for all of the impacts incurred by the project, it is not clear that all portions of the Stormwater Drainage Swale Mitigation Area should be dropped completely. A portion of the Stormwater Drainage Swale Mitigation Area could remain and compensate for some of the impacts incurred by the project.

However, if USACE has engineering concerns about every portion of the Stormwater Drainage Swale Mitigation Area (even with the re-designed project, which is intended to eliminate USACE engineering concerns), then it may be prudent to eliminate the Stormwater Drainage Swale Mitigation Area. It is not clear that a meeting with only USEPA would be able to answer this question.

Classification: UNCLASSIFIED
Caveats: NONE

Chet:

We were looking to have the Successional Marsh Mitigation discussion at 1:00 p.m. rather than 3:00 p.m., because we already have a full agenda for the 3:00

p.m. meeting.

The 1:00 p.m. meeting was proposed to be only with the EPA - South Terminal Team (including me) and Commonwealth/Apex. EPA wants to get a better idea if the design for the Successional Marsh Mitigation work can be modified to avoid impacts to existing salt marsh areas and there would still be adequate space to create/restore adequate salt marsh (and possibly freshwater wetland) mitigation. We figured if there is not adequate space to at least complete the salt marsh mitigation requirements that the Successional Marsh Mitigation work should be dropped completely. Therefore, the engineering discussion with the Corps Levee Safety Office personnel can wait.

With this information in mind, please confirm if Apex is willing to take part in a 1:00 meeting next Tuesday. Thanks.

Subject: Tuesday Meeting

Hi Paul,

We heard back from Gary Davis, and it sounds like he won't be able to meet at 1 pm on Tuesday, and he suggested that we discuss the Stormwater Drainage Swale Mitigation Area at our 3 pm meeting instead.

Just to check, was the 1 pm meeting going to involve USACE personnel? We felt it was important to discuss the engineering aspects of the mitigation measure with USACE (i.e. maintaining the hydraulic nature of the drainage swale) before discussing the environmental aspects with EPA. We had put the USACE meeting off because EPA had indicated that they wanted to attend, but it wasn't clear if the 1 pm meeting would involve USACE personnel or was just an EPA meeting.

Thanks,
