

Hi Phil,

Enclosed please find the updated Fish Deterrent Plan with the changes to Figure 2 as well as updated information regarding the transects for the monitoring.

This document should replace the Commonwealth's October 17, 2012 submission to EPA.

Please contact us with any additional questions.

Thanks,

Subject: Re: Fish Deterrent Plan and Confirmation on Easement Parcels

Chet,

Just 2 quick comments on the Fish Deterrent Plan.

1. Figure 2 should include a depiction of where the Fish Weir Nets will be placed.

2. The monitoring plan makes reference to 1200 foot transects parallel to the shoreline, with their starting points randomly selected. This selection process needs to be more completely articulated. It appears that the project area is being gridded off and random numbers assigned to each square. Transects will then occur in each randomly selected square. Thus, the squares are 1200 feet in length? More detail on this process is needed and perhaps a figure depicting the grid and a hypothetical transect line.

Phil

Subject: Information on Non-Blasting Alternatives

Hi Ann and Carl,

Attached please find the information that EPA requested regarding non-blasting alternatives.

Additionally, responses associated with the timing of the Marsh Island project and the destination of dredged CDF material are attached.

Thanks,

Chet Myers

Subject: RE: Draft Final Mitigation Plan

Hi Ann and Carl,

Did the Commonwealth ever submit this letter to EPA? Carl asked for it in his 9/19/12 e-mail to the Commonwealth. It's the "cross-walk" table that NHPA requested. The letter is dated September 24th. I suspect it was submitted previously by Jay, since the NHPA letter went out on 10/1, but he is currently out of the office so I cannot confirm, and I have been busy on other items so I know that I did not submit it myself and I may not have been copied on its submission to EPA.

Carl's 9/19/12 email did not specify a due date for this item, but I believe we were trying to get it into EPA as soon as possible. If we have previously submitted this letter, please disregard.

Thanks,

Chet Myers

Subject: Draft Final Mitigation Plan

Carl and Ann,

Attached please find the text for the Draft Final Mitigation Plan.

There are figures and appendices to go with it, but we were unable to finalize the report in time to hand deliver CDs with that material on them, and the figures and appendices are large, unfortunately.

Please note that the design of the River's End Park Mitigation Project is not complete. A conceptual plan is included in the appendices, a 90% design area estimate and estimate of proportional mitigation ratio is included in the document. Therefore, some of the numbers that still have some uncertainty (for example, the final area of that mitigation project) are highlighted in yellow and a range is given.

In addition, there are references to the final plans that we have not yet received. A resource delineation for that project is currently underway, and will be forwarded upon completion (the incomplete resource delineation is the source of uncertainty regarding the final area of the River's End Mitigation Project).

Unless someone is working on Monday (we will be working), we will deliver 10 CDs of the completed Draft Final Mitigation Plan to EPA on Tuesday morning.

Thanks,

Chet Myers
