Superfund Technical Assessment and Response Team
3 Riverside Drive
Andover, Massachusetts 01810

February 2008

INTRODUCTION

This document is the Index to the Administrative Record File for the second Nuclear Metals, Inc., Site Time-Critical Removal Action. The Index cites site-specific documents and guidance documents used by U.S. Environmental Protection Agency (EPA) staff in selecting a removal action at the site. Activities conducted under the second EPA Fund-lead removal action will protect public health, welfare, and the environment. EPA will conduct the removal and disposal of hazardous materials from the site, including the following: flammable liquids; compressed gas cylinders; toxic compressed gas cylinders; caustic materials; flammable metal powders; and other hazardous materials. Hazardous materials will be shipped off site for disposal at appropriately licensed disposal facilities including, if required, licensed radioactive waste disposal facilities. If cost-effective, the radiation-contaminated containers will be decontaminated on site prior to off-site disposal. Furthermore, if the site is vacated by Starmet Corporation (Starmet) prior to, or during performance of, this removal action, EPA will secure the site to prevent unauthorized access. Security will be provided during non-working hours to ensure adequate site surveillance until the waste to be removed as part of this removal action is transported off site. In the event that stabilized materials require an extended period of storage before off-site disposal, EPA may request that the Massachusetts Department of Health (MassDPH) provide site security, which they have agreed to do if needed and if funding is available.

The Administrative Record File is available for public review, by appointment, at the U.S. EPA Records Center, One Congress Street, Suite 1100, Boston, Massachusetts, 02114-2023; and at the Concord Free Public Library, 129 Main Street, Concord, Massachusetts, 01742. Questions concerning the Administrative Record File should be addressed to Athanasios Hatzopoulos, EPA On-Scene Coordinator.

The Administrative Record File is required by the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA), 42 U.S.C. § 9613 (k), and EPA's implementing regulations, 40 CFR § 300.800.-825.

PLEASE NOTE: THE FOLLOWING DOCUMENTS COMPILED IN THIS ADMINISTRATIVE RECORD FILE HAVE BEEN MADE FROM THE BEST AVAILABLE COPIES.

SITE-SPECIFIC DOCUMENTS

ADMINISTRATIVE RECORD FILE INDEX for the Nuclear Metals, Inc., Site Removal Action

REMOVAL

Correspondence (Site File 2.01)
