Regulation 1. Introduction

The purpose of the “Regulations for Prevention And/or Abatement of Air Pollution Episode and Air Pollution Incident Emergencies” is to prevent ambient air contaminant concentrations at any location in the Commonwealth from reaching levels which would constitute imminent and substantial endangerment to the health of persons. The levels which would constitute imminent and substantial endangerment to the health of persons as have been defined by the Administrator of the Environmental Protection Agency are set forth in the table below:

**CONTAMINANT CONCENTRATION LEVELS**

Prescribed by the EPA Administrator as would cause Imminent  
and Substantial Endangerment to Health

Contaminant	Ambient Air Contaminant Concentration Levels				
	Ave. ugm/M <sup>3</sup>	ppm	COHs	Duration	Product
Sulfur Dioxide (SO <sub>2</sub> )	2,620	1.0		24-hr.	
Particulate Matter					
Hi-Vol (TSP)	1,000			24-hr.
