Pursuant to the Provisions
of Section 39-116 of the Idaho Code,
and the Rules and Regulations for the Control of Air Pollution in Idaho,

POTLATCH CORPORATION - PULP & PAPER UNIT
Permittee, including affiliates, if any

P.O. BOX 1016
Located at
LEWISTON, IDAHO

is hereby granted permission to operate the Air Pollution Source(s) and Control Equipment specified herein provided the emission limitations, monitoring requirements and other conditions set forth in the Source Permit(s) are complied with.

Issued July 5, 1979
Expiration January 1, 1984
POTLATCH CORPORATION
PULP & PAPER UNIT

located at LEWISTON, IDAHO

is hereby granted permission to operate the following air pollution
source or control equipment: THEIR FOSSIL FIRED POWER BOILERS NO.
1, 2 AND 3 WITH ASSOCIATED BREECHINGS AND STACKS.

PART II GENERAL PROVISIONS

A All emissions authorized herein shall be consistent with the terms and conditions of this permit. The emission of any pollutant identified in this permit in excess of that authorized, or non-compliance with any other condition or limitation contained in this permit, shall constitute a violation of this permit and the Rules and Regulations for the Control of Air Pollution in Idaho, and the Environmental Protection and Health Act, Idaho Code 39-101 et seq.

B The permittee shall at all times (except as provided by breakdowns as defined in the Rules and Regulations for the Control of Air Pollution in Idaho) maintain in good working order and operate as efficiently as practicable, all treatment or control facilities or systems installed or used to achieve compliance with the terms and conditions of this permit and other applicable laws.

C The permittee shall allow the Director, and/or his authorized representative(s), upon the presentation of credentials:

1) To enter upon the permittee's premises where an emission source is located, or in which any records are required to be kept under the terms and conditions of this permit; and
2: at reasonable times to have access to and copy any records required to be kept under the terms and conditions of this permit; to inspect any monitoring equipment or monitoring method required in this permit, and to sample any emission of pollutants.

D Except for data determined to be confidential under section 39-111, Idaho Code, all reports prepared in accordance with the terms of this permit shall be available for public inspection at the appropriate regional office of the Division of Environment.

E Nothing in this permit shall be construed to preclude institution of any legal action or relieve the permittee from any responsibilities, liabilities, or penalties established pursuant to any applicable federal, state, or local law or regulation.

F In the event of any change in control or ownership of source(s) from which the authorized emissions emanate, the permittee shall notify the succeeding owner or controller of the existence of this permit by letter, a copy of which shall be forwarded to the Director.
The provisions of this permit are severable, and if any provision of this permit to any circumstance is held invalid, the application of such provision to other circumstances, and the remainder of this permit shall not be affected thereby.

Until the expiration date, this permit shall be renewable annually, provided the permittee submits any and all information required by the Director to assess the air pollution impact of the equipment for which the permit is granted. Failure to submit such information within sixty (60) days after receipt of the Director's request shall cause the permit to be voided.

The Department may require the permittee to develop an Operational and Maintenance Manual which must be approved by the Director. Such Manual shall become a part of this permit by reference, and failure to comply with the terms of the Manual shall constitute a violation of this permit.

The permittee shall provide the appropriate regional office a minimum of five (5) days notice prior to conducting any compliance tests required pursuant to this permit. Any records or data generated as a result of such compliance tests shall be made available to the Department upon request.
APPENDIX A

1) **Submit a Quarterly Report of Testing Results with All Values Exceeding Limits Specified in This Permit Summarized with Corrective Procedures Taken for Each Occurrence. Report Shall Be Submitted Each Calendar Quarter Following an Equivalent of Over 30 Days of Operation.**

2) **Submit a Copy of Operating and Maintenance Procedures Relating to: Pressure Drop Across Scrubber, Water Recycle Rate, Solids Content of Recycle Scrubber Water and Water Make-up Rate or Other Parameters to Assure Optimal Scrubber Efficiency.**

3) **Submit a Semi-Annual Report of Maintenance Activities Pursuant to Item 2.**
Potlatch Corporation
Pulp and Paper Unit

SOURCE PERMIT NO. 13-1183-00

1) The permittee maintaining a differential pressure across the Venturi Scrubber of at least 18 inches of water, and a maximum solids level in the scrubbing solution of 7%.

2) The permittee install a "flooded elbow" just prior to the scrubbing tank on #1 Lime Kiln, said flooded elbow to be completed and operating by January 15, 1980.

3) The permittee shall comply with the following emission limits if, by July 1, 1981, it can be shown that they can be consistently met:
