Subject: Amendment 2 to Phase I IPWP for Rainier Commons

Hello Vered-

As discussed today, I am approving a modification to the Amendment to the RBDA for PCB Bulk Product Waste at Rainier Commons, dated June 24, 2014. The modification is to remove condition 2 of the Amendment which required particulate measurements to be based on PM-10 criteria. Instead, EPA requests that you remove the PM-10 filter from the dust monitoring equipment for future analysis.

Please acknowledge receipt of this modification by replying to this e-mail.

Sincerely,

Michelle Mullin

PCB Coordinator
